The Amazing son in law Chapter 8064

After spending two days in the Antarctic ice sheet with Lin Wan'er (Alani), charlie wade decided to travel to the United States with her again.

After making the decision, he told Yun Rugo and Song Ruyu, "Wan'er and I plan to leave for a while. You two stay here and focus on your training. We'll return before the shipping resumes, before the research teams and tourists land, and leave Antarctica with you."

Song Ruyu asked in surprise, "Mr. wade, where are you and Miss Lin going? Antarctica is so cold. Last time you were gone for ten days to half a month, and this time it might be even longer. Aren't the conditions too harsh?"

Yun Rugo quickly gave her a wink and smiled, saying, "Ruyu, don't worry about Mr. wade." "Well, Mr. wade's cultivation is so high, dealing with the Antarctic climate is naturally no problem for him. Miss Lin, you don't need to worry either. Although Miss Lin is not a cultivator, she feels like a gentle breeze in the bitter cold, unlike you and me who have to constantly expend spiritual energy to protect ourselves."

Song Ruyu stuck out her tongue and smiled, "Sister Ruge is right!"

In fact, both of them knew that charlie wade could stay away for a long time in the vast ice field shrouded in polar night, which meant that he and Lin Wan'er (Alani) must have another place to stay. However, since charlie wade did not choose to say it, they wisely did not ask.

So, charlie wade and Lin Wan'er (Alani) said goodbye to the two of them again and drove the snowmobile to the underground city.

Just like when they came, the two held hands almost the entire time, without any overly intimate gestures, just using holding hands to feel and confirm each other's real presence.

In the past few days, charlie wade had hardly let go of Lin Wan'er (Alani)'s hand except when he was sleeping, and Lin Wan'er (Alani) was the same. She was not only being held by charlie wade, but more often her fingers were intertwined with his.

After a long journey, charlie wade arrived at the entrance to the underground city. He stored the snowmobile in his spatial storage, still holding Lin Wan'er (Alani)'s hand tightly. Through a hidden teleportation array, they instantly arrived inside the underground city.

The underground city was as tranquil as ever, still bathed in gentle, bright light and filled with an unbelievable abundance of spiritual energy.

This time, charlie wade didn't immediately take Lin Wan'er (Alani) away through the teleportation array. Instead, he suddenly thought of a question and asked her, "Wan'er, wouldn't settling here in the future be a good choice?"

Lin Wan'er (Alani)'s eyes lit up, and she smiled, saying, "It's more than just a good choice; it's the best possible choice! This place was built by a great supernatural being, and it's so vast that it doesn't feel cramped at all. More importantly, it's completely isolated from the world. Given its sturdiness, I think this might be the safest place on Earth."

As she spoke, Lin Wan'er (Alani) said with some longing, "If we really settle here, then we'll try to find a way to unlock all the areas locked by the teleportation array outside. " "Buying them or renting them permanently—although those places belong to various countries, I believe that shouldn't be a problem as long as there's enough money."

charlie wade nodded and smiled, "Yes, most of them are remote mountainous areas. With a little more money, even if we can't buy them, we can rent or lease them long-term. If we also modify the exits of each teleportation array, living here won't be boring. We can travel around the world anytime."

Lin Wan'er (Alani) sighed with some melancholy, "However, only you, Young Master, can operate the teleportation arrays here. If many people live here, they'll probably need you to escort them when they want to go out."
