BloodLine 1161

Chapter 1161: Part 1: Ancient Guardian God Inheritance

From MC's Perspective:

Before I could say anything, she started dragging me in midair. I could only see a blur in front of my eyes.

Shortly thereafter, we returned to Star City. Then we returned to Star University within minutes. I thought she would drop me in front of the Thunderflame Faction.

Yet she was taking me somewhere else. Then I realized she must be serious about the words spoken earlier. She was going to open the Bloodline Faction's secret land for me.

My heart beat faster. I didn't know why she was doing this. In a flash, we arrived in a dark area. This place was behind the Human Ancestor Bloodline Faction.

"This place is just behind my faction. Only members are allowed to go in. Since your situation is special right now, I will let you in."

"Don't forget to gather resources inside. They will help you activate your bloodline," she said with a smile.

Hearing that, I was dumbfounded. I could still call the Thunderflame Faction Leader, but looking into her firm eyes, I could only nod my head in response.

Francesca smiled before taking out a silver key. She put her energy into the key before shooting it toward the darkest corner.

Swoosh!

In a flash, the key reached the darkest corner, but it came to a standstill in midair.

Boom!

The next second, a small rift appeared. The scene was similar to the secret lands under the Thunderflame Faction.

“You can enter inside!”

I heard the voice from behind. The next second, I took a step forward and entered the rift. I disappeared from the spot.

Francesca’s mouth curved into an arc.

“Let’s see whether his sleeping bloodline gets activated or not,” she said to herself.

There was a reason why she wanted him to enter this secret land. The resources inside could help Bloodline warriors.

If Zack Lockwood consumed the resources there, she could feel a stronger connection.

Maybe she could use the opportunity to make him a member of both the Thunderflame Faction and the Human Ancestor Bloodline Faction.

For that, Zack Lockwood’s sleeping Bloodline should be awakened. If not for her Half-Step Red Mark level, she wouldn’t have felt the connection.

From Zack Lockwood’s reaction earlier, she had confirmed that his bloodline was dormant.

“He has this level of aptitude without the awakening of bloodline,” she said in her heart.

Meanwhile,

Inside the secret land, I landed on the ground. When I raised my head and looked around, I found out that it was nighttime inside the secret land.

“What should I do now?” I asked myself.

“Go and find a secluded place immediately!”

The ancient voice sounded again. Hearing that, I felt goosebumps all over my body. Then I uttered, “Okay.”

The next second, I picked a direction and started moving forward. I activated my perception ability. If there were any monsters nearby, I would know easily.

A few minutes later, I came across a cave-like structure. Cave structures are common; they can be found in all secret lands.

Follow new episodes on the "N0vel1st.c0m".

Soon, I arrived in front of the structure. Seeing the opening there, I heaved a sigh of relief. I quickly walked inside.

After appearing near the end, I looked around before picking up a few small-sized boulders. Then I started placing them at the entrance.

As time passed, I almost covered the entrance. If any monsters tried to disturb me, I would know soon.

Then I came to the middle of the place and sat cross-legged on the ground. I calmed my heart and said, “I’m ready to accept the Ancient God Inheritance.”

“Good!”

“After a long journey, you were able to develop your physique to an acceptable extent,” the ancient voice said.

“Now get ready to accept the inheritance of the Ancient Guardian God. If you lose consciousness, you will die,” the ancient voice reminded.

“Okay,” I replied.

Boom!

The next second, the golden blood hidden deep inside my body became activated. Like hot molten lava, the golden blood began to course through my body.

Aaaahhh!

A small scream escaped my mouth as the coursing energy brought terrible pain to my body. I gritted my teeth and continued to pay attention.

The terrible pain was worse than the blood element method. It was making me lose consciousness. But if I lost consciousness, it would be the end.

The golden blood continued to flow. Wherever it left traces behind, that area was getting stronger, including the veins and meridians.

As time passed, the pain became more intense. Different parts of my body were strengthening. The ancient will was still present within the blood.

It continued to strengthen my body.

Time passed in the blink of an eye.

The amount of golden blood didn't decrease. Rather, my inner organs and bones had gotten stronger. My physique had a major upgrade.

The silver-red skeleton now had a golden texture. The dantian had become stronger and more powerful. The dark purple lightning seed was now starting to have a golden texture.

My flesh and muscles had strengthened. My skin had become a lot smoother.

Boom!

Out of nowhere, a few golden wisps of energy from the golden blood entered my consciousness and soul at the same time.

AAaaaaHhhh!

A terrible pain appeared again. This time, the pain brought an unimaginable level of suffering. Slowly, I started to lose consciousness.

"No," I uttered in a low tone.

The golden wisps of energy in my mind were strengthening it. My mental defenses began to get stronger.

On the other hand, my soul was growing at a faster rate. Henceforth, no other warriors at the same level could hurt me using mental and soul techniques.

Time passed,

The golden blood didn't stop. It continued to flow through my body again. I was shocked inside. I thought the transformation was over.

I bit my teeth to stay conscious. The whole body restructuring was still going on, including my body, mind, and soul.

I had to bear the terrible pain again. I don't have any other choice.

Chapter 1162: Part 2: Ancient Guardian God Inheritance

From MC's Perspective:

The Ancient Will is monitoring the whole process. Zack Lockwood's physique underwent many transformative processes. The golden blood was like never-ending energy.

It's strengthening the body, mind, and soul.

The next morning,

The Ancient Will checks Zack Lockwood's physique. It feels that Zack Lockwood's physique is now ready to accept Stage 1 of the Inheritance, which is Black Mark Rank.

The Ancient Will has decided to unlock further stages when Zack Lockwood breaks through to reach the next rank.

Zack Lockwood's body, mind, and soul need to be stronger to accept further stages. So the golden blood is going to assist him when he attempts the breakthrough.

Boom!

The next second, a golden shield rune shot from the golden blood. The golden shield entered Zack Lockwood's mind.

The next second, the golden blood disappeared deep into the body. It won't appear until the next breakthrough.

As time passes, the inhuman pain decreases. I can think more clearly. Then I noticed a new golden shield rune in my mind.

It's floating next to the Golden Silver Rune of the Shock Force Integration Inheritance.

Before I could think further, the ancient voice sounded.

"You got the first stage of inheritance. The next stage will appear when you attempt the next breakthrough."

"Each stage is many times more difficult than your Shock Force Integration Inheritance. Take your time to understand the method."

"Don't reveal the power to anyone. Don't tell anyone about the inheritance. Otherwise, I will make your body explode from the inside."

"And one more thing: your dormant blood is activated as well. But the bloodline power will be suppressed by the two Inheritances."

"If you want, you can use that power as a disguise so that no one can doubt you about your inheritance power."

After saying that, the Ancient Will disappeared into the golden blood.

On the other hand, I was petrified on the spot. My heart set off stormy waves. I thought the inheritance acceptance was over after going through a long hour of enduring inhuman pain.

But it’s quite shocking to think that all the pain was for the first stage of inheritance. Then a look of understanding dawned on me.

It’s the inheritance of the Ancient Guardian God. It was more powerful than the Shock Force Integration Inheritance.

If I think like that, it’s normal to go through this kind of process. But then it’s a bit annoying to hear the death threats again.

The ancient voice made the same death threats back at the Outer Post. Because of it, I was forced to grow stronger along the way.

Now it’s threatening me again. I don’t know whether to laugh or cry. I can only get used to it. Then I calmed down my turbulent heart.

After doing that, I paid attention to the Golden Shield.

Boom!

The next second, new information appeared in my mind.

[Ancient Guardian God Inheritance – Chapter 1]

Looking at the unknown runic letters in my mind, I was shocked. It was the first time I had seen such runic letters.

Follow new episodes on the "N0vel1st.c0m".

But strangely, I could understand all of them. It must be because of the golden blood. Then I started to comprehend the first chapter.

…

Outside,

Francesca Ball frowned. The ancient secret land is a mysterious one. It could eject the warrior in case of any danger or if they are willing.

Right now, she could tell that there were no dangers posing a threat to Zack Lockwood. Then it must be that Zack Lockwood is willingly staying there.

“Is he going to stay here forever?” she thought.

She had thought it was urgent, so she let him use the faction’s secret land. She also had personal motives. The resources there could activate dormant blood.

But she hadn’t expected him to take so long. Now she had no choice but to inform Faction Leader Clifford.

She is aware that Dean Jerome supports Zack Lockwood. He doesn’t want to see anything bad happen to him.

But this matter is serious. Zack Lockwood is a member of their Ball Bloodline Family. If others learn about this, then there is a danger to Zack Lockwood’s life.

Already, Zack Lockwood has made many faction leaders unsettled by accepting the Ancient Inheritance. Now he is carrying the Ancient Human Ancestor Dylan’s blood.

The attacks on Zack Lockwood could increase.

She then made up her mind before reporting to Dean Jerome.

Meanwhile,

Dean Jerome, who was in his office, was dumbstruck. He was looking forward to meeting Zack Lockwood this morning. He wanted to discuss with Zack Lockwood about his inheritance.

Then he wanted to reveal the truth of the world as well. But before that, he is hearing this shocking news on the call from Francesca Ball.

The old man didn't know how to react. But as Francesca continued to explain and clarify things,

Dean Jerome understood why Zack Lockwood's talent was superior compared to the other seeds of the Outer Post. He had put considerable thought into this topic before.

In the end, he had thought Zack Lockwood was naturally gifted in three elements. But now he understood why that kid's talent was superior.

"Dylan Ball," Jerome uttered.

Then he told Francesca to wait at the same spot. The old man then exited the room and started moving towards the secret land.

Shortly afterwards,

He arrived at the territory of the Human Bloodline Faction. Then he arrived in front of the secret land entrance.

Francesca Ball was standing there. Upon seeing Dean Jerome, she spoke about the bloodline connection she felt from Zack Lockwood.

She also told him about Zack Lockwood's parents. There was no official record in the Outer Post 1012 or Inner Post.

“Alright, this came out of nowhere. But I got an answer for this kid’s superior talent now.”

“Fortunately, this kid has accepted an ancient Inheritance. If he had accepted a lesser Inheritance, then he would have wasted the bloodline power in his body as well,” Jerome said.

But in his heart, he envied Zack Lockwood’s talent.

“This kid has three rare elements already. Now he has the bloodline power as well. But we don’t know about the attribute of bloodline power yet,” he thought.

Chapter 1163: Part 3: Ancient Guardian God Inheritance

Bloodline Faction:

Both Dean Jerome and Faction Leader Francesca Ball are waiting for Zack Lockwood to return. As time passes, they have started to grow worried.

They don’t know why it’s taking so long for Zack Lockwood. But Dean Jerome knows that there aren’t many dangers inside the secret land.

So they continue to wait for Zack Lockwood to come out.

…

Thunderflame Faction:

Faction Leader Clifford comes to the main hall. He can’t wait to meet Zack Lockwood. He wants to discuss Ancient Inheritance with him.

If a warrior receives the Ancient Inheritance, it is clear that he will soon become the Red Mark Warrior in the future. Old Man Clifford made a call to Zack Lockwood.

But the call was not connected. Seeing that, he tried to call again. But still, there was no response whatsoever.

Clifford frowned. It was already daytime, post-noon. Yet he couldn't connect the call. He thought that the kid might be sleeping.

Shortly afterwards,

Main Elder Austin comes to the main hall. Upon seeing the faction leader, he is stunned. He was looking to contact him, but he didn't expect the Faction Leader to be present before him.

"Faction Leader, what's going on?" Austin asked.

"Just like you, I was waiting for your disciple. But he seems to be sleeping," Clifford replied.

Hearing that, Austin's eyes flickered with understanding.

He sat in his seat before asking, "Leader, what do you think about Zack Lockwood's inheritance?"

Clifford shook his head and replied, "I'm not sure. That's why I'm interested in seeing this kid in person today."

…

From MC's Perspective:

Inside the secret land, I'm understanding the first chapter of the Ancient Guardian God's Inheritance. At first, it was confusing.

As time passed, the unknown runic words started to make sense, like the shock force integration method. This inheritance method has new energy as well; it's another new kind of force.

I started to comprehend further. A golden energy from the world energy comes out and enters my body. This golden energy feels kind of dull.

I don’t know the use of the golden dull energy, but then I continued to circulate according to the routes mentioned in the first chapter.

I could feel a warm current coursing through my body. After circulation, the golden dull energy enters the dantian. It appears in the middle of the dantian.

It occupies a space near the silver dark purple liquid essence. The silver color was the result of the shock force integration.

Not only did it get integrated with all three elements, but the purple lightning seed got a slight silver color in it. I focused on the process. Then, a new dull golden energy gathers beside it.

Seeing that, I continued to repeat the process. Then the quantity of the golden dull energy increased. I expected something else to happen.

But to my surprise, the golden dull energy didn’t show any reaction after settling down. I don’t know how to use it. I clearly know it’s not the golden lightning.

But it represents something else. A hint of confusion appeared in my eyes. Then I decided to try it out. I stopped running the new method.

Then I circulated the new dull golden energy. In the blink of an eye, my fist was covered with dull golden energy. Then I stood up and punched the nearby rock.

Follow new episodes on the "N0vel1st.c0m".

Boom!

The rock shattered into pieces. But my eyes filled with confusion. More and more doubts appeared. Before I could think further, the golden shield rune in my mind flickered.

The next second, new information appeared in my mind.

“Ancient Seal Technique Chapter 1”

The new information stunned me. Unlike the Shock Force Integration Inheritance, this Ancient Guardian God’s Inheritance has its own techniques.

What shocked me was the purpose of the technique. Unlike other elemental techniques, the purpose of this technique was to seal everything.

But the first chapter of the technique was to seal black mark rank living and non-living things. Once sealed, no one can move the object from its fixed position.

Chapter 2 is related to the Silver Mark Rank. When I completely digested the information, my heart was in turmoil. I didn’t expect the Ancient Guardian God’s Inheritance to be this overpowered.

It could seal away anything. If I become a Red Mark Warrior in the future, then I can seal away Red Mark Warriors as well.

I can reach the Title God Rank with this method. But it’s going to involve an understanding of the power of seal force.

“The power of force,” I uttered in my heart.

This terrific information shocked me to the core. Like the Shock Force Integration Method, I had to reach the next rank to understand the next level of the inheritance chapter.

But the concept of force once again surprised me. Then the golden dull energy is sealing force. According to the information, I could seal away anything at the level of Black Mark Rank.

If I could seal a Black Mark Rank attack, then it would be awesome. Then I could understand why there is a Golden Shield Rune in my mind. The sealing force can be called absolute defense.

Then I thought of something that once again turned my expression serious. It's nothing but the identity of the Ancient Guardian God. Why did I receive the inheritance?

Then I realized there must be a shocking truth behind it. I then pushed down the unnecessary thoughts before thinking positively.

Now I have two ancient inheritances. Each of them has given me a new kind of enemy called force: the shocking force and the sealing force. If I use these two powers, I think I can fight across levels.

Though I got chapter 1 from both of these methods, I believe the average Silver Rank Warriors won't be able to handle the two types of forces.

Then I collected my thoughts before looking at the dantian. The golden dull sealing force has occupied a small area inside the dantian.

Whereas the Silver Shock Force has integrated with the dark purple lightning essence and the lightning seed.

I don't know what to say if the Dean and the main elders found two kinds of forces in my body.

Chapter 1164: Dean Jerome's strict order!

From MC's Perspective,

Inside the secret land, I stopped practicing two hours later. There weren't any other changes. I now understand what's the difference between two inheritances and how to proceed further.

So the thought of leaving came to my mind. Then I realized something: I don't know how to leave.

“What’s going on here?”

“How am I supposed to leave this place?” I uttered in a low tone.

Buzz!

The next second, I felt an invisible will expelling me from the secret land. My heart was set off by storms. Then the words uttered by Faction Leader Francesca came to my mind.

“Is it really a mysterious secret land?” I asked myself.

She told me to use resources here to activate the dormant bloodline. But thanks to the ancient voice, the process was skipped. My bloodline is active now. I don’t know what secret it holds.

My heart beats with excitement. I kind of feel overpowered right now.

Swoosh!

I disappeared from the spot and appeared outside. Then I saw two people standing before me: Faction Leader Francesca and Dean Jerome.

I was stunned upon seeing them.

Jerome smiled as he started to observe the changes in Zack Lockwood’s body. He saw golden and silver energy all over the red skeleton and essence.

He thought it was the Ancient Inheritance that Zack Lockwood got from the old secret land. Then he saw thick red blood cells running down the bloodstream.

Seeing that the number of thick red blood cells was high, he understood that Zack Lockwood had been able to activate his bloodline successfully.

“You have done a good thing by bringing him here,” Jerome said to Francesca.

Francesca had a helpless expression on her face. She could only notice a few things but not the whole picture because Zack Lockwood was wearing the Red Mark Warrior ring.

But she could feel the difference in the bloodline power. It was more active than before. So she sighed in relief.

Jerome saw through this but he didn’t intend to talk about Zack Lockwood’s Inheritance. Rather, he was now interested in bloodline power.

“Ancestor Dylan Ball is a heroic figure. He single-handedly raised the bloodline family to this level. Apart from you, not many in your family have high bloodline power.”

“Now this Zack seems to have high bloodline power as well. What are you going to do?” Dean Jerome asked.

He had to plan Zack Lockwood’s future carefully. They needed powerful warriors to resist and destroy foreign creatures.

If Zack Lockwood could become a Purple Mark Warrior sooner, then the burden on STAR University would be drastically reduced.

Francesca frowned. She could tell that Dean Jerome didn’t want to talk about Zack Lockwood’s Inheritance, because she had brought Zack Lockwood to the secret land.

She then said, “First, I need to awaken his elemental attribute. The ancestor primarily used the boiling water element. So I need to take him to the family right now.”

Hearing that, Dean found nothing wrong.

But he said, “This kid has already got an ancient Inheritance. He was a thorn in many people’s hearts earlier. Now that he has the bloodline power of the Ball Family,”

“If people see him using it, it would cause unwanted problems. He would become a target for foreign creatures,” he added.

Francesca’s expression changed drastically. She knew the risk. The warriors who inherit ancient power have always been targeted.

Follow new episodes on the "N0vel1st.c0m".

Now Zack has her family’s bloodline power. She was sure that someone could target Zack.

On the other hand, my heart was in turmoil while listening to their conversation. They forgot that I was standing here.

Suddenly, Jeroen turned towards Zack Lockwood.

He asked, “Now that you have heard our conversation, what do you think?”

“Do you have any idea?” he added.

Hearing that, I started to think. The ancient voice had forbidden me from revealing anything. But it reminded me that I could use the bloodline power to cover up.

Since the Ancient Guardian God’s Inheritance is related to sealing, I can disguise it by using bloodline power for my abnormal strength.

Now, in the current situation, I had a good solution.

I looked at them and said, “My Ancient Inheritance is quite special. I can use bloodline power to mask it as Inheritance power.”

Dean Jerome raised his eyebrows. He didn’t want to discuss Zack Lockwood’s Inheritance with others. But then Zack Lockwood belonged to Francesca’s family, so he decided to ask in front of her.

Francesca was curious as well but, because of Dean Jerome, she remained silent.

Looking at their curious faces, I decided to tell them about the Shock Force Integration Inheritance.

“My Ancient Inheritance is called Shock Force Integration. The shock force can integrate with the lightning element to create a tremor effect. But it’s not a common element.” After saying that, I immediately stopped.

Otherwise, I could have spilled about the other two elements.

Dean Jerome saw through this. His eyes flashed with approval. At the same time, he was impressed by Zack Lockwood’s Inheritance.

He hadn’t heard about this Inheritance before, which means it was much older.

Francesca had the same reaction. She was hearing about it for the first time. She knew and read about most of the ancient Inheritances.

It’s the first time she was hearing about the Shock Force. But she felt this Inheritance was a perfect way to mask the bloodline power.

“It’s a good idea. If you were to awaken the boiling water element, you could use the Shock Force to integrate with it. Then no one can distinguish between the bloodline power and ancient Inheritance,” Jerome said in a serious tone.

“Francesca, what do you think?” he asked.

“Dean, this method is perfect. No one will suspect it, including the faction leaders,” Francesca replied.

Jerome nodded his head and said, “Zack Lockwood, listen carefully. Hereafter, your inheritance is an ancient variant of water force.”

“If anyone asks you, you say the same, including your Thunderflame Faction Leader and main elders. I know you have two masters.”

“But I want you to hide the truth from them for your own safety. This also includes the truth about your bloodline power. Apart from me and Francesca, no one should know about this. It’s my strict order,” Dean Jerome said in a strict tone.

Chapter 1165: Dean Jerome’s twist

From MC’s Perspective:

“Don’t worry, Dean. I won’t tell anyone,” I replied to Dean Jerome.

He trusts Zack Lockwood. Then the Dean turned towards Francesca Ball.

He said, “You can take him to your family. I hope his bloodline attribute is boiling water. It will save us from a lot of trouble.”

“Once you are done with your work, drop him at Star City. I’ll go and convince his faction leader and the main elders.” After saying that, he disappeared from the spot.

Francesca let out a deep sigh. She then turned towards Zack Lockwood.

She said, “You are lucky. If you become a Red Mark Warrior in the future, you can protect yourself. Until then, you have to be careful.”

After saying that, she grabbed Zack Lockwood's shoulder before disappearing from the spot.

Swoosh!

She exited Star University in a flash. She is moving towards her home at breakneck speed.

On the other hand, my body is brushing against the fierce wind. I knew that I can't match her speed; she is a Half-Step Red Mark Warrior.

…

Thunderflame Faction:

"What's going on?"

"I got the message from the Dean saying that Zack was with him," Faction Leader Clifford said to the others.

Main Elders Austin, Ann, Leola, Cathy, and Rosie were all present.

"I guess the Dean is discussing a serious matter with Zack," Austin replied.

"Maybe it's related to his inheritance," Leola commented.

"You are right. I watched the Dean's expression earlier. He seemed to have wanted to talk with Zack Lockwood. But because of the faction leaders, he didn't say anything," Cathy said.

"She is right!"

Dean Jerome's voice sounded all of a sudden, stunning everyone. They all stood up from their seats, including Oldman Clifford, who stepped aside from the main seat.

Swoosh!

The next second, Dean Jerome appeared in front of them. He sat in the main seat, with Clifford standing beside him.

Quiet!

There was a pin-drop silence. Earlier, everyone had been casually chatting. They didn't know that the Dean had heard every conversation.

"I took away Zack Lockwood this morning to discuss his inheritance," Jerome said.

Hearing that, everyone felt curious. They wanted to hear from Zack Lockwood, but he was not there. Instead, Dean Jerome had come.

"I have verified his inheritance. It's indeed an ancient inheritance, better than some of the known ones," he added.

Phew!

Oldman Clifford heaved a sigh of relief.

Follow new episodes on the "N0vel1st.c0m".

Austin and the other main elders put their hearts at ease. If it was an ancient inheritance, then Zack Lockwood could reach Red Mark Rank without any problem.

That's why everyone paid attention to the inheritance. Not only that, but every university attaches importance to a warrior who has an ancient inheritance; they treat them like an asset.

So everyone here thought that Zack Lockwood would be safe.

Jerome smiled and said, "I know what you guys are thinking. But it's not that simple."

"His ancient inheritance doesn't belong to any of his three elements. Instead, he has accepted a new one—a variant of the water element."

"Compared to other ancient water element inheritances, Zack Lockwood's contains destructive properties, like a water bomb."

"That's why I took him early to check for any problems," Jerome said in a serious tone.

Hearing that, everyone's expression changed drastically. They had thought it would be a smooth journey, but they didn't expect Zack Lockwood to have this kind of problem.

"Dean, what do you mean?"

"Don't tell me he can't use his purple lightning element anymore," Austin asked all of a sudden.

He felt like a thunderclap had struck his ears. Everyone was happy that Zack Lockwood got an ancient inheritance. But if it's not lightning, fire, ice, or healing, then he would be disconnected from the Thunderflame Faction.

"Dean, what about his healing element?" Ann also asked.

She had great expectations for Zack Lockwood because he was practicing one of her ancient healing techniques.

The ancient healing technique was incomplete, but the main chapter could provide special abilities upon successful practice.

The faces of Leola, Cathy, and Rosie changed as well. They didn't expect such a twist to happen.

Jerome's eyes flashed with a gleam.

"I don't have any answers right now, but I'm going to look for a method to see whether he can integrate the water element with the others," Jerome said to them.

If Zack Lockwood were here, he would be shocked to the core. He had no idea how Dean Jerome was protecting his secret with the information provided by him about his Ancient Shock Force Integration inheritance.

Faction Leader Clifford immediately replied, "Thank you so much, Dean."

"Thank you, Dean!"

One after another, the main elders thanked Dean Jerome.

"It's okay. I have given a task to Zack Lockwood to complete. He will return soon, so you guys can do your work." After saying that, he disappeared from the spot.

When Dean Jerome was gone, everyone sat back in their seats. They sighed in relief, knowing that the Dean would find some solution.

"No wonder the kid looked down yesterday," Faction Leader Clifford said.

"It's okay; as long as he has an ancient inheritance, everything else doesn't matter. Only by becoming a Red Mark Warrior can he protect himself," Austin said while accepting the facts.

“If the Dew Water Faction people learned about this news, they would be shocked to the core,” Leola commented.

“I’m not going to let him go. He still has a healing element. The healing technique he is practicing is an ancient internal method. It won’t interfere with the ancient inheritance,” Ann said all of a sudden.

Faction Leader Clifford asked, “Main Elder Ann, is it true?”

“Yes, Zack has successfully started practicing it. But it would take time for him to progress since he is focused on the other two elements,” Ann said.

“Phew!”

“Then we are saved. I don’t want the Dew Water Faction people to have Zack Lockwood,” Clifford said.

Hearing that, the others agreed. Austin sighed in relief.

Then he said, “Since the Dean is going to find a way, I’m going to search for techniques as well.”

“Don’t put pressure on yourself. Since the Dean has said it, that means he is 80% sure he will solve Zack Lockwood’s problem,” Faction Leader Clifford said to him.

Chapter 1166: Third Inheritance?

From MC’s Perspective:

In a place surrounded by mountain ranges, there is an old, pointed structure, and brick buildings can be seen in the middle of it.

These castle-type buildings give ancient vibes. I didn’t expect Faction Leader Francesca’s home to be on this level. She was truly from a broken background.

I thought she would directly take me home, but she continued to fly across the buildings.

Francesca turned her head and saw Zack Lockwood's reaction. She then turned back and continued to fly.

She said, "I don't want others to see you. There are many factions within the family. If any unwanted people saw us, it could cause problems for me."

Hearing that, I nodded to her. But I was shocked in my heart. A dignified Half-Step Red Mark Warrior is afraid of family politics. Then she said one of my parents was from her family.

A quick gleam flashed in my eyes.

I don't know about my parents, but she found me and told me the truth because of the bloodline connection. Can she find my parents?

A lot of doubts appeared in my heart. It was an unknown secret with which I had made peace a long time ago. But Faction Leader Francesca had successfully opened the wound.

Swoosh!

She continued to fly across the sky. This time, we left behind the castle-type buildings. Now she is going to the forest at the foot of one of the mountains.

It didn't take long for her to reach the middle of the forest covered with giant trees. My eyes gleamed with a twinkle. I had only seen these trees inside the secret land.

But compared to those dead trees and tree monsters, the trees in this forest look green and lively.

"Don't be fooled by the appearance. The trees could suck the life out of a Gold Mark Warrior easily," Francesca said without turning back.

My back went cold hearing that. My earlier appreciation disappeared from my heart.

“Here, we are!”

She said before appearing in the vacant land where there is a fountain in the middle of it. Instead of water, red-colored water is flowing from it.

“Where is this place?” I asked her.

“This is the awakening fountain of her family. This entire forest belongs to our family as well,” Francesca said.

Hearing that, I was left speechless. This dangerous forest belongs to her family. Then a look of understanding dawned on me.

Francesca’s eyes flickered.

She said, “Looks like you have understood something. Let me tell you, the whole forest’s existence was to protect the fountain.”

“I understand,” I replied.

“Now let’s focus on the work. It’s easy to find out your attributes since your bloodline has awakened. There is no need for an awakening process.”

“You can simply drop a drop of blood into the fountain. If the calm red water changes color and shows clear water boiling, then it’s the boiling water element,” she added.

Hearing that, I sighed in relief. I thought there would be some serious trials. I had gotten out of the ancient trials. I didn’t want to face such trials soon.

I calmed my heart before pricking the tip of my finger. Then I walked up to the red fountain water and dropped the blood drop into it.

Francesca Ball was watching everything closely.

The red blood drop fell and landed on the calm red water. At first, there was no reaction, then the calm red water began to shake. It started to change color.

Follow new episodes on the "N0vel1st.c0m".

The red water became transparent like drinking water. Following that, the clear water began to boil. A hot vapor started coming from it.

Seeing that, my eyes gleamed with a twinkle.

Francesca Ball heaved a sigh of relief as well.

She said, “Now there is no problem. Your element is the same as Ancestor Dylan’s.”

“You can use your inheritance to disguise the bloodline power,” she added.

On the other hand, I was dumbfounded. I already have two ancient inheritances. Now I have the bloodline power. How am I supposed to use it?

Francesca said, “You must be wondering how to use the bloodline power, right?”

I shook my head and said, “I don’t want to use the bloodline power. I already have an ancient inheritance.”

Francesca was stunned. She thought Zack Lockwood would be happy to hear about the bloodline. But he was not happy at all.

“What’s wrong?”

“Did you forget Dean’s words?”

“He said your inheritance will be the ancient inheritance of the variant water source,” Francesca said in a serious tone.

My expression turned ugly. I’m already burdened with two inheritances. Fortunately, there is no problem with the existence of the two inheritances.

Otherwise, the ancient voice would have warned me. Now what should I do?

Francesca frowned and said, “If it were others, they couldn’t wait to practice the bloodline method of our ancestor. Only in that way can you use your bloodline element.”

“Otherwise, you can’t attract the water element. It’s not your natural talent. It comes from your bloodline. You need bloodline methods and techniques to practice it,” she added.

Hearing that gave me a headache.

“I don’t know whether it’s okay to practice the bloodline method. What if it is not compatible with the ancient inheritance of mine?” I said.

“Did you forget? I was there when you talked about your inheritance. Your inheritance power can integrate with your lightning element, despite it not being a lightning-type inheritance,” She said.

“I think that inheritance power can integrate with boiling water as well. That’s why the Dean told you to reveal the ancient inheritance of the variant water source,” she added.

Hearing that, a look of understanding dawned on me. To cover up my bloodline, I need to have the bloodline method of hers.

“I’m a bit confused right now. Can we talk about this later?” I asked her.

Francesca sighed. She realized that Zack Lockwood is overwhelmed with information right now. He needs rest.

“Okay, I’m taking you back to the university. I will then ask the Dean what to do,” she said.

“Okay,” I replied to her.

Chapter 1167: Back to campus!

From MC’s Perspective:

Faction Leader Francesca dropped me in the middle of Star City in an isolated spot. No one could have spotted her. But I have to go back to the university on my own now.

A slight headache is making me uncomfortable. So many things have happened back-to-back. I couldn’t figure out the heads and tails of it.

I have decided to lock myself up for at least 2 days in my residence. Only after clearing my head could I face others.

Not long after, I came to the busy street. Then I found a cab waiting for a customer. When I showed my ID, the driver widened his eyes in disbelief.

Before he could open his mouth and draw attention, I looked at him and said, “I don’t have time for this. I need to go back to the university ASAP.”

Hearing that, the middle-aged driver nodded his head. His expression was serious.

Then I entered the cab and sat in the back seat. The driver then started to drive without making any noise. The cab slowly hovered above the ground.

After appearing in mid-air, he started driving toward the destination. From time to time, the driver took a look at Zack Lockwood, who is one of the famous persons of their Star University.

His fame went through the roof when he became one of the survivors of the secret land. The survivors of the secret land all got Inheritance.

Many of them received ancient inheritance. It was no longer hidden news. The driver thinks that Zack Lockwood had accepted ancient Inheritance as well.

It's just that he feels unfortunate that he is not familiar with Zack Lockwood. Otherwise, he could have spoken to him right now.

On the other hand, with my current black mark warrior strength, I could easily tell that the driver was observing me.

But then I guess I should adapt myself to this kind of situation.

About 20 minutes later,

The flying cab entered the Star University space. Then the driver slowly drove toward the parking area. After arriving at the spot, he landed the vehicle slowly on the ground.

I don't have to pay the fare. The university would pay for me because the flying cab belongs to the university. Then I nodded to the driver before stepping out.

Then I started walking toward the Thunderflame Faction.

It didn't take long for me to get there. When I walked inside the faction territory, I saw members going about their business.

At first, no one seemed to have spotted me. But when I continued walking toward my residence, among the passersby, a few recognized me instantly.

“Hey, he is Zack Lockwood!”

“He has come out of his residence!”

“Great!”

“Our Thunderflame Faction got another ancient inheritance warrior.”

“But we don’t know about his inheritance. I guess he is now an inner hall warrior. Soon, everyone will know.”

They are discussing in low tones, but I could hear them clearly. I almost forgot that I’m an Inner Hall Warrior now.

Which means I have to go to the new place. Then I pushed down these thoughts before continuing to walk.

Soon, I reached the residence. I quickly went inside and locked the door.

Phew!

I heaved a sigh of relief the next moment. I hope Faction Leader Francesca won’t come here to abduct me again. My eyes reflected helplessness thinking about it.

…

Dean's Office:

"Are you sure he doesn't want the bloodline method?" Jerome asked.

He is speaking to Francesca Ball.

Francesca sighs before replying, "He seems to dislike the bloodline method."

Jerome was taken aback. Then he thought of something important before saying, "The kid is yet to know about the secrets of our world. No one has spoken to him."

"Maybe he will change his mind after learning about the foreign creatures. If he gets the bloodline method, then basically he is stronger than other ancient inheritance holders by a large margin."

"With that power, he can save a lot of lives on the battlefield," Jerome said in a serious tone.

Francesca's eyes lit up with hope.

She said, "Dean, I think he doesn't know about our work. Maybe he thought that Red Mark Warrior was the ceiling. Now he has the inheritance information; he should know by now that our world is not that simple. It's bigger than he is thinking."

"Alright, I'll tell Clifford to inform him about the world and our enemies. Once he clears his mind, we will talk to him again," Dean Jerome said.

"Okay, Dean," Francesca replied.

Jerome then thought of something before asking, "Is there any possibility of finding Zack Lockwood's parents?"

Hearing that, Francesca hesitated. Then she said, “We don’t have records of those who have gone for undercover missions.”

“Many of them were dispatched to various outposts that year. So I’m still trying to find out the truth,” she added.

“Take your time. Too much information is not good for him. Let him focus on the task at hand,” Jerome replied.

He can’t imagine the emotional turmoil of that kid, Zack. So he doesn’t want the past wounds to bother that kid now.

Then they spoke about a few other things before Francesca left the place.

…

Meeting Hall:

“Zack is back,” Clifford uttered in surprise.

There is no one inside the meeting hall right now. Everyone is doing their own work. He is thinking about meeting Zack Lockwood.

Then he recalled something before shaking his head.

“Ancient Inheritance of the variant water element,” he uttered in a helpless tone.

He has decided not to bother the kid. If other factions learned about Zack Lockwood’s situation, then they wouldn’t be silent. They would definitely make fun of that kid.

So far, Zack Lockwood had tormented them with his powerful purple lightning. Others would surely be happy if it's not going to repeat in the future.

Clifford trusts Dean's words. Dean Jerome is a Red Mark Warrior. He has seen many things and knows many secrets. He believes he will solve the problem soon. Chapter 1168: Part 1: Truth about the world

Meeting Hall:

Faction Leader Clifford was deep in thought when he suddenly received a call from the Dean. Upon seeing the call, he gathered his thoughts before answering.

"Dean," Clifford uttered.

Then Clifford began to listen. Dean Jerome explained what to do. He ended the call a few minutes later.

In the next moment, Clifford's eyes lit up.

"The Dean must have found a way; otherwise, he wouldn't instruct me to do things," he thought to himself.

The Dean wanted him to tell everything about the world to Zack Lockwood, which meant Zack Lockwood was now officially a Black Mark Warrior. He could join the Inner Hall tomorrow.

…

From MC's Perspective:

The following day,

After getting out of bed, I started my morning routine. I felt a lot more relaxed. My head was light, and my thoughts were clear.

I spent about an hour completing my morning routine before heading to take a bath. The bath lasted for 20 minutes.

Later, I stepped out and changed into fresh clothes. I didn't know what was going to happen today. Thinking about her puts me in a bad mood.

I pushed those thoughts down before getting ready.

An hour later,

I was ready to leave when I received a call from the faction leader. Upon seeing the call, I attended it. He wanted me to come to the meeting hall because he had something important to discuss.

After he ended the call, I stood in the same spot, pondering. I'm sure the Dean doesn't want others to know about the bloodline power.

So he had asked me to lie about my inheritance. If I went to the meeting hall now, there would be discussions about the inheritance.

"What to do now?" I asked myself.

The Dean is the ultimate authority here. I can't go against his words. He wanted me to lie about the inheritance for my safety.

There is also the Red Mark Warrior Ring on my finger. It can block all prying eyes. I continued to look at the ring.

Then I decided to go along with the lie. After gaining some clarity in my thoughts, I exited the room and walked out of the residence.

Looking at the bright sky and feeling a cool wind brushing against my face, I felt good. Then I started walking toward the meeting hall.

On the way, I came across other members. They stood to observe me. Right now, I am a Black Mark Warrior.

The warriors above the General Rank rarely spent their time in the Thunderflame Faction. They had their own hall and facilities.

I ignored everyone's gazes and continued toward the meeting hall. Soon, I arrived at the meeting hall. When I entered, I found everyone present.

Faction Leader Clifford was seated in the main chair. Master Austin, Ann, Main Elder Leola, Cathy, and Rosie were present as well.

Everyone's expressions were dull. Upon seeing me, they showed serious reactions.

"Zack, I know you were resting yesterday, but I would like to know the name of your inheritance," Austin asked in a serious tone.

Hearing that, others perked up their ears as well.

Follow new episodes on the "N0vel1st.c0m".

Faction Leader Clifford looked at me with expectations.

But I did not falter. I had come prepared.

I raised my head and said, "My Ancient Inheritance is called the variant of the water source element."

"Sigh!"

Faction Leader Clifford let out a deep sigh. The faces of the other main elders changed drastically. Now they understood that Dean Jerome was not lying.

Now, everyone's mind had one thought: What if the Dew Water Faction learned about Zack Lockwood?

Since Zack Lockwood had accepted the ancient inheritance related to the water element, his rightful place must be the Dew Water Faction.

Quiet!

The whole main hall fell silent.

The faces of the main elders looked sad. They didn't know whether to console themselves or Zack Lockwood.

Austin was shocked to the core. His last disciple, who was exceptional with the purple lightning element, had accepted the ancient inheritance of the variant water in the end.

Ann was disappointed as well, but she didn't give up hope. Because the ancient healing technique is independent; its origin is related to the ancient era as well.

While everyone was down, I sighed inwardly. If not for the bloodline power in my body, I would have told them about the Shock Force Integration Inheritance.

That ancient inheritance allowed me to practice all three elements up to the Title God Rank.

Unfortunately, I couldn't reveal the truth right now. Dean Jerome seemed to be serious about the bloodline power in my body.

Clifford said, "Thankfully, Dean Jerome said that he would find a way for you to use the purple lightning element. I believe him; he won't speak without being sure."

Hearing that, I nodded to him. Of course, the Dean knew about my ancient inheritance.

“Right now, the Dean wants me to tell you the truth about our world. It’s the truth everyone would know after becoming a Black Mark Rank,” Clifford added.

My expression turned serious. Finally, the doubts regarding the appearance of foreign creatures at the trial would be cleared.

“Zack Lockwood, our world is unique and massive. The countless outposts, many inner posts, and the current Tier-4 region are only a small part of our world,” Clifford said.

At this time, the main elders showed serious expressions. They had heard this countless times since becoming Black Mark Warriors.

At that time, everyone was young and in their prime, but the news shook them to the core. Right now, they didn’t know how Zack Lockwood was going to react.

On the other hand, I was surprised by the sudden revelation. But I quickly accepted the fact: ever since I learned there are many levels beyond the General Rank, I understood the world is not ordinary.

Besides, I hadn’t heard about warriors above the Red Mark Rank living in the Tier-4 Region. I had guessed there must be another place somewhere in the world. I’m happy that I’m finally getting to know the truth.

Chapter 1169: Part 2: Truth about the world

From MC’s Perspective:

Meeting hall:

Clifford said, “Since you got the inheritance, you must know about the ranks above the Black Mark. There are powers above Red Mark Warrior.”

“Once you become a Red Mark Warrior, you will know about them. Right now, you should know that our world is engaged in a war with the foreign creatures’ world.”

“The war has been taking place since ancient times. From time to time, there are ceasefires. But we are now engaged in an active war with them.”

“The foreign creatures have a similar rank system. The highest one we are dealing with has the same power as the Red Mark Warrior.”

“But they are not frontline warriors. They operate behind the scenes. The frontline warriors are the same as Black Mark, Silver Mark, and Gold Mark Warriors,” Faction Leader Clifford said in a low tone.

On the other hand, my heart was in turmoil. My doubts were cleared, but it’s shocking to know that the ancient battle is yet to be over.

No wonder the ancient voice had great expectations of me. It had made me fight against the foreign creatures in that trial.

I have to say my first fear of them had already left my body. The ancient trial had destroyed my fear.

Austin and others were watching Zack Lockwood’s expression. They were surprised to see his calm and composed behavior.

They thought he would yell out in surprise because they had done the same when they heard it for the first time.

But they didn’t know Zack Lockwood had already experienced the foreign creatures in the trial.

A few minutes later,

I looked at everyone before turning toward Faction Leader Clifford.

“I understand,” I said to him.

“Good, since you know now. Hereafter, you won’t be fighting against monsters alone, but against the foreign creatures as well.”

“You will be assigned to the battlefield whenever there is a foreign creature extermination task,” Clifford said in a serious tone.

Hearing that, I replied, “Okay.”

“Good, you can go now. Hereafter, you will be entering the inner hall. If you want, you can go there to get familiarized,” Clifford said.

I nodded to him and the others before leaving the meeting hall.

“Sigh!”

Clifford let out a deep sigh. He had expected a different reaction. But Zack Lockwood was calm and composed from the beginning.

He then turned toward the others and asked, “Did any of you guys tell him before?”

“No,” Austin replied with a smile.

“I think Dean Jerome must have said something. This kid came prepared. He was not surprised at all,” Leola said with a chuckle.

Hearing that, the others supported her argument. Then they spoke about a few other things before parting ways.

Meanwhile,

I walked out of the Thunderflame Faction and started walking toward the Inner Hall. The Inner Hall is located far away from the Outer Hall.

But then I continued to walk on foot. On the way, I came across other warriors who were surprised to see me.

The next second, they stopped and took pictures. Seeing that, I ignored them and continued walking.

There were a couple of warriors who avoided my gaze and fled from the spot. They were all General Rank Warriors.

They didn't dare to fight against me right now.

About 10 minutes later,

I arrived at the territory surrounded by walls. I came to the entrance gate and saw that no one was there. Confused, I wondered if my outer hall ID would work.

I took the ID out and walked up to the gate.

Creak!

The next second, the iron gate opened. A middle-aged man walked out. The aura of a Black Mark Warrior radiated from him.

The middle-aged man saw the face of Zack Lockwood, and he was stunned.

"You are Zack Lockwood?"

“What are you doing here?” the middle-aged man fumbled a little.

“What do you think?” I asked back.

The middle-aged man collected his thoughts. He felt a sense of danger from Zack Lockwood. Then he recalled the trending news.

He realized that Zack Lockwood was one of the returnees from the old secret land.

“You are a Black Mark Warrior now,” the middle-aged man uttered.

Then he welcomed Zack Lockwood inside.

I nodded to him before walking into the inner hall. The inner hall is larger, wider, and more spacious than the outer hall.

I could see tall buildings everywhere.

The middle-aged man said, “I’ll take you to the admin office. They will give you your new uniform and ID card.”

“Thanks,” I replied.

Then I started following him to the admin office.

On the way, I began to look around the surroundings. I didn’t see a single warrior.

I asked, “Where are the others?”

The middle-aged man said, “Most of the warriors have gone for the foreign creatures extermination task.”

Hearing that, I was stunned. I thought one or two teams could have accepted the task. But it looks like the battlefield is larger than I imagined.

Soon, we arrived at the admin office. There was an old man sitting behind the desk. I could sense that he was stronger than me.

“He is a Silver Mark Warrior,” the middle-aged man said.

Hearing that, I raised my eyebrows in surprise.

The old man opened his eyes. His gaze fell on the ID before he saw Zack Lockwood. He immediately recognized him.

He said, “You are a famous kid in the outer hall. But you are an inner hall warrior from now on. You can’t be reckless hereafter.”

“I will be careful, elder,” I said to the old man.

Then he called out to the staff inside the office. A middle-aged man walked out. The old man told him to bring out the new ID and uniform.

Shortly afterward,

The staff came with the new ID and uniform. The old man gave them to me. I accepted them and stored them in my storage ring.

“The rest of the things he will explain to you,” the old man said.

I thanked the elder before leaving.

The old man's eyes flickered.

"This kid's inheritance is not easy. Many of them are going to have sleepless nights here," he thought.

Your gift is the motivation for my creation. Give me more motivation!

Chapter 1170: Gave the inner hall seniors good lesson!

From MC's Perspective:

The middle-aged man who is guiding me is still the same person who opened the gate for me earlier.

"What's your name?" I asked.

The middle-aged man was stunned.

He said, "Now you remember me. My name is Simon. I'm one of the senior students of the Inner Hall."

Hearing that, a look of understanding dawned on me. Then he started to take me around the inner hall buildings and facilities.

Time passed while we were going around the places. I realized that the number of warriors in the inner hall is less compared to the outer hall.

Not many successfully break through to become Black Mark Warriors.

I saw many training facilities, not just one, but more than one. The training facilities seemed to be larger than the ones in the Outer Hall.

He then showed me the dormitory building. I can stay here if I want. These places were built for those who don't belong to the top 10 factions.

Just as we were about to finish the short tour, we came across a group of warriors. Seeing that, Simon's face changed.

"Zack Lockwood, let's leave," Simon said.

Hearing that, I was dumbfounded.

"What happened?" I asked.

"It looks like the news of your joining here has spread to others," Simon said.

I didn't know what to say. Everyone here is a Black Mark Warrior. What's there to be afraid of?

Swoosh!

Before I could ask, the middle-aged man, Simon, fled from the place. Seeing that, I was stunned. I didn't know why he was so scared.

Then I turned around and saw the group of warriors coming towards me.

There were six of them, all middle-aged men. Looking at their emblems, I saw that they were not from the top 10 factions. I ignored them and decided to leave.

Swoosh!

The next second, they appeared in front of me. I raised my eyebrows and looked at them.

“It looks like you are a newcomer. What’s your name?” a tanned-skinned middle-aged man asked.

Hearing that, I sneered inside. I’m wearing the uniform of the Outer Hall. The emblem of the Thunderflame Faction is on my chest.

Either they are blind or are purposely trying to create trouble.

But I think it’s the latter. So I looked at their smiling faces before saying, “Yes, I’m new here. My name is Simon.”

The smile on their faces disappeared the next moment.

The six of them showed anger on their faces, but the middle-aged man with tanned skin stopped them from saying anything.

In fact, the six of them recognized Zack Lockwood. They were purposely creating problems to establish their prestige. They are not from the top 10 factions.

If a newcomer looks down on them, it would cause a lot of ridicule among the other warriors.

The middle-aged man walked forward to look into Zack Lockwood’s eyes. He knew that Zack Lockwood was from the Thunderflame Faction.

There were already rumors spreading around that he had accepted Ancient Inheritance. But he wouldn’t let a newcomer look down on them.

Boom!

A terrific coercion was released from his body. It immediately caused a shockwave.

On the other hand, my eyes turned icy. I didn't do anything, but he released coercion to attack me. The coercion struck my body in a flash.

The middle-aged man and the other warriors expected to see some fun. But to their disappointment, the coercion was too weak to harm me.

The smile on their faces disappeared the next second.

"What is it?"

"I don't like tickling," I said to them.

Hearing that, the six of them were infuriated. The middle-aged man raised his fist to strike me.

Boom!

I simply grabbed his fist. Then I raised my right leg and kicked his side.

"Aaaaahhh!"

The next second, he let out a scream before rolling over on the ground. This all happened within seconds.

Seeing that, the other five warriors reacted. It's forbidden to use Inheritance force power, but they were allowed to use their brute strength.

The next second, the five of them started rushing toward me to attack. Seeing that, I didn't step back.

Without using my perception ability, I could clearly perceive each of their movements.

Whack!

When the second warrior was a few meters in front of me, I stepped forward to attack. I smacked his face with a loud slap.

The warrior felt his head spinning. He felt sudden dizziness. He immediately knelt on the ground.

Boom!

Then I punched the third warrior's abdomen. The next second, he fell to the ground, clutching his stomach. The remaining three warriors were shocked.

They were forced to use their Inheritance force, but I didn't give them a chance. One after another, I struck my fists at their abdomens.

I hit the last one in the chest. In the blink of an eye, all six of them were rolling on the ground. It was just a casual strike from me, yet it caused this much pain to them.

Then I realized my body is many times stronger than theirs. It has undergone many transformations because of the two Ancient Inheritances.

So it's normal that my body is stronger than the Black Mark Warriors here. I doubt the Black Mark Warriors with Ancient Inheritance would be able to fight against me.

After a spare glance at them, I turned around to leave. I had already looked around the important places. If there are any buildings left out, I'll see them tomorrow.

Then I returned to the exit gate, where I saw the middle-aged man Simon. Upon seeing me, he was genuinely shocked.

"What happened to them?" Simon asked.

“They have gone back,” I replied.

“It’s impossible. I know about them. They won’t let newcomers go easily,” Simon said in a serious tone.

“You can go back and check.” After saying that, I walked out of the place.

Then I started going back to the Thunderflame Faction.

Simon was dumbfounded. He then started going back. Upon arriving at the previous spot, he saw the six of them were bruised and battered.

Your gift is the motivation for my creation. Give me more motivation!
