Chapter 113 - Part 2: Arrived At The Location

At the very least, they might be able to save their lives while doing so. Warriors have been given this aura deflector by each group. Those who have accomplished a greater number of missions in their lives. It is not given to newcomers by the organization. They can only buy it with pricey credit points. It's also for a limited time only.

Mr. James kept an eye on the aura as it began to diminish. Mr. James sighed again. He's on the verge of exploding seeing the aura. He feels relieved to be alone. As soon as he notices, the Monster begins to migrate to a different location.

He planned on following close behind. However, there is a significant risk involved. If it was irritated. It has the ability to launch a major attack. As a result, he avoided entering its range. He'll take it one step at a time.

Time moves on. After one hour, currently, the Monster is devouring. It's nutrition in a new location. Mr. James was able to catch up with it in the end. He notices the Monster's huge body. After being aware of it. He didn't approach it. He simply came to a halt. He felt a wave of relief rush over him. He then begins to keep an eye on it.

Meanwhile, Mr. Dawson spots something unusual in the sky. Five people were flying by him at incredible speed. He bowed his head unconsciously. "They showed up on time. Mr. James will be OK in the future." He grumbled to himself.

He feels relieved that everything will work out. Monsters at level 4 are different ball games. He felt insignificant in front of it. As a result, Then he sends Mr. Alvin a report. He's in a good network area right now. He received a message not long after. Mr. Alvin invited him to return. He felt relief when he saw that and returned quickly.

Ms. Norma and her team made it to the edge of the cliff. She came to a halt as she noticed the weak level 4 aura in the air. After that, she confirms it. The group gets closer to the location. They soon observed a devastation scene from the sky.

The landscape has been utterly turned upside down. A large number of trees were uprooted. These are signs that there is a Monster in the area. "As expected, this destruction was done with its level 4 aura alone". Ms. Arlene observed after witnessing such a spectacle. They all nod in agreement when they hear that.

Ms. Norma fixed her focus on a specific spot. It was found where the realm of a level 4 Monster had previously been stabilized. The strong concentration of energy was felt by Ms. Norma.

Representing strength at the highest level. "This appears to be the location. "Where did it burst through?" she wondered aloud. Then she realizes the path it has left behind. It took a step back. With her peak elite level perception, she suddenly knew something. She is aware of her surroundings.

Mr. James is nowhere to be found. Sensing this, she knitted her brows. "Did He do it or did He die?" She pondered in her head. Then, without wasting any time, she said, "Let's go, the level 4 Monster has relocated." Everyone nodded when they heard that.

They quickly began following the path at breakneck speed. When outsiders look at them, they will think they are moving too quickly. It's the standard speed for those of the Eagle lineage. The bloodline, in particular, has a wind element.

The Eagle team arrived at the place sometime later.

Mr. James, who was keeping an eye on everything. Suddenly, something in the sky caught his attention. He takes note of their emblem. In his eyes, a gleam of lucidity dawned. "As a result, they dispatched the well-known Eagle Team." He made a heartfelt remark.

Then he had the feeling it will all be over shortly. Observing his stare. The Eagle team have their eyes on him. Ms. Norma will know when he has seen him. She vanished from the scene. She appeared in front of him in the blink of an eye.

"Mr. James, You've done an excellent job. "You should leave this location," Ms. Norma stated solemnly. Mr. James nodded and walked away from the area as soon as he heard that. He was relieved that everything had gone smoothly. They'll take care of it after that.

Initially, I was interested in witnessing their fight. The fight will be over in less than ten minutes. If they all attacked at the same time.

However, the intelligence of a level 4 Monster should not be underestimated.

While attempting to disrupt the battle, it may assault me. As a result, I agreed with her. When Mr. James left this location, he went fairly far away. The Monster is then noticed by Ms. Norma. Her eyes were as piercing as an eagle's. One of the bloodline's powers is this. From the sky, she can see what the level 4 Monster is up to.

She sees the enormous Monster. It is swallowing tonnes of soil. She notices with her eye's abilities. She remembered the report citing high soil nutrient density. It's almost as though the Monster has an earth affinity.

"Surround the Monster," she told her squad after confirming this. "Aim with the Wind Blade at a single location." Ms. Norma didn't go into any further detail. They all went on a lot of missions. This isn't the first time it's happened. They're up against the Worm Monster.

Ms. Norma took the lead, followed by the rest of the group. They were all encircling the level 4 Monster. They need to get rid of it as soon as possible. It's a conflict between the Earth and Wind elements.

As long as the Monster stayed on the surface, it'll be a simple battle for them. It eventually went underground. It will then be difficult to eliminate it.

The level 4 Monster, on the other hand, sensed the existence of four high-level energy. It ceased to consume its nourishment.. The level 4 Monster is well aware that the humans who have arrived this time will obstruct its feast.
