Chapter 105 - Ant Queen?

Meanwhile, Zack charged forward to assault the creature's abdomen. Following the blockage of its jaw. I took a step to the side and jumped on its abdomen. I clenched my fists around my sword. And then I hacked into its abdomen once again.

The Blade is capable of slicing through the air. The Massive Ant notices it and twists its body slightly to utilize its stinger. The stinger, which looked like a needle, collided with the blade.

"Clang...Clang..." The clatter of metal rang throughout the region.

I took enough of a stride to the side to avoid its belly Gland. Then, I take a step back to launch another attack. Just as I'm about to leave the area. The acidic liquid squirts from the gland in its abdomen.

As soon as I realized this, I moved away from the area. As time passed, just a few rounds of attacks were launched. But it all comes to the same conclusion.

Throughout the entire time. I made use of my physical prowess. Following the most recent cultivation of the blood element. It unquestionably boosted my stamina.

On the battlefield, the results can be observed. I can easily sustain this assault for another hour. I'm not going to be exhausted.

But I decided to call it a day. Physical strength has satisfied me.

It's pointless to push it any further. As a result, I'll utilize lightning. It won't be as difficult as it appears. If I assault it with my lightning.

It is, however, making use of its huge size to its advantage. It isn't allowing me enough time to relax.

When I consider using a long-range lightning bolt. It began to attack me with its corrosive attack. I'm being forced to move from one location to another. I couldn't seem to obtain a good aim.

The goal of this combat is to discover an opening to use lightning strike. When it comes to Reckoning Circle, there are a few things to consider. To use it, I need to come closer.

However, the Ant Monster would find it more convenient to spray acidic liquid. The attack range would be extended. As I was pondering it.

I became oppressed all of a sudden. Sensing this, I wrinkled my brows. "What could it be?" I commented in my heart. The Massive Scouting Ant came to a halt. It dipped its head and slightly bent its legs in the direction of the East.

"What is it doing?" I had a thought in my head. My heart flutters with a dreadful omen. Observing its behavior. My instinct urges me to get out of here as soon as possible. But I'd like to figure out what's causing this pressure.

As a result of the pressure, "It has a level 2 feel to it. However, this pressure is greater than that of the Black Tree Monster." I had a thought in my head.

I noticed a buzzing sound for a brief moment. It was deafening. The volume of the sound is increasing. Hearing that, I tightened my grip on my sword and held it vertically. Something seemed to be approaching me.

I locked my gaze on Ant, who was inspecting the area. It is still in the same place. I looked up at the sky with my perception turned on. I soon noticed it. When I saw it, my eyes were wide open. "This is going to be a disaster!" I had a thought in my head.

"Buzz....Buzz..." The sound of flapping wings reverberated across the region.

Even before I had a chance to react. It used its Stinger to attack me. Against it, I swung my Sword. Despite this, I couldn't hold on against its might. Its overwhelming force astonished me. It happened so fast. As a result it.

"Bang...Bang" The region was shaken by a loud crash.

As a result of the collision, Zack was thrown away. He was launched into the air at breakneck speed. Zack tried to keep his movements under control.

However, the impact was immediate. As a result, In mid-air, he couldn't do anything. He eventually crashed into some surrounding trees.

Zack screamed in pain, "Arrrgh...arrgrh!" As he collided with the trees. The hit landed squarely on his back. Fortunately, He is aware of the circumstance. He tries to get to his feet. All of this happened in a matter of seconds. The Ant Queen began to circle in the sky, after the attack.

I'm looking up at the sky. "Ant Queen," I mumbled. "Monster of Level 2." And it may be a high point. I had a thought in my head. Fortunately, none of my bones were broken.

Ant Queen is still thrashing its wings in the air.

"Reckoning Circle" I used lightning Move.

The Ant Queen had moved in the meantime. It flaps its wings once again as it dashes towards Zack.

Meanwhile, a thunderous roar resonated throughout the area. Due to the activation of the Reckoning Circle. In the nick of time, a lightning wheel appeared. The Wheel is bursting at the seams with lightning power.

I was startled to see the Queen charging towards me. My mouth curled slightly.

"Let's see who gets hurt this time," I commented. The Ant Queen sprinted towards her prey. However, it detected nemesis energy along the route. The speed was incredible. It will be impossible to avoid colliding. It happened in the blink of an eye.

Bang...Bang..." A deafening sound reverberated throughout the region.

Zack was still thrown flying due to the Collision. He knew he couldn't do anything in the face of such tremendous power. He is still a Trainee Apprentice at the Mid-Level. The Ant Queen, on the other hand, is far more powerful than the Black Tree Monster.

In contrast to the Black Tree Monster. The Ant Queen can move. It also has the specific ability of speed. As a result, b. All of Zack's hopes were pinned on Lightning Wheel. Since the Ant monster has gained the metallic attribute. He is hoping that the strike would at the very least dissuade it.

As Zack had predicted. Lightning Wheel was forced to collide with the Ant Queen. Because it is Metallic. Its Mandible was penetrated by the lightning energy, which showed no mercy. Since the contact moment was so brief.

Only a small portion of the lightning's energy reaches the Ant Queen. Before Zack was launched into the air.

However, the attack was successful in destroying Ant Queen's left jaw. It has been eliminated. In agony, the Ant Queen screamed. The Ant Queen was no longer able to dwell in this location due to its injury. It fluttered its wings quickly.. And then it started flying back to its colony.
