

Beast 131

Chapter 131: Shi Yu's Strongest Tactics

"Come on."

"Yes."

The two of them nodded at each other.

Seeing that the two of them were prepared tacitly, Master Qu Jie revealed a strange expression.

Hehe.

During the survival assessment, this Yin Zhengfan accidentally lost to that Iron-eating Beast with the Sky Crystal Butterfly once. He definitely wanted to win it back now.

It would depend on the performance of the two parties in this battle.

"Beep!!!"

With Master Qu Jie's command, the venue immediately changed.

"Roar!!!!"

"Wuu!!! Ji!!"

Before the pets appeared, three roars came from the summoning array on the field.

At the same time, a shocking might erupted from inside!

With a boom, the three auras seemed to make space collide, wrapping the entire arena in the impact of this aura!

Bang! Bang! Bang!

The aura continued to squeeze until four pets appeared!

The green worm stood on the head of the iron-eating beast and looked at its opponent domineeringly. Both parties were using their power to bully others!!

At this moment, as expected, the ordinary deterrence emitted by the Zonyan Rock Beast was quickly suppressed by the two pets that were bullying it.

A terrifying aura swept over, making even the monarchs' Zonyan Rock Beast reveal a serious expression.

As its mind was dizzy, he could only barely resist with its deterrence. Its battle intent was greatly affected.

As for the Sky Crystal Butterfly protected by its aura, it was empty and revealed an apologetic expression.

"Mi ~" Sorry, I lost face.

As the only pet that didn't know how to deter, the pressure on the Sky Crystal Butterfly was huge.

It glared at Shi Yu, Eleven, and Buggy. Everyone was clearly having a good time back then, couldn't they leave them some "face"? Maybe not make them look so bad?

The battle tempo was very fast.

Before the battle and after the battle, Shi Yu was very willing to make friends with his opponent's pet, but in the battle, he only wanted to win with all his might!

"Sorry, this is all to promote the Iron-eating Beast," Shi Yu thought.

He could only unseal Eleven and Buggy's strongest battle strategy!

This tactic was very dirty, disgusting, and violent. Shi Yu originally didn't want to use it.

He couldn't bear to use it against a 12-year-old child.

"Wuu!!!"

At this moment, on the venue!

Seeing that he couldn't instantly kill his opponent, Eleven showed a fierce expression. "Wuu!!!!" With a cry, its body began to expand!

As the ripples around its body vibrated, in the blink of an eye, it became a huge beast nearly ten meters tall!!

The Iron-eating Beast, which was as tall as a three-story building, looked at the Zonyan Rock Beast in front of it fiercely. Its long black and white hair fluttered without wind, and its whole body contained explosive power.

"Holy shit."

Although they were already prepared for the multiplication of this little Iron-eating Beast's mastery, seeing it so fierce at this moment, many spectators still subconsciously swallowed their saliva.

"Mi!!!"

At this moment, the Sky Crystal Butterfly opposite was extremely shocked.

Because its spatial shackles could not quickly wrap such a large iron-eating beast.

Moreover, it had fought with the Iron-eating Beast before and knew this guy's defense. It could completely ignore its spatial oscillation damage!

What was going on!

The Sky Crystal Butterfly quickly searched for the figure of the Green silkworm, planning to pick on the soft target.

It also understood that the Zonyan Rock Beast and the monster Iron-eating Beast were the main combatants on the battlefield.

As for it, it just had to deal with that silly and cute green worm.

However, it was soon dumbfounded.

This was because during the process of the little Iron-Eating Beast enlargement and its hair growing, the tiny Green silkworm went straight into the fur to god knows where and couldn't be found.

“Roar!!!”

“Wuu!!”

At this moment, the giant transformation was completed. Eleven directly hardened his palm and used the Thunder Palm at the same time. A huge black metal fist wrapped in lightning crushed towards the Zonyan Rock Beast!!

“Earth Collapse!!!”

In the face of the iron-eating beast's violent attack at the start, Yin Zhengfan frowned and quickly issued an order.

The next moment, the ground under the feet of the giant Eleven collapsed, directly causing its body to sway. Its strength was partially affected, and its strength weakened!

However, due to its huge body, it couldn't be buried at all. It still continued to attack the Zonyan Rock Beast!!

“Teleport!!”

Seeing that the Earth Entanglement could only restrain the opponent slightly, Yin Zhengfan didn't choose to let the Zonyan Rock Beast go all out. The Sky Crystal Butterfly directly teleported and disappeared with the Zonyan Rock Beast!

However, in the next second, just as the Zonyan Rock Beast and the Sky Crystal Butterfly appeared again, Eleven seemed to be able to detect them from 360 degrees without any blind spots. After adjusting its body, its Thunder Palm directly smashed towards the opponent that had just appeared!

“What a perfect battle awareness!!”

Seeing this scene, some master-level Beast Tamers couldn't help but sigh.

It was too ridiculous for it to be so agile in its giant form!

“Rock Transformation, Lava Explosion!”

Seeing that the Iron-Eating Beast was so fierce, Yin Zhengfan's pupils constricted. The speed of his brain was almost faster than the Zonyan Rock Beast, and his heart rate accelerated to the limit.

“Roar!!!”

This time, there was nowhere to run. The Zonyan Rock Beast roared in anger, but it didn't want to run either.

In the face of the incoming thunder palm, it also punched out. Its arm turned into a huge lava fist. During the process of the magma wrapping around it, the fist size was actually not inferior to Eleven's Giant Thunder Palm. Its power was similarly vast!

Boom!!

The huge Hardened Thunder Palm directly collided with the lava eruption!

In the spectator area, the armored man, Wang Ling, had a serious expression. In the next second, he took a deep breath.

At the same time, most of the spectators present also took a deep breath!

Boom!!!

Eleven struck out with its palm, and the moment the two fists collided, the Zonyan Rock Beast's expression was filled with shock. It was shocked by the other party's strength, and its body seemed to have suffered a huge impact. The ground under its feet directly shattered, and its huge feet kept moving backward on the shattered arena!!

Moreover, its body kept trembling. The other party's lightning penetration was so strong that even if it was an earth-element creature, it could clearly feel the excellent resistance effect!

In the interweaving of lightning and magma, the collision of the two pets was very scary. Even the Sky Crystal Butterfly could not interfere and could only hide in the air to avoid the aftermath!

At this moment, anyone with eyes could tell that the Zonyan Rock Beast had lost a lot in terms of strength!!

After the first hit, the Iron-eating Beast roared and followed up with a victory attack. It immediately retracted its arm and threw a second attack!

Boom!!!

The Zonyan Rock Beast was forced to use Lava Explosion again. Once the battle started, it directly evolved into two pets attacking each other with big moves, making all the spectators' gazes extremely serious!

"Roar!!!"

Under the collision, the Zonyan Rock Beast was once again knocked back by Eleven. It completely relied on the Stone Sealing Skill to prevent itself from being knocked over and resisted with difficulty!

However, many cracks had already appeared on its body. In fact, the Zonyan Rock Beast was also fighting back. During the Lava Fist eruption, the Rock Roar Cannon in its mouth directly hit Eleven!

In this situation, Eleven couldn't dodge at all, but there was no need to dodge. The hardened substance quickly flowed and instantly covered the area that was attacked. It chose to resist this attack!!

Then, Eleven retracted its arm and threw a third Thunder Palm.

Upon seeing this scene, all the master-level Beast Tamers couldn't help but say, "This is too fierce."

F*ck, who exactly was a monarch creature here?

Boom!!

The third Thunder Palm smashed out, and this time, the Zonyan Rock Beast was finally unable to resist. No matter how strong the Lava Explosion was, it was only an entry-level super skill. In the face of a combination skill like Transcendent Level Hardening+Perfect Level Thunder Palm+Expert Multiplication, it could only be suppressed!

“Roar!!!”

After the attack, the Zonyan Rock Beast was directly knocked over and its body shattered even more. It was obvious that it was heavily injured. Although the Rock Roar Cannon hit Eleven the moment it was knocked over, it was useless.

Hardening and high-speed healing only consumed Eleven’s physical strength!

“F*ck, this is an Iron-eating Beast?”

At that moment, everyone was stunned when they saw this scene.

They suspected that this iron-eating beast was the real monarch race.

After all, the huge Iron-eating Beast clearly had the aura of a monarch.

Three strikes directly knocked over the Zonyan Rock Beast!

However...

At this moment, the audience quickly discovered that after the Zonyan Rock Beast was smashed apart, it did not directly lose its combat ability with the strong physique of the monarch race.

Its basic physical fitness, vitality, defense, and recovery power were several times stronger than Eleven. This was an undeniable racial advantage.

Although the Zonyan Rock Beast had flipped over, judging from its panting, it was clearly trying its best to adjust and recover!

In fact, it even wanted to stand up and continue fighting.

On the contrary, after three consecutive full-strength attacks, the huge Iron-eating Beast, which didn’t look injured at all, actually showed an extremely tired expression. It quickly shrank to more than ten centimeters like a leak, and “fainted”.

“What the f*ck?”

The huge reversal stunned everyone.

In the end, it was the Iron-eating Beast that looked so ferocious that had overdrawn its strength and lost its ability to fight?

“No!!” At this moment, Yin Zhengfan’s expression was solemn to the extreme.

In theory, the Sky Crystal Butterfly and the Green silkworm couldn't interfere during the collision just now.

The Sky Crystal Butterfly had always been in a concealed state. Then, what about the Green Silkworm? Moreover, by shrinking its body, the pet's physical recovery speed would increase...

It was far from over. The outcome could only be decided after the Iron-eating Beast was fatally injured!

"Sky Crystal Butterfly, Wind Blade!!!"

"Attack the Iron-eating Beast!"

While the Zonyan Rock Beast was panting and recovering, Yin Zhengfan quickly ordered the Sky Crystal Butterfly.

"Mi!!!"

"Mi!!!"

The Sky Crystal Butterfly looked at the fallen Zonyan Rock Beast and Iron-eating Beast with a trembling heart. It was finally its turn?

However, it had the same doubts as the Beast Tamer.

Everyone had the same question.

Where was the Green Silkworm?

In the end, it evolved into a battle between the Space Crystal Butterfly and the Green Silkworm. Many people had guessed this before, so what about the Green Silkworm?

"Jihehehehe!!!"

As if in response to people's guesses, the Green Silkworm turned away from the invisible silk coat and directly appeared beside the little Iron Eating Beast.

The invisibility skill was very successful!

It was finally its turn to appear!!!

"It's the Worm God—It's the Invisible Worm Silk!"

Everyone was delighted to see Buggy.

However, they were a little conflicted. They didn't know how Buggy planned to deal with the Sky Crystal Butterfly.

No matter how heaven-defying the bloodline of a low-level transcendent Green Silkworm was, it was still very lacking compared to the high-level Space Crystal Butterfly of a rare spatial-type commander species. The outcome of a perfect evolution without evolving could be imagined.

They had no idea how Buggy was going to protect Eleven.

Everyone thought so.

However, at the next moment, a shocking scene occurred.

The little Iron-Eating Beast, which was supposed to “pass out”, opened its eyes with difficulty and raised its head trembling. With its last strength, it condensed a hardening substance and handed it to the worm.

Buggy took it with a sorrowful expression. “Ji!”

“Leave the rest to me. Don’t worry and go,” it seemed to say.

Everyone: “?”

Then, Buggy’s expression froze and it closed his eyes.

Using the hardening substance as a medium, it began to summon the huge Iron-eating Beast phantom illusion!!!

Boom!!!

The weather changed.

The huge Iron-eating Beast that the Zonyan Rock Beast had used all its strength to put down just now appeared in the arena again. At the same time, a green silkworm phantom stood on its shoulder!

Expert Level Illusory Phantom, full power burst!

“Roar!!!” The huge Iron-eating Beast phantom let out a roar, and its deterrence was released. Its whole body hardened matter and condensed!!

Everyone was stunned at this moment. They looked at the Green Silkworm guarding the little Iron-Eating Beast with its eyes closed in shock and looked at the huge Iron-Eating Beast Phantom in shock.

“Holy shit.”

Illusionary?

Holy shit, it could be used like this?

4VS2?

Not only was the audience stunned, Yin Zhengfan was also stunned when he saw the huge iron-eating beast that appeared again and looked exactly the same as the iron-eating beast just now.

Only Shi Yu calmly pushed up his nonexistent glasses to act cool.

1

Since he wanted to promote the Iron-eating Beast, it was obvious that this head-on effect was the best!

Phantom illusions could also be used for publicity!

Buggy could even become an Ice Dragon. It lived with Eleven every day, fought and trained with the living Eleven every day. There was no reason for it to understand Eleven less than an Ice Dragon!

It was far more proficient in projecting Eleven than the Ice Dragon!

Moreover, with the foundation guarantee of the hardened substance provided by Eleven, the projection was also extremely powerful!

The size could be directly changed by the silkworm through multiplication. The Hardening skill was perfectly inherited through a hardening substance medium. Skills such as deterrence, super vision, and absolute sleep were all common between Eleven and the Worm. The silkworm's Projection of Eleven was much more compatible than the Ice Dragon.

It was just that Buggy thought that the imposter couldn't defeat Eleven's main body, so it hadn't used it before!

But now...

In order to promote the Iron-eating Beast, Shi Yu planned to let his opponent experience the joy of being crushed by the two Iron-eating Beasts.

"Buggy, kill the Sky Crystal Butterfly!!!"

"Wuu!!!"

The huge Iron-eating Beast's phantom hardened and flowed, spreading out to form a huge badminton racket in its hand. Then, the Green Silkworm Phantom quickly spat silk at the racket, forming a net, stunning everyone.

Holy shit, what the hell was this?

Badminton racket?

Theoretically, the Butterfly with the Hiding Skill was invincible. Fighting it with this? Were they sure?!

"Mi!!!" The Sky Crystal Butterfly's eyes widened and it was a little confused.

Only Yin Zhengfan's expression suddenly changed.

"Teleport, dodge!!"

Boom!!

The huge Iron-eating Beast Phantom held the badminton racket in both hands and directly swept a strong wind towards the Space Crystal Butterfly. The first thought of the Space Crystal Butterfly was that it was hidden, but after hearing the Beast Tamer's command, it still chose to teleport!

However, just like when the Iron-eating Beast fought the Zonyan Rock Beast, this huge Iron-eating Beast phantom's reaction speed was also very ridiculous. It was as if it was the main body. Its body turned smoothly, and the ball racket continued to swing at the Space Crystal Butterfly that appeared, instantaneously!!!

"Mi!!!" This time, the Space Crystal Butterfly, which couldn't maintain Instant Transmission, could only be forced to go into hiding.

At this moment, there was a boom.

The Sky Crystal Butterfly, still hidden, made contact with the net. At this moment, the Sky Crystal Butterfly's eyes widened.

Then, it felt a huge force coming from the Internet!

With a hum, the insect silk net directly broke through the hidden Space Crystal Butterfly!

The huge Iron-eating Beast phantom hit the "ball" and crushed the crispy butterfly to the ground with a bang!!

Boom!!!

Although the Sky Crystal Butterfly was mysterious, its defense was still the defense of the bug type.

With just one hit, the Sky Crystal Butterfly directly fainted in the huge pit on the arena!

At this moment, Yin Zhengfan was stunned on the spot and couldn't understand.

Two Iron-eating Beasts, how the hell was he supposed to fight this?!

Everyone fell silent.

He opened his mouth and looked at the Green Silkworm that beat down the Sky Crystal Butterfly.

He understood that the worm silk could break through concealment.

Low-level transcendent Green Silkworm VS high-level commander species Space Crystal Butterfly.

The silkworm made a complete victory...

Then, the most ridiculous thing was that there was another reversal.

The huge commotion made the Zonyan Rock Beast climb up with difficulty. It finally recovered some physical strength and decided to launch another lava eruption!!

After completing this series of smooth attacks, the huge Iron-eating Beast Phantom and the Green Silkworm Phantom disappeared directly. The Green Silkworm, which had its eyes closed, opened them while panting. Then, it closed its eyes and entered absolute sleep to recover.

Just like Eleven just now, its stamina was exhausted.

It would be fine if this ended.

The most ridiculous thing was that at this moment, True Eleven, who had shrunk its state and fallen asleep beside it, had quickly recovered some physical strength. It stretched and crawled up.

At the same time, it continued to expand and expand.

It returned to its nearly ten-meter posture and looked at the giant beast that was also crawling up.

Eleven: "Wuu!"

Zonyan Rock Beast:???

It looked at the Iron-eating Beast that was not injured at all and was even more energetic than itself. It opened its mouth wide.

What the f*ck!

This was the recovery ability that a middle-level transcendent pet could have?

Everyone looked at the arena with their mouths agape.

The seven archeological elites and the elites of the Battle Club from Ancient Capital University widened their eyes.

Are you sure it just fought?

Lu Qingyi, White Brook, Lin Xiuzhu, and the other three seniors fell silent. They realized that they didn't recognize the iron-eating beast.

"This battle tactic is called the Infinite Cycle Real and Fake Iron-eating Beast Wheel battle tactic!"

Shi Yu thought to himself that he could perfectly use all the accompanying moves of the two pets!

While Shi Yu was lamenting about his talent, Eleven, now gigantic, struck out with its palm again and sent the Zonyan Rock Beast sprawling under its despairing expression.

Mid-level transcendent Iron-eating Beast vs Low-level monarch Zonyan Rock Beast... Iron-eating Beast wins!

At this moment, the entire place fell silent.

No one expected Shi Yu to easily win the final battle through such a heaven-defying strategy.

Yin Zhengfan stood on the spot with a blank expression, losing his train of thought.

He didn't know what a battle between beasts was.

Countless candidates opened their mouths wide. Those seeded candidates and advanced candidates even felt fear towards Shi Yu directly.

Zhang Qianyi, Yu Shu, and the others were stunned. They thought about how long they could resist this tactic...

This guy's strategies were very powerful, but why was it so ridiculous every time? It didn't make sense, it wasn't scientific. It made one's brain buzz!

Two multiplied Iron-eating beasts, that was f*cking ridiculous!

"F*ck." Even Master Qu Jie couldn't help but say in his heart. This was too disgusting. His heart ached as he looked at Yin Zhengfan, who had a blank expression.

Perhaps it wasn't that Iron-eating Beast that had mastered sleep-type recovery skills. The other party's accompanying moves were too dirty.

According to his understanding, the evolution of the iron-eating beast wasn't so ridiculous!

In the future, don't f*cking fight with him anymore!

At this moment, the master-level Beast Tamers also fell silent collectively.

Yin Chuan looked at his absent-minded son and couldn't help but shake his head under the gaze of the old man beside him.

"That Shi Yu..."

"I've finally understood the battle tactics."

His face darkened. He didn't know if it was good or bad for his son to meet a strong opponent like Shi Yu...

"He... Heh..." The old principal of Ancient Capital University laughed dryly and looked at the venue with a twitch of the corners of his mouth.

He was a little worried that Yin Zhengfan would really run to a different school in the end...

However, although the process of this vocation assessment was a little bumpy, it was finally almost over.

The strongest newcomer in the professional field of Ancient Capital, Shi Yu?

At this moment, Shi Yu, who was standing on the ground, felt his heart burn. Why wasn't it over yet? He couldn't wait to choose the third pet with the rich lady! Speaking of which, the Iron-eating Beast would definitely see an increase in the price this time!

Chapter 132: The Plant Pet Is Here

January 10th.

In the afternoon.

At this time, many people were actually waiting for the subsequent progress of the professional assessment in Ancient Capital.

It was mainly because the Iron-eating Beast, Shi Yu, was currently using the Iron-eating Beast to participate in the Ancient Capital vocation assessment. Moreover, his performance seemed to be very ridiculous, and it was very difficult for others to not pay attention.

The people who couldn't watch the tournament didn't wait for long. Those media outlets qualified to enter the professional examination hall directly released big news!

'Vocation Assessment: Archeologist vs Legendary Son, Iron-eating Beast Suppresses Monarch, The Birth of the Strongest Newcomer in the Ancient Capital!'

On this day, the news of the vocation assessment in the nine first-level cities occupied the top of the trending search. The news of the vocation assessment in Ancient Capital paired with the evolution of the iron-eating beast was the most eye-catching.

As the Iron-eating Beasts discovered their evolution form, Shi Yu really used the Iron-eating Beast that had awakened its evolution bloodlines to defeat the monarch species pets that had yet to evolve. The Internet immediately exploded, and the Beast Tamers who were paying attention to this matter commented one after another.

“Damn, he really got first place, but I heard his opponent is a 12-year-old child. What’s going on?”

“You call the legendary son of the Zonyan Rock Beast and the Sky Crystal Butterfly a child? However, compared to Shi Yu, Little Angel Yin Zhengfan is indeed a little like a child... He still doesn’t understand the dangers of adults!”

“In that case, the Iron-eating Beast’s potential is really very strong?? Damn it, I should have chosen the Iron-eating Beast as my initial pet, but it’s not too late now!”

“This Shi Yu is too strong.”

As the incident fermented, as well as the revelations of people in the know, other information about Shi Yu was dug out.

High school in Icefield City... A student of the Feeding Department?? He had even interned at the breeding base in Icefield City?

Some voices from Icefield City said that they were classmates with Shi Yu, but they didn’t know much about Shi Yu himself because Shi Yu rarely interacted with others. He was a quiet and reclusive genius.

These people had posted their graduation photos and their credibility was very high. Because of this, the Internet was in a mess.

A quiet and reclusive genius? Everyone looked at the editing of the survival assessment again and felt that something was definitely wrong.

Learning how to feed pets? Everyone looked at the big archeologist title on the official media and became even more confused.

Now, this archeologist from the Feeding Department had become the newbie king of the Beast Tamer assessment in the ancient capital. His battle power was off the charts?

Shi Yu’s personal identity and pet experience were similarly ridiculous.

All over Icefield City, Chen Kai and Cheng Gong, the former combat units, watched the follow-up news in silence.

At this moment, Shi Yu’s reputation could be said to have risen to a new height. Although he was only a professional newbie and would definitely be forgotten slowly as the hot topic disappeared, Shi Yu was also the first to enjoy such attention after just becoming a professional Beast Tamer.

“Iron-eating Beast, buy it!”

“Too late, too late. The Iron-eating Beasts definitely can’t be affordable anymore now. Is anyone going to team up with me to catch a Green Silkworm? The Green Silkworm is also very impressive. The most important thing is that it doesn’t need money. If I catch a Green Silkworm with a hidden mysterious power, I will earn big.”

His words woke up the people from their dreams. Many Beast Tamers who were conflicted about whether they could afford the Iron-eating Beasts locked their gazes on the green silkworms that were everywhere.

The number of insect youths in the Nation increased at this moment.

...

After the battle ended, and after Master Qu Jie announced the results, Shi Yu started to take Eleven and Buggy to replenish their physical fitness.

Before this battle, there would definitely have been many spectators who thought that he wouldn’t fight the Iron-Eating Beast head-on with the Zonyan Rock Beast, because such an Iron-Eating Beast with a disadvantageous physique might not necessarily be able to gain an advantage.

Of course, this was everyone’s analysis on the basis of not knowing about expert level high-speed healing and absolute sleep.

Shi Yu thought that perhaps its physical fitness and basic qualities couldn’t compare, but in terms of explosive damage and physical endurance and resistance to damage, Eleven, who had mastered the profundity of absolute sleep, high-speed healing, and shrinking... Was really not afraid of anyone.

Hardening, multiplication, super vision, Absolute Sleep, Thunder Palm, Deterrence, High Speed Healing... Eleven could be said to be indispensable in this battle. It was the same for Buggy. Every skill was very important.

“I’ve pretty much used all my trump cards. Some powerful Beast Tamers should be able to analyze Eleven and the others’ accompanying moves after this, right?”

Shi Yu looked at the crazily eating Eleven and Buggy and thought to himself. With this strength, the next qualitative change should be after he contracted his third pet or after Eleven and Buggy evolved.

But now, he wasn’t weak either.

Professional Beast Tamers were divided into primary-level, intermediate-level, and advanced-level. Now, in the primary-level and intermediate-level domains, he should be able to kill indiscriminately.

In these two stages, the difference in the strength of the Beast Tamer was not big. The difference was only in the level of the Beast Taming Space. The growth level of the pet was basically transcendent, and only high-level professional Beast Tamers had the ability to nurture the pet to commander rank.

According to what he knew, the female beast-eared senior and the main members of the Ancient Capital University’s battle club were all high-level Beast Tamers.

This was also Shi Yu’s goal during his university days: to become a high level expert.

At that time, he would have enough strength to do whatever he wanted.

At this moment, although Shi Yu wasn't very tired, he still lay on the sofa and looked at Eleven and Buggy, who were replenishing their energy, with a little melancholy.

"Huh?" "Ji?"

Eleven and Buggy couldn't help but be puzzled when they saw that Shi Yu was unhappy after getting first place.

"Eat your food," Shi Yu said.

After getting first place and becoming a professional Beast Tamer, he was about to obtain a large amount of resources. It should have been a happy thing...

However, at the thought of adding nearly 200 Hardening points to help Eleven maximize the Hardening and prepare for evolution, Shi Yu felt a headache. This wasn't a levelless skill...

Moreover, he also had to help Buggy break through the spatial shackles, Instant Transmission, and Concealment points. Then, he had to level up the phantom and spatial shackles to the point where it could break out of the cocoon and evolve...

It was another difficult task.

Thinking about it this way, perhaps the ten days of the vocation assessment was the easiest time for him.

"I love exams and competitions."

...

"Junior Shi Yu is awesome!!"

"Impressive."

The vocation assessment was not over.

For example, Yin Zhengfan would definitely have to battle Zhang Qianyi, who had defeated the armored man. However, Senior Panda, the Archeological Seven Elites, and the others didn't watch the subsequent matches. They all ran over to Yu Yu's prep room.

They started to congratulate Shi Yu.

These few people completely didn't expect that Shi Yu could really take first place in the Ancient Capital vocation assessment.

A few of them didn't even dare to think about it previously.

"Impressive!" The panda senior holding the camera looked at Eleven and Buggy eating and said excitedly.

"Haha..." Shi Yu sat on the sofa. He remembered that he not only had to take care of Eleven and Buggy, but he also had to give his third pet some extra points. He smiled rather gloomily.

Amazing, right? He exchanged his body for it.

Have you all experienced the life of lying in bed and taking medicine all day long?

“Junior Shi Yu, what plans do you have next? School starts in February. There are still 20 days left. You can relax well. How about we bring you to tour the ancient capital?” Zheng Yingjie suggested.

During this period of time, everyone was busy researching the iron-eating beast evolution. Shi Yu was also busy preparing for the vocation assessment.

Now, with the announcement of the iron-eating beast’s evolution form, the research could temporarily come to an end. There was no need to rush into deeper research. After all, this was a long-term job.

Shi Yu had also become the top scholar in the Ancient Capital assessment. No matter how one looked at it, he should relax for a while.

“We can indeed have them lead you to understand the ancient capital. It’s very big here,” Senior Panda suggested with a nod.

“Senior, you might as well not return to Ping Cheng,” Lin Yu’er said.

“No...” The panda senior smiled. She had been in the Ancient Capital for nearly half a year. Next, it was time to return to Ping Cheng to take a look. Moreover, the Iron-eating Beast Breeding Base definitely needed her more than ever.

“I guess I have other things to do too.” Shi Yu smiled and declined.

“I want to explore the Ice Dragon Ruins in Ice Dragon City. This ruin is a chain mission like the one I cracked previously. I’m afraid that I won’t have time after school starts.”

Archeological Seven Elites:???

Damn, he was going to crack the ruins again?

The Ice Dragon Ruins?

They had studied archeology for so long, but they had never cracked a ruin.

And Shi Yu had already targeted the third one?

He wasn’t human...

“Ice Dragon Ruins??” The panda senior frowned and looked at Shi Yu.

“You’re just a professional Beast Tamer. Why would you go to that kind of place?”

Ice Dragon Snow Mountain. That place was even larger than the entire Icefield City. The environment was extremely harsh. There were a lot of transcendent-level ferocious beasts, and there were also a lot of ferocious beast communities with commander-level creatures. There was even an ice-element monarch. Master-level Beast Tamers weren’t suited to go deep alone. Shi Yu was only a professional Beast Tamer.

“Don’t worry, safety won’t be a problem. If I don’t have a few masters as bodyguards, I won’t go.” Shi Yu was still very experienced.

If it weren’t for the fact that Yin Zhengfan didn’t want to talk to him now, Shi Yu even wanted to beg him to let his father help...

Eh, wait a minute. Yu Shu’s mother was a Dragon Tamer, right? He wondered if she was interested in the Ice Dragon Ruins... A top-notch Dragon Tamer. This wasn’t for show. Fighting ordinary monarch-level creatures was like hitting a younger brother. She could stroll on the Ice Dragon Snow Mountain alone.

But... Yu Shu didn’t seem to like him either?

Shi Yu fell into deep thought. He clearly wanted to make more friends!

“Even if you say that...” Senior Panda was still a little worried.” Forget it, forget it. Remember to call my dad. “

She was worried about other masters’ protection, but she could guarantee that Lin Hongnian would definitely not want anything to happen to Shi Yu.

“Alright, I’ll take this call.” Shi Yu smiled. At the same time, he sensed the vibration of his cell phone and took it out.

He looked at the stunner and immediately took a deep breath.

Good, it was Senior Lu.

She called him to the rooftop of the venue to talk about plant pets.

Was she taking him to choose a plant pet?

The third pet was finally coming.

Although the level of the Beast Taming Space was not yet at level three, it was alright to understand it beforehand.

The main reason was that he had a premonition that the pet Senior Lu chose for him must be very rare. If he missed this opportunity, this pet wouldn’t exist anymore.

“I’ll go out for a while,” Shi Yu said to everyone.

Everyone nodded.

“Eleven, Buggy, eat here yourselves.” Shi Yu then said, “By the way, the thing you want is with Senior Lin.”

“Huh?” “Ji!”

Eleven and Buggy suddenly stopped and looked at the panda senior who was holding the camera. They suddenly remembered that there was such a thing.

Next, it was time to admire their heroic bearing.

They got first place, as expected of them!

“Wu!” “Ji!” Eleven and Buggy quickly ran to Lin Xiuzhu’s legs and looked at her camera.

Lin Xiuzhu smiled. “Don’t worry... I’ll give the videos to you.”

...

On a certain rooftop of the venue.

At the moment, only Lu Qingyi and White Brook were here.

They chatted with each other and discussed Shi Yu.

When Shi Yu came over, the two of them turned around and looked at him.

“Senior Lu, Senior Brook.”

Shi Yu smiled and greeted the two rich girls.

“Shiyu, do you want to join the battle club and the school team after school? I’ll take you to the National League when the time comes,” White Brook invited with a smile.

When she first saw Shi Yu, she didn’t feel anything, but after looking at Shi Yu’s vocation assessment, she realized that Shi Yu’s potential was really strong.

In fact, that Iron-eating Beast and Green Silkworm didn’t even need to learn other skills or increase their skill proficiency. As long as their growth level reached commander rank, Shi Yu would definitely be able to perform well in the National League. After all, there were very few Beast Tamers who could master the profundities in the National League.

If she considered the fact that the iron-eating beast and the green worm could still evolve, she felt that Shi Yu could help Ancient Capital University win a national championship that Ancient Capital University had never won.

“This...” Shi Yu felt tired. Did he have to participate in collective training or something?

“The rewards are very good. Young cubs of monarch species, super-level skill manuals, high-level resources, opportunities to enter mystic realms...” White Brook sighed. “Most importantly, the school’s rewards will only be more than the prizes of the competition.”

Shi Yu’s eyes lit up. “It didn’t matter if the reward was there or not. It was mainly because he wanted to win honor for the school”? He liked this kind of safe competition very much.

Lu Qingyi rubbed her temples and said, “Let’s not talk about things so far away first.”

With that said, she smiled and looked at Shi Yu. “I previously told you that I would take you to choose a plant pet after the assessment.”

“Actually, I’ve already helped you choose seven types. I was afraid that you would be distracted just now, so I didn’t tell you.”

“They come from different places and their states are also different. You should understand them first and choose further. I’ll bring you to take a look personally another day.”

“Let me help you analyze it,” White Brook also said with a smile. She loved to choose pets the most and also liked to help others choose.

“Which seven??” Shi Yu became excited.

Lu Qingyi said,

“Middle class monarch race, wood and dragon types, Dragon Blood Willow.

Low-level monarch race, wood-element, Tree of Life.

Low-level monarch race, wood and spirit dual-element, Blue Spider Lily

Low-level monarch race, wood-element, Mutated Ginseng Baby.

High class commander species, wood type, undead type, Wood Spirit.

Among the high class commander species, the spiritual type Seven Star Four Leaf Clover, with a time talent.

High class commander species, dual elements of spirit and space, Scarecrow Magician.. “

Chapter 133: Classic Seven Choices

Shi Yu: Aba Aba Aba Aba...

As soon as the names of Lu Qingyi’s seven pets were mentioned, Shi Yu immediately felt conflicted!

How could he choose!

He didn’t expect that there were actually four monarch races.

Just randomly picking one would make 99.99% of the plant based Tamers green with envy.

“Sigh.”

Beside him, White Brook shook her head.

Shi Yu might not know how rich this woman he’d gotten the favor of was.

A young monarch pet suitable for contracting was something that could only be chanced upon by luck for ordinary master-level Beast Tamers.

But for Lu Qingyi, who had the identity of Division 11 and knew many legendary Beast Tamers, finding it wasn’t a difficult task.

In short, Shi Yu was really lucky to have such a blissful list!

“Some pets might not meet your initial requirements. I’ll explain them to you one by one. You choose,” Lu Qingyi said.

"Alright." Shi Yu nodded obediently.

"The Dragon Blood Willow is the evolved form of the Blood-sucking Willow after it absorbed dragon blood."

"It's a special breed cultivated by a top-level master of plant pets who doesn't like dragons very much. It grows by absorbing dragon blood."

"At the same time, the tree sap it releases can be bathed in ordinary plants. It can create spiritual plants that dragons like. This is the bait they set up to hunt dragons."

"This master nurtures a Dragon Blood Willow every few years to give it to someone. This one should currently be at the transcendent level, close to the commander level, in a new life state, and has just evolved."

"It has the greatest battle potential among the seven pets. It has mastered the super-rank racial skill, 'Divine Willow'. It's a war machine that can fight against monarchs and dragons. It's very resistant to dragons and is a pet that can greatly increase the combat power of Beast Tamers."

Lu Qingyi smiled.

"This is good, its battle power is very strong." The beast-eared girl had clearly seen the battle of the Dragon Blood Willow.

That blood-red willow branch could directly penetrate the dragon's scales. It was very violent!

"Then there's the Tree of Life. You're not unfamiliar with it, right?" Lu Qingyi asked. "Isn't there a monarch level Ancient Tree of Life in Icefield City?"

Shi Yu nodded.

The Ancient Tree of Life was the evolution form of the Tree of Life.

The Tree of Life was also a descendant of the Ancient Tree of Life.

Apart from the first batch of Trees of Life that were born for unknown reasons, most of the origin of the Tree of Life's saplings were chosen to sacrifice themselves to become a seed after the Ancient Tree of Life's vitality was exhausted.

"This Tree of Life sapling was born after the death of an Ancient Tree of Life. Its current growth level has just reached the transcendent level."

"The Tree of Life is a classic healing-type pet. Its own life force is very strong. It has the power to revive some ordinary plants. It can also have very powerful effects when used to treat humans and other life forms. It has mastered the transcendent race skill, 'Life Gift'."

"After the contract, it can greatly increase the vitality of Beast Tamers, and it can increase the lifespan of Beast Tamers by several years."

She explained the benefits of contracting the Tree of Life.

When Shi Yu heard that, he was immediately tempted.

Because he currently had the control of a super skill.

The gift of life, paired with plant control... It would become both a war machine and the strongest gardener.

Just imagine, the immortal and indestructible sea of trees descending...

Compared to the Dragon Blood Willow, the Tree of Life and the Ancient Tree of Life were not pets that were good at fighting. The main classification was still treatment-type pets. However, the reason why the Ancient Tree of Life in Icefield City could become the guardian of Icefield City was that in addition to the racial skill Life Gift, it had also learned the wood-element super skill Plant Control during its long life.

If he chose this, Shi Yu could use that Auntie Ancient Tree's growth template to nurture this little Tree of Life.

Second, the benefits that contracting the Tree of Life brought to Beast Tamers were also not what other ordinary plant pets had.

The growth and evolution of pets would give the Beast Tamer some power.

The power ratio of the feedback was actually mainly based on the types of pets.

For example, the Iron-eating Beast's growth gave Shi Yu more basic physical strength.

If it was a spiritual pet, the power it gave Shi Yu after growing up would be that it had more spiritual power.

As for after contracting the Tree of Life, the feedback would definitely be that there was more life force. Therefore, Beast Tamers who contracted healing-type pets generally had higher lifespans.

"This is also very good." The beast-eared girl nodded.

The Tree of Life, the most reliable partner!

It could fight, it could be a gardener, it could heal, it was perfect!

"The Blue Spider Lily is active in a dangerous place. I've gone to investigate before. This is a relatively dangerous plant that has the ability to create illusions, and is extremely resistant to undead creatures. It also has the skill of a transcendent-level illusion-type species, Blue Purgatory."

"Contracting this is relatively dangerous, but its illusion ability is very reliable. The most important thing is that its seeds can parasitize a Beast Tamer's body, giving the Beast Tamer the ability to maintain his form even if his soul leaves the body. After contracting it, even if the body accidentally dies, his consciousness can still be maintained in the form of a soul for a period of time. Not bad, very suitable for high-risk workers."

"Indeed." The beast-eared girl nodded. As expected of Senior Lu.

Shi Yu : "..."

Damn, that sounded scary.

How was it not bad?

“Then there’s the Mutated Ginseng Baby,” Senior Lu said.

“How did Baby Ginseng reach the monarch race?” Shi Yu asked.

Isn’t this a supplement for transcendent races!?

After hearing this name, he was very concerned.

“Mutated...” Lu Qingyi.

Shi Yu :” ...”

“This is a special pet that a senior from Bureau 11 accidentally discovered in the forbidden area recently.”

“It was originally an ordinary ginseng baby. In a place like the dangerous Lost World forbidden zone, its fate was basically to become food for other ferocious beasts.”

“But forbidden areas represent danger, and also opportunities.”

“In that place, it accidentally ate an ownerless level-eight resource, Life Fruit, and survived with a very small chance. Its body mutated and it awakened a transcendent-level wood-element skill, ‘Source of Life’.”

“Its current form is still that of a ginseng baby, but its life force, physical strength, energy value, and race potential have all undergone huge changes. It can be said to have undergone a different evolution.”

“According to the comprehensive judgment of that senior from Bureau 11, its race level should currently be judged to be a low-level monarch. No, it might be even higher, but it’s only so low considering that Baby Ginseng’s race has almost no combat power.”

There were a total of three types of plant-type transcendent creatures.

The battle type mostly evolved from meat-eating plants like the venus flytrap.

For healing types, they had less battle power, but powerful self sustaining capabilities.

The supplement type was the kind of creature that was a nourishing plant before it evolved. Its combat power was the weakest of the three types, and it was also the favorite of other ferocious beasts. Often, the nutritional value of this kind of supplement-type plant pet was the highest.

Baby Ginseng was a classic supplement-type pet. Its battle power was not high, but it could create nourishing supplements for Beast Tamers and other pets to eat. Therefore, there were many places with baby Ginseng farms.

“This mutated ginseng baby has a life force comparable to the sapling of the Tree of Life. Its energy level is also very high, not inferior to the cubs of other monarch species. Its own nourishing effect is also very good. Moreover, it has the source of life, a transcendent skill that can recover life force and physical strength at a high speed. It can quickly produce high-quality supplements at the smallest cost. Its recovery power is strong, and it’s very suitable for those Beast Tamers who have a huge consumption of strengthening talent and physical fitness.”

“If you contract this pet, it’s actually equivalent to giving up your combat power and strengthening your life-saving ability. Although you don’t have an enhanced Beast Taming Talent and don’t need to use physical strength, it can greatly increase the time you use the Ruins Bead to Etherealize. When you reach the Legendary level, you can use your Beast Taming Space for that, and the effect will be even more obvious.”

Shi Yu was momentarily stunned.

The source of life? A super-level recovery-type skill? The minimum cost was to produce high-quality supplements infinitely?

If he contracted a supplement-type plant pet, the feedback from the pet’s upgrade would be physical recovery ability...

Shi Yu was tempted again. F*ck, at the moment, the Dragon Blood Willow and the Paramita Flower were alright, but the Ancient Tree of Life and the Ginseng Baby were both what he needed.

Although the former couldn’t directly produce supplements, as long as there were seeds, the gift of life could quickly mature high-quality supplements with the control of the plants.

The latter was a super supplement in itself, and it also had the ability to produce at a high speed. Most importantly, after contracting the ginseng baby, its physical recovery ability would undergo a qualitative change, which was very compatible with the skill index.

“This is also good,” the beast-eared girl suggested.

Shi Yu: “?”

What kind of advice was this?

Obviously she thought everyone was good!

Senior Lu continued to introduce the remaining three.

The rest had no super skills, nor were they of a monarch race, but they were relatively special pets.

“The wood spirit is a plant spirit born from the evolution of an entire forest. It’s similar to the concept of the soul of a mountain and the spirit of a lake. It can possess ordinary plants and accelerate the growth of this plant, helping it evolve into a spiritual plant and giving it combat ability. As it grows, it can control the entire forest. When the types, quality, and number of plants it possess reach a certain limit, there’s a possibility of it evolving into the monarch’s species pet, the monarch of the forest. It can also awaken plant control skills.”

“This is also very good,” the beast-eared girl praised. Senior Lu is awesome. She actually found so many rare plant pets.

Shi Yu :” ...”

It was indeed very good. It could also create an army of supplements. Most importantly, it could form an army of plants according to its own thoughts.

Contracting one was equivalent to contracting a group.

“The Seven Star Four Leaf Clover is a very special plant pet. Its skills are all inclined to the defensive type. It has defensive skills that can withstand various types of attacks. Moreover, due to its small size, it can perfectly cooperate with Beast Tamers and protect Beast Tamers.”

“Apart from that, it also has the mental-type skill of sensing danger that contains a little time element. It can help Beast Tamers turn misfortune into blessings, so it’s also known as the lucky grass. This is very suitable for some unlucky people who like to court death.”

Lu Qingyi referred to those fellow archeologists who had died.

Shi Yu gulped and was tempted again. Time, time, he had finally encountered his first time-type skill!

He wanted this!!

“I want this!” The beast-eared girl also said.

Shi Yu: “?”

“As for the Scarecrow Magician, it is a rare spatial pet that has the miraculous ability of ‘Scarecrow Substitute’. If the enemy attacks the owner of the Scarecrow Magician, it’s very likely that the damage will be transferred to the Scarecrow Substitute created by the Scarecrow Magician. Or perhaps, the enemy’s target from the beginning to the end is the Scarecrow Substitute.”

“This is also a pet that can increase the survival ability of the Beast Tamer.”

This time, before the beast-eared girl could say anything, Shi Yu said, “Do you want this too?”

White Brook shook her head. “It’s too ugly, it’s so gloomy.”

Shi Yu: “?”

“Then, have you considered it?” Lu Qingyi smiled at Shi Yu.

Apart from the blue spider lily that she had to capture personally, these pets were all from different places. She needed to rely on connections to buy, exchange, or ask for them. She just didn’t know which one Shi Yu liked more.

Shi Yu fell into deep thought.

According to his preferences, he first eliminated the Dragon Blood Willow, the Blue Spider Lily, and the Scarecrow Magician.

He didn’t lack pure battle-type pets.

The Lily sounded dangerous to obtain and contract. Forget it.

The life-saving ability bestowed by the Scarecrow Magician wasn’t that needed. At the moment, the ruins bead was actually enough.

Most importantly, Buggy was about to have a space element. Another extra space element was not very attractive to him.

As for the tree of life, the mutated ginseng baby, the wood spirit, and the seven-star four-leaf clover...

Shi Yu once again eliminated the clover and its premonition danger skill. He wanted to see if he could replicate it later. Forget about the contract. He was such an outstanding boy, so his luck wouldn't be bad.

Then, he rejected Forest Spirit again, mainly because the cultivation period was too long. Moreover, this kind of DIY-type pet needed a bunch of high-level spiritual plant underlings at a glance. Training one was equivalent to cultivating a group. The cost was huge. He didn't have money anymore! Moreover, the plant control skill awakened after evolution was too boring.

In other words, whoever he taught plant control to would already be the monarch of the forest anyway. There was no need to deliberately pursue this.

In the end... there was still the tree of life and the mutated ginseng baby to choose from.

Shi Yu thought about the advantage of the Tree of Life. Firstly, there was still the evolution of a high-level monarch race. Although the conditions were unknown, there was indeed a possibility of evolution.

Secondly, the Tree of Life was very suitable to be a gardener. With the control of the plants, it could grow various spiritual plants in the ruins bead, not limited to supplements.

However, the disadvantage was that it needed to be cultivated for a period of time. At the moment, the level of the Tree of Life's sapling was too low, and the level of the gardener's potential wasn't high. He couldn't teach plant control either. Perhaps within a year or two, he wouldn't be able to experience the joy of quickly producing high-quality spiritual plants. He might not even be able to be self-sufficient, let alone earn money through this.

The advantage of the Mutated Ginseng Baby was that after contracting, it could immediately reflect the speed of physical recovery. With the excellent effect of the skill index, it could provide him with a pretty good points upgrading experience in the short term.

In addition, even without the contract, it could also quickly produce high-quality supplements for the current Shi Yu to use. It could help Shi Yu save a lot of money.

If there was a disadvantage, it was that it had no battle power at all. It was a mutated species, and its future development path was unknown.

"Senior, do you have any suggestions?"

Shi Yu looked at Lu Qingyi.

"I suggest... the sapling of the tree of life, the mutated ginseng baby, the wood spirit, and the seven-star four-leaf clover."

Lu Qingyi smiled. "The word 'lucky grass' isn't called lucky for nothing."

"Forest Spirit can be used together with the ruins space. There are many cultivation paths. It can be used to fight, heal, and recover."

"From the current potential, the highest level can be raised to a high-level monarch. Although the evolution conditions are very harsh, there's at least a way to find it."

“However, from your own perspective, I still advise you to contract the mutated ginseng baby the most.”

“As a monarch pet, it’s definitely easier to contract than the other monarch races.”

“Besides, don’t forget that your Iron-eating Beast and Green Silkworm still have to evolve.”

Shi Yu nodded...

“After they evolve, their racial levels might all reach the level of monarchs, and your Beast Taming Space is only at level two. Even if they evolve, they will bring huge feedback to your Beast Taming Space, and huge feedback to you. In theory, it will still be very difficult for you to bear, even if the Beast Taming Space reaches level three.”

“Moreover, during the period when the Green Silkworm is in the form of a cocoon, it’s the stage where it relies on the Beast Tamer’s Beast Taming Space the most. If a pet in the form of a cocoon is raised in the outside world, it won’t be absorbing the nutrients provided by the cocoon and the Beast Tamer themselves. It’s very easy to affect the contract between the two parties. And if it sleeps in the Beast Taming Space, with its current potential... it might be uncomfortable for you.”

“At that time, the Beast Taming Space won’t be able to withstand their growth speed and insufficient nutrition. Your condition will be greatly affected. However, if you contract the ginseng baby, there won’t be this effect. The recovery ability it brings you can largely share this burden. In the future, as the number of pets you contract increases, the value of the ginseng baby will increase.”

“In short, although you have the bead that can replace your Beast Taming Space, I suggest you don’t do this in the long term. After all, the Beast Taming Space is the best place to maintain the bonds between Beast Tamers and pets.”

Shi Yu fell into deep thought. Would it? Eleven and Buggy seemed to have been outside longer than he had in the Beast Taming Space, but their relationship was very good!

However, the best habitat of the cocoon was the Beast Taming Space of the Beast Tamer himself. This was indeed correct, as various academic papers had proven.

Since Senior Lu said so, it seemed like Baby Ginseng was indeed more useful.

“Then I’ll choose the mutated ginseng baby.” Shi Yu finally made a decision.

The life force of the Mutated Ginseng Baby was not inferior to the Tree of Life. As long as he replicated the gift of life, the effect would be the same. At that time, he would teach it the plant control skill. It could also do what the Tree of Life could do. It was not a problem for it to have weak combat power!

Furthermore, it could completely digest a level-eight resource and transform itself into the number one mutated ginseng baby. This ginseng baby was also very unscientific. Although its future potential was unknown, it didn’t necessarily mean that it was weak. It might mean that its talent was ridiculously good. Shi Yu kept analyzing.

However, at that time, the combat power of a supplementary ginseng baby would be off the charts... That would be f*cking hard to explain and unscientific. It was even more ridiculous than Buggy. The ingredient, fighting people...

“You chose it? Actually, you can choose two or three to see for yourself if it’s suitable before deciding,” Lu Qingyi said.

Shi Yu was stunned. Was this a chance for him to replicate the skill first...

Chapter 134: A Ginseng Baby With A Dream

At this moment, Shi Yu indeed wanted to copy the skills of the other six pets and teach them to Baby Ginseng.

He couldn’t take all the pets, but couldn’t he take the skills? He was a human-type skill teaching machine!

But soon, his heart trembled.

There was really no other way.

Currently, there were 15 pages of the skill index.

Apart from the worm silk, the skills mastered by Eleven and Worm had already occupied 13 pages!

In other words, there were only two empty pages.

Even if he wanted to replicate the skills, there was no place left!!!

Unless the Beast Taming Space reached level three and he contracted the ginseng baby, which would increase the page count.

However, it might be a few months later when the Beast Taming Space reached level three...

During this period, the value of any skills recorded in these two empty seats was not high.

Life Gift, super level. If he couldn’t teach it, it would be useless at the moment.

Divine Willow... was he going to let Baby Ginseng use the roots of the ginseng to poke the giant dragon? The problem was that this was also a super level skill, so he couldn’t teach it.

The baby ginseng might not necessarily be compatible with Blue Purgatory. Buggy had a chance to learn it, but it was still a super skill.

Then, there was a slightly valuable straw substitution skill. At the moment, it was not very urgent to be using etherealization either.

The only thing he was a little reluctant to do was the “danger sense” skill...

At max level, could he predict the future?

It sounded delicious. What if it could be used to buy lottery tickets?

However, this thing felt like a passive skill. Even if he met the Seven Star Luck Grass, he might not necessarily be able to replicate it...

In other words, even if he could replicate it, he wouldn't be able to use it in the short term. It would only occupy a slot.

It was far inferior to copying the racial skills brought by the ginseng baby to help him upgrade points, all so that he could recover its physical cost more quickly.

Shi Yu fell into deep thought.

The page number restriction of the skill index didn't allow him to go all over the place. It only allowed him to calculate carefully.

"At the moment... I'm more interested in baby ginseng and four-leaf clover."

He could go to Icefield City in the future to look for Auntie Tree of Life with the Life Gift skill. This didn't matter.

However, time-type skills were a little difficult to think about.

Lu Qingyi was slightly surprised. "These two pets happen to be the easiest to come into contact with."

Shi Yu: "Huh?"

"The mutated ginseng baby is currently in the ancient capital."

"And the Seven Star Four Leaf Grass is the school beau of Ancient Capital University. It's in the garden of Ancient Capital University."

Shi Yu: "?"

This Seven Star Four Leaf Grass was actually the same as him, within the Ancient Capital University? Fate.

However, it was a pity that it was about to miss the opportunity to increase its points. It looked like the lucky grass wasn't that lucky.

It was fine not to choose the fake lucky grass, in case it backfired in the future...

"Seven-star Four Leaf Clover... is it in Ancient Capital University?"

"Yes, but there aren't many four-leaf clovers cultivated in Ancient Capital University either. They're usually only used to reward outstanding students."

"After all, although premonition danger hasn't been classified into the time department, there's still a time element. It's very rare."

The beast-eared girl said. This kind of life-saving divine pet was what many Beast Tamers pursued.

Shi Yu was stunned. Then there was no hurry.

The Ancient Tree of Life and the Four-Leaf Grass... He would have plenty of time to encounter them in the future. He would think about replicating skills when he had extra space!

"In that case, Senior Sister, let me take a look at Baby Ginseng first."

“Alright.” Lu Qingyi nodded.

“I think the Baby Ginseng will be very happy to see you.”

“Why?” Shi Yu was curious.

“Grandma Li of Bureau 11 raised these supplementary pet beasts most likely to make soup. If we were to take it, it would be lucky to escape.”

What the heck?!

Was such a rare pet used to make soup???

Shi Yu’s expression darkened. What kind of devil was this senior from Bureau 11?

...

In the end, Shi Yu decided to meet the mutated ginseng baby first.

He and Senior Lu had agreed to visit this senior from Bureau 11 tomorrow.

As for later... there was still business.

Shi Yu rushed back to the venue.

When the ranking assessment ended, Shi Yu received a license.

He was relieved to have his license.

Professional Beast Tamer license!

The dark red booklet symbolized his identity as a professional Beast Tamer. Shi Yu finally obtained it.

Apart from Bureau 11 documents, Shi Yu also had a second useful certificate.

With this, he would have a certain discount when using planes and other transportation in the future.

He would also be qualified to apply for certain danger areas.

In addition, for Beast Tamers with professional licenses, the Beast Tamer Association would also provide some guaranteed funds every month to reduce the pressure on Beast Tamers to train their pets.

Initially, this was what Shi Yu was most concerned about. He planned to rely on this to repay the loan, but from the looks of it, this bit of money was nothing.

The greatest use of the professional Beast Tamer license... No, the greatest use of the whole assessment, for him, was the number of cultivation resources he could obtain after entering the Ancient Capital University.

Shi Yu held his license and opened the certificate. On it was his handsome profile picture.

“They’ve edited this picture before, right?”

Zheng Yingjie looked over and said.

“Indeed.”

“They’ve even taken away my natural and erudite aura.” Shi Yu shook his head.

Who edited this photo? Couldn’t they not photoshop it without permission.

They had to apologize to the fangirls in this country.

When Shi Yu was surfing on the Internet with his cell phone, he realized that he had female fans. From the looks of it, although the Iron-eating Beast Knight’s actions were second-rate, looks were always the first concern.

Senior Panda and Qi Yingjie :” ...”

As expected of you, Iron-eating Beast Knight.

“Try to get an intermediate certificate as soon as possible,” the panda senior said to prevent Shi Yu from continuing to be narcissistic.

“Yes, try to quickly upgrade the certificate. This is just the starting point.”

“Alright.” Shi Yu smiled.

Advancing to the intermediate title still required an assessment.

But at that time, the assessment would be relatively simple.

It wouldn’t be as grand as the vocation assessment. Instead, professional Beast Tamers could participate in the assessment at any time.

It required the Beast Tamer’s Beast Taming Space to reach level three.

At the same time, it required the Beast Tamer to have the ability to last five minutes in the hands of a commander-level pet.

Regardless of whether a Beast Tamer contracted one, two, or three pets, or sent out a few pets, as long as they could fight a commander-level creature for five minutes without any external help, it would be considered to have reached the requirement to advance to an intermediate-level Beast Tamer. At that time, the benefits would increase.

This goal was not very far from Shi Yu.

It was relatively easy to cultivate the first three levels of the Beast Taming Space. In addition, he had a pile of Ethereal Stones to support his cultivation. In about a few months, he could level up.

On the same day, the vocation assessment ended.

While the other candidates were being contacted by various factions, Shi Yu, who had already internally decided to enter Ancient Capital University, ran to have a meal with Senior Panda and the others to celebrate.

It had been tough on him for the past ten days.

In order to welcome the next higher difficulty point upgrading, he had to reward himself these two days!

...

At the same time.

Somewhere in Ancient Capital City.

In a ruin space filled with plants.

A ginseng baby was sitting on a branch swing, thinking about ginseng life.

Baby Ginseng looked like a ginseng. There was a ginseng flower on its head. It had crystal clear big eyes, an exquisite mouth, and small hands. It was very cute, about 20 centimeters tall.

All along, Baby Ginsengs had always given people a lively, energetic, honest, and cute image...

But this baby ginseng was always frowning and worried when it swung the swing.

"Yi..." Baby Ginseng looked up.

Thinking back to its miserable life.

It was born in an extremely dangerous and resource-rich forbidden area outside the Dong Huang Nation, a place that belonged to ferocious beasts.

Baby Ginseng itself was a "resource" produced by this treasure land, for other beasts.

Fortunately, after it was born, the ginseng baby was lousy, so it lived on because of its low nutritional value.

High-level ferocious beasts were everywhere. An Awakening-level ginseng baby was not enough to fill the gap between the teeth.

Most ferocious beasts knew to fatten up first before eating, so Awakening-level supplements were generally safe.

This ginseng baby didn't know whether to be glad that it was too weak or troubled that it was too weak.

After understanding its situation, Baby Ginseng had been living cautiously. However, its luck was really off the charts.

For some reason, it encountered a level-eight spiritual fruit, Life Fruit, that even overlord-level creatures coveted. There were no ferocious beasts guarding it.

The Fruit of Life emitted a rich aroma, and the Baby Ginseng couldn't help but eat it.

Normally speaking, after this... the Baby Ginseng would definitely die from overeating.

However, its luck exploded again. Under its extremely uncomfortable state, its body mutated. It didn't know how long it slept. During this process, it completed its evolution.

After it woke up, it could clearly sense that it had become much stronger and had immediately stepped into the transcendent domain.

It was overjoyed, but before long, it encountered an extraordinary-level ferocious beast that stared at it eagerly.

Baby Ginseng's heart skipped a beat. The joy of becoming stronger was gone. It only felt that it was going to die.

A supplement-type pet had too much energy in such a dangerous place. In fact, it was better to be weaker.

What made Baby Ginseng the most uncomfortable was that although it had become stronger and awakened a few new skills, it still didn't have any offensive skills.

The Mutated Ginseng Baby still retained the characteristic of a supplement-type plant pet that had almost no combat power. Under such circumstances, it directly cried in the face of the transcendent ferocious beast that was eyeing it covetously.

However, after the mutation, the nourishing effect of the ginseng baby was indeed much more ridiculous.

After being tortured by the transcendent-level ferocious beast, Baby Ginseng directly made a final struggle and used the nourishing "Sweet Aura" skill, then...

The transcendent-level ferocious beast, due to the intense sweetness, fainted. It fell down with a nosebleed, and Baby Ginseng escaped.

In the next few days, when facing low-level ferocious beasts that weren't that strong, it used this method to escape. There were also a few times when danger surrounded it. The other party had just bitten it and directly fainted from bleeding from all seven apertures, losing the ability to fight.

Baby Ginseng's profundity: I'll nourish you to death!

However, this situation didn't last long before it encountered a monarch-level ferocious beast.

This time, the sweeter Baby Ginseng was, the more excited it was...

Baby Ginseng was helpless..

Then, it was captured by the other party.

However, Baby Ginseng didn't expect that this ferocious beast was the pet of a human Beast Tamer.

After being caught, the human Beast Tamer directly placed it in the ruins space.

After arriving at this plant ocean that was completely different from the restricted area of the Lost World and was like a paradise, filled with replenishing pets of the same type, Baby Ginseng was stunned.

Then, it cried again.

It felt like he had come to heaven.

This place looked much safer than the outside world.

However, before it could be happy for long, the pile of supplementary pets raised here told it the truth.

This was an old witch's spare ingredient storage. They had to provide supplements to the old witch every day, or else they would be made into soup.

Baby Ginseng's heart skipped a beat again.

Then, every time it was grabbed by the old witch to cut and study, it would be so scared that it would be made into soup.

It was too difficult.

Due to the birthplace of the Lost World's forbidden area, it had seen too many passing monarch-level creatures. Baby Ginseng looked at the other supplementary pets in the ruins space who were peacefully accepting the current situation and felt a sense of melancholy.

Why were they all at ease, they were backup ingredients!

If possible, it didn't want to be a ginseng baby or a backup ingredient.

It wanted to be a king of ferocious beasts with extremely strong strength that could decide its own fate.. The super fierce kind.

1

Chapter 135: The Third Pet

The next day.

Morning.

The weather was good.

It was a good day to act cool.

Shi Yu stood outside the Iron-eating Beast Research Institute and looked at the sky. He took a deep breath.

But today, forget it.

As he was going to visit a senior from Bureau 11, he had to be more obedient.

"You two, take it easy. You can rest for two days."

Before leaving, Shi Yu thought to himself.

Just as the vocation assessment ended, Eleven and Buggy started another round of special training in the ruins space. They were too diligent.

"Wuu!" "Ji!"

Eleven and Buggy said that there was no problem.

If they worked hard now, they would be able to enjoy extra points without feeling guilty in a few days!

They already had a premonition that a new storm would begin when Shi Yu was free.

Moreover, didn't he go out today to forage for supplements?

It was a complete sign of increasing points...

"It's not foraging for supplements...!"

"It's to find a new companion for you."

"Although the meaning is similar?"

...

After the vocation assessment ended, the candidates went home and discussed business.

After a night of celebration, Shi Yu had recovered to his optimal state after eating and drinking well.

Using the cell phone's navigation, Shi Yu happily arrived at the arranged meeting place with Senior Lu.

Ancient Capital City Museum of Ancient Life Petrification.

This museum was built 47 years ago, and it covered an area of 30,000 square meters. The museum displayed biological fossils from the totem era to the Beast Taming Era, such as various dinosaurs, Sword Fang Beasts, Abyss Rhinos, Sea Space Giant Kun, and various other ancient biological fossils.

"Senior Li is here. She's the curator here. She likes to study the fossils of extinct pets and use this to study the history of various eras."

"She has heard the voices of many biological fossils and used this to discover many secrets, restoring many historical gaps."

While Shi Yu was waiting, Lu Qingyi appeared behind him and spoke.

After Shi Yu saw Lu Qingyi, he said, "So Li Lianping is a senior from Bureau 11??"

来之前,他自然调查过博物馆资料.

3

The tickets to this paleozoic fossil museum weren't expensive either. Ordinary people could come and visit as they pleased, but the curator was actually a senior from Bureau 11. Shi Yu really didn't expect this.

"Yes." Lu Qingyi smiled.

"This was established by Senior Li when she was young. She established this fossil museum because she actually wanted more people to understand the history of the past. She also built fossil museums in several other first-level cities, but most of the time, she won't stay in the same place. These places are just temporary footholds for her to explore various locations."

As Lu Qingyi spoke, the glass door of the museum opened automatically. A short old woman with silver hair and a single ponytail walked out slowly in a white research coat.

She stood at a high point and looked at Lu Qingyi and Shi Yu who were chatting. Her gaze flickered.

She looked at this reserve member of Bureau 11 carefully and observed Shi Yu, who had caused a stir in the archeological world because of the archeological discovery of the iron-eating beast's evolution.

"Looks like Qingyi takes very good care of this new member."

"But of course. After all, she's the only one in Bureau 11 who's about her age."

Li Lianping, the senior of Bureau 11, walked out.

Lu Qingyi's method of finding plant pets was very crude.

She directly inquired on social media, and then a bunch of acquaintances with channels contacted her.

Li Lianping happened to catch a mutated ginseng baby at that time. After asking Lu Qingyi for its use, she said that she could take it.

"It's Senior Li." At this moment, Lu Qingyi also saw Senior Li.

The next moment, Shi Yu quickly looked in the old lady's direction.

Shi Yu looked at the old woman who had her hands behind her back, whose white coat fluttered without wind. Her expression was calm, and his heart skipped a beat. This Senior Li looked so strict...

...

In a room in the museum.

This senior from Bureau 11 made hot tea.

After the three of them sat down, Shi Yu looked at the old senior up close and realized that her aura had gradually faded.

Now, she looked like an old lady next door, looking at Lu Qingyi and him kindly.

"Shi Yu, right?"

"Yes." Shi Yu nodded obediently.

"Qingyi has already mentioned you to me a few times."

Lu Qingyi was silent beside him.

Really?

But did a group of seniors like her take the initiative to ask her for this information back then?

Senior Li Lianping clearly had other things to ask.

"How many times have you entered a 'listening' state?" she asked Shi Yu.

Shi Yu was stunned and immediately said, "It should be four times."

Stone statue 2, ruins 1, ruins 1...

"Four times in half a year." Li Lianping nodded.

This Shi Yu was a good seedling.

No wonder he could break through two ruins in a short half a year. His talent was very good.

"What do you think is the most important thing to listen to the voice of history?"

She took a sip of bitter tea and looked at Shi Yu again.

"Curiosity, and... desire for the truth of history," Shi Yu said without hesitation.

Although he didn't hesitate, he still felt a little hesitant.

Because sometimes, his curiosity was strong enough, and the ruins didn't appear.

On the other hand, when he offended the ruins, the ruins directly appeared.

This was an unimaginable path. Perhaps in the future, if he encountered an unsolvable situation, he could give it a try...

"Your desire for the truth?" Li Lianping nodded again.

She was already satisfied that Shi Yu, who had not undergone systematic learning, could say this.

She continued, "Qingyi has already told me that your third pet needs a plant-type pet, right?"

"I believe my ginseng baby has already introduced it to you."

"Yes." Shi Yu nodded.

"Apart from not having battle potential, the Mutated Ginseng Baby is indeed the best choice. It's not very useful to me. In that case, take it away."

"Thank you!"

"But there's something I have to remind you of."

"This mutated ginseng baby has some problems because it's a mutant."

"But maybe it matches your personality."

"..." Shi Yu's expression was odd.

He felt that this development was a little familiar...

Also, why were problem pets always compatible with him???

"Let me show you." With that said, Senior Li stood up.

Lu Qingyi also quickly stood up. When Shi Yu saw this, he immediately stood up.

In the next second, Shi Yu's brain buzzed as he appeared in a huge plant garden.

The fragrance of various plants instantly entered Shi Yu's nose.

He breathed in the fresh air and immediately felt more energetic.

"This is the ruins space. This place is where I use to specially grow some nutritious medicine. That ginseng baby is here." Grandma Li put her hands behind her back again and looked at a tree branch swing.

The place where she appeared with Shi Yu and Lu Qingyi was right beside Baby Ginseng.

At this moment, Shi Yu and Lu Qingyi saw this little fellow in the form of an ordinary ginseng baby at a glance.

However, there was indeed a problem with this little guy.

He saw that it was holding a broken branch and waving it around.

"Yiya!!!"

"Yiya!!!"

His expression was solemn and serious, like a swordsman who was training hard.

Seeing this, the nearby Hundred Flower Queen Bee, Sky Devouring Dragon Frog, Worm Grass, Lingzhi Monster, and other supplements shook their heads.

This new baby ginseng was probably a fool.

Look at that group of spiritual peaches playing hide-and-seek. They had the awareness of being supplements, of being kids.

It was just a ginseng baby, what did it want to achieve?

"Hua!"

The supplements watched with interest as Baby Ginseng trained its battle skills. In the next second, they suddenly dispersed because the old witch had come.

Baby Ginseng, who was focused on honing his combat skills, was the last to notice.

As the shadow approached, its movements stiffened. It slowly turned its head and looked up at the tall old witch, Shi Yu, and Lu Qingyi.

Then, it revealed a pitiful look.

Ginseng Baby: QAQ

"Yi..." Could it be that today was another day of research?

Forget it, just cut it. It had good recovery abilities anyway, so it could recover no matter how much it cut.

"It's indeed very similar to you." Lu Qingyi looked at Shi Yu.

Shi Yu and Baby Ginseng were both weak chickens, but they had the experience of pretending to be swordsmen. They were a perfect match.

She roughly knew what Senior Li meant when he said that there was something wrong with this mutated ginseng baby.

This ginseng baby probably still didn't understand where its talent was. It didn't have the awareness to be a supplement-type pet at all.

Shi Yu : "..."

Good lord.

Shi Yu exclaimed.

He felt that something was familiar. As expected, it was another problem pet. It was even more unconventional than Eleven and Buggy.

"It's exactly as you see. You have to train it well in the future," said Senior Li.

If a supplement didn't train those recovery skills and healing skills properly and ran to train battle skills, wasn't this being negligent?

This was different from Eleven. Eleven worked hard to train because of its poor talent, while this ginseng baby was clearly ridiculously talented, but it didn't develop in the right direction.

Shi Yu's expression was strange. An iron-eating beast that wanted to become stronger, so it was extremely self-disciplined, a green worm that wanted to become stronger every day in its daydreams, and a baby ginseng that had battle dreams and wanted to become stronger... They were very compatible! It looked like the third one was indeed this Ginseng. It should be able to integrate into this big family very soon.

"Yi." Baby Ginseng looked carefully at the old witch, the new little witch, and the little demon.

How was it going to be dealt with today?

"I like it very much," Shi Yu said. "I feel that it will indeed be very compatible with me."

Senior Li nodded. Since Shi Yu himself felt that there was no problem, there was no problem.

She looked at the mutated ginseng baby and said telepathically, "Then from today onwards, you should follow him. In the future, he will become your Beast Tamer."

Baby Ginseng was stunned.

It wasn't getting cut today, but sold?

Baby Ginseng:???

Baby Ginseng looked at Shi Yu, who was smiling at him. It was at a loss and panicked a little.

Who was this? It kept feeling that Shi Yu's gaze at it was plotting something.

Just like those transcendent creatures that wanted to eat it...

No!!!

It would rather continue to stay here and be sliced up for research.

“However, your Beast Taming Space doesn’t seem to have reached level three yet. Are you preparing to raise it in the ruins space first? Or are you going to leave it with me first and contract it after you level up?”

“Although this ginseng baby doesn’t have any offensive skills, it’s not without combat power. Before contracting, you still have to be careful when touching it.”

“Its recovery skill has so much energy that it can completely burst a creature. In terms of effect, it’s similar to a Beast Tamer eating a divine bean. That’s not a supplement, but poison.” Senior Li looked at Shi Yu.

Shi Yu’s expression turned serious. There was such an amazing thing like that?

At that time, he would like to compete with Baby Ginseng. Would it nourish faster, or would he, Shi Yu, be faster at draining his energy through upgrading points?

“Let’s bond for a while. I believe I can get along with it.”

Shi Yu said.

The three of them were talking normally, so Baby Ginseng naturally didn’t understand.

Only when it was being specifically spoken to it would it use its telepathy ability.

Shi Yu squatted down and looked at Baby Ginseng. He said telepathically,

“How about coming with me? I’ll help you develop your battle talent. Who said Baby Ginsengs can’t fight?”

Leave with him as a Ginseng Baby.

Ten years later, it would be the Heaven Ascension Emperor.

Baby Ginseng was stunned. It gulped, but it still looked at Shi Yu warily.

It felt that Shi Yu was a liar.

However, Shi Yu’s words made Baby Ginseng very concerned.

This ginseng baby was not very old, and its mind was that of a child. It was at the stage where it believed everything others said.

“Yi...”

Really??

Shi Yu said in all seriousness, “You don’t have any resistance against me. Why would I lie to you? Isn’t it easy to harm you? Is there a need to lie?”

Ginseng Baby: ㄟ_ㄟ

Damn it, Baby Ginseng's defense was broken.

Its weak heart was shattered by Shi Yu.

"But although you're very weak now, I guarantee that your battle power will have a qualitative leap in half a year. Do you want to believe me?"

Shi Yu stretched out his hand, wanting to let Baby Ginseng climb onto his palm.

At the side, Senior Li and Lu Qingyi saw Shi Yu squat down and communicate telepathically with the baby ginseng. Although they didn't know what they were talking about, they were quietly waiting for the results.

This was the advantage of being a Beast Tamer with the gift of telepathy.

Before contracting, one could communicate with their pets on a deeper level. The success rate of contracting was the highest of all talents.

"Yi!"

Baby Ginseng fell into deep thought.

It pondered over Shi Yu's words.

It seemed like it really had no choice.

Most importantly, if it was disobedient, it would become soup.

Baby Ginseng was helpless..

Then, it would reluctantly believe it.

It would believe this human for once, for the battle dream!

"Yi!!!"

Baby Ginseng rubbed its tears and climbed onto Shi Yu's palm with a determined expression. Then, Shi Yu smiled and stood up to take a closer look.

Seeing this, Senior Li and Lu Qingyi revealed surprised expressions.

Was he able to make Baby Ginseng let down its guard so quickly? It looked like Shi Yu was quite talented.

"Eh, it's a little fragrant."

After raising the ginseng baby, Shi Yu sensed the fragrance of the baby and could not help but comment.

"Don't smell it. Even if it's just an ordinary body fragrance, you'll feel dizzy," Senior Li quickly said from the side.

After all, it was a ginseng baby of a monarch race. Even if it wasn't a sweet scent skill and was just an ordinary body scent, a Beast Tamer at Shi Yu's level would feel like he was drunk if he took a deep breath.

However, Shi Yu had already taken a deep breath.

“Uh.” Shi Yu looked at Senior Li and said, “It’s alright. I have a body that absorbs supplements easily. It’s just an ordinary fragrance. It won’t affect me.”

His expression was normal, looking completely unaffected. The physique of humans couldn’t be compared to each other. He had once eaten divine beans as candy in an extremely weak situation.

Senior Li and Lu Qingyi were speechless.

“Yi...” At this moment, Baby Ginseng looked at Shi Yu, who was constantly breathing deeply, and panicked again.

It still felt that this human was up to no good!!! Could this guy really let it leave the status of being a supplement and become a battle member?? Trust him??

Chapter 136: Baby Ginseng’s Sect Brother Position

Then, Senior Li began to tell Shi Yu about the specialness of the ginseng baby.

< Name > Mutated Ginseng Baby

[Attributes]: Wood

[Race Level]: Low Class Monarch

[Level of Growth]: transcendent

[Skill]: Sweet Aura (Low-level wood-element skill, releasing a refreshing fragrance. The fragrance has the effect of easing fatigue).

Slow Healing (Low-level wood-element skill, can slowly heal one’s injuries)

Earth Chain (Intermediate earth-type skill, self-linking to the ground, using the power of the ground to recover physical strength)

Nutrition (Intermediate wood-element skill, can condense one’s strength into nutrients suitable for absorbing).

Source of Life (transcendent-level wood-element skill, transforming the body into a source of life, can greatly increase the level of life, and accelerate the injuries and physical recovery speed).

This mutated ginseng baby had three more skills than normal ginseng babies.

They were the Earth Chain, nutrients, and source of life...

Ordinary ginseng babies, as extraordinary creatures, only had two skills: Sweet Fragrance and Slow Healing.

Sweetness could only be used on others.

In addition, the sweet aura couldn't be preserved, and its form was unstable. Every time it was released, too much would be wasted, and the effect was ordinary. Therefore, generally speaking, the breeding base of breeding ginseng babies basically ignored this skill.

On the other hand, some hotels and entertainment venues liked to place some plant pets that could release sweetness.

The best-selling part of the ginseng babies was still the parts cut from their bodies. This could be preserved for a long time and had high nutritional value.

This was how Shi Yu usually ate the roots of the ginseng baby.

Therefore, the Ginseng Baby Breeding Base basically only cultivated their slow healing skills.

This skill was a low-level version of high speed healing. It could slowly heal one's injuries, but it couldn't heal others.

Therefore, the cuts slowly healed. The world of Ginseng Babies being hurt came into existence.

As for Earth Chain and Nutrition, they were actually skills that could only be awakened after a baby ginseng evolved.

The former could use the power of the land to recover its physical state. Coupled with slow healing, it could allow the sliced baby ginseng to recover faster.

As for the ginseng baby that had learned nutrition, it meant that it didn't need to be sliced.

This was because Baby Ginseng could use this skill to directly condense the nutrients with nourishing effects in its body. Moreover, the nourishing effect was better and the preservation time was longer.

As for the source of life, it was the foundation of the power of this mutated ginseng baby.

This was the same as the Gem Cat's Eye. It was a passive skill to modify the body. Learning this was equivalent to indirectly increasing the level of one's life.

This ginseng baby could immediately break off its branch and be reborn after being bitten by a transcendent beast in the Lost World's forbidden zone. It could rely on its own nourishing effect to make the transcendent beast faint. This skill was the most important.

Its sweet aura, slow healing, Earth Chain, nutritional supplements, and other skills were all ridiculously effective under the enhancement of the source of life.

After Shi Yu realized all the skills of this mutated ginseng baby, he almost laughed out loud.

It was too miserable.

There was really no attack skill.

They were all skills born to become supplements.

"Let's go out," said Senior Li after a while.

"Alright." Shi Yu and Lu Qingyi nodded.

At this moment, Baby Ginseng was getting more and more nervous. It listened to the three of them talk about itself, but it couldn't understand. It could only take the initiative to imagine things in a bad direction...

In short, it had to be obedient... Otherwise, it would be made into soup!

...

In the museum.

Shi Yu put the ginseng baby on his shoulder. He felt that it was much more useful than Eleven.

The bodily fragrance that emitted from time to time made Shi Yu's condition very good.

In the future, he didn't have to carry Eleven to sleep anymore. He should carry Baby Ginseng instead.

No, the panda bed didn't seem to conflict with the ginseng baby.

At this moment, Shi Yu was in a pretty good mood, while Baby Ginseng still had a depressed expression.

It didn't know if the final outcome of him choosing to follow this human Beast Tamer was good or bad...

"You guys are really compatible..."

Although Lu Qingyi didn't know what the hell was with the "physique to easily absorb supplements", seeing Shi Yu interact with such a nutritious pet without being affected, just this point alone was not something that ordinary professional Beast Tamers could do.

"No, no..." Shi Yu smiled.

This was considered a praise, right?

Perhaps, it was like praising his son and father for looking alike, or for a married couple to look alike?

"Heh heh..." Senior Li looked at Shi Yu and Baby Ginseng and smiled.

This way, Shi Yu could freely use his etherealization ability in the future.

Contracting this ginseng baby was a huge guarantee for Shi Yu's personal safety.

There were very few Beast Tamers who had the talent to listen to the Voice of History. She didn't want anything to happen to Shi Yu either.

"Then, I'll leave this ginseng baby in your care," Senior Li said with a nod.

This ginseng baby was considered rare and special.

Even if a master-level Beast Tamer saw it, their eyes would turn envious.

But she was already past that stage.

Only an overlord species pet could move her heart.

The supplements of low-level monarch races were just soup for her...

She just didn't know what kind of sparks this special little guy could spark with Shi Yu, a newbie from Bureau 11 in the future.

"Thank you very much. I'll take good care of it."

Shi Yu said to Senior Li, "Grandma Li is generous!"

Senior Li smiled. "Alright, I won't stay long either. It's time for lunch. Go back."

...

Soon after, Shi Yu and Lu Qingyi left the museum.

Senior Li rejected the invitation for the three of them to eat together.

"Senior, thank you."

After coming out of the museum, Shi Yu started to thank Lu Qingyi again.

Lu Qingyi shook her head. "You're planning to return to Ping Cheng next, right?"

"Yes." Shi Yu nodded.

"When are you preparing to explore the Ice Dragon Ruins? I'll go with you," Lu Qingyi said.

In fact, she had also explored the Ice Dragon Ruins a few times, but she didn't gain anything.

This time, Shi Yu had obtained the key item. She wanted to take a look with Shi Yu.

"Senior, you're coming too??"

Shi Yu was stunned. Although he didn't know Lu Qingyi's exact strength, it shouldn't be lower than master level.

"You don't want me to?" She smiled.

"No, of course you're welcome," Shi Yu said.

"I haven't confirmed the exact time, but I should go take a look soon."

"Alright, then tell me two days in advance," Lu Qingyi said.

"Alright."

Because Senior Li didn't come, Lu Qingyi didn't plan to eat lunch either. She said, "In that case, I'll leave first. You can slowly cultivate your feelings with Baby Ginseng first. Remember to look after your pets. Don't let them accidentally eat Baby Ginseng."

Baby Ginseng:???

Although it didn't know what the two humans were talking about, it felt like it had been shot again.

"No, no, no."

Shi Yu didn't know whether to laugh or cry. Eleven and Buggy couldn't even wait to worship such a nutritious pet like Baby Ginseng.

If they directly ate the ginseng baby. How could the ginseng baby nourish the Beast Tamer's body so that he could give them the pleasure of upgrading points?

Throughout the entire process, Baby Ginseng listened to the two humans' weird language blankly from Shi Yu's shoulder and did not dare to interrupt.

Only when Lu Qingyi also left, leaving only Shi Yu and Baby Ginseng, did Shi Yu speak to it.

"I'll place you in a ruin space later."

"That's the same place you were at before. Your two future companions are also there. They're also my pets."

"You go in first. You guys get to know each other. I'll go in later too."

"Yi?" Baby Ginseng's eyes widened.

Companions?

It was more worried about whether it would be bullied.

...

Then, Shi Yu sent Baby Ginseng into the ruins.

As for himself, he started to take a taxi and prepared to return to the research institute.

He and Senior Panda had booked a flight back to Icefield City tomorrow, so they had to stay in the Ancient Capital for another day.

At this moment, in the ruins.

Baby Ginseng directly entered the ruins and appeared beside Eleven and Buggy.

At that moment, Eleven and Buggy had just finished training and were resting.

Eleven was about ten centimeters long, and it was definitely sleeping. Buggy was also sleeping and resting.

However, as Baby Ginseng entered, the two pets immediately opened their eyes.

The three pets immediately stared at each other.

A Historical Meeting.

"Yi?"

At this moment, Baby Ginseng was stunned.

It didn't expect that Shi Yuzhi's companions would actually look so weak!

They looked even weaker than the other supplements in the garden.

Look at this little iron-eating beast. It wasn't even as tall as its shoulder.

Look at this little green worm. Wasn't its status even lower than supplements?!

Baby Ginseng took a deep breath. Its initial worry disappeared immediately, and it felt that it was safe again.

It originally didn't have much confidence, but it suddenly felt that becoming Shi Yu's pet seemed to be pretty good.

Perhaps its position in the team would be very high.

After all, it was a ginseng baby that walked out of a dangerous place like the forbidden zone!

It had to be confident!

It was actually very strong.

Were so many transcendent-level ferocious beasts that were defeated by it fake? No, it happened!

It was indeed different from the others. It still had some talent!

"Wuu!!!" "Ji!!!"

Eleven and Buggy, who saw Baby Ginseng, were also very excited, their eyes shining.

Not bad!

It smelled very nutritious!

The renewable supplement Shi Yu found was really good!

They all greeted Baby Ginseng.

It meant that our future happiness depended on you!

Of course, as Shi Yu had yet to contract with the ginseng baby, it was very difficult for Eleven, Buggy, and the ginseng baby to communicate normally.

This problem also stumped Eleven and Buggy.

However, these three pets were all gesture masters.

With the language barrier, they directly used body language.

A moment later, Eleven and Buggy "understood" Baby Ginseng's meaning.

"Yiyi, Yiyi, Yiyi!" Baby Ginseng swung its fists and legs, meaning that it would be the boss here in the future.

As long as Eleven and the bugs were obedient, it could reward them with sweet air and nutrients to smell and eat. It was very helpful for their growth.

Look at your little arms and legs. In the forbidden zone, any monarch-level creature that passed by would scare you to death with a little bit of deterrence!

Baby ginseng was clearly knowledgeable.

Coming from a place like the restricted area was also the foundation for it to have such awareness.

However, Eleven and Buggy couldn't understand, so they didn't.

They understood it as the supplement telling them it didn't feel safe with them, and that it hoped to see their strength.

Eleven and Buggy looked at each other to show their understanding and nodded seriously.

This made Baby Ginseng happy. It didn't expect the situation to change so quickly.

However.

In the next second, under Baby Ginseng's shocked gaze, the little panda that was originally not even the size of its shoulder became more than ten meters tall. Its monarch aura leaked out as lightning flashed and thunder rumbled all over its body. It threw a punch into the distance.

"Wuu!!!" Eleven created a super huge pit with a bang, causing the ground to tremble, making Baby Ginseng almost unable to stand steadily. Although the terrifying deterrence didn't attack Baby Ginseng, it immediately made Baby Ginseng feel the same terrifying aura as those forbidden zone kings!

"Roar!!!"

On Buggy's side, it was similarly ridiculous. In the blink of an eye, it turned into a frost dragon that wasn't inferior to the size of Giant Eleven. It also emitted a terrifying dragon might, and strong snowstorms lingered around it!

The aura was similarly terrifying.

Then, Eleven looked at the tiny baby ginseng with its blue eyes that contained lightning. The giant dragon formed by the worm also lowered its head slightly.

"Wuu!!!" "Hou!!!"

They expressed to the ginseng baby that there was no need to be afraid after joining the team. With them protecting it, it just needed to provide Shi Yu with nutrients at ease.

Baby Ginseng: ㄟ ▽ ㄟ ?!!

At this moment, Baby Ginseng was trembling in fear, and its gaze gradually exploded!!

It immediately understood. It wasn't the position of the boss in the team at all, but the position of the younger brother in the team. These guys actually knew how to transform.. It couldn't compete with them!

Chapter 137: Best Partner

In the face of the giant Eleven and the Ice Dragon Buggy, Baby Ginseng became depressed and understood that it was useless.

In a place like the forbidden zone, it was trash.

In the old witch's botanical garden, it was trash.

Now that it had come to a new environment, it was still trash.

"Yi!!!"

Baby Ginseng sat on the ground and started thinking about ginseng life again.

The more it thought about it, the more annoyed it became. As it thought about it, it fainted from anger and fell down with its head tilted.

Eleven, Worm:!!!

"Wuu!" "Ji!"

Baby Ginseng suddenly fainted, scaring Eleven and Buggy, who were showing off their strength.

The two of them quickly recovered and ran to baby ginseng.

What... happened?

Their deterrence didn't touch the ginseng baby!!!

Eleven hurriedly checked and realized that Baby Ginseng's breathing was very even. It should have fallen asleep due to excessive mental pressure.

"Ji!"

Buggy was scared. It was good that he didn't die.

"Wuu!"

Eleven nodded and wiped its forehead nervously.

This ginseng baby was too weak.

"Huh?"

But soon, Eleven was stunned.

It used its super vision to observe Baby Ginseng. Eleven was surprised to discover that this guy's energy value... seemed to be even greater than its own.

Its energy value was so huge that it was even higher than that Zonyan Rock Beast. It was a bit exaggerated.

So, was it weak or strong...

...

When Baby Ginseng woke up, Shi Yu was already in the ruins space.

"You're awake!"

Shi Yu sat cross-legged in front of Baby Ginseng and waved at it.

Eleven and Buggy stood on both sides of Shi Yu like guardians.

Baby Ginseng, who woke up, immediately widened its eyes when it saw Eleven and Buggy.

“Yi Yi Yi Yi Yi Yi Yi!!!”

Ginseng Baby: I don’t want to be the boss anymore, I’m still a baby!

“Uh...” Shi Yu was stunned.

He looked at Eleven and Buggy. What exactly were they talking about???

“Wuu?” “Ji?”

Eleven and Buggy looked innocent. There was nothing at all.

“Forget it. In any case, Baby Ginseng, welcome to the team!” Shi Yu said to Baby Ginseng again.

“In the future, the four of us must get along harmoniously!”

“But I have to correct you.”

“You’re already five years old.”

“And Eleven isn’t even two years old. Buggy isn’t even one year old yet. They’re the babies.”

Shi Yu said in all seriousness. Baby Ginseng was a baby, but in this team, it wasn’t entirely a baby.

Eleven and Buggy also nodded seriously. Big Brother Ginseng, you have to take good care of them in the future.

Baby Ginseng:(● o ●)?

Baby Ginseng looked at Eleven and Buggy, who had just become ten-meter-tall monsters and dragons, and its mouth fell open.

Was this a year old???

Bang! Bang! Bang!

Baby Ginseng started to hammer its skull with its fist, unable to accept reality.

It felt like he wasn’t awake yet.

Eleven, Buggy, Shi Yu:...

This ginseng baby indeed looked very problematic.

A moment later, Baby Ginseng cried: o(∩_∩)o

It kept feeling that everything that happened around it was strange.

“Yi...”

At this moment, Baby Ginseng raised its head nervously.

It asked Shi Yu if what he said was true.

Could it really become very strong?

Seeing how unscientific Eleven and Buggy were, it felt like it could believe Shi Yu.

It also wanted to become as strange as this ten-centimeter panda and worm.

“It’s no big deal...”

Shi Yu smiled as he looked at Baby Ginseng and thought about whether he should fulfill his promise now so that Baby Ginseng could believe in his abilities.

As long as Baby Ginseng acknowledged him, even if there was no contract, Baby Ginseng would be obedient.

He looked at the thirteen skills in the skill index.

Skills with offensive abilities, Hardening, insufficient compatibility. Plant control, its physique was too weak for him to teach. Spatial shackles, illusory illusions, and thunder palm similarly didn’t have enough compatibility...

It was a little difficult...

However, it could be taught to multiplication.

This multiplication...

Shi Yu looked at Baby Ginseng with a strange expression.

A multiplied ginseng baby?

Even though multiplication was also a strengthening-type offensive skill, why did it feel like after installing it on Baby Ginseng, it became a supplement strengthening skill?

No, deterrence could also be taught.

A king of ginseng babies that could have deterrence was probably as ridiculous as a king of green worms that could deter.

After choosing the two skills, Shi Yu chose multiply.

He smiled and looked at Baby Ginseng. “Eleven, multiply.”

At the side, Eleven didn’t understand, but it still nodded obediently and immediately multiplied in size.

One meter, two meters, three meters, four meters... Three meters, two meters, one meter. One moment, it enlarged, and the next moment, it shrunk, displaying the multiplication skill.

This made Baby Ginseng’s mouth open slightly. It was this skill! What a ridiculous skill!!!

Thinking of the ten-meter-tall Eleven just now, it immediately swallowed its saliva.

This was one year old?

The kings in the forbidden zone weren't that big, right?!

"This is a multiplication skill. It can make the body huge. During the process of enlarging, the body's strength will increase by a lot."

"Think about it, if you had such a huge body, how much would your strength increase? If your strength increases, won't your battle power increase?" Shi Yu analyzed.

Eleven and Buggy looked at each other. They didn't know if the increase in battle power had increased.

"Yi?"

Baby Ginseng was indeed thinking according to Shi Yu's train of thought. It imagined itself, which was ten meters tall, and felt excited.

Baby Ginseng wiped its saliva: (☹▽☹)

Could it learn that?

"Under normal circumstances, a baby ginseng definitely can't learn multiplication."

"However, it's your fault you met a powerful Beast Tamer." Shi Yu touched his forehead and laughed out loud. "Index, increase points!"

As Shi Yu chose to teach multiplication, his right hand suffused a white halo.

At this moment, seeing this familiar scene, Eleven and Buggy looked at Baby Ginseng, knowing that he was going to give Baby Ginseng points this time.

[No pet can resist the temptation of extra points.]

If there were, then just add more points to convince it.

Eleven and Buggy had already expected the scene of Baby Ginseng immediately being convinced.

This temptation was much more useful than any contract.

At that moment, Baby Ginseng was still a little confused.

As Shi Yu placed the hand on its head, Baby Ginseng's brain immediately buzzed.

The white light that represented the multiplication skill experience flowed into the ginseng baby's body. Its body immediately awakened the various uses of the multiplication skill.

At that moment, Baby Ginseng's expression was extremely blank.

But before it could be at a loss for too long, Shi Yu's voice sounded.

"Baby Ginseng, sweetness, sweet aura skill...! Quick!!"

Baby Ginseng:???

It couldn't react for a moment.

“Yi?”

Sweet?

No way, its sweetness could even make transcendent ferocious beasts faint.

Shi Yu wasn't a bad guy. Baby Ginseng didn't want to hurt him with his sweetness.

“Sweet aura, hurry!”

Shi Yu looked at the hundred-hour cooldown with sunken eyes.

At this moment, he couldn't bear to use supplements and wanted to try Baby Ginseng's skill.

“Wuu!!” “Ji!!” Eleven and Buggy also urged the tonic baby.

It's your turn, emergency ingredient! Use it!

“Yi!!!”

Baby Ginseng sensed that something was wrong and sensed the seriousness of Shi Yu, Eleven, and the worm. It was so scared that Baby Ginseng immediately released a sweet aura from its ginseng flower.

In an instant, a faint transparent gas immediately spread around.

Shi Yu took a deep breath and was immediately shocked.

Because the cooldown time was decreasing hour by hour every second, and it was decreasing faster and faster.

Holy shit, the effect was so strong. It completely defeated the Queen Bee Happy Water.

Wait a minute, this level could make a transcendent-level ferocious beast faint?

“Baby Ginseng, use more strength! Didn't you eat lunch?”

What was this situation??

Baby Ginseng looked at Shi Yu who was sucking the sweet air crazily and didn't understand what was going on. It immediately released the sweet aura that could relieve fatigue with all its might.

At the side, Eleven and Buggy, who had just finished training, also took a puff. Then, they surprisingly felt pretty good.

The fatigue from the overload training seemed to have been swept away instantly.

In the blink of an eye, the sweet aura released by the baby ginseng was instantly absorbed by Shi Yu and the others. The baby ginseng immediately took a step back.

At this moment, Shi Yu was so high that he exploded. This was because the sweetness of the mutated ginseng baby was really strong.

In a short moment, the cooldown time for him directly became less than eight hours. After sucking a few mouthfuls of sweet air, the effect was actually better than eating a divine bean!

As expected of a monarch species ginseng baby. As expected of a ginseng baby with an energy level higher than Eleven.

The normal type of sweet aura of perfect proficiency was only so-so.

The advantage of an ordinary ginseng baby was that its vitality and energy were strong, comparable to commander-level creatures, so it was very nutritious. And with the support of this source of life skill, the mutated ginseng baby's advantage in this aspect was even more outstanding!

If Shi Yu, who had the skill index, was a very exhausted target, then this ginseng baby was a very nutritious object.

An exhausted Tamer and an over nutritious pet. Best partners!

"As expected of you."

"How is it? Have you learned multiplication?"

At that moment, Baby Ginseng just reacted, but it was still a little shocked.

First, it was shocked that his all-out sweet aura had actually been directly sucked dry by the three in front of it. Then, the other party was completely fine. Then, it was shocked that after Shi Yu sucked in the sweet aura, he still looked extremely weak and unsatisfied.

Baby Ginseng felt its worldview shattering.

"ಛ_ಛ..." Even as a supplement, it was still trash? Why was the Beast Tamer sucking harder and harder?

In the end, Baby Ginseng was shocked once again. It seemed to have really mastered the multiplication Shi Yu had mentioned.

Baby Ginseng was stunned. It blankly chose to use multiplication.

At the next moment, its size kept increasing.

At the same time, Baby Ginseng could clearly sense that its strength had doubled.

The price was that the speed of energy loss in his body became slightly faster.

"Yi!!!" Baby Ginseng widened its eyes. It... could actually learn multiplication??

Feeling its powerful strength, Baby Ginseng had the feeling that it could crush rocks.

This human didn't lie. He could really make it stronger!!!

"Yi!!!"

Baby Ginseng let out a loud cry as it looked at Shi Yu with hopeful eyes.

It was as if it had found the meaning of being a ginseng.

However, Shi Yu's next words made Baby Geng's heart skip a beat.

"Do you want to become stronger?"

“Do you understand the meaning of life? Do you want to really... live?”

“In the future, be good and release sweet gas and create nutrients. You will have attack skills, battle power, and everything.”

“There’s no conflict between being a combatant and a support healer at the same time, right??”

Shi Yu’s eyes lit up. When he saw that Baby Ginseng didn’t look affected after releasing the sweet gas once, he immediately understood that the team was about to take off.

Maximum Level Hardening, high-level skill... As long as he had his hands, after he contracted this baby ginseng, maybe increasing hardening above maximum level wasn’t a dream.

Well, after returning to Ping Cheng, he would first use the sweetness to increase hardening.

At that moment, Eleven and Buggy looked at Baby Ginseng with hopeful eyes.

The future depended on it!

“...” In the face of the three burning gazes, Baby Ginseng’s expression stiffened and it trembled.

When it recalled how Shi Yu, Eleven, and Buggy looked like they were unsatisfied after sucking in the sweetness, it felt that he had accidentally entered a wolf’s den. This battle Ginseng dream didn’t seem to be that easy to achieve...

The price it had to pay might be more painful than imagined...

Ginseng Baby: ㊦ _ ㊦, it seemed like it could be a combatant, but it still couldn’t get rid of its status as a supplement.

At this moment, Shi Yu had already started to consider another problem.

Speaking of which, should he give the new baby ginseng a name?

Chapter 138: Additional Plan

January 11, Monday.

Yesterday, Shi Yu obtained a ginseng baby and tried out the powerful nourishing ability of the mutated ginseng baby for the first time!

He felt that he no longer needed to buy supplements in the future.

With the sweet aura, the nutrients, earth chain, and source of life, Baby Ginseng could completely replenish the consumption of the extra points.

Of course, Shi Yu also knew that it was all thanks to the level-eight spiritual fruit, the Fruit of Life.

That thing could sell for at least 1 billion, so thinking about it carefully, if he changed the Fruit of Life into supplements, it would be at least 10,000 divine beans...

Apart from the time factor, this quantity of supplements was at least equivalent to nearly 30 full-level high-level skills.

As expected, the nourishing ability of the ginseng baby didn't come out of thin air.

At the moment.

In order to communicate normally, Eleven and Buggy had already started to drag Baby Ginseng away to learn a "second language".

As for Shi Yu, he had already packed his luggage and prepared to return to Ping Cheng with Senior Panda.

The sky was clear, and not a single white cloud could be seen in the blue sky.

In the First Airport of Ancient Capital, a plane slowly set off. Shi Yu sat in his seat and leaned against it, feeling a little depressed.

"What's wrong? In a bad mood?"

Seeing Shi Yu in this state, the panda senior sitting beside Shi Yu turned her head and asked.

Logically speaking... Shi Yu should be very energetic after the vocation assessment.

Now, all the major media outlets on the Internet were praising Shi Yu. If it were other young people, they would have long been feeling smug.

"I'm indeed a useless namer..." Shi Yu slumped helplessly.

He thought about it all night but still couldn't think of a new nickname for Baby Ginseng.

He couldn't possibly do it like Buggy, half-heartedly calling it Ginny or Baby, right?

"Name... name??" Senior Panda was stunned.

"If there's a ginseng baby as a pet, what's a good nickname?"

Shi Yu asked.

After some thought, the panda senior said, "Lil' Ginseng?"

Shi Yu had almost forgotten that Panda's naming skill was also useless.

"It sounds a little stupid and not generous enough."

Future Ginseng Baby was a super supplement that could sweep away monarchs and overlords.

Panda:???

It was just a supplement pet. What kind of name did this guy want?

"What about the names you eliminated? What are they?" asked the panda senior.

"Grand Ginseng Emperor..." Shi Yu looked out the window.

Panda:???

Impressive, but was this really the name of the baby ginseng?

Indeed, one couldn't expect Shi Yu to come up with a good name.

"Why was it eliminated?" However, the panda senior asked curiously.

Shi Yu turned his head slightly. What other reason could there be? It was because Buggy felt that the name was too pretentious, cooler than its own, and protested.

If he had known earlier, he would have given Buggy a proper name. Now, it was even being petty about nicknames. Wasn't this making things difficult for him, a Beast Tamer?

"..."

...

Icefield City.

As a second-tier city of the vast Dong Huang nation, it was located at the border of the country. An even larger ice dragon snow mountain separated it from the heavy seas.

On Blue Planet, compared to land, the ocean was also larger. There were countless ferocious beasts in the deep sea, and it was a forbidden zone that humans had yet to explore.

Even a monarch-level mechanical life form couldn't guarantee that it could safely send humans from one side of the sea to the other.

Shi Yu sat by the window and looked at the approaching icy plain. The humming of the plane sounded in his ears.

"This flight is about to reach the Icefield Airport..."

A moment later.

A group of people rushed out of the arrival hall.

Just as Shi Yu and Senior Panda came down, Hall Master Lin appeared.

He smiled at the two of them and picked them up.

A biological daughter and a junior who was even closer to him than a close friend. He had to come personally.

"Uncle Lin, how's the situation at the breeding base?"

After getting into the car, Shi Yu asked. He wanted to know very much about the impact of the Iron-Eating Beast Breeding Base on the announcement of the Iron-Eating Beast's evolution form and his own victory in the Ancient Capital's assessment!

After all, he had shares now!

"There were hundreds of reservation calls overnight." Hall Master Lin, who was driving, sighed with emotion.

His daughter's dowry was here again.

Shi Yu was stunned. So crazy?

However, the crazier they paid for it, the harder it would be to sell it later.

Shi Yu had already imagined a group of people excitedly buying the Iron-eating Beast, and then realizing the Iron-eating Beast would only eat and sleep.

"Uncle Lin, the promotion and introduction has to be honest..."

"I understand." Lin Hongnian looked helpless.

How could he not understand?

In the past two days, there had been a bunch of master-level Beast Tamers who had contacted him. In order to let the other party understand that the Iron-eating Beast wasn't that perfect, he was about to become the number one anti-fan of the Iron-eating Beast.

However, it didn't work!

He listed the shortcomings of the iron-eating beasts one by one. Even if he made something up, he couldn't resist the buyer's enthusiasm.

Who could he reason with?

Perhaps the iron-eating beast deserved to explode after being ignored for so long.

Senior Panda shook her head helplessly, "Speaking of which..."

She looked at Shi Yu. "When do you plan to let Eleven evolve?"

"Didn't you say before that the reward for discovering the evolution of the iron-eating beast is almost enough to pay for the evolution materials?"

Hall Master Lin, who was in the driver's seat, took a deep breath.

It was fine if Lin Xiuzhu didn't mention it, but once she did, he felt speechless sorrow.

She had cultivated the Iron-eating Beast for most of her life before the Iron-eating Beast had mastered transcendent Level Hardening. As for Shi Yu, half a year?

Moreover, Shi Yu was only 18 years old, but he was already worth more than 100 million yuan. An Iron-eating Beast that was about to have a monarch title was simply a dreamy start.

As expected of a genius from Bureau 11!

At this moment, Hall Master Lin had long known Shi Yu and Lu Qingyi's true identities and relationships.

President Feng, Director Li, and the others all knew, so Shi Yu had no reason to hide it from Hall Master Lin.

In the ruins of Ping Cheng, Lu Qingyi showing up, Shi Yu rising up... Everything could be connected.

This was also what made Hall Master Lin feel the most emotional. Comparisons were odious. Perhaps, as a member of Bureau 11, Shi Yu could really lead the iron-eating beasts further. He could even walk out of the country and let the Beast Tamers of the other six countries feel the strength of the unique pet of Dong Huang!

This was his greatest dream in his life.

"There's no hurry."

"I'm not ready yet," Shi Yu said with a smile.

Apart from the fact that the hardening hadn't reached the maximum level yet...

He also had to increase his Tamer level.

Also, he had not thought of the design of the evolution equipment.

For example, armed claws or bracers?

Or, could it be that, like Squirtle? It had two cannon muzzles that could be used to release long-range electromagnetic cannons...

He even had to consider whether he needed wings and shields. Who knew how many strange shapes Shi Yu, Eleven, and Buggy could have imagined together.

This also meant that they had yet to finalize the appearance of the evolution equipment.

At the moment, the one closest to Shi Yu's prerequisites might be full-strength hardening.

He was filled with endless anticipation. He was curious about the different properties of max-level hardening.

"During evolution... You have to call me." The panda senior waved her fist.

She had a premonition that Eleven's evolution would definitely be very unusual.

"Me too."

Lin Hongnian spoke in a low voice, also quite concerned.

Shi Yu had previously said that the Iron-eating Beast might have a second stage evolution. In terms of which Iron-eating Beast, and which Beast Tamer, that this evolution was most likely to appear on... Perhaps it could only be Eleven and Shi Yu.

During evolution, he definitely couldn't count Elder Lin in... He could even sponsor some evolution materials.

"Dad, drive properly." Sister Panda looked at Hall Master Lin.

"Oh right, Dad."

"This time, Shi Yu plans to explore the Ice Dragon Ruins. At that time, can you go with him?"

Lin Hongnian had experienced many expeditions to the snow mountain. With him around, the panda senior could rest assured about Shi Yu.

“Huh?”

“You plan to explore the Ice Dragon Ruins?” Hall Master Lin immediately looked at Shi Yu in the rearview mirror and said seriously.

“Yes, I’ve already obtained some clues. Perhaps... I can gain something,” Shi Yu said.

Hall Master Lin was silent for a moment before saying, “Let me think. If it’s you, wearing a cold-proof suit, it shouldn’t be a problem to enter the snow mountain.”

“The path to the Ice Dragon Ruins is relatively safe. Many archeological teams have established it. If there’s a need, I can go with you. But even so, it’s best to find more Beast Tamers with you.”

If he were alone, Hall Master Lin could guarantee that he would be safe and sound. He could even stay in the snow mountain for a few months, but with Shi Yu around, he didn’t dare to guarantee all of Shi Yu’s safety.

In a place like the wild, there were too many unexpected factors. The more people, the better.

“Of course,” Shi Yu said. “I’ll be sufficiently prepared.”

“Then there’s no problem. Call me if you need anything.” Lin Hongnian smiled. Then, his mood became strange.

Rumor had it that the Snow Mountain Beast Tide was related to the Ice Dragon Ruins. Could it be true?

If it was true, cracking the ruins and solving the beast tide from the source would have a far-reaching impact on Icefield City.

...

After a few hours from Gudu to Ping Cheng, Shi Yu finally arrived home.

After Hall Master Lin sent Shi Yu to the villa area, he left with Lin Xiuzhu.

After watching the two of them leave, Shi Yu turned to look at the villa area and took a deep breath.

He was finally back!!!

Shi Yu took a few steps forward and returned to the training villa.

As soon as he arrived at the courtyard, he shook out Eleven, Worm, and Baby Ginseng from the ruins space.

“Wuu?” “Ji?” “Yi?”

The three pets looked around. Eleven and Buggy were surprised, while Baby Ginseng was confused.

They were home.

Shi Yu walked forward and patted Eleven on the shoulder. “I’ll leave the cleaning to you.”

With that, he turned and left to get ice cream from the fridge.

Eleven was silent for a moment before squatting down to pat Buggy on the shoulder.

“Wu wu, wu!”

With that said, it turned and left, following behind Shi Yu to eat ice pops.

In the next second, Buggy looked at Baby Ginseng and fell into deep thought.

Damn it, the language barrier was blocking this...

In less than half an hour, Buggy had cleaned up the entire villa, leaving not a trace of dust behind.

It slept directly. Materializing dozens of Green Silkworms to clean with worm silk was just that efficient.

At the same time, this was also a lesson. Buggy pulled Baby Ginseng to the side to learn from it the whole time. After all, such a difficult task in the future would belong to Baby Ginseng.

“Yi...” Baby Ginseng was extremely bitter.

This green worm was indeed a monster. In the blink of an eye, it had actually become dozens in number...

If it had this ability... Well, it still seemed useless. It would only attract more predators and make them more excited.

After the house was cleaned up, Shi Yu also took a shower. After changing his clothes, he started to call Eleven, Buggy, and Baby Ginseng over.

He started to increase their points!

Shi Yu first looked at Baby Ginseng.

[Skill]: Sweet Aura (Perfect), Slow Healing (transcendent), Earth Chain (Proficient), Nutrition (expert), Source of Life (Initiate), Multiplication (Initiate)

Yesterday, Shi Yu had pretty much judged the skill proficiency of the ginseng baby.

Apart from the source of life, multiplication, which were both at entry-level proficiency, the proficiency of the other skills of the baby ginseng was not low.

For example, the skill Slow Healing. Due to the physique of the source of life, its effect was directly comparable to that of a transcendent level skill. It could even easily regrow broken limbs, and it was even more ferocious than a master level healing skill.

As for skills like Sweet Aura and Nutrition, most of the proficiency levels only affected nourishing effects and preservation time. These skills were not low leveled due to the mutation of the baby ginseng, but they had not reached the level of proficiency qualitative change.

For example, Sweet Aura. Only at the transcendent level could it undergo a qualitative change. At that time, it would be able to condense the fragrance into preserved liquid perfume and solid spice. It would

also be able to control the speed and strength of the fragrance's diffusion, from uncontrollable to manageable.

As for the Nutrition Skill, as long as it was below Perfect Level, there were no special features. The proficiency level only affected quality and shelf life. Only when it reached transcendent Level would it be unique.

That meant that the storage time limit was nearly unlimited. Moreover, as the storage time increased, it would absorb external energy and have richer nutrition. Thousand-year-old ginseng roots and ten thousand-year-old ginseng roots came from this.

"At the moment, the nourishing effects of the sweet gas and nutritional supplements are more than enough to restore skills below high level. He didn't have to worry about these two skills for the time being."

"As for slow healing, it can be upgraded to high-speed healing. This isn't urgent. After all, it has learned nutrition. Unless it goes to battle, it won't be injured."

"I can't afford to upgrade Source of life, so it looks like Earth Chain is the only thing worth upgrading at the moment."

Earth Chain could allow the ginseng baby to freeloader energy from an earth vein and provide supplements limitlessly. At this moment, its recovery speed appeared to be very important. It was best to teach it absolute sleep and accelerate its recovery speed.

Source of Life+Earth Chain+Absolute Sleep... Good, good.

Therefore, the current priority should be to ensure the endurance of the baby ginseng.

Then, it was Eleven and Buggy's skills next!

Eleven's hardening needed to be maxed as well, while for Buggy, he had to ensure that the spatial shackles and phantom illusions could easily break through the full-level worm silk cocoon with 100% ease... In this way, after school started, he could start preparing for the evolution of Eleven and Buggy.

"Come on!" Shi Yu seemed to have made a huge decision. He looked at the three pets with a tragic expression.

Eleven and Buggy also had tragic expressions, as if they had made a lot of determination to accept the challenge of their hearts being corroded.

Only Baby Ginseng was still confused. Why were you all so serious... Suddenly, it had a bad feeling..

Chapter 139: Their Limits

In the ruins.

Shi Yu pulled Eleven, Worm, and Baby Ginseng in.

It was actually quite difficult to save money and turn a ginseng baby into a "perpetual motion" ginseng.

He had to increase the proficiency of the Earth Chain Skill as much as possible.

Apart from that, the perpetual motion aspect was also very particular.

At least it wouldn't work in the training villa.

Earth Chain looked very impressive, but it was actually very useless.

Its requirements for the environment were very harsh.

For example, on the ocean, this skill was directly crippled.

For example, on the cement road, the low stamina Ginseng Baby might not necessarily be able to recover Shi Yu's full physical fitness even after a month if it tried using Earth Chain..

Spending a month was far inferior to eating an energy crystal to recover faster.

Only in wild areas with abundant natural energy, fertile land, and rich resources... Or training grounds and battlefields with qualified energy standards would these skills be relatively easier to use.

For example, human cities were places with relatively thin natural energy.

However, although it was thin, the huge power of the land was enough compared to an extraordinary ginseng baby.

What prevented the Ginseng Baby from recovering was also the problem of absorption efficiency.

The energy in the city was thin to begin with, and the absorption effect was inferior to that in the wild. In addition, the skill proficiency was not high, and the absorption efficiency was poor. Therefore, it was really possible that a situation where one could take root for a month, and still not recover their physical fitness to the fullest, would happen.

This was also the reason why Shi Yu wanted to prioritize raising the level of Earth Chain.

Perhaps, only by leveling up to the level near Dao proficiency could Baby Ginseng ignore the environmental factors and absorb natural energy to recover its physical fitness faster.

Controlling natural powers was actually an ability that only guardians and Mythical creatures began to come into contact with and control.

Skills such as Earth Chain and Absolute Sleep could only be considered to have touched the surface. Therefore, the restrictions were huge and the effects were poor.

In fact, the best way was for Shi Yu and the others to directly settle in the wild. This way, the effect of this skill would be the best.

However, Shi Yu thought about it. The growth speed of Eleven and Buggy was not bad in the ruins space either. It was definitely related to training in the ruins space.

Be it the ownerless Beast Taming Space or the ownerless ruins, they could draw strength from nature at different speeds and convert it into various nutrients that were easy to absorb. This was also why pets grew faster in the ruins space and Beast Taming Space.

If it took root there, it could also relieve the problem of the consumption of the ginseng baby being greater than its recovery. Most importantly, it would save Shi Yu and the others the trouble of going into the wild. Moreover, even if it was in the wild, as long as it was close to the city, the natural energy was not especially abundant. Unless Shi Yu went to Baby Ginseng's hometown, outside the country... But that kind of place was even more dangerous than the Ice Dragon Snow Mountain. He didn't want that...

"Baby Ginseng, let me see your limit!"

"Earth Chain, Sweet Aura!"

"Wuu!" "Ji!"

Baby Ginseng, let us see your limit!

Shi Yu, Eleven, and Buggy looked at Baby Ginseng seriously.

Ginseng Baby: ㄟ(*°▽°*)ㄟ

Baby Ginseng's heart skipped a beat. As expected...

It had said that it had a bad premonition. Now, it seemed that the premonition had come true.

It was going to be sucked dry...

Ginseng Baby wanted to cry.

"Hurry up."

"The more sweetness you release, the stronger you will become."

"Don't you want to evolve from Baby Ginseng to a towering emperor?"

"Yi!!!" As Shi Yu finished speaking, Baby Ginseng widened its eyes. A sweet aura suddenly spread from the ginseng flower.

"Let the sweetness wrap around me."

Shi Yu's words made Baby Ginseng immediately take a step back. Shi Yu was definitely the most terrifying creature it had ever seen.

The more one inhaled the sweetness, the weaker they became. It was ridiculous to rush to inhale the sweetness.

It wondered if... he could satisfy Shi Yu this time.

"Yi!!!" Baby Ginseng gulped and controlled the sweet aura to surround Shi Yu.

In the next second, Shi Yu took a deep breath and a white halo suddenly appeared on his right hand.

And it hit Baby Ginseng.

Earth Chain, teach!

Previously, he had already replicated the Earth Chain skill.

And now, it was the other way around.

At this moment, the baby ginseng that was releasing the sweet aura was immediately at a loss.

In its mind, its understanding of the Earth Chain Skill immediately deepened.

The connection between it and the ground immediately felt a little deeper.

Then, Shi Yu's hand did not stop.

At the moment, Baby Ginseng's greatest power, sweet aura, could directly restore nearly 200 hours of cooldown time.

It had only taken 40 hours' worth since he started teaching the Intermediate Skill Earth Chain. In short, in order to not waste the sweet aura, he couldn't stop teaching!

Pa!

In less than half a minute, Shi Yu felt that it was alright again, and his hand hit Baby Ginseng for the second time.

At this moment, Baby Ginseng felt that its understanding of the earth chain had undergone a qualitative change.

[Skill]: Earth Chain (Expert)

This was not the end. Every few moments, Shi Yu would continue to pat it.

In just two minutes, Baby Ginseng was stunned on the spot.

It didn't understand why he suddenly became stronger after the Beast Tamer patted him.

Baby Ginseng:(● o ●)

This was... a human Beast Tamer?

"The sweetness can't stop." Just as Baby Ginseng was in a daze, Shi Yu's voice sounded.

Baby Ginseng saw that the all-powerful sweet aura it had released had actually been completely absorbed by Shi Yu. It couldn't help but widen its eyes.

Ah, this...

"Baby Ginseng, is this your limit?"

Shi Yu asked.

Baby Ginseng was stunned. Of course, this wasn't its limit. A low-level skill like Sweet Aura... Even if it was released at the greatest power, it could still be released many times!

This was what it was like for high energy creatures.

"Yi!!" Baby Ginseng immediately continued to release its sweetness.

At this moment, Shi Yu's hand hit Baby Ginseng again.

Heavens!

Baby Ginseng felt that its skill proficiency had never improved so quickly.

The last time his proficiency increased was when it accidentally ate the Fruit of Life...

Shi Yu = Fruit of Life?

A moment later, Baby Ginseng seemed to have understood something.

Could a Beast Tamer turn the energy around and make it stronger after absorbing its sweet aura?

Could this be the reason why Shi Yu said it could become powerful?

Realizing this, Baby Ginseng's expression gradually became serious.

He should have said so earlier...

It looked at Shi Yu, who was absorbing the sweet aura and constantly condensing light in its palm to slap itself.

Then, a strong desire to compete appeared.

"Beast Tamer, let me see where your limit is!!!" It thought.

Don't stop!

"Let's see who will have the last laugh!" It thought.

"Yi!!!!" Baby Ginseng changed to full power mode. The ginseng flower went berserk like a propeller, continuously releasing all its power and sweetness to wrap around Shi Yu.

"Damn, it's so pungent..."

At that moment, even if the sweetness was very strong and smelled good, Shi Yu's face instantly darkened.

Baby Ginseng was over it?

At the side, Eleven and Buggy looked gratified. This ginseng had potential!

As long as he knew that it was a good thing to have points added, it wasn't stupid!

At this moment, Shi Yu was absorbing the sweet aura while teaching the skill.

His body kept changing between exhaustion and peak recovery.

This process also made his body undergo intense tempering.

Under the protection of the skill index, Shi Yu's physical fitness was also increasing crazily.

Although time after time, Shi Yu still felt an unavoidable load on his body and mind, right now, Shi Yu felt as high as the ginseng baby.

If it were anyone else, they definitely wouldn't be able to absorb the effects of the supplements so quickly.

After absorbing too many supplements, the body would definitely produce a greater burden.

However, under the protection of the second talent of the skill index, Shi Yu really didn't lie to his seniors. He had the "Supplement Absorption" talent.

Not only would the burden produced be reduced to the minimum, but it could also strengthen the body!

He had never felt that his physical fitness had become so obvious and so fast.

When he was a Beast Tamer intern, even if he taught skills with the index frequently, the improvement effect was only so-so...

A moment later, Shi Yu understood.

Previously, when his physique was still in the category of ordinary people, there was a certain upper limit. Even if the skill index gave him multiple feedback, he couldn't escape the category of ordinary people. No matter how ordinary physiques were trained, he was still "human".

However, after his Beast Taming Space upgraded to level two and his own physique became transcendent, the upper limit of his body strength instantly increased by a lot.

The difference between a powerful transcendent and a weak transcendent was even greater than the difference in physical fitness between a strong ordinary person and an ordinary person.

However, as the space increased, the power that the skill index could provide was even greater.

"Yi!!!"

After a long time, because Shi Yu had the protection and feedback of the skill index, and Baby Ginseng focused on only consuming it... In a short period of time, Baby Ginseng cried and realized that its physical fitness was almost insufficient to support the release of the sweet aura.

At Shi Yu's absorbing speed, even with the support of its source of life skill, it couldn't withstand it.

The Beast Tamer in front of it was like a black hole. It was extremely scary, squeezing it dry...

Baby Ginseng shuddered.

Ginseng Baby: 呜呜

Was this... Its limit..?

It didn't expect that as the legendary mutated ginseng baby, it would actually lose to a human...

"That's why you need Earth Chain."

Shi Yu looked at Baby Ginseng who was still standing on the ground and could not help but say in a speechless manner.

After saying that, Baby Ginseng was stunned for a moment before it reacted.

Eh, it almost forgot...

The next moment, its two tender calves were instantly filled with light. It seemed to penetrate the ground and become one with the ground.

At this moment, the nearly perfect level Earth Chain, in addition to the two recovery measures of source of life and the ruins... It all instantly increased Baby Ginseng's energy recovery speed.

Baby Ginseng was delighted. It seemed... to work!

After Earth Chain's level increased, although it couldn't maintain the crazy consumption of the sweet aura, the energy loss immediately became less exaggerated.

"Continue!" Shi Yu chuckled with a serious expression.

"Wuu!" "Ji!"

At the side, Eleven and Buggy even forgot to train. They rubbed their hands the whole time and looked at the combination.

So fierce!

Baby Ginseng was so fierce!

The Tamer was so fierce!

So, when would it be their turn?!!!

Baby Ginseng's crazy increase in points almost made them cry.

Who could resist such temptation!

...

At the same time.

Ancient Capital City.

The old principal of Ancient Capital University stayed at Legend Yin's house aggrievedly.

"Little Yin, that's not what we said before."

"Didn't we agree to let Zhengfan enter Ancient Capital University to study?"

"Why did you change your mind just like that?"

Legend Yin had a calm expression and turned hostile.

"I never promised you."

"What I said previously was that it's all up to Zhengfan to decide."

"At that time, his attitude was that it didn't matter. He could go anywhere."

“And now, he wants to go to the capital.” Legend Yin shook his head, as if he was powerless and couldn’t interfere.

Just as he had expected, after losing to Shi Yu, Yin Zhengfan kept quiet for a long time.

He also made a decision. He would leave his hometown, the Ancient Capital, and compete for a more brutal, more talented, and comprehensive strength. He would leave for the Imperial Capital University, which was currently the number one university in the country, to further his studies in the battle department.

In comparison, the resources facilities of Ancient Capital University and the combat specialization were barely in the top five in the country’s universities...

If he got the title of top scholar, along with the right to be willful at such a young age... Yin Zhengfan naturally didn’t mind.

However, after losing to Shi Yu, he didn’t want to make a random choice. He wanted to catch up to Shi Yu and his father with faster footsteps.

Imperial Capital University was more suitable for him than Ancient Capital University.

“I...” The old principal of the Ancient Capital University cried in his heart. What the f*ck was going on?

He dared to guarantee that this was definitely not Yin Zhengfan’s decision alone. Yin Zhongrong was definitely more inclined to let his child grow on bigger stages like Imperial City and Demon City.

“As a local of the Ancient Capital, he had to study at the Ancient Capital University”? There was indeed no such thing.

The principal of Ancient Capital University also knew that places like Imperial University and Demon University were more suitable for Yin Zhengfan.

But... it was still a pity.

At the same time...

Yu Shu, Zhang Qianyi, Wang Ling, Miao Dongdong, and the others had pretty much made their choice as to where they would go to further their studies in the future.

“Don’t worry, Mom. I’ll definitely surpass that guy within a year.”

Yu Shu promised his mother, the Dragon Tamer. Then, she rolled her eyes.

“Is that so?”

“Of course.” Yu Shu was unconvinced.

The advantages of Spirit Medium and Dragon Tamers depended on development.

After entering university, he would be able to enter the best training venues in the ancient capital that were suitable for Spirit Mediums to train their undead pets. Shi Yu’s telepathy talent would only be greater and greater than his.

On the other side...

Zhang Qianyi's master, an old granny who also had the talent to control beasts, Shu Shu, said calmly to this grassroots girl.

"It's just a secondary vocational assessment. You don't have to worry about the number. The real stage is after university."

"Your talent has greater potential than all of them."

This was because he didn't want the girl to be hit by the fact that she hadn't gotten the best results even though it was a retest.

"Yes," Zhang Qianyi said quietly.

Because she came from an ordinary family, she was stronger than others.

At this moment, she made up her mind. After college, she had to work hard to surpass Shi Yu, Yin Zhengfan, and the others. Moreover, she had to maintain the advantage of crushing Yu Shu.

The vocation assessment ended.

Each candidate had their own destination, and every Beast Tamer Association also concluded their business.

In this year's vocation assessment, the average quality of the candidates had improved again compared to last year.

This was the embodiment of the prosperous development of the Beast Tamer domain.

According to tradition, this batch of candidates would undergo a qualitative change within a year with the support of more resources, be it after entering a business or university, under an even more intense competition environment. They would all be promoted to Intermediate Beast Tamers.

However, at this moment... There was actually an unreasonable candidate who had secretly undergone another qualitative change before school started and before he could enjoy the resources of the university...

"Baby Ginseng, let me see your limit!"

"Yi!! (Shi Yu, let me see your limit too!)"

"Wuu!" "Ji!"

"Baby Ginseng, Beast Tamer, let us see where your limits are!" The two thought..

Chapter 140: Explosive Strength of All Members

It felt good to continuously upgrade points.

Shi Yu was immediately immersed in the joy of adding points.

Several days had passed since Shi Yu returned to Ping Cheng from the ancient capital.

For the past few days, Shi Yu had been living in seclusion.

It couldn't be helped. It was too exciting to use Ginseng Baby to add points.

Be it the sweetness or the various nutritional supplements produced by the ginseng baby, they were all better than the supplements bought. The burden on the body was smaller.

He could also make himself stronger, and he could also make his pets stronger to gain a sense of accomplishment. If he didn't take advantage of this, would he still be human?!

However, Shi Yu did not forget the main goal.

After calculating the time, he made an appointment with Senior Lu, Hall Master Lin, President Feng, and Commander He, these master-level Beast Tamers. He decided to explore the Ice Dragon Ruins together in a week.

Initially, Shi Yu wanted to call a few more.

In the end, Lu Qingyi said two sentences to Shi Yu.

"It's only the Ice Dragon Ruins... There's no need to mobilize so many people..."

"Besides, according to my rich archeological experience, the more people exploring a ruin, the easier it is to fail."

Shi Yu : "..."

Alright, alright!

Since the big boss of the archeological world had spoken, Shi Yu chose to believe it.

Then, he continued to increase points.

...

About ten days after Shi Yu returned to Ping Cheng.

Shi Yu upgraded all three pets.

During this process, Shi Yu felt that his physical fitness had reached another limit.

Because the feedback effect of the skill index gradually decreased.

After testing his grip, he silently discovered that his current physical fitness might not be inferior to those high-level Beast Tamers who had reached level four in the Beast Taming Space.

This change left Shi Yu at a loss for a long time.

He was really a human battle beast.

More specifically, he could already fight some awakened-level pets of extraordinary races with his bare hands.

If the opponent was an adult Iron-eating Beast that had awakened to level ten, Shi Yu would definitely win if he fought with it without using any skills.

This was only the upper limit of the physical fitness level in the second-level Beast Taming Space.

If the Beast Taming Space reached level six, seven, and eight and reached the upper limit of this level of physical fitness, Shi Yu didn't dare to imagine if he could really become a human-shaped ferocious beast and a super Earthling under the feedback of the skill index...

The improvement in physical fitness also brought about a benefit.

That was, Shi Yu's meditation efficiency had become especially efficient.

Originally, he judged that it might take a few months to raise the level of the Beast Taming Space to level three...

But now, with the enhancement of his super physique, he felt that with the full meditation of the Ethereal Stone, this speed could be greatly improved.

But these were not the most important things.

Most importantly, in the past ten days, under Shi Yu's crazy points, each of the three pets' strength had undergone a huge change.

Shi Yu sat in the study and leaned against the old chair. He looked at the pet data book he had recorded in Chinese.

< Name > Ginseng Baby

[Level of Growth]: transcendent

[Skill]: Fragrance (Perfect), High Speed Healing (Perfect), Nutrition (Expert), Earth Chain (Transcendent), Origin of Life (Initiate), Multiplication (Expert), Absolute Sleep (Expert)

In the end, Shi Yu reached transcendent in the Earth Chain skill, upgraded Absolute Sleep to expert level, and got Multiplication to expert level.

In this way, the Earth Chain+the source of life+shrinking+absolute sleep, together with the ruins space... This could roughly equalize the consumption of Shi Yu and the others' points. It would be enough to only absorb natural power. There was no need to buy additional energy crystals to help Baby Ginseng recover its physical fitness.

Of course, as a Beast Tamer who had a ginseng baby, even if he could really borrow the power of nature to completely freeload, Shi Yu wouldn't squeeze the ginseng baby like this.

Shi Yu did not give the baby ginseng any less energy crystals and nutritional supplements.

Even if it didn't need these things to replenish his energy, it was good to have a taste. Shi Yu had the mentality that pets had to be doted over. He gave everything to Eleven to Worm, even if Baby Ginseng hadn't officially contracted with him. Shi Yu had already treated all three pets equally.

Each day, Baby Ginseng still had a lot of entertainment time.

But even so, it didn't miss helping Shi Yu level up the pets.

Currently, Baby Ginseng could completely supply the consumption of skills below super level.

Super skills... At the moment, it still looked far away.

In addition to multiplication and absolute sleep, Shi Yu also taught Baby Ginseng high-speed healing skills.

Due to the slow healing and source of life, the ginseng baby had just learned to heal at a high speed, and the effect was comparable to perfection.

Compared to slow healing, the effect of Perfect Level High Speed Healing was much greater. Most importantly, Baby Ginseng now had the ability to heal others.

Perfect level High Speed Healing also gave Baby Ginseng the ability to form a combination skill with this move. Coupled with the nutritional supplement skill, Baby Ginseng could not only create high-level supplements, but it could also create high-level medicine for injuries. It could be considered to have completely changed its profession to a support nurse. The positioning of it in the team... was a support, after all.

After all, at the moment, Baby Ginseng should have the highest proficiency level in the team.

Although its dream was to become a combatant... After ten days, its combat power didn't increase much. The effect of multiplication was different on Eleven compared to the baby ginseng...

Shi Yu planned to think of a way later to find a wood-element attack skill for it. He could teach it when the time came.

However, although Baby Ginseng's battle power didn't increase much because of its race, Eleven and Worm, who had witnessed the limits of Baby Ginseng and Shi Yu, had completely taken off in the past ten days.

< Name > Green Silkworm

[Level of Growth]: transcendent

[Skill]: Worm Silk (Dao Proficiency), Absolute Sleep (Expert), Illusory Phantom (Perfect), Deterrence (Expert), Super Sight (Expert), High Speed Healing (Proficient), Spatial Shackles (Expert), Instant Transmission (Expert), Concealment (Expert)

For Buggy, Shi Yu increased the phantom illusion to perfect level.

Perfect-level illusionary illusions focused on the word "solid".

It could make the illusion even more realistic. If Buggy transformed into a frost dragon, even Eleven's perfect super vision wouldn't be able to see through it. Moreover, it would be able to clearly feel the lively life force of the ice dragon. The illusion had reached the point of making it look real.

Of course, this also meant that the quality of the phantom had been raised to a higher level, and the power it could display was stronger.

Shi Yu had also taught Worm three spatial skills.

At this moment, Phantom Illusion skill alone could already easily break through the full-level worm silk, but the spatial shackle was still a little lacking. Shi Yu prepared to upgrade this high-level skill to at least perfect level before evolution.

But at the moment, the thing most worth mentioning was that it wasn't so easy for Eleven to defeat Buggy. It would take a lot of effort, and it would have to use all his trump cards. Even so, there was a risk of losing.

< Name > Iron-eating Beast

[Level of Growth]: transcendent

[Skill]: Hardening (Dao Proficiency), Thunder Palm (Transcendent), High Speed Healing (Expert), Super Sight (Perfect), Deterrence (Expert), Absolute Sleep (Expert), Multiplication (Expert)

This was mainly because relatively speaking, Eleven's skills improved less. He only had time to increase the proficiency of Hardening and Thunder Palm.

In the past, it was Buggy who was envious of Eleven's pile of skills. Now, it was Eleven who was envious of Buggy's pile of skills.

After Thunder Palm reached transcendent, Eleven had a stronger lightning control ability. It could even turn the Thunder Palm into a Wave Palm, condense the lightning into an energy body, and release the Thunder Palm, or transform the Thunder Palm into various forms.

This was a small surprise, giving Eleven more long-range attacks.

However, after teaching Eleven's Thunder Palm to transcendent, Shi Yu discovered a big problem.

That was, when this skill reached the level of transcendent, the skill index showed that it could not be taught anymore.

At the same time, the deletion symbol appeared on the Thunder Palm page, indicating that Shi Yu could delete the Thunder Palm at any time.

This made Shi Yu a little silent. This was because the skill index seemed to only be able to increase points in the species skills of pets to the level of Dao Proficiency.

For non-racial skills, reaching transcendent was the maximum level.

Shi Yu's mood was complicated.

Fortunately, this way, the conditions for deleting certain skills were much lower. He could replicate more rare skills.

What was annoying was that some super useful skills outside the race could not be activated to the highest level. Next, the pet could only rely on itself to train.

Therefore, although he had replicated Earth Chain, Hardening and Thunder Palm had become skills that could be deleted at any time on Shi Yu's side. He could empty two new skill slots at any time.

As for max level hardening...

Compared to transcendent Level Hardening, apart from the increase in hardness, there was an additional property.

Growth.

The reason why Hardening was evaluated as a low-level skill was that no matter what the Iron-eating Beast's food was, the nature of Hardening Material was always like that. Apart from becoming a little harder and having a better resistance to physical attacks, it had no special characteristics and didn't have much growth.

However, after reaching the maximum level, Hardening became like the transcendent Worm Silk. It could directly change the nature of the Hardening Material according to the difference in eating food.

For example, if Eleven ate a large amount of Electric Mines, its hardening substance would become more like a magnet. In the hardening state, its control over thunder skills and thunder talent would increase greatly.

If it ate a large amount of lightweight rocks next, it could freely control its weight in the hardened state, be it light or heavy.

It was also the reason why it was a little difficult for Eleven to fight Buggy at the moment.

Because it hadn't grown up yet.

In addition, Eleven had yet to successfully coordinate the super electromagnetic cannon, the ultimate combination of max Hardening and transcendent Level Thunder Palm.

Buggy, who had the addition of three spatial skills and a perfect high level skill, was now able to fight Eleven 40:60 because of that. If the bug's race was a little higher and it had more physical fitness, and if it weren't a weak green worm, Eleven might fail.

Shi Yu stared at the data card. Baby Ginseng still lacked a wood-element attack skill. He had to choose a suitable one. The skills of Buggy were more or less enough. After filling it up, he just had to wait for it to evolve and awaken new racial skills. He still had to add points to racial skills. After all, the upper limit was high. As for Eleven, there were a little fewer offensive skills, but there was no hurry. After all, it was like Buggy. It could be arranged to evolve soon after school started.

"Why do I feel that if the Beast Taming Space's level increases smoothly, in addition to the evolution of Eleven and Buggy... I can defeat seniors like Sister Beast Ear in my first year." Shi Yu's expression was strange.

Too small, the mindset was too small. Ancient Capital University wasn't impressive in the battle department either. He would set a small goal of sweeping through the battle department of Imperial Capital University before his second year.

At that time, he would go to the principal to ask for money. When he was paid for his accomplishments, that would be the start of his legend!

This baby ginseng was really his lucky star.

"Hello!!!"

“There’s a package for you!!!”

Just as Shi Yu was fantasizing, a familiar voice came from the outside.

Shi Yu hurriedly jogged. When he passed by the courtyard, Baby Ginseng, who was taking care of the plants in the villa, poked its head out and followed curiously.

“We will meet again.”

“I haven’t delivered it to you in a long time.”

Outside the training villa.

Shi Yu’s old friend, a young man who rode the Wings of the Wind to deliver goods everywhere, looked at Shi Yu with a smile after delivering a metal pile of mineral resources.

He was a little puzzled. Why didn’t Shi Yu buy supplements this time...

Then, he saw Baby Ginseng beside Shi Yu’s leg...

The courier was speechless.

“Yeah, long time no see.” Shi Yu put the goods away with a smile. At the same time, he was very puzzled. Didn’t the other party know his new identity? From the looks of it, the reputation of a genius archeologist wasn’t enough...

The two of them completed another tacit transaction.

This time, Shi Yu bought a level-four thunder-element mineral resource, the Flat Thunder Stone.

It cost about 5,000,000 yuan. He didn’t buy much, just a box.

After all, he only had tens of millions of yuan now.

This also made Shi Yu a little depressed. Although the money for the additional supplements was saved, the other resources weren’t f*cking cheap either.

The reason why he bought this was to test this so-called growth rate of max-level hardening.

“Yi ~” At this moment, Baby Ginseng looked at the big box in front of it and was extremely curious.

What was this?

Shi Yu smiled and opened the box. It was filled with a pile of sealed dark blue electric stones.

“This is food prepared for Eleven.”

Baby Ginseng:!!!

“Yi!!” In Baby Ginseng’s opinion, Eleven and Buggy were very strange.

One ate iron rocks, alright... But the other ate plants. Damn it.

It was different. Ginseng babies loved to eat dirt and drink all kinds of nutritional drinks.

Baby Ginseng felt that it was very normal.

“Let’s go back.”

Shi Yu chuckled. He picked up the big box filled with metal minerals and walked back with the ginseng baby.

This Flat Thunder Stone’s nature was stable.

The stone had super high control over the lightning energy inside.

Many thunder-element pets used this resource to increase their control over the lightning energy.

When Shi Yu chose the resources, he locked onto the Flat Thunder Stone at a glance.

After all, Eleven wasn’t a thunder-type pet. Even if its Thunder Palm had reached perfection and its Hardening had reached the maximum level, as expected, the electromagnetic cannon that Shi Yu imagined was still lacking.

It was impossible to reconcile the relationship between hardening and the electromagnetic field.

To put it bluntly, Eleven’s control over the metal element was strong enough, but it was still lacking when it came to the thunder element.

Therefore, Shi Yu thought of the Flat Thunder Stone and wanted to see if the full-strength hardening could absorb the stone’s nature.

If it could, Eleven would basically have a second attribute under Hardening: Lightning.

At that time, both the profundities of the Thunder Armor and the Electromagnetic Cannon would undergo qualitative changes.

In short, he would use the Flat Thunder Rock excessively first... When he had money in the future, he would buy higher-level and stronger metal resources to change the nature of the hardening substance!

...

Boom!!!

Boom!!

In the ruins.

When Shi Yu and Baby Ginseng arrived, Big Eleven and the Ice Dragon Buggy were engaged in a crazy battle of flashy moves.

“Cough.”

Shi Yu coughed dryly and immediately made Eleven and Buggy stop.

At that moment, Eleven’s eyes lit up when it saw the huge box in Shi Yu’s hand.

“Wuu!!!”

It quickly became smaller and ran over while the worm recovered and crawled over.

At this moment, when Buggy crawled, it raised its head and chest.

It felt that the gap between it and its leader was gradually shrinking. It was very excited.

“Huh?”

After Eleven ran over, it pointed at the Flat Thunder Stone in the box and asked if it was for it.

Shi Yu smiled and nodded. The next moment, Eleven rubbed its hands and stuffed a piece into its mouth.

Great.

It could finally test the nature of maximum hardening.

“This is a fourth-level resource... In theory, it’s for commander-level creatures to use. Take it easy.”

Shi Yu reminded.

“Ow, ow.” Eleven hurriedly nodded, but it was not a big deal. This was because in the ruins space, coupled with absolute sleep, its absorption of nutrition was very good. There would be no indigestion.

Crack. Crack. Eleven ate a piece after a few bites.

Then, its eyes shone.

Delicious!

It simply ate in its hardened state.

Crack.

Eleven ate very happily. After all, the battle had just ended and it was time to replenish its nutrition.

As it ate, something unexpected happened.

A dark blue lightning suddenly flowed across Eleven’s hardened body. However, Eleven didn’t feel anything unusual and continued eating.

“Yi...” “Ji...” Baby Ginseng and Worm looked at the Flat Thunder Stone. Was this thing... really that delicious?

After eating about three pieces, Eleven gradually felt that the nature of its hardened substance was slowly changing. It raised its head slightly and looked at Shi Yu.

Shi Yu nodded and looked at Buggy.

“Let’s give it a try.”

“Buggy, try using the spatial shackles to seal Eleven.”

“Ji!!”

Buggy didn’t understand, but it nodded.

The next moment, a three-dimensional spatial barrier the size of a room appeared around Eleven.

Expert level spatial shackles!

This was even stronger than the spatial shackles of the Sky Crystal Butterfly. In the previous battle, it was quite troublesome for Eleven to break it.

Using this move, Buggy and the ice dragon phantom disgusted him many times.

As for now...

Looking at the transparent spatial wall in front of him, the one-meter-tall Eleven had a serious expression. It slowly raised its fat arm and aimed its palm in front of it.

Then, a black ball condensed outside its palm.

At this moment, Buggy and Ginseng Baby were still very calm.

But the next moment.

Crack!

A shocking electric arc appeared on Eleven's hardened arm and wrapped around it, making a violent sound!

Then, Eleven's entire arm shone, and powerful electric currents suddenly spread around the black ball floating in front of his palm. This change made the expressions of Buggy and Baby Ginseng change slightly.

What they didn't know was that... the magnetic field that formed quickly with the lightning palm's high-voltage electric current was giving the hardening ball an acceleration! This acceleration was even greater than the power of Eleven!

Boom!!!

Finally, the electromagnetic cannon that Eleven had tried many times but couldn't complete was finally fired for the first time.

"Wuu!!!" Eleven shouted excitedly during the launch.

Boom!!!

At the same time, it was like a thunderclap exploded in the hearts of the bugs and Ginseng babies.

Buggy and Baby Ginseng widened their eyes and only saw a blue light streak across. With a bang, space seemed to shatter and the spatial shackles made by Buggy instantly started collapsing with a flash of lightning!!

In the next moment, the lightning was still accelerating. In the blink of an eye, the light landed in the distance, and a terrifying loud bang was suddenly transmitted along with the fading light. In the next moment, there was even a strong wind that blew over from afar accompanied by this loud bang, completely blowing the spatial fragments away!

“Ji!!!”

Buggy:

Seeing the fragile collapse of the spatial shackles, Buggy’s eyes immediately widened. Holy shit.

What happened!

Baby Ginseng was also stunned. It didn’t understand what was going on and almost got blown away.

At this moment, Eleven stood on the spot and returned to its normal state. Its black and white hair fluttered with the strong wind. It was at first confused, but then it looked at its palm in surprise.

“Wuuu!!!”

Success!!

It also saw Shi Yu’s smile.

The second profundity!! Electromagnetic Cannon!!

“Wuu! (Buggy, come fight!)” Eleven looked at Buggy with fighting spirit.

Buggy:???

“Ji!!!! Are you sure I won’t die if that thing hits me?!!” Buggy thought..
