Chapter 104 - Testing Physical Strength

On the way, I noticed that it emits an acidic odor. As the acidic liquid, it ejected. They spilled to the ground. All the grasses on the earth began to decay. A foul odor begins to spread over the area.

As the revolting odor assaulted my nostrils. I took a step backward. And I stared at the scene, pondering it. It's a Scouting Ant Monster. It's currently working on establishing a trail behind it. As a result, the Working Ant Monster will be able to follow it.

The Scouting Ant Monster is a monster that scouts for food. In contrast to other Ants. It attacks its foes with an acidic liquid. Scouting Ants are the only ones with this specific ability, except Ant Queen. Even though they are not level 2 monsters.

Ant's massive body moves forward when he sees it. Zack didn't waste any time in launching an attack.

My perceptive ability was activated. I have to be cautious of its acidic properties. Aside from that, it's business as usual. I'm going to concentrate on its abdomen and head. Following the creation of a strategy. I sprinted forward.

From my perceptual ability. Every action of it catches my attention. I'm particularly interested in its antennae. The antennae will move once it detects my presence. So far, it's been smooth sailing for seconds. But, when I got closer to it.

"It tracked me down." I had a thought in my head.

The Massive Scouting Ant stands 5 feet tall. The length is 12 feet. The Scouting Ants are a little more muscular and taller than the Working Ants. It's now taking a step ahead. Yet, it immediately began to use its antennae. It spotted a living being.

The Scouting Ant Monster spun its huge body around and charged towards the live being. The Monster has sensed that prey is coming towards it. Seeing that, It ejected a corrosive liquid. Soon, a green-colored liquid is sprayed in Zack's direction as quickly as a bullet.

When the Scouting Ant was on the lookout for its prey. It didn't squirt out the corrosive liquid in a ferocious manner. But when it comes to dealing with its prey, it's a different story. It radically altered its strategy.

Zack, on the other hand, notices this.

My emotions became more deliberate. It finally sensed my presence. After seeing it, I looked around for a suitable open location in which to combat the Monster.

Most of the space on my left side was taken up by trees. However, it's on my right side. I discovered a location. It is, but, a little further away. I'm not sure if this Monster will stick with me. When I get there.

I'll travel in that direction. thinking that, I made my mind. While I'm on the lookout for some open space. In the meantime, the Scouting Ant begins to move. The acidic attack is released. I didn't hesitate. When I saw it, I ran for the free area on my right side.

Thanks to the ability to perceive. It allowed me to save precious seconds. Quick decision-making, As a result, the corrosive attack landed on the bare earth. All the grasses and plants on the ground immediately wither.

I have no idea. What would the outcome be? Even if just a smidgeon of it landed bit on my skin. I'm not going to have the same luck as last time.

As I was fleeing the attack. The Scouting Ant Monster became upset as a result of this. It began charging towards me. When I saw it, I didn't hesitate to lead it to the open area.

After a few moments,

We were both standing in the open area. Unlike the previous time. It will be difficult to face the Monster this time. When I approach close to the acid, I need to protect myself.

I held the Black Sword in my hands and pointed to its abdomen. I'm debating whether or not to use Sword Divide Move. It will flee

If I fail to attack it. That is something I do not want to happen.

It would also be pointless to use Reckoning Circe. If it attacks with an acidic attack. Dogging it will be challenging.

I don't want even a speck of acid on my face. That was something I shrugged off. As a result, I have no choice except to wait for the ideal opening. To take it out with one fell sweep.

My lips curved slightly as I considered a nice plan. I should first put my physical strength to the test. I'm not sure how far I've progressed since my last blood cultivation.

So, before we end, let's have a look at it.

Meanwhile, the Massive Scouting has made its way to the open space. The prey has halted its movements after sensing something. It didn't waste any time launching another caustic onslaught. It ran towards him as a result of this.

Meanwhile, Zack is aware of the situation. He's prepared for a fight.

I choose to rely on my physical strength. I'll wait till there's an opening before using lightning. As far as I could tell, the Monster utilized the same attack.

It's also approaching me at a blazing speed. Speed. Like the prior time, I was able to avoid the corrosive onslaught. But instead of moving away. I raced up to it.

As we grew closer to one another. I'm cautious about its stinger.

So, that's how I see it. I'm paying attention to every little movement it makes. The acidic liquid is released by the scouting ant's abdomen gland. Then, before it's too late, I should go after its abdomen.

The Scouting Ant wanted to rip Zack apart with its jaws. Its two razor-sharp jaws had crept closer to Zack by an inch. When Zack noticed it, He grabbed his Black Sword and stabbed it downward.

In the air, the Blade created an arc. When it got into contact with the metal Jaw, It clashed.

"Clang...Clang..." echoed across the area.

A massive force crashed upon the area. As a result of the impact, wiping away neighboring small trees and vegetation.. A brief moment later, the dust had settled.
