

Beyond Deep Space

Chapter: 81

"What's going on?" Aoki was upset.

The old man told him the situation gently, and said: "Xinxing has a very powerful research institute. They dug up something in the Daxing'an Mountains. They have been conducting experiments there secretly for the past few years, but they have not reported it to the old soil. Naturally, the relevant departments are going to find them. 'Talk', this time I will find someone to disclose the news there to the gray blood organization, let them go to test the specific situation of the underground test site first, and by the way, educate the gray blood organization in turn, let them understand that in the old The soil needs to abide by the rules. Of course, the Gray Blood Organization is very cautious and only sends a small number of people, so I have wronged you. In order to find a way to fish, I can only use you to attract the attention of the Gray Blood Organization."

"Bastard!" Aoki cursed.

"The danger has been lifted, and all the battleships of the Gray Blood Organization have disintegrated."

Aoki heaved a sigh of relief after receiving this news, and the tense heartstrings of Heihu, Lao Mu, and Kite also relaxed. They were actually locked in reverse by the Gray Blood Organization, and almost became prey from hunters. Today is actually very dangerous .

Wang Xuan didn't make a sound. This feeling is very bad. His own safety is completely out of his control. It is not what he wants to be promoted by others.

From the perspective of the old man, there is nothing wrong with it. The fishing was successful. This battle can be described as clean and beautiful, which greatly hurt the vitality of the gray blood organization.

From Wang Xuan's point of view, as long as there is a slight accident today, their spaceship will be beaten to pieces, and none of them will survive.

"An idea?" Aoki, as a master of old techniques, has a strong sense of nature, and he sensed that Wang Xuan was not in a good mood.

Wang Xuan didn't hide it, and said: "Although fishing was successful today, as bait, we may be swallowed by big fish at any time. In the end, life and death are determined entirely by luck."

Heihu, Kite, and Lao Mu didn't speak, but they all agreed with his point of view. However, they have experienced many crises and are somewhat used to it.

"I will report this matter to the higher authorities." Aoki opened his mouth, temporarily uncovering it.

Wang Xuan thought silently, although the expedition organization is very strong, every action has yielded a lot, but as a chess piece, someone else will throw the position of fate, which makes him feel strongly uncomfortable and has the idea of retreating.

He wants to explore freely in the field of old arts, and doesn't want to be a pawn in some organizations.

In the depths of the Grand Canyon, the clouds were steaming, and the energy cannons continued to bombard them.

This part of the gray blood organization didn't know that the back route was cut off, and their medium-sized warships were completely blown up, but they were still advancing.

But soon they ran into trouble. There were a large number of modern high-energy weapons deep in the canyon, and they launched a fierce counterattack against the invasive gray blood organization.

It wasn't until then that they realized that something was wrong. If it was a fairy grave, how could it be possible to arrange so many high-tech weapons, and there were more energy cannons than them.

Advanced robots kept running out with energy guns in their hands, shooting at them.

The people from the Gray Blood Organization realized that the situation was wrong, retreated quickly, and immediately contacted the rear to ask for support, but they couldn't get in touch at all.

"Who are you, why are you setting up an ambush here, targeting us?" the people from the Gray Blood Organization shouted.

The people in the depths of the Grand Canyon were angry, and said: "You attack our underground experimental field, and you dare to say that we have targeted it, it's ridiculous!"

The troops from both sides smashed the Grand Canyon to pieces, and some robots even went to the forefront. Not only were energy guns spewing beams of light, but they were also wielding long alloy knives.

This kind of battle is quite tragic!

The Gray Blood organization still has small spaceships nearby, but seeing the people from both sides mingling in the canyon, they feel helpless.

In the end, the people of the Gray Blood Organization collapsed and began to flee. First, the spaceship flew into the sky, but before they could go far, they were hit, causing big explosions one after another.

People from the relevant departments stood guard at a distance, and the expedition organization had been waiting for a long time. Seeing the people from the Gray Blood Organization fleeing in defeat, they would naturally not be relentless.

Those people in the depths of the Grand Canyon quieted down, they realized that they were being targeted, and more than one force came to Daxing'an Mountains.

They had a premonition that they would probably not be able to fight this time, so they roughly guessed which side had arrived, and they could only blame themselves for secretly conducting research here for so many years, and did not report to the relevant departments of the old soil.

But they were unwilling to hand over all the scientific research results like this, and decided to show the extraordinary here to facilitate the next negotiation.

Chapter: 82

While communicating with the opposite side, they transported something from the depths of the ground. It turned out to be a piece of golden bamboo with leaves, full of vitality. A powerful supernatural force erupted.

In an instant, the nearby spaceships were disturbed, as if they had suffered some kind of shock wave.

"The raw material of the golden bamboo slips?" Wang Xuan was moved. Standing in front of the big screen of the spaceship, he couldn't move his eyes away. The leaves on this piece of bamboo were flowing with golden clouds and blooming with light and rain. instrument.

Aoki was surprised: "The supernatural power is released through that bamboo, and it is one-way, making sure that they themselves are not impacted."

What is there in this underground area? The research institute from Nova actually displayed this extraordinary plant unabashedly.

After so many years, the major organizations and chaebols in Xinxing found a total of four golden bamboo slips in the old soil, but they have never obtained this kind of native bamboo living body. There are actually underground in Daxing'anling?

"boom!"

Apparently, the top management of the expedition organization and people from the relevant departments were reported, and quickly took action to deal with the remaining people of the Gray Blood organization, and then ceased fire, accepted the connection from the deep underground experiment site, and started negotiations.

"Aoki, you and Jin Chuan go to accompany the people from the relevant departments to the canyon to see what's going on in the underground experimental field?"

At this time, the old man spoke to Aoki again, asking him to bring a few capable assistants to go deep underground.

There is no doubt that the expedition organization has always had close contacts with relevant departments, otherwise there would be no such cooperation today.

Heihu, Kite, and Old Mu all watched eagerly. They all wanted to go to the Grand Canyon to see what this research institute from Xinxing had discovered and what kind of scientific research results it had.

They knew that there would be no danger in going in now, the spaceship outside was flying across the sky, all kinds of high-energy weapons were aimed at the canyon, and the people underground would only go to war unless they were crazy.

"Xiao Wang, Heihu, you two come with me." Aoki got off the spaceship first, and then he selected six people from other groups to follow him.

Kite and Old Mu were slightly disappointed, but they could understand that although there should be no danger, they still had to choose someone with better skills to go.

Jin Chuan also came with eight people, waiting at the entrance of the Grand Canyon.

Seven people from the relevant departments came over. The leader was about 40 years old and was in charge of contact and preliminary negotiations. He wore black-rimmed glasses.

When Wang Xuan saw his profile, his heart skipped a beat.

Not long ago, when he heard the voice of the old man on the phone with Aoki, he wondered for a while, was it his old colleague?

Now, when he saw that middle-aged man wearing the same style of black-rimmed glasses as the guy in his office, he was naturally almost suspicious.

Fortunately, he was sure that even if this person was wearing a simulated human leather mask, he was definitely not that old man. As an old art master, he had a strong intuition.

Beside the man with black-rimmed glasses are two members of the military, both of whom are masters in the field of old arts.

The remaining four are professionals in the field of life science research, and this time they mainly accompanied the four of them in to watch and confirm something.

The Grand Canyon was smashed to pieces, and a small spaceship appeared, taking them deep into the end until they sank into a huge cave.

Then they stepped out of the spaceship and saw the underground fortifications, which were well-built, and various facilities were completely built according to modern standards.

The lights are bright, the underground is vast, full of modern atmosphere, as if entering the interior of a skyscraper.

Underground, there is a large area of living quarters, as well as a state-of-the-art laboratory area.

A group of people took the elevator down for more than a hundred meters before stopping. Then they left the underground modern area and walked towards a cave.

"This is where we made the most astonishing discovery. Since we decided to share it with the old land, we will never hide anything now..."

Accompanied by people from Xinxing, explaining along the way.

Chapter: 83

Their organization is not small, and they have a great reputation on the Nova side. They are a life research institute called "Origin".

It sounds like just a scientific research institution, but in fact it spans various fields and has a huge industry, otherwise it would not be able to support them to build such a huge experimental field in the old soil.

At the very least, they are not afraid of mercenary organizations like Gray Blood, because the Institute of Origin Life itself has enough guards.

"How did you find this place?" asked the middle-aged man wearing black-rimmed glasses on the road.

This is Daxing'an Mountains, where the primeval forests are dense, and there are no famous mountains and rivers, and there are no myths and legends. If there is no news, if you come here to dig the ground and dig down hundreds of meters at every turn, you are either crazy or stupid.

A female researcher from Xinxing explained: "We deciphered a volume of pre-Qin bamboo slips, from which we knew this place, explored for many years, and finally found it here."

"What is recorded on the bamboo slips that is worth pursuing all the way?" asked the man wearing black-rimmed glasses.

Wang Xuan is not far from him, and he is also very interested in these issues.

"The bamboo slips mentioned a female alchemist who seemed to be famous in that era and aspired to be a fairy. Although the bamboo slips recording her were damaged and the text was incomplete, this position was mentioned, so we searched all the way."

The Xinxing people have dug up several broken corpses of pre-Qin alchemists in the old soil, and extracted abnormal substances from their bones and hairs, which are of amazing scientific value. Since there is a female alchemist here who is expected to become a fairy, they naturally Very tempting.

It should be noted that the most powerful alchemists are all myths and legends. There are all kinds of incredible things, and it is difficult to find their remains.

Once there is news about them, even in the era of the rise of new technologies, it will also attract the attention of major institutions.

Moreover, the immortals are nowhere to be found, and many people think that the top pre-Qin alchemists may be the legendary immortals!

"Have you found that alchemist?" The middle-aged man wearing black-rimmed glasses asked.

"I found it." The female researcher who accompanied him all the way into the cave answered this question affirmatively, and she ordered someone to open the stone chamber ahead.

Amidst the rumbling sound, the stone door was opened, and an inexplicable breath suddenly circulated.

In fact, even though he hadn't entered yet, Wang Xuan believed the female researcher's words.

He had a very familiar feeling, as if standing in the "inner scene", he captured some mysterious factors, that kind of substance was slowly falling here!

Then, everyone was shocked.

In front, there is a golden bamboo with a diameter of one meter, which was cut open and made into a boat. In the center lay a young woman, lifelike, as if she had just fallen asleep.

This woman conforms to the aesthetics of modern people. Her delicate skin is snow-white and crystal-clear, her hair is black and shiny, and her appearance cannot pick out any flaws.

"She still has life in her body!" Aoki said solemnly, and he was a little nervous when he spoke the first time.

Although the woman closed her eyes and remained motionless, the faint aura exuded made Aoki feel palpitations, like a herbivore seeing the king of beasts, strong anxiety, and an urge to run away.

Wang Xuan was also staring at the woman in the golden bamboo boat, and indeed felt a strong vitality.

The body of this young woman has not rotted, and the clothes on her body have a strong style of the pre-Qin period. After so many years, they have remained intact just like her body.

"That's right, her body seems to be still alive!" The female researcher from Xinxing nodded solemnly.

Thanks to the leader of the Silver League: The Hunter of the Three Lives, thank you for the support of Silver.

Thank you also: Miss Jiaran, the owl with weak stabs, became the leader, thank you for your support.

Over the years, the relevant departments and various organizations of Nova have unearthed strange things from the old soil, but the golden bamboo with a diameter of one meter is unprecedented.

It was cut open and made into a small boat, which was probably also a big deal in the pre-Qin period!

Chapter: 84

The major organizations of Xinxing used to fight for a few golden bamboo slips, but now the living bamboo appeared with a vigorous breath of life.

There are more than a dozen branches on the bamboo boat, all with leaves, and from time to time, a golden rain falls, falling on the body of the female alchemist who is as quiet as sleeping.

A female researcher from Xinxing explained that the bamboo branch brought to the surface just now was a section taken from a small boat.

"You mean, there is still a possibility for her to come back to life?" The man wearing black-rimmed glasses called himself Qian Lei, and carefully and carefully understood the situation.

The people above attach great importance to this place, but anything related to longevity is a big deal, not only the plutocrats of Xinxing care about it, but it is also the same in the old land.

"It's impossible. She has been dead for thousands of years. The self-awareness that is the most essential feature of human beings has long since disappeared, and the bioelectricity in the brain has collapsed."

As one of the project leaders, Zhou Yu knew better than anyone else that the female alchemist had been dead for at least three thousand years. The only puzzling thing was that her physical body was still active.

Later, after tests and tests, they all agreed that it was related to the golden boat and her own supernatural power.

"Let's talk about it specifically." Qian Lei asked for advice. He needs to understand in detail, and Old Earth must participate in the follow-up research work of this underground test site.

Several scientific researchers from Xinxing explained, from the discovery of this underground relic, to the direction of their research in recent years, and the preliminary results obtained so far, etc., and gave a general introduction.

As one of the project leaders, Zhou Yu added that she clearly knew what some people in the old land were most concerned about.

"After testing, her biological age before death was about twenty-five years old."

"So young?" Qian Lei was taken aback. Being in a special department, he knew far more about pre-Qin alchemists than ordinary people. It was unheard of for him to become a top alchemist in his twenties.

"No, to be precise, her twenties are only her age of physical activity. After various methods of detection and analysis, we have scientifically calculated that her actual age when she died was about 230 years old. I have to say that she is very old. It's amazing, from the number of cell divisions to the consumption of telomeres, her indicators are far beyond ordinary people."

This age still maintains a youthful state, which made Qian Lei look extremely serious. He adjusted his glasses frame and asked, "Is the data credible?"

Zhou Yu knows what he or the people behind him are hoping for. From ancient times to the present, the topic of longevity can be said to never fade, and it is the most mysterious.

Many people are searching for it. From the pre-Qin period to the present, the old events of the past have been repeated, and it has truly attracted countless heroes.

It's just that the chaebols of this era are more direct, publicized, invested a lot of resources, and have achieved initial results.

Zhou Yu said: "The cause of her death is unknown, but it was definitely not a natural death. Based on her physical activity, theoretically, she can live to be at least seven hundred years old, and the upper limit is about nine hundred and fifty years old."

Qian Lei was very disturbed. He knew what this meant. Once he reported to the authorities, this underground experimental field would become one of the most important laboratories in the old land from today, and the security would be raised to the highest level.

Several scientific researchers in the old land were looking at some data reports and kept nodding their heads. They were quite excited. This underground experimental site has done many experiments using the blood, bone marrow, and muscle fibers of female alchemists. The data are detailed and the conclusions are credible.

Wang Xuan paid attention to listening and observing. The 230-year-old female alchemist still maintained the physical activity of her twenties. It was really

amazing. He knew very well that an alchemist with such great achievements must have been to the inner scene.

"Her telomeres are far longer than ordinary people, which means that the upper limit of her life expectancy has been greatly increased in theory."

Several researchers from the old land were eager to participate in this project immediately.

Zhou Yudao: "We extracted a magical substance from the blood of the female alchemist, which can extend the lifespan of ordinary people to a certain extent."

Hearing this, Qian Lei looked solemn, and said, "Do you have any phased results? I'm asking about clinical trials, etc. Are there any real cases that have extended the lifespan of a normal person?"

"Yes, Xinxing has a very important client of ours and one of our investors. He provided 30% of the funds for this underground experiment site. We will extract it from the blood of the female sorcerer. After more than two years of follow-up and observation, it was found that he, who was already short-lived, can theoretically live for more than fifteen years."

When Zhou Yu said this, several people in Jiutu were extremely surprised.

Even Wang Xuan was secretly amazed that the female alchemist had been dead for more than three thousand years, but there were still some longevity attributes hidden in her body, which was indeed extraordinary, almost like the flesh of a Tang monk.

Qian Lei's expression changed immediately, and he said, "Do you still have such clients? How much of that active substance have you extracted from the female alchemist?"

Chapter: 85

Zhou Yu replied: "There are still some big customers who are waiting for our samples, but we don't want to waste our money. We have been trying to artificially cultivate the cells of the female alchemist over the years, but the results are not satisfactory. For example, her blood contains supernatural power. Once Leaving the body, its properties are extremely unstable, and there have been many laboratory explosions."

"We have another experiment, we are going to try to upload the thought memory of a volunteer from Xinxing to the brain of the female alchemist, and reactivate the bioelectricity in her brain, to see if we can use her incomparably powerful physical activity to make the Another person is reborn."

"No!" Qian Lei was in a hurry, and directly objected loudly with some gaffes.

Wang Xuan was also in a daze when he heard that, there is such an experiment?

"In Xinxing, this kind of technology has accumulated to a certain extent. In the eyes of our researchers, all human beings are actually no different from robots, but we are more delicate. Human brain thinking activities are just a set of complicated programs. , theoretically it can be replicated."

Qian Lei said in a deep voice: "The experimental project you mentioned is suspended, this cannot be done."

Then he asked again: "Who is that volunteer?" He felt that ordinary people would never get this opportunity. He wanted to use the body of the female alchemist to revive and live for hundreds of years without dying.

"It's the founder of our Institute of Origin of Life—Ms. Zheng." Zhou Yu told me calmly that 60% of the funds for the construction of this underground experimental site came from Ms. Zheng.

Qian Lei said: "Since we want to cooperate, we need to discuss the most secure plan. Your experiment is too risky, and it is not suitable to proceed at this stage."

"Actually, I personally don't agree with resurrecting another person's thinking and memory on her body. I am more inclined to the latter plan, which is to fully dissect the female alchemist, and use the most advanced life instruments on Xinxing to record and decipher her. The genetic information of the body, in essence, comprehensively analyzes and compiles the microstructure of this kind of person that breaks the ceiling of human life..."

Wang Xuan was quite speechless after hearing this, and mourned silently for the female alchemist, who had been dead for thousands of years and could not live in peace. She was often drawn for blood, and now she was going to be dissected.

Qian Lei was taken aback, this very quiet woman was actually so crazy, he quickly said, "Don't act rashly, some experiments must be shelved first, and we will discuss after our plan comes out, since we want to cooperate, we naturally need a win-win situation. "

...

"This kind of bamboo contains supernatural power and has very strong activity. After we refined it, we found that it contains no less life factors than the body of a female alchemist."

When mentioning the thick bamboo that was made into boats, the female researcher Zhou Yu regained her spirits.

When Wang Xuan heard this, he couldn't help asking a scientific researcher next to him, and said, "Are there any other discoveries such as bamboo slips in this underground cave? It's impossible that such a powerful female alchemist didn't leave other things behind?"

The scientific researcher shook his head and said: "No, when we came in, this underground cave seemed to have experienced a big explosion. Many places were charred black, and even the bamboo slips were turned into ashes."

After the scene he described, whether it was Aoki, or the two masters of the old army, or Qian Lei, who was very strong in his own right, all looked extremely serious.

Qingmu said in a deep voice: "From what you said, this is very similar to what was recorded in the bamboo slips left by other alchemists in the pre-Qin period."

"That's right." The old military master nodded and said, "This is very similar to the description of a big explosion after the failure of eclosion."

There have been debates in later generations about feathering. Some people think that taking that road means knowing that you are going to die and using supernatural power to burn yourself.

Some people also believe that becoming a fairy is the embodiment of being about to become a fairy, pushing the level of life to the extreme, and from then on you can truly live forever.

It's a pity that for a long time, there has been no one who has successfully demonstrated it. When all people related to eclosion were discovered, they were definitely dead.

Even, the "archaeological team" sent by Xinxing's chaebol once dug up the ashes of that kind of person in the old soil, and the death was not very decent.

The woman in front of me was mentioned in other pre-Qin Bamboo Slips. She was considered to be the top alchemist among the alchemists, and she aspired to be a fairy.

It's a pity, now it seems that she also failed, so it makes sense why she died when her body was still alive.

Intervening from the perspective of scientific testing, no injuries were found, and the cause of death was unknown.

However, from the perspective of the old technique, it is proved that her spiritual will was broken and completely wiped out at that time, and it is impossible for this kind of person to come back to life.

Wang Xuan was fascinated by listening, another case of failure in ascending to immortality!

There are too many legends about the immortals, but once they are traced back to the truth, it is found that they are only immortals, not immortals.

Chapter: 86

Especially in this era of brilliant technological civilization, Xinxing's many life research institutes and major chaebols, etc., in pursuit of longevity, dug through the old soil, and more than once actually found the characters recorded in "Legend of Immortals", and opened the underground palace for the first time. It was shocking to see their lifelike figures at the time, but it would make people sigh after a while. Unfortunately, the legendary people turned into ashes in a very short period of time, which directly proved that they had not ascended to immortality.

For example, Chixuzi, the real immortal mentioned in "Biography of the Immortals", was found in the tomb in the old days, and a pool of ashes was found. As for Guan Lingyin, even the inner and outer coffins have been dug out, and they have been placed in museums as cultural relics for many years.

Wang Xuan didn't care if Lie Xian was falsified. Today he learned about the lifespan limit of alchemists. This news is important enough for him.

The woman lying in the bamboo boat, as the top alchemist, can live to be at least seven hundred years old, and the upper limit is nine hundred and fifty years old, which is really not short.

It is confirmed by the more famous alchemists in history, such as the famous Peng Zu. It is said that he lived to be 800 years old, and he was indeed in this range.

Wang Xuan was full of confidence all of a sudden, if one day he really set foot in that field, he would have enough time to think about the problems after the end of the old art road.

But after calming down, he also thought of some of the problems.

For example, this woman obviously still has enough lifespan, why is she in such a hurry to become immortal?

What happened back then? Is it related to her personally, or is it related to the general environment? He thought a lot.

"She failed to become an immortal. The reason why she was able to leave her body and retain the vitality of her life is closely related to this thick golden bamboo."

Zhou Yu introduced that the institute named this golden bamboo as Yuhua Shenzhu, which contains rich supernatural substances and vigorous life force.

Qian Lei asked: "Do you have any other scientific research plans and experiments in other directions?"

"There is indeed another plan, we named it—the longevity species."

"Let's hear it." Qian Lei knew that the people in the New Star Research Institute must have reservations about them, but there will be plenty of time in the future, so they can dig out slowly.

"In addition to the dissipated mental consciousness, the female alchemist's body is very active, as if she has been sleeping until now. Her biological age is very young, and she is at the stage of marriage and childbearing."

After hearing this, even the two very stable experts from the military were shocked and dumbfounded, thinking that the researchers of Xinxing were too crazy!

Qian Lei was also in a daze, subconsciously holding on to the black-rimmed glasses, as if afraid of them falling off, he couldn't help asking: "You mean, after three thousand years, a female alchemist will give birth?!"

"That's right, she is a truly immortal person we discovered, breaking the limit of the ceiling of human life, and the genetic material she left to future generations is absolutely extraordinary and worthy of experimentation."

Zhou Yu had a frenzied look on her face. She was more excited than when she said she was going to dissect the female alchemist. She couldn't help but waved her arm vigorously.

As the person in charge of a department of the expedition organization, Aoki was usually calm and calm, but now he was a little surprised. He suddenly felt that once the polite scientific researchers became "enthusiastic", they would be more terrifying than him.

Wang Xuan: "...". He really felt a little stupid, is this all right? Three thousand years after death, they will not be able to live in peace, and they will have to conceive and have children.

He made up his mind that if he didn't follow the path of the old technique, he would definitely burn himself to death when the deadline came.

He now seriously doubts that the other top alchemists will finally become immortals and burn themselves. Did they already have a premonition of this day?

Qian Lei was very solemn, with a serious expression, and said: "This experiment cannot be carried out at this stage."

As one of the person in charge of the project, Zhou Yu, although she has a lot of power to speak, she didn't mean to confront her when she heard the words. She nodded and said: "We didn't plan to start it in the near future, although the mother body is enough Strong, but I can't find a suitable father body. Wait ten years later, if there is a suitable person on the road of the new technique, I can consider it. As for the old technique, let's forget it, there will never be someone like the pre-Qin alchemist. This road is becoming more and more

unworkable in today's era, and the results are extremely slow, and it is not universal."

Wang Xuan secretly sighed, the female alchemist finally avoided the catastrophe in her life temporarily, but he immediately shook his head again, everyone is dead, the rise and fall of honor and disgrace are meaningless to her.

Qian Lei talked for a long time with Zhou Yu and other managers of Nova, and when he finally left, he asked to take a piece of Yuhua Shenzhu with him and take it back for research.

Zhou Yu and the others seemed to have expected it, and generously gave him the cut bamboo strip.

Aoki was not calm anymore, and wanted to organize the conversation, asking for a piece of golden bamboo on behalf of the expedition organization, but before he could open his mouth, the people from Xinxing took the initiative to talk about it.

"It is no longer possible to cut branches from the bamboo boat. We are worried that it will seriously affect the activity of the bamboo boat, and it may even endanger the stability of the female alchemist's body. If this happens, all experiments will go wrong and can no longer be carried out. "

Chapter: 87

Aoki was tongue-tied, the other party blocked all the roads, and if he begged for nothing, it would be destroying the overall situation here and hindering the experiment.

Zhou Yu apologized, and then sent a golden leaf, expressing that this was the only way to go.

Aoki felt very uncomfortable, looked at the bamboo branch in Qian Lei's hand, and then at the leaf in his own hand, without comparison, there would be no shame.

"Forget it." He could only comfort himself like this.

Wang Xuan said: "I'm really sorry, may I dig out a few stones from this cave?"

The people present were amazed, and the people from Xinxing were puzzled.

Wang Xuan immediately explained: "I am a person who walks the old art path. I admire the former sages. It is like a myth to me. I can witness this kind of relic with my own eyes. I am very satisfied, but I still want to take a few things away from the scene." A piece of gravel, keep it as a souvenir, and spur yourself, the old art path is feasible, and you can reach the realm of immortality, you can be close to the immortal!"

Aoki was surprised, he knew Wang Xuan, knew that he didn't have much respect for Lie Xian, changed his mind today? Actually want to take away a few stones to display.

The middle-aged man in the military smiled, he is a very powerful old art master, nodded and said: "Young man is not bad, Wu Chi, you are very similar to me when I was young, and I will keep in touch with you in the future, even though I am now I started to transition to new techniques, but I haven't let go of all the old techniques, if you have any questions you don't understand, you can come to me and we can have a good chat."

Wang Xuan immediately expressed his gratitude with a sincere smile on his face, and took the initiative to exchange contact information with him. Of course, what he left behind was the mobile phone number specially connected with the expedition organization.

The project leader of Xinxing and other scientific researchers, seeing that he was like this, and someone from the military spoke, nodded, with an indifferent attitude.

In fact, they have searched here long ago. The female alchemist did leave some utensils behind, but they were almost burned, and there was nothing else of value.

Moreover, they have used the most advanced instruments to detect dozens of times, and the cave has no interlayers, etc., and no other special substances and energies.

Wang Xuan was very casual, and picked a few stones from the cracked cave wall with his bare hands. The strength of his hands surprised the Xinxing people.

Although the cave has been cleaned, there are still traces of scorched black between the cracks. It doesn't look like it was burned by feathers, but it looks like it was struck by lightning.

Wang Xuan had no expression on his face, and took away six stones in total, and then he backed away silently, looking calm, but in fact he was very excited.

Aoki sighed: "I am also a person who practices old techniques, but unfortunately I am not up to date. Although I worship the former sages, but my own strength is not good enough, I have to take the road of new techniques. Take two stones as a souvenir."

What can Xinxing's people say, they only gave him a leaf, and they can't treat each other with respect to stones, right?

"Oh, our old way is over, from now on we can only look to new techniques." The middle-aged man from the military stepped forward, quite sad, and grabbed two stones as well.

"It's sad!" Jin Chuan sighed, walked over silently, and put two fist-sized stones into his arms.

Wang Xuan was in a daze. He was convinced that these three people actually didn't understand anything, and they followed him to do the same thing. Is this a monkey spirit, or is it just a follow-up?

The new star people laughed, trying to take advantage of them? It's ridiculous. This cave is almost full of flowers. It has been tested a hundred and eighty times. If there is something valuable, will it be kept for you?

"You guys!" Qian Lei sighed and shook his head.

Aoki, Jinchuan, and the middle-aged men in the military were a little embarrassed and a little embarrassed, but everyone understood.

Qian Lei took the lead and turned to leave. Soon they took the elevator back to the surface and were sent out of the Grand Canyon by a small spaceship.

"Little brother, I saw that you brought out a lot of stones. I suddenly remembered that if my comrades in arms ask me for them, two yuan is not

enough for me. You can give me another one or two." The middle-aged man in the army He looked at Wang Xuan with a sincere expression.

Wang Xuan sighed, this man was so polite earlier, what kind of martial idiot, he was very similar to him when he was young, after talking a lot, it turned out that he was grateful to him for nothing.

Qian Lei helped the glasses frame, and said, "Little brother, give me a piece too. After all, it is a rock from the scene of the Yuhua explosion. I need to take it back and have it checked by a special person."

Wang Xuan is really speechless, as expected, they are not simple characters, they are all actors!

However, he didn't care. He had anticipated certain possibilities. He took a few extra stones, but he only cared about two of them.

Chapter: 88

So he didn't say anything, and silently threw a piece to the middle-aged man and Qian Lei, seeing that Aoki also opened his mouth, looking embarrassed, he took the initiative to throw a piece over.

Jin Chuan immediately said: "Brother, we belong to the same expedition organization..."

Before he finished speaking, Wang Xuan directly refused, saying: "No!" Of course, he did not forget to add: "You intercepted and killed me last time!"

Jin Chuan was so choked that he wanted to correct him for being a jerk, but he finally shut up and turned away, not wanting to take the initiative to find Qi Shou.

Wang Xuan looked at the group of middle-aged men and said, "Aren't you thinking too much? I really want to take it back for display, and I want to remind myself all the time that old skills can be very strong. What are you all thinking?!"

"Haha, it's because of life experience!" The middle-aged man in the military was very calm, and didn't add drama this time.

"Let's go, retreat, it's time to go home!" Aoki patted his shoulder.

Not long after, they boarded the spaceship and returned smoothly. Although the mission was not dangerous, Wang Xuan already had the idea of quitting, and did not want to put his fate on other people's chessboard.

Right now, his mood is not depressed, on the contrary, he is very excited. With the stone in his arms, he can't wait to return to his residence immediately. With his calm personality, he can hardly hold it back. One can imagine the value of the stone.

After Wang Xuan returned to the city, he went straight to his residence without any delay. He couldn't wait for a moment!

There is no cloud in the night sky, the galaxy is brilliant, and the universe is deep, giving people infinite reverie.

A flying saucer flew across the city like a meteor, and went away in an instant, leaving only a faint afterimage of its trajectory. The speed was too fast.

Soon another battleship turned into the sky, the alloy hull exuded a cold radiance, this is a giant that can move horizontally in the deep space, rushing to the distance at an extremely fast speed.

Chewing the food in his mouth, Roujiamo in one hand and soy milk in the other, wearing the stars and the moon, hurried back to the old community, looking up just in time to see this scene.

He was a little surprised, is there any action? Even the large warships were dispatched, and they flew across the sky above the city.

Still on the way, he was about to finish his dinner, and all his thoughts were on those two stones.

At this time, his phone rang, it was Aoki calling, what could happen not long after we separated?

Wang Xuan settled the last food in twos, connected the phone, and immediately heard Aoki's laughter, he seemed to be in a good mood.

"The gray blood organization's strongholds in the old soil have been pulled out, and all spaceships and battleships can't escape. The relevant departments will take action and severely warn organizations that do not

abide by the rules of the old soil. Starting tomorrow, those institutions and organizations from the new stars will A lot more low-key."

Wang Xuan was in a good mood when he heard that, he did not forget that night, in the forest in front of him, he was shot and killed, and the organization was finally taken away.

Going upstairs and back to the room, he immediately put the stones on the desk and looked carefully under the light. He only cared about two of them, and put the third one aside.

Both were the size of a fist, slightly scorched black, as if they had been burned by fire, or struck by lightning, with traces of melted crystals on the outside.

"The strong mysterious factor...they can't sense it!" Wang Xuan said to himself. This is the reason why he was so excited and tried to bring back these two stones.

At that time, it was right in front of our eyes, but Aoki, Qian Lei, and military masters didn't notice it, let alone Xinxing, who stayed there for several years and didn't notice it.

Wang Xuan believes that it is mostly related to his visit to the interior location.

The first time he came into contact with that mysterious factor was in the interior scene. Although there was emptiness, desolation, and no sound at all, as long as the root method of the alchemist of the pre-Qin period was operated, the mysterious substance would be attracted, which could nourish the spirit and body of the person. Factors of the void fall from nothingness in the interior.

Today, when he first entered the underground cave where the female alchemist was sleeping, Wang Xuan sensed some thin mysterious factors, which actually permeated there.

He was surprised at the time, thinking that he was approaching the interior location.

Soon he discovered that, apart from the wisps of wisps spreading from the woman in the golden bamboo boat, some of them came from the rock wall.

At that time, Wang Xuan realized that other people didn't seem to notice these at all, and they didn't feel this mysterious factor produced in the inner scene.

Chapter: 89

Qian Lei, Aoki, and Jin Chuan are all very strong, but even they didn't notice anything, their attention was all on Yuhua Jinzhu and the female alchemist.

Wang Xuan wondered if only those who had entered the inner scene and absorbed this substance could discover the abnormality?

It wasn't until the end that he was convinced that those people really didn't capture the mysterious factor in the underground cave, and regarded this special substance as air.

Wang Xuan's face was calm, but his heart was quite excited. He fixed his eyes on the rock wall early, and determined the core position with super perception.

Fortunately, nothing happened, and he successfully dug back two stones.

On the entire rock wall, there are traces of mysterious factors overflowing, but only these two pieces are the most special. In addition to confirming that there are rare and rare substances inside the stone that are so thick that they cannot be melted, he also vaguely touched the inner scene. This is what made his heart beat faster and caused huge waves in his heart.

In addition, he also confirmed one thing. Although supernatural substances and other substances were found on the Nova side, they were ignorant of this obviously different mysterious factor, and they couldn't detect anything with the most advanced instruments.

"It seems that the things in the inner scene are very unusual!" Wang Xuan rubbed the two stones with his hands, which were rough and scorched, and even more comfortable substances fell out and entered his body.

"Leaves of Yu Hua, the relics of ascending immortals, let's call you Yu Huashi." He thought the name was very appropriate.

He thought of those middle-aged men who not only followed the trend to dig rocks, but most importantly, they had to take what he had in their hands after they came out. They were really monkey spirits.

A smile appeared on Wang Xuan's face, fortunately he was able to guard against them.

However, he believed that those people had also benefited. The whole cave was covered with traces of mysterious factors, and the stones in their hands were more or less contaminated.

Wang Xuan guessed that the female alchemist's failure to ascend to immortality caused a big explosion, and the mysterious substance she carried from the inner scene exploded violently, impacting everywhere.

The cave was melted back then, and a large amount of rare and precious materials were buried in the rock formation. It can be said that the whole cave is a treasure.

It is a pity that the cave was continuously impacted, and there were dense cracks everywhere, and the mysterious factors that rushed into the rock formation finally escaped from the cracks.

Otherwise, there would definitely be more feather stones than just two.

Wang Xuan is convinced that in the eyes of truly knowledgeable people, these two plume fossils are priceless treasures, and they will not exchange them for anything.

Holding two stones in his hand, he was looking forward to it.

Now, before he shattered the Feather Fossil, strands of mysterious factors had penetrated into his body, nourishing his mind and purifying his muscles and bones.

Most importantly, he could vaguely see the edge of the interior scene again!

Wang Xuan took a deep breath, calmed down, and prepared to use the root method of the alchemists of the pre-Qin period. He had expectations and a strong desire to explore.

The sound of fallen leaves passing by outside the window reached his ears, and then the raindrops crackled and hit the window, and it began to rain outside.

Suddenly, Wang Xuan opened his eyes, quickly put the two feathered stones in an inconspicuous corner, walked to the balcony, and squatted down quietly.

He heard a different sound. There was a slight sound under the balcony. Someone was climbing. Although it was so weak that ordinary people could not hear it at all, it could be covered by the rain, but Wang Xuan's hearing was too keen. Far beyond ordinary people.

In particular, the last time he triggered his super sense and went to the inner scene, his strength has improved a lot. Not only has he practiced the golden body technique to the third level, his spirit has become more vigorous, and his spiritual sense has become extremely sharp.

Who actually took advantage of the rainy night to climb and approach the balcony.

After Wang Xuan let go of his perception with all his strength, he heard other faint movements.

In the corridor outside the door, there were subtle footsteps approaching, and the footsteps were very gentle. There were a total of two people who came to his door and stopped.

If the golden body technique hadn't been promoted to the third level and the spirit wasn't so vigorous, Wang Xuan might have ignored these directly and couldn't sense it.

But now everything was different, he caught these barely audible sounds, and felt the danger approaching.

Chapter: 90

Silently, a hand appeared on the balcony, and it climbed up vigorously, then revealed half of the human head, and then pointed a black gun at the room.

Wang Xuan didn't see this person's face, but squatting on the balcony, he could just see the muzzle of the black hole pointed at the house.

If two people outside the door broke in, Wang Xuan went to fight, and the person outside the balcony suddenly shot coldly, the situation would be very bad.

He knew at a glance that this was a professional level, someone came to kill him, stronger than the group last time, these were three killers with a somewhat terrifying strength.

Tonight, the Gray Blood organization was uprooted in the stronghold of the old soil. Are these killers jumping over the wall in a hurry?

Or is it that the employer has added more money, and the people who have been dormant in the Gray Blood Organization and have not been eliminated are now taking advantage of the chaotic night to kill him?

No matter what the reason was, Wang Xuan couldn't help but get murderous. He has always been kind to others, and he asked himself that he had never done anything wrong to anyone. As a result, he was targeted again and again and wanted to come to kill him.

The rain outside was getting heavier and heavier, crackling on the windows, and some raindrops fell into the balcony with the wind. The killer who was climbing outside was obviously having a hard time, and his whole body was soaked.

In the end, the man turned over, as agile as a civet cat, and went directly to the balcony, trying to hide behind the curtains and attack the people in the house.

However, she thought too much. The moment she turned over and landed on the balcony, a hand twisted her arm holding the gun. With a soft click, her arm bone was broken, and it was drooping at that time, unable to hold a gun.

She was about to open her mouth to warn her, but the moment Wang Xuan pinched her arm with one hand, the other hand moved at the same time, and the terrifying slap was powerful and smacked on her nose, nose and face, not only blocking her voice. When she went back, her seven orifices were bleeding, and she almost passed out.

Wang Xuan was a little surprised. He had confidence in his own strength. After practicing the third level of the Golden Body Technique, his physical body was extremely strong. With just one slap, an ordinary person's entire face would collapse, and he wouldn't even make a sound. You have to fall to the ground.

The female killer was not completely unconscious, there was a strong force rushing in her body, and she wanted to break free.

She is actually an old art master who has succeeded in gathering Qi at the beginning, and with the gun in her hand, it will be very difficult if she is not prepared. In order to kill Wang Xuan, a group of real elite killers came tonight.

If you don't pass out, then give another slap. Now Wang Xuan has achieved the golden body technique, and his strength is extraordinarily strong. It is far from enough for someone who has just collected Qi to deal with him.

With a slap, the female killer's decent face was deformed immediately, tiny cracks appeared on her forehead, and her eyes turned black. Before she fell down, her heart was cold, and she felt that this person was much stronger than what was described in the information. It didn't hit her vitals, just casually slap her on the face, it made her unbearable, she felt like her head was about to rot, just like a ferocious Siberian tiger pinching a little rabbit with its paws.

Wang Xuan held the female killer in one hand, picked up her gun in the other, and returned to the room lightly and swiftly.

Almost at the same time, the door made a slight sound, and then opened silently. Two people flashed in like apes, and rolled on the ground, instead of breaking in straight.

The gun in Wang Xuan's hand missed and missed the person. However, the female killer he threw out with force at the same time bumped into one of them.

That person was also ruthless enough, he kicked the female killer away with one foot, then jumped up with one hand on the ground, threw out a dagger in his hand, and came towards Wang Xuan's face.

The moment Wang Xuan evaded, that person rushed towards him directly.

The other person also arrived almost at the same time, his skills were amazing, far beyond what the woman just now could match, it could be seen that they were two masters in the field of old arts.

They didn't bring hot weapons, one came with a short blade, and the other came with bare hands, trying to kill the target.

Wang Xuan sighed, if he had the chance, he would really go to practice marksmanship, he didn't even hit a few shots, his accuracy was a bit poor.

In fact, the main reason is that these two people are extremely powerful. They dodge, roll, jump, and move sensitively, and they have practiced physical skills to an extremely advanced level.

These two people have not only gathered energy, but also have been trained for many years. If it was Wang Xuan who was a week ago, it would be extremely difficult and even dangerous to deal with them.

But the last time he was sniped, he entered an interior scene, and everything was different.

He dropped his gun and tackled both men with his bare hands.

boom!

One of them waved his palm and smashed it, but Wang Xuan slapped him violently with his right hand, blocking it with a dull sound.
