Chapter 112 - Part 1: Arrived At The Location

As they walked towards the station's exit, I kept an eye on them. They simply nodded in response to their bows. I scrutinized each of the female soldiers. They aren't arrogant in the least. They did, however, appear solemn. I kept an eye on things. Until they exited the building.

I'm not sure how powerful they are. However, after seeing them, I had a gut feeling. They may be more powerful than Uncle James in this regard. Their youthful appearance intrigues me.

They aren't old fighters with a lot of experience. This makes me consider their education and surroundings in Tier-7 city. It would be great if I could observe their abilities. "It is wishful thinking," I said as I shook my head.

When I considered that idea, my lips curled slightly. I heard the announcement of my train's arrival after some time had passed. It arrived at the station shortly after. I entered the cabin right away and took my seat. "It's going to take a full day." I had a thought in my head.

...

In the meantime, At the Administration Office.

Mr. Alvin was provided with information. The Eagle Squad is on its way. He vanished from the scene after learning this. He will not squander any time. He'll take them to the level four monster's areas.

Ms. Norma Massey This squad's team leader is her. She is an Elite Warrior at the highest level. Ms. Norma contacted Mr. Alvin after leaving the station.

She had previously learned about the problem. There are currently no humans in the vicinity of the level -4 Monster. With the exception of one warrior.

Despite the fact that she did not want to spend any time. They must eliminate it as quickly as possible. Also, look into alternative possibilities. There may be one or two monsters. They have to find out.

Mr. Alvin has arrived at the location, and they will be waiting soon. In a matter of minutes. The group did not come into the office. Ms. Norma has requested that no one is greeted this time.

Mr. Alvin came to see what was going on. "Send me the location and contact information of the warrior who is currently monitoring it," she added, looking at him.

Mr. Alvin nodded. He sent her Mr. James's map and contact information. He wanted to say something, but he couldn't since he was staring at their faces. He was well aware that they didn't want any chit-chat.

Ms. Norma then turned to face her colleagues. After that, she addressed them. They began to fly in the air soon after. Ms. Norma didn't even give Mr. Alvin a glance. The crew began to move at breakneck speed through the air. Mr. Alvin had a serious look on his face, witnessing that. From her colleagues, he learns the team's disposition.

He then told her colleague in Tier-7 city of the current situation.

Ms. Norma and her colleagues were all from the same family. Clan of Wind Spitting Eagle is their bloodline. This clan is also responsible for the name of the tier-7 city. Due to its contribution to the city.

Then it was given the name Eagle City. Ms. Arlene Thompson is the team's second member, aside from her. She is an Elite Mid-level player. Rosa Hurley, Wanda Burnett, and Ava Baxter were the remaining squad members. They were all at the Early Level Elite level.

Ms. Arlene raised her eyes to her Team leader. "Captain, do we have any information about the Monster?" she inquired. Ms. Norma shifted her weight and remarked. "They stated that the level-4 Monster is in the process of settling into its new level".

But it had been six hours. We don't have the most recent information. That is why we must move more quickly." Ms. Arlene nodded in agreement.

She was unconcerned about the level 4 Monster. That Monster can be readily dispatched by the team captain alone. However, in order to eliminate any variables, we came as a group.

...

Mr. James, on the other hand, is monitoring the Monster. He whispered to himself, "It stabilised its new level." He examined his sci-fi wristwatch. It's time because there's no other option. The Elite team must have arrived at this time.

He is relieved that it has reached a new degree of stability. It didn't cause any problems. It was designed to consume nutrients found in the soil. He's still perplexed. He didn't come across anything unusual. He's wary of this region because of the oddity.

The level -4 Monster made a sudden appearance. It depleted the soil fertility in this area. It wishes to relocate to a different location. I didn't think about it any further. It had already been discovered that one of the humans had never left his territory.

However, it recognized that human strength was unimportant. As a result, it hasn't been attacked directly. Instead, it released a Mid-level elite aura while moving. The Worm Monster's massive body began to move underground.

As a result, there is a massive tremor in the area. The ground started to splinter. This time, only a few trees survived the uprooting. A dense level 4 aura began to spread around the area. It was denser than the previous time. It vanquished all impediments wherever it went.

A few level 3 Monsters were damaged and perished as a result of taking the brunt of the damage. The level 2 Monster from the last attack has already vanished. Only a few of them managed to flee the region.

Mr. James, on the other hand, sensed a worrisome change as it began to spread. When the ground began to tremble. He didn't think twice about using the Aura Deflector. It's almost as though it's a reaction to the initiative. Whenever an Elite level Monster or above moved, he knew. It removes weaklings with its aura as a passive ability.

He's been in a situation like this before. As a result, he's well-prepared this time. He activates the object by placing it on the ground. Previously, there was time. A silver screen encircled him like a dome this time as well.

The dense aura took a few moments to arrive. It came into contact with the object. It tore like paper through the opposing aura. This artefact can handle aura levels up to level 5.. For humans, it is a tremendously helpful and survival item.
