Chapter 107 - Level 4 Aura?

The twins, Their impact on the squad is significant. Their success has resulted in the deaths of a large number of monsters. Along the route due to their teamwork and time attack. It helped them save a lot of time and energy.

Even for them, constantly facing so many creatures is exhausting. Mr. James was well aware of the situation. That's why he looks after every team member. He and Mr. Dawson provide a helping hand to the squad to relieve stress.

They didn't want to waste any of their resources. While the appearance of level 4 seems improbable. They don't want to take any chances.

However. As a result, they are extremely cautious in their actions. They had to save the point now. Mr. James and Mr. Dawson had to devise the next course of action. They can't just walk in blindly.

They are conversing at the same time. Mr. James went to Emma and inquired, "Why is this area's soil so densely nutrient-rich?" Everything is unfolding in front of him. It's adding to the evidence of that Strange Monster's presence.

This soil's richness worth is out of this world. That is the first time he has seen anything like it. Only high-level Special zones have this kind of value.

This black forest, however, is not a high-level zone. Mr. Paul's question has been heard. Ms. Emma wore a melancholy expression on her face. It has never been documented in previous data. This was something that had happened recently.

There must be some explanation for this behavior. If a similar situation has occurred in the past. This area would have been cleared for people. This zone would now be used for the earth element special zone.

"Something must have happened here," she said with a shake of her head. And we have no idea what it is? I feel it has something to do with that strange Monster.

Mr. Paul's face lit up with a wry smile as he heard that. Then he remembered Mr. James and craned his neck to look at him. "Do you think we should delve a little deeper? I believe we are still short on manpower. To clean up this area, we'll need troops." He inquired her.

"Once we've completed our investigation, it will happen. Since the data of soil richness has skyrocketed. After seeing the data, management will not keep mute." Ms. Emma said, her voice solemn.

It's a foregone conclusion that the area will be cleared out shortly. However, this is a future-related issue. They should now concentrate on themselves. She too thinks it's better to give up.

When management has a look at the facts, they will be able to make an informed decision. Then there will be a series of huge events.

People were resting at the time. The ground began to tremble all of a sudden. It's as though there's been a tremendous earthquake. The ground began to fracture in an instant, and it continues to crack.

"Stay away from the crack!" exclaimed everyone, startled. Mr. James yelled angrily. Everyone moved away from the cracked area as soon as they heard that. The twins built a tiny holding wall in the meantime.

Because the soil is nutrient-rich. Their cultivation seemed to be going much more smoothly. As a result, they were able to quickly regain their cultivation energy. It's now useful in this circumstance. The little wall has become brittle.

This wall serves as a source of support for everyone.

They waited patiently for the shaking to stop. Meanwhile, Mr. James and Mr. Dawson began to investigate their surroundings. With Mr. James using his consciousness to do so. There is, however, nothing to be found. With the exception of fleeing level Monsters.

Several Monsters had fallen into that crack, He noticed. Many monsters are attempting to escape the Crack. However, the ground begins to crack even more. When they attempted to employ their strength.

Observing several trees that had been uprooted. Mr. James sighed.

A suffocating aura arose out of nowhere. It starts to spread across the air. It cleared out all the impediments everywhere it went. A number of level 1 monsters have been transformed into a paste.

Monsters of the pseudo-level vanished into thin air. Level 2 Monsters were not forgotten. They were seriously hurt and left to die. Only a few level 3 survivors were found.

The aura soon reaches the team's location. Mr. James was the first to detect the problem. He began observing the aura right away. His pupils were constricted by the sight of so many monsters being killed.

He quickly removed an object from his storage ring. He told his troops to form a ring around him. The artifact is known as "Aura Deflector," and it can be utilized against monsters up to level 5.

Everyone flocked around Mr. James after hearing his word. He didn't waste any time. He began to turn the object on. He set it down on the ground. Before injecting it with his Energy.

Soon after, a silver light flashed across the sky. A dome-shaped silver color screen began to cover them. When it was covered. The aura collided at precisely the right moment.

Everyone was expecting a loud crash. The deflector, on the other hand, cut through the opposing aura like paper. They had never seen such a powerful object before.

Mr. Dawson, on the other hand. He recognized that Mr. James would never be unprepared for such an investigation. Everyone is curious about the Artefact. "Please don't tell me it's a level 4 Monster's aura." Mr. Paul expressed his concern in a panicked tone. His face appeared as if he had lost blood.

For an answer, everyone looked to Mr. James. Because he is the one who has spotted the aura. He is also the most powerful of the group. Ms. Emma's heart began to beat faster. Seeing the circumstance, she resigned herself. If it's not for the deflector everyone will be injured.

She examined the artifact. She was unsure how long it would last. "Please don't leave this silver dome, everyone. I'll go looking for it." Mr. James said, his voice solemn. He then turns to face Mr. Dawson.. He told him to keep his distance and protect them.
