Chapter 100 - Part 1: Passage Way

Ms. Tracy finally made up her decision and chose to tell. She replied, "There is a presence of level 2 Queen Ant in that Colony." My pulse beat quickens when I hear that. "It's a Level 2 Monster," I reasoned.

Yes, she is correct. Ant Queen Monsters can be found in every ant colony. This is something I hadn't considered previously. If she's telling the truth. My plan to attack the colony should be postponed as a result.

Unlike Level 1, Uncle James informed me that Level 2 Class Monsters had certain skills. This could be either elemental or other specific talents. The Monster's skills will only become stronger as it evolves further.

I believe it to be true since I have witnessed it with my own eyes. The Level 2 Black Tree Monster's passive sound ability in action.

I'd stay away if it weren't for the noise. I would have dealt with it right away.

But, at my current level, I was powerless to stop the odd sound. As a result of what he had seen, Zack plunged into deep thought.

Ms. Tracy believed Zack had taken her counsel and was now pondering it. However, observing his dissatisfied expression. "What happened?" she couldn't help but wonder. She inquired.

I shifted my gaze to her when I heard that. I pushed these thoughts to the back of my mind. "If there is a presence of Level 2 Monster," I responded. Why haven't the authorities cleared it yet?"

It's a question that's been on my mind recently. Professional Hunters and High-Level Adventurers. Frequently hunt in the Black Forests, as I knew. Because it is their source of income. However, I do not believe that the entire system is run for their benefit. There's something else, as well.

Zack's question was heard. Ms. Tracy believes that is a fair question to pose. This black forest is an excellent spot to practice. Those that desire to fight level 2 monsters, in particular.

This is one of many unique Zones that may be found throughout the world. Each Special Zone is classified according to the level of Monster it houses.

Each location has its own advantages. As a result, exactly like me, each academy allows its students to go to such a facility to train.

In response to Zack's inquiry. "There are two reasons for this," Ms. Tracy began her response.

One is for safety, and this black forest is part of the training zone list. People gathered here to acquire experience by fighting level 2 monsters. There is no danger of encountering a high-level monster here. With the exception of a few level 3 monsters. It's a small number that can be counted on one hand."

"Second purpose for this, to limit Monster Population," she stated. If the authorities begin to eradicate Monster. Then no Monster will be accessible for fight training."

I nodded when I heard that. It's an excellent spot to raise warriors. It differs from Pinewood woods in a few ways. That place is a jumble. That day is still fresh in my mind. Where those hyenas had been chasing me.

That location is a mixed one. You never know what level Monster may appear on next.

Pinewood woodlands and Trezi town's semi-arid area. Unlike the Black Forests, which are open to the public.

Only one requirement must be met: they must be awakened warriors. In some circumstances, the government will not even conduct a check. If you received passes from your academy or organization.

I appreciate how thorough she was in her explanation. She outperforms my classmates. Ms. Tracy, unlike Candace and Maria, does not wear a veil. I was curious about Ms. Tracy. It would be beneficial. If

she is a member of a greater Academy. It will undoubtedly motivate me if I learn one or two things from her.

However, I didn't want to ask her today. It's not too late. Then I turned my attention to something else. My day has gone exceptionally nicely. Uncle James, on the other hand, I'm not sure about. It's something I'm thinking about.

Ms. Tracy dropped me off at my house a few hours later. After that, I went into the room. The first thing I did was send Uncle James a message. Due to a poor network, I was unable to make a call. "I'm hoping He'll respond to me." "Once He's seen it." I had a thought in my head.

In the meantime,

Mr. James Lockwood and his crew were dispatched to the scene of the incident. They arrived at the location many hours later. Ms. Emma and Mr. Paul spotted the strange Monster there. It's a scene from the Cliff.

Mr. Mike Hopkins and Mr. Leroy Hopkins were the names of the two new recruits.

They were identical twins. At the same time, they were both sent to the Black Forests Station. The twins had the appearance of a normal warrior. With a visage that is expressionless and sheer strength. They were committed to their work.

Both of them were at the Early Trainee Warrior level. They are those who use the Earth Element.

Mr. James and Mr. Craig Dawson chose to add them to their team after studying their profile.

They all got out of the four-wheeler. Mr. James summarized the investigation plan once more. There were a total of six people in the group. If they came across any trail. The two squads will next investigate each track separately.

Then, from the four-wheeler, both crews carried the essential equipment. They began their journey to the barred land on the other side by taking a safe way. Both teams are wary about Monsters on the way. They are averse to making significant moves. It will cause an unneeded commotion.

They are unconcerned with battles with monsters. However, it will cause them to be delayed in their journey. As a result, they took small steps ahead. The route is uneven and at times tight, enabling just one person to travel through at a time. Other times, it's big enough for three people. The path proceeded in a zigzag pattern, much like a snake.

They arrived at the location a few minutes later. Where they had to descend to get to the other side. They came across a couple of Level 1 lizards along the way. The lizard didn't stay on the spot after sensing their level.

They took a step back. Mr. James noticed a lot of poisonous plants. "Stay away from those plants and proceed onward," he urged his people.. Even the scent emitted by its plants was poisonous."
