

THE BREAKING POINT OF LOVE

Chapter 738

Rodney's behavior drew dissatisfaction from Bryson, Lucien, and a few others who were already talking to Celeste.

Lucien couldn't help but glare at him. "Rodney, I'm not stopping you from coming over to say hello, but we're still in the middle of a discussion. At least wait until we're done talking."

There were also other leading figures in the AI field present at the scene, all waiting for their turn to have a discussion with Celeste.

Hearing this, others also smiled and joined in, "Exactly, Rodney. There had to be order, right? Show some manners and go queue over there."

Wynn withdrew her gaze after seeing that. She took a deep breath before managing to calm her emotions.

Jorge and Quentin were both paying close attention to Wynn.

They saw how enthusiastically she tried to approach Rodney to ask questions, and also saw his perfunctory attitude toward her, as well as his eager attitude toward Celeste.

So, they also noticed the disappointment on her face and the restraint she showed after witnessing how academicians and industry leaders at the venue were all gravitating toward Celeste.

There were circles of academicians and technical experts surrounding Celeste. So, even if they deliberately avoided looking her way, they could still tell just how popular she was in the field now.

They could clearly see that Rodney and the others were there specifically for Celeste. This showed their recognition of her professional ability.

Seeing Wynn's disappointment and Celeste's current brilliance, both Jorge and Quentin looked somewhat displeased, especially Quentin.

Since Rodney and the others were so eager to talk to Celeste, it showed that her abilities were indeed excellent. However, in his view, those abilities were only obtained because she had taken opportunities that originally belonged to Wynn.

If it had been Wynn who entered YodaVision and if she had received the guidance and support of Matthias and Zachary, she would definitely have done even better than Celeste, given her own academic and professional ability.

Jorge and Quentin were about to stop what they were doing and go over to Wynn when Trevor also noticed that something was off with Wynn. He asked her, what's wrong? Are you unhappy?"

Wynn came back to her senses and forced out a smile. "No, I was just thinking about something."

Trevor was still in a discussion. So, after hearing that, he did not ask further.

Seeing this, Jorge and Quentin also stopped and did not go over.

One of Quentin's female colleagues couldn't help but say after noticing he was looking in Wynn's direction, Is she the junio from school. Her boyfriend is so outstanding and treats her so well. I'm really jealous."

Quentin responded flatly with a hum.

rat

That was right. Even though she lost a great opportunity in her career, at least she still had someone outstanding as Trevor by her side. So, her emotional life was still happy.

The technology conference lasted for two days.

Although Celeste, Matthias, Trevor, and Wynn all arrived quite early, they did not speak to each other that morning.

It wasn't until noon, when everyone was preparing to have lunch, that the organizers invited Celeste, Matthias, and Trevor together.

Wynn had been in a bad mood the entire time after the incident with Rodney.

She didn't want to have lunch with them because she would inevitably have to listen to everyone praising Celeste again.
