Chapter 1431: Eliminating the foreign creature team!

Battlefield 5

The supervisor of the foreign creature side was a humanoid-type creature. But this creature had an oval head with long, slender arms touching the ground.

The fingers were like claws. They could tear apart anything. The face was blank except for a single eye. The pupils in that eye were constantly moving as it watched the battle end.

Then, the foreign creature sent an emergency report to the higher-ups. One of the targets on the kill list had appeared here.

The humanoid wanted further orders to act. It was believed that the target was the masked man who was responsible for the Battlefield 8 collapse.

Meanwhile,

It didn't take long for me to come across the group of foreign creatures. The foreign creatures looked like humanoid creatures with long hands.

Right now, I'm looking at them. My eyes are sharper. I can tell that they have found me as well. They are all coming towards my direction.

My perception is active. It has covered the surrounding area. There are five foreign creatures in the group.

I tried to sense their strength. The next second, my eyes flashed with seriousness. Their strength seemed to be that of Gold Mark Warriors.

I held the white bone staff tightly. Then, I circulated the dark purple lightning force in my body. In the blink of an eye, the dark purple lightning force covered the white bone staff.

The foreign humanoid creatures were all the same. They all had long, claw-like hands. It didn't take long for them to get closer.

Upon looking closer, I saw their height was over 8ft.

Boom!

One of them rushed forward to attack. The other four humanoid creatures moved from behind.

I gripped the staff tightly. I saw the foreign creature raise its long hand towards me. This all happened within seconds.

Boom!

Then I rotated the staff. The purple lightning force was beaming with power. Next, I swung the staff.

Swoosh!

The staff blurred. In a flash, the staff came down like a hammer. It struck the claws the next second.

Boom!

A deafening noise sounded.

The right-hand claw was destroyed. Black blood splattered across the ground.

Shriek!

The foreign creature made a weird sound. Its right claw was injured. It swept its left claw towards me in anger.

Seeing that, I swept the white bone staff in a wide arc. The staff struck the left-hand claw.

Boom!

An earth-shattering noise occurred. The left-hand claw was broken as well. This all happened within seconds.

Shriek!

The foreign creature made another weird sound.

By this time, the four other foreign creatures appeared before me. My perception caught every detail.

Swoosh!

All four foreign creatures launched an attack. A black light was released from their claws. Each of the foreign creatures released two streaks of black light.

I felt a sense of crisis. My eyes caught the black light. It seemed to be dangerous. My senses were heightened.

Swoosh!

I evaded the first black light. It went right past me. The second black light came the next second. I moved my body at the last second.

As the seconds passed, I shifted my body here and there to avoid getting hit by the black light. This all happened within a second.

I was extremely focused. When the last black light missed its attack, I raised the white bone staff to attack.

Slam!

The purple-lightning-force-covered staff slammed into the foreign creature closest to me.

Boom!

A terrible noise sounded. The foreign creature fell down to the ground.

Then I swept my white bone staff across the other three foreign creatures. They released the same black lights again.

Boom!

This time, I encountered the black light again. The white bone staff came in contact with the black light.

Boom!

A deafening noise occurred. I felt a tremendous force affecting the white bone staff. I circulated the purple lightning force to withstand the black light.

Boom!

The black light was extinguished. The white bone staff then met the body of the foreign creature. The white bone staff slammed into the chest of the foreign creature.

Boom!

The foreign creature flew backward before crashing into the ground.

I wanted to use another inheritance force, but I couldn't expose it in front of others. I swung the staff in a wide arc. The staff knocked down the fourth foreign creature.

Boom!

I didn't waste time. The staff spun before sweeping the hands of the 5th foreign creature.

Boom!

The hands of the foreign creature cracked. Blood gushed forth from the wound. Taking the opportunity, I moved the bottom of the staff upward.

The staff's bottom end struck the jaws of the 5th foreign creature. The 5th foreign creature rolled backward before landing on the ground.

In a few minutes, all five foreign creatures were knocked down to the ground. But they were not completely dead.

Boom!

Then I made a decision. I quickly went to the side of the foreign creatures and struck their bodies with heavy blows.

Boom!

The white bone staff struck their heads one after another. The foreign creatures tried to stop the attack.

But they failed to stop the attack. Their heads cracked. Black blood splattered across the ground.

It took me a few more minutes to completely kill them. If it had been earlier, I would have used shock force and blood force to make their deaths quicker.

Now, I could only use the dark purple lightning force.

After making sure that they were confirmed dead, I continued to walk forward.

I heard a different shriek this time. There were foreign creatures fighting ahead. Seeing that, I rushed forward.

Dean Jerome wanted me to perform well. I should kill as many foreign creatures as possible.

...

Office

Supervisor Kenny saw the battle as well. His eyes flashed with appreciation. He thought Zack Lockwood did well against the group.

There was more fighting happening at the front.

But his eyes flashed with worry. He was not worried about the current battle, but he was thinking about the next battle.

Earlier, he had a phone call with Dean Jerome. Dean Jerome was confident in Zack Lockwood's strength.

So, he told him not to worry about the battle.

Chapter 1432: Stunning other warriors!

Battlefield

When I got closer to the front, my gaze fell on the foreign creatures fighting against the warriors. My arrival drew the attention of the creatures.

Unlike the long-handed foreign creature from before, these creatures came in different shapes and sizes. One of them was three meters tall.

A team of warriors was fighting against this one particular creature. As my gaze swept across the battlefield, I found the same situation everywhere.

Shriek!

Suddenly, a four-legged foreign creature charged toward me. My gaze sharpened. I realized the strength of the creature was at the Silver Mark.

I rotated the staff and shifted my hand toward the center. I covered the staff in purple lightning force.

Boom!

In the blink of an eye, the four-legged creature, over four meters in size, appeared before me.

I felt as if a small hill had manifested in my path. The terrifying thing was the creature's face.

It looked exactly like a human face; my heart stirred. Fortunately, I composed myself. Then I swung the staff; it swept toward the side of the creature's body.

Boom!

The foreign creature didn't take the attack seriously. Its humongous body collided with the staff.

Boom!

A deafening noise sounded. The staff strike left behind a terrible lightning power, tearing through the flesh and bones of the creature.

Puchak!

Weird black blood splattered across the ground.

Shriek!

The foreign creature let out a strange sound. It lost its composure. For a second, it even forgot about its human enemy.

Boom!

I moved. My staff swept in a wide arc before striking the unguarded creature. In a flash, the staff delivered a terrible blow.

Puchak!

Blood gushed forth from the wound. Seeing that, I continued to land a few more strikes. The massive body of the creature made it hard to kill in a single move.

Puchak!

The staff landed one blunt blow after another. The body of the foreign creature finally broke. The purple lightning force surged inside and started rampaging through its organs.

The four-legged creature finally smelled death. Charred smoke rose from its body in the blink of an eye.

A few minutes later...

The massive body of the creature crashed onto the ground. It had taken me a couple of moves to kill the Silver Mark foreign creature. If it were a human warrior, the strike would have killed him many times over.

Gasp!

The next second, I heard a loud exclamation. I turned and saw that both the human warriors and the foreign creatures were looking at me.

This type of foreign creature was different; it usually could only be killed by more than one Silver Mark warrior.

But I had killed it alone. Suddenly, I felt a terrible killing intent coming from the foreign creatures.

"Hey, he is Zack Lockwood. The rising star of the Thunderflame Faction," a warrior from the human bloodline faction said.

Hearing that, others had looks of understanding on their faces. There were warriors from other universities as well.

They showed killing intent in their eyes. If they could kill Zack Lockwood, they could claim massive rewards.

Boom!

Following the words spoken by the human warriors, the creatures started charging toward their main target.

The name "Zack Lockwood" was now on their kill list. For the foreign creatures, killing him would bring more rewards than killing any other warrior.

On the other hand, my perception was active. I could feel killing intent from both sides.

I held the staff tightly. Seeing the number of foreign creatures, it was going to be a difficult battle for sure but I was ready.

The warriors saw that half of the foreign creatures were all heading toward Zack Lockwood.

The pressure on the rest of them was greatly reduced. The warriors from the Thunderflame faction and the neutral faction were all grateful.

Even the warriors from the hostile university set aside their enmity. The presence of Zack Lockwood truly helped them.

Boom!

I started swinging my staff. The foreign creatures were trying to stomp me. I side-stepped to avoid their massive bodies and targeted their flanks. The bottom end of the staff contacted their skin.

Boom!

The purple lightning power exploded, leaving a hole at the point of contact. Weird black blood emerged like a torrential rain.

Puchak!

Blood dyed the ground.

But I didn't have time to relax. The other foreign creatures targeted me. It appeared they didn't have weird abilities like the black element, but their body surfaces appeared to be slippery. I dared not touch them.

Boom!

My staff slammed into the head of another beast. The lightning power exploded on the creature's face. The creature was hit hard and fell to the ground.

In the blink of an eye, my staff struck all the surrounding creatures.

With exceptional perception, I caught every detail. My mind was filled with information, allowing me to avoid every strike aimed at me.

On the other hand, the warriors observing Zack Lockwood's fight were dumbfounded. They only saw purple streaks of light moving here and there.

Yet, the foreign creatures fell to the ground one by one.

"What kind of movement technique is that?" a warrior from the elemental faction asked.

"It isn't a movement technique, but a staff imbued with purple lightning power," a warrior with discerning eyes said.

Gasp!

Hearing that, others sucked in a cold breath of air. They had never seen such a staff technique before, mostly because warriors rarely selected a staff for combat.

But these warriors didn't know: Zack Lockwood was just swinging the staff normally. He hadn't even started using an actual staff technique yet.

Puchak!

I noticed the foreign creatures were unable to fight back. It was time to end their lives.

A sharp gleam appeared in my eyes.

I immediately performed a staff technique. The next second, I drove the end of the staff into the head of a foreign creature.

The movement carried immense momentum coupled with purple lightning power.

The destructive power doubled.

Boom!

The strike crushed the head, and blood spurted. The lightning power surged inside and scorched the internal organs. All of this happened within seconds.

Chapter 1433: Unite against!

Battlefield 5

Twenty minutes later,

Boom!

The staff technique proved to be powerful. The foreign creatures are lying on the ground; whether they are alive or dead is unknown.

Gasp!

A huge exclamation occurred from the surrounding warriors.

Though the pressure on their side was reduced, they were still fighting and struggling to defeat the foreign creatures. But Zack Lockwood had done it easily.

The warriors from other universities were scared. If they didn't use this opportunity to kill Zack Lockwood, he would truly grow in the future.

At that point, they wouldn't even be able to think about killing him.

Two Gold Mark Warriors from the Dark Shadow University made their move.

Swoosh!

Like shadows, they silently left their front and started moving towards Zack Lockwood. They wanted him dead. None of the other warriors noticed; they were too busy dealing with the foreign creatures.

"Hmmm." I was starting to relax when I felt a sudden sense of crisis.

The battle was not over. My senses were in a heightened state already.

I felt the danger coming from behind. I didn't see anyone, but through my perception, I noticed two black shadows coming towards me.

My eyes flashed with killing intent. I gripped the staff tightly. My purple force was close to exhausted; I had consumed most of it in the previous battle.

But to deal with these two, the remaining purple force was enough.

I circulated the dark purple lightning force. The remaining energy flowed from my palm and covered the staff in the blink of an eye.

Swoosh!

As the two shadows appeared behind me, I made my move. I gripped the staff with both hands before swinging it back.

Boom!

The end of the staff swept through the air before landing a reverse strike. The staff carried immense momentum, and the dark purple lightning made it even more powerful.

The two Dark Shadow University Warriors were forced out of their shadow forms as their bodies received a terrible blow.

"Aaahhh!"

They let out a blood-curdling scream. Human bodies are weaker than those of foreign creatures.

The strike that had merely injured the creatures earlier now crushed the internal organs and bones of the two Shadow University Warriors.

They flew backward before crashing into the ground. Their fate was unknown. Even if they survived, they would face a punishment no less than death.

Gasp!

The other warriors were stunned and stopped their fights.

"Zack Lockwood killed someone!"

"How dare he?"

The warriors from Silver University were alarmed and started accusing him right away. I ignored their cries and prepared to face the foreign creatures again.

Buzz! A

A second later, the battle alarm sounded. The battle had come to an end.

Hearing that, I sighed in relief. My purple lightning force was exhausted; I had been thinking of using brute force. Fortunately, the alarm sounded at the right moment.

Swoosh!

I cast a glance toward those who had spoken before leaving.

"He is leaving!"

"Chase him back!"

"He killed his own side!"

The Silver University warriors cried "injustice," but the other warriors said nothing. They had seen the strength of the two Dark Shadow University warriors.

They were Gold Mark Warriors, yet they had been beaten badly. The others were no stronger than the Dark Shadow warriors; their situation would be the same if they confronted Zack Lockwood.

The remaining Dark Shadow University Warriors were angry, but they were currently entangled by the foreign creatures.

Some of the creatures didn't quit after hearing the alarm; they wanted to take a few more lives before retreating.

Swoosh!

On the other hand, I rushed back to the teleportation platform. I didn't want to face any other planted spies in my current condition.

Otherwise, I would be forced to use my other inheritance force. It didn't take long to get there. I noticed other warriors on their way as well.

I quickly passed through the layer before stepping onto the platform. A few more warriors appeared; they looked at me in surprise before stepping inside. They were from Star University as well.

Swoosh!

The teleportation platform activated, and I disappeared. When my feet touched the ground again, I was back in the camp.

I sighed in relief. Seeing no one, I walked straight toward my tent. After reaching it, I opened the door, walked inside, and shut it behind me.

Next, I sat down on the sofa.

"Phew!"

I heaved a sigh of relief again. The foreign creatures were getting harder to kill. Even with an Ancient Inheritance, it still took me a couple of attacks to end them.

No wonder everyone wanted Ancient Inheritance. If I had a lower-tier inheritance, I don't know how long it would have taken to defeat them.

This Battlefield 5 was truly shocking. So many people tried to kill me for the first time, both in the camp and on the battlefield.

I didn't know who else was still hiding. I felt fortunate that supervisors could watch the duel. I had done nothing out of the ordinary.

Supervisor Kenny might have been stunned. So many spies chose to reveal themselves. I didn't know their purpose, but if not for me, they would have continued to hide their identities.

I collected my thoughts and took a deep breath before entering the bathroom.

Meanwhile,

The warriors were coming out of the battlefield one after another. The warriors of Dark Shadow University and Silver University started causing a ruckus.

They complained that Zack Lockwood from Star University had attacked his own side and killed fellow warriors.

It shocked the others. It was forbidden to attack allies. Even the other Star University warriors didn't know what to say.

They didn't go back to their rooms. Instead, they decided to confront Zack Lockwood upfront. Soon, more than fifty warriors gathered.

Among them were those with bad intentions who wanted to kill Zack Lockwood using this opportunity. They mixed in with the group, while others simply wanted to watch the show.

Even the warriors from the same Star University didn't plan on intervening; they were going to watch from the sidelines.

Chapter 1434: Exposing the planted spies!

Warrior Camp No.5

I was inside the room. I didn't know when the next battle would occur, but I had decided to consume the Purple Lightning Force carefully. Otherwise, I would be forced to fight with brute strength.

Knock!

Suddenly, I heard a knock at the door. I furrowed my eyebrows. I could guess who it might be. Either the person was Supervisor Kenny, or it was other warriors. I got out of bed and walked up to the door.

Creak!

I opened the door and saw the warriors standing outside. Seeing them, my mouth curved into an arc. I knew it.

"What are you guys doing here?" I asked.

"Zack Lockwood, you killed your own side!"

"You are a traitor."

"How dare you kill warriors of Dark Shadow University?"

One after another, the warriors shouted. They were enraged. I didn't react, but I felt killing intent coming from someone. I activated my perception.

It immediately covered the crowd before me. Then, I noticed the subtle actions of a few warriors. Their gazes were filled with malicious intent.

"Planted spies," I thought.

"Zack Lockwood, come with us!"

"You have to face the consequences of your actions."

"No one can save you."

The warriors shouted and stepped forward to capture me. At that moment, a knife-wielding warrior made a sudden sneak attack from behind. His knife was covered in the gold element. It was extremely sharp.

The other warriors were startled by the sudden attack. The knife was about to land on me, but the warriors' movements were completely clear to my eyes.

Swoosh!

I shifted my body and evaded the attack. The knife went past me. At the same time, I covered my fists with Purple Lightning Force. Next, I turned around and attacked the warrior. My right fist landed on the killer's body.

Boom!

The Purple Lightning Force blasted the warrior away. He flew backward through the air before hitting the ground hard. This all happened within seconds. But the attacks didn't stop there.

Swoosh!

A female warrior launched an attack like a shadow. Her hand held a small dagger. My eyes flashed with killing intent. Without turning back, I released the purple lightning technique.

"Lightning Wheel!"

A powerful lightning wheel appeared all of a sudden. The female warrior wielding the dagger was startled before her weapon could touch the target.

Boom!

Her body collided with the purple lightning wheel. A second later, the lightning wheel exploded. The powerful force blasted her away.

"Aaahhhh!"

A blood-curdling scream escaped her mouth. The purple lightning power electrocuted her. Her charred body flew through the air before falling to the ground.

This all happened within seconds. The other warriors were shocked to the core.

"Killer!"

"He killed warriors in front of us!"

"Capture him!"

The nearby warriors shouted. They had no idea about the planted spies. On the other hand, I still felt killing intent among some of them. They could be planted spies or from hostile universities. Not everyone who wanted to kill me was a spy.

Swoosh!

Before the matter could get worse, someone appeared. It was none other than Supervisor Kenny. He immediately released a small amount of pressure.

The warriors knelt on the ground. They were all terrified. The warriors who were watching from the sidelines were not spared; they knelt under the Purple Mark Pressure.

Those who were already injured fared even worse, fainting on the spot. Specifically, the two killers who had attacked me earlier faced even more force. They fainted directly.

I was the only one who didn't feel any pressure. I stood upright, which immediately displeased the others.

A few minutes later, Kenny withdrew the pressure. When the pressure was gone, everyone gasped for breath. A few people lay flat on the ground.

Kenny said, "I have watched the battlefield. Before Zack Lockwood entered the battlefield, five warriors tried to kill him. Do you guys know why?"

Gasp!

Hearing that, everyone's expression changed drastically. They didn't know about that attack. Even the Star University warriors were shocked.

Their faction had a hatred for Zack Lockwood, but they were not blind enough to make a move inside the camp.

Kenny saw the change in everyone's expressions. "It's because they were not on our side. They betrayed the human side long ago," he revealed.

"What?" The neutral warriors who had gathered were all dumbfounded. They didn't know about this. No wonder he had come here to protect Zack Lockwood. Were those two who attacked Zack Lockwood earlier also...?

That was the question on everyone's mind. Kenny saw through their fears and doubts.

"You guys guessed right. Including the two from just now, they were not on our side," he said.

Everyone's faces filled with fear. These warriors were not naive. Since they had reached the camp, they were the strongest who had risen step by step. They knew something about spies as well.

"If I'm not wrong, you guys have guessed it already. These people are planted spies. They betrayed the human side for resources. Zack Lockwood's name was on the foreign creatures' kill list. Since he made an appearance, they activated their spies," Kenny told them.

"So, those guys killed by Zack Lockwood on the battlefield were spies as well. Their information will be sent back to the Dean and other universities. So, don't break the rules. Otherwise, you will be suspected," Kenny warned.

His warning stunned everyone. Their eyes flashed with understanding.

Earlier, they were blinded by hatred and hadn't thought rationally. Now, everything made sense. Before he could ask anything else, they apologized and dispersed.

In the blink of an eye, the warriors vacated the area. Only Zack and the Supervisor remained. Kenny turned around and looked toward Zack Lockwood.

He asked, "Do you think there could be more planted spies among them?"

Hearing that, I smiled and replied, "Supervisor, you made an early entrance. I spotted a few more with killing intent, but I'm not sure whether they were planted spies or not."

A bitter smile appeared on Kenny's face. "If I hadn't appeared, you wouldn't have spared the others either," he said.

I was stunned. He was right. I might have treated the others the same way.

Chapter 1435: Using the sword!

Warrior Camp 5

Supervisor Kenny left the place after instructing us on a few things. I glanced around, seeing that no one else was there.

I walked back to the room, my eyes flashing with cold intent. I didn't expect so many people to jump out; there could be planted spies hiding inside.

I was sure they would make their moves inside Battlefield 5. I pushed down those thoughts before heading to the training room.

I entered the chamber and turned on the switch. World energy entered the inlet and started filling the room.

I walked to the middle and sat cross-legged on the ground. Then, I closed my eyes and started practicing the Purple Lightning Method.

The purple lightning bolt in the rune began to flicker. Purple lightning force from the world energy entered my body.

I circulated the force, watching as it followed the route before settling down inside my dantian.

The dark purple lightning force began to gather near the purple lightning seed.

The power was strong and destructive. Seeing this, I continued to repeat the process.

Time passed.

The quantity of purple lightning force continued to increase. Once enough force was gathered, I switched to another method.

The next morning

I walked out of the room and went to take a shower. The bath lasted for 20 minutes.

I exited, dried off, and changed into my warrior uniform. The battle alarm could sound at any moment, so I closed my eyes and began to rest.

30 minutes later...

Buzz!

The alarm sounded.

Hearing it, I opened my eyes and rushed to the door. I arrived in front of the door and swung it open.

As I walked out and closed the door behind me, I saw the warriors heading towards the teleportation platform.

Swoosh!

Seeing them, I used my flight ability to follow. When I got closer to the platform, I felt killing intent again, but I activated my perception. My mental power covered the place.

None of them dared to make a move. In the blink of an eye, I entered the teleportation platform. The other warriors occupied their places.

Swoosh!

The teleportation platform activated. A blue light lit up, and the next second, we disappeared from the spot.

Shortly after, I felt my feet back on the ground. I opened my eyes and saw other warriors looking in my direction, but none of them dared to make a move.

I glanced at them before passing through the barrier and entering the battlefield.

The other warriors looked at each other before passing through the barrier themselves. They were a team; they found a direction and quickly moved out.

Meanwhile

Supervisor Kenny was watching the battlefield through the mirror. He was worried, just like with the previous battlefield.

He didn't know who else might move against Zack Lockwood. More than that, he thought the foreign creatures might target Zack more than anyone else.

Boom!

He heard a loud sound. Then, he saw more than a hundred foreign creatures rushing forward from the opposite side. Kenny's eyes flashed with coldness.

His worst fear was coming true. He didn't know if Zack Lockwood could endure it. In the end, one has limited energy; if his inheritance force ran out, he would face a crisis.

If other warriors were present to help Zack, it would be good. Unfortunately, Zack Lockwood had enemies everywhere.

Even the warriors from Star University were not helping him.

Kenny had already told Dean Jerome about the planted spies, but the Dean had already foreseen this attack, so he was not surprised.

...

Battlefield 5

I used my perception to cover the area. Then, I heard a tremor coming from the ground. If such a sound appears on the battlefield, it means a large number of enemies are moving together.

A look of understanding dawned on me. I brought my huge black sword out and held it firmly.

This time, I was going to use the sword against the foreign creatures. I circulated the purple lightning force and covered the blade with lightning power.

Swoosh!

I saw foreign creatures appearing in the distance. They were marching forward, and their numbers were increasing. In the blink of an eye, I saw more than a hundred foreign creatures coming toward me.

"This is bad," I muttered.

I gripped the handle tightly. There was no avoiding it. The foreign creatures were going to encircle me, and I couldn't give them any chances.

I retreated close to the barrier. The rest of the warriors had long since gone to the front, where I guessed a battle was already taking place.

Swoosh!

A four-legged foreign creature with a harpoon-like tail came toward me. This was the first time I was seeing this species. My perception caught every detail. Before its main body could reach me, it swept its tail at me.

Block!

When the sharp end was about to land, I moved the broadsword. The flat edge of the blade blocked the attack.

Boom!

The next second, I felt a huge impact force. The four-legged foreign creature stepped backward. At the same time, the other foreign creatures made their moves against me.

Slice!

I swung the broadsword. The sharp edge of the blade cut through the body of a foreign creature. The blade felt no resistance; it cleaved the body in two.

Pfff!

Black blood splattered across the ground as the body parts dropped. Seeing that, I made a move against the others. My speed was incredible.

Swoosh!

I avoided the creatures' attacks. My body shifted, and my blade landed on their bodies one by one.

It was hard to end their lives in one move, but the blade penetrated deep. I withdrew the blade before striking at the next one.

Pfff!

In a flash, I dealt blade cuts across the creatures.

As time passed, more and more foreign creatures felt the blade wounds on their bodies.

Black blood splattered across the ground, but their numbers were high. More and more foreign creatures continued marching toward me. Their target was me.

Chapter 1436: Getting injured!

Battlefield 5

The Silver Mark Level creatures were all cleaved by the black sword. Still, it took me a couple of moves to kill them.

But the Gold Mark Level creatures are enduring. It's hard to kill them. Yet, I'm not going to spare them. If I slow down, the creatures will swarm toward me.

Slice!

Time passed; the black blade moved swiftly before striking down the creatures.

At the same time, I evaded the attacks precisely. I didn't make unnecessary movements. The huge bodies of the foreign creatures were riddled with holes.

These creatures are trying to deter me with their pressure. But none of their actions were working.

I charged toward them to attack, one after another blade penetrated their bodies.

On the other hand, the warriors were alarmed by the numbers of foreign creatures. This time, the foreign creatures have sent double their numbers.

But they are within the conditions. The elite warriors are finding it hard to defend at the front, let alone slay them.

If they don't do something soon, they could face a one-sided massacre. These warriors are confused by the presence of the large number of enemies.

People with discerning eyes found out the reason. They knew about Supervisor Kenny's words. They are not here for them, but for Zack Lockwood.

These foreign creatures wanted to eliminate Zack Lockwood. The warriors at the front looked around and found there was no Zack Lockwood among them.

He might be fighting at another front. These warriors didn't know what to do. If the situation gets worse, they have decided to lead the foreign creatures to Zack Lockwood.

...

Hidden Space (Foreign Creature Side):

The Purple Mark foreign creature is watching the battle. Its eyes were on their kill-list target, Zack Lockwood. More than a hundred creatures have encircled the target.

Yet the target is fighting non-stop to break the circle. More than 20 Silver Mark foreign creatures have died already. A large number of Gold Mark warriors are injured.

But the creature was sure that the target is going to die today. Once the target runs out of the inheritance force, he would be exhausted.

The rest of the foreign creatures would smash him into pieces.

...

Hidden Space (Human Side):

Supervisor Kenny was watching the battle. His eyebrows were furrowed. He looked tense. He saw Zack Lockwood surrounded by the foreign creatures.

He had expected this reaction. How could the foreign creatures let him go? They had now seen Zack Lockwood. Hereafter, he would face more dangers.

Time passed,

I didn't know how many times I had swung my blade. The purple lightning force in the dantian is getting drained.

But the foreign creatures didn't stop their assault.

Swoosh!

Black streaks of light aimed at me. I almost got hit by them. If this goes on, I will be exhausted. I don't want to use other inheritance forces.

A firm determination appeared in my eyes.

Boom!

I continued to slash at them. It didn't take long for me to notice the appearance of other warriors.

My eyes flashed with relief. I guess I don't have to fight alone. I continued to fight for another 5 minutes.

Then I noticed something amiss. The number of foreign creatures was not decreasing; instead, their numbers grew.

I swept my gaze across the field. I saw the warriors leading the foreign creatures toward me. Upon seeing me, the creatures ignored the others and joined the group to attack me.

The other warriors are only fighting against one or two foreign creatures. I'm taking most of the load, while they take very few.

"This?" My eyes turned icy cold.

A surge of anger rose in my heart. I put away the black sword and placed it inside my storage ring.

Then, I covered my fists with the purple lightning force.

Boom!

I appeared in front of a creature and slammed my fist into it.

The fist tore through the body of the creature. Dark blood splattered across the ground.

The scene looked ugly, but I didn't care. I continued to move across the foreign creatures, bombarding their bodies with fiery fists.

The Gold Mark Level creatures were stunned. Compared to the staff and the blade, the fist carried more power.

They were injured in a single attack. Their dark blood fell on me because of the close contact.

It had some corrosive power, but I didn't care and continued with my assault.

The foreign creatures' numbers were finally decreasing.

On the other hand, the warriors are stunned. They are finding it hard to kill even one creature. Meanwhile, Zack Lockwood is slaying more than 50 foreign creatures.

The records stunned them. Though they acted despicably by leading more foreign creatures toward him, now their faces turned red with embarrassment.

Boom!

Suddenly, the purple lightning force was completely exhausted. I couldn't even use the movement technique now.

Boom!

A black streak of light landed on my hand. The next second, the force threw me from the spot.

My body lost balance before crashing to the ground. In the next second, I felt terrible black energy trying to enter my body.

The black energy is causing searing pain. I tried to use healing force.

When the green-colored healing force came in contact with the black energy, the black energy was destroyed but it was taking a lot of time.

Boom!

By this time, a foreign creature's body slammed into me. The huge impact force hit me hard again.

My body flew backward before landing on the ground.

Pfff!

I coughed up a mouthful of blood. The black energy continued to penetrate, using the opportunity. Feeling that, my expression changed.

I continued to control the healing force inside my body, but I didn't have time. I raised my head and saw the foreign creatures continuing to come toward me.

Boom!

Seeing that, I felt the crisis of death for the first time.

Buzz!

Just before the foreign creatures could reach me, the battle alarm sounded.

Seeing that, the warriors stopped their actions and rushed toward the barrier.

But the foreign creatures didn't stop. They continued to move toward me.

Chapter 1437: Part 1: Getting fame across the planet

Warrior Camp 5

The foreign creatures were ready to strike. I thought I would be forced to use the other inheritance force.

Just as I circulated the blood element force through my body...

Boom!

The reinforcements from Star University arrived. They attacked the foreign creatures to rescue Zack Lockwood. The attacks landed heavily on the foreign creatures' bodies.

The foreign creatures retreated, giving me an opportunity to escape. I used the blood force to stand up and then moved to the side of the Star University warriors.

I saw they were not from the elemental factions, but from other medium- and small-sized factions. No wonder they helped me. I thanked them.

The next second, we passed through the barrier and reached the teleportation platform. After we stepped inside, the platform activated.

Swoosh!

The next second, we disappeared from the spot.

On the other hand, the foreign creatures had missed their target. They had no choice but to return to their side.

...

Hidden Space (Foreign Creature Side)

The foreign creature was enraged. Its anger grew. More than a hundred foreign creatures had tried to kill the target, yet the target was able to return unscathed.

The higher-ups would definitely be furious, but the creature had no other choice.

...

Hidden Space (Human Side)

Supervisor Kenny sighed in relief. He had been worried that Zack Lockwood's life was in danger. As he had guessed, the foreign creatures had managed to encircle Zack.

If not for the timely help from the other Star University warriors, Zack Lockwood would have died. Kenny decided he would recommend their names to Dean Jerome; they deserved a reward.

...

Camp 5

When my feet touched the ground, I opened my eyes. We were back in the camp. I thanked the Star University warriors once more.

"If we hadn't helped you, Dean Jerome wouldn't have spared us," one of them said.

Hearing that, my eyes glinted with understanding. They were afraid of Dean Jerome.

I gathered my thoughts and left the teleportation platform, walking toward my tent. There was no one there to bother me. Soon, I arrived in front of the tent.

Creak!

I opened the door and went inside. I shut the door and rushed to the cultivation chamber. After entering, I turned on the switch. World energy began filling the room.

I went to the middle of the room and sat cross-legged on the ground. I started running the ancient healing technique and took the healing energy liquid given to me by Master Ann.

The healing energy entered my body. It came into contact with the black energy that was damaging my physique. Upon contact, the black energy was cleared out. I was surprised.

It appeared Master Ann had foreseen the situation. I relaxed, then focused on circulating the healing energy using the ancient, incomplete technique.

The pain decreased over time. However, I didn't stop and continued with the circulation.

...

Outside

News of Zack Lockwood's feat was being discussed everywhere.

Witnesses shared the news with others: Zack Lockwood had faced more than 100 warriors. He had killed more than 50 and injured numerous others.

This included foreign creatures of the Gold Mark level. Many found it hard to believe, but the people spreading the news were not even close to Zack Lockwood.

They were the ones who had led the large number of foreign creatures toward Zack in the first place, though they didn't mention that part.

The Bloodline and Elemental factions were shocked. They had underestimated him.

Only the warriors from the medium- and small-sized factions knew the truth, but they didn't dare tell others.

They knew the tension between the Thunderflame Faction and the others.

They had helped Zack Lockwood considering the interests of their own factions. The Dean would take care of them.

...

The Office

Supervisor Kenny was talking to Dean Jerome on a call.

"Dean, it was close this time. The creatures sent more than a hundred warriors to kill Zack Lockwood."

"He was completely encircled. Zack fought bravely, killing most of them and injuring many," Kenny reported.

There was silence on the other end of the call.

"Did the kid use any other methods?" Dean Jerome finally asked.

He wanted to know whether Zack Lockwood had used his other inheritance force. He knew Zack had both an ancient inheritance and a bloodline inheritance.

"No, he used purple lightning force. He exhausted his force in the end. Finally, he used brute force to fight for a few minutes. His physique is naturally strong as well," Kenny said.

Dean Jerome was surprised. He had underestimated Zack Lockwood's endurance. He knew that if Zack had used his other inheritance force, he would have wiped out the enemies in no time.

Kenny then shared the disturbing news.

"Dean, I have to tell you about the conduct of the other warriors. No one helped the kid. In fact, some of the warriors diverted trouble toward him."

"Yesterday, I revealed the fact that the foreign creatures were targeting Zack Lockwood specifically. Because of that, they led the creatures toward him," Kenny said in a grim tone.

"Note down their names. I will handle it," Jerome replied.

"Dean, the Star University warriors from the medium and small factions rescued Zack Lockwood in the end. I hope you will reward them," Kenny requested.

"Okay," Jerome replied.

....

The Other Side

On the opposite side of the space barrier sat a dark, oval planet with countless protruding peaks. Among the highest peaks lived the powerhouse foreign creatures.

Countless medium and small peaks surrounded them, where second- and third-level foreign creatures resided.

There were many cities at the bases of these peaks. In one of them, the higher-ups were discussing the battle with the human warriors.

More than winning battles, they prioritized the "killing list."

As long as the warriors on that list were wiped out, the human side would lose its strength. Then, their armies would face no trouble invading further.

However, the creatures knew the ultimate powerhouses of their planet remained silent and hidden.

The human side had top powerhouses as well, but the creatures did not have the authority to access that information.

Even if they won the battles on the front lines, the final outcome rested on the top powerhouses of each side.

Chapter 1438: Part 2: Getting fame across the planet

Other Planet

The higher-ups on the foreign creatures' side went through the reports of the battlefield. Many of the targets on their kill list had participated on the battlefield.

But the foreign creatures had managed to kill only a few of them. They didn't get one hundred percent success, so it was considered a loss to them.

They summoned the supervisors of each battlefield. The foreign creatures are Purple Mark Level Creatures, but each of them is a different size and shape. These Purple Mark Warriors had failed in their task.

Among the foreign creatures there, the creature responsible for targeting Zack Lockwood was present as well.

The higher-ups started scolding them. The foreign creatures endured it; it was their fault. At best, they won't be killed.

One of the higher-ups brought a black box. A foreign creature opened the box. There were many black orbs inside.

The supervisors saw the black orbs. They recognized the orbs and understood what the next task would be.

The higher-ups handed over the black orbs to each of them. The supervisors received the orbs.

They communicated in their foreign language. The function of the orbs is to serve as a barrier. It will block the target from escaping.

Unlike the previous time, they didn't have to break the battlefield. They can give the black orb to the foreign creatures on the battlefield.

They can kill the target using greater numbers.

Then no one will be able to save the target. The supervisors are ready to implement the plan.

When the meeting ended, the higher-ups shared the news with their heads.

The foreign creatures have an intelligent group among them. This intelligent humanoid group learned about the human targets.

They placed importance on the kill list. If they ever come across the human warriors on the kill list, they will eliminate them.

...

Warrior Camp 5

The following day,

After getting out of bed, I started doing my morning routine. I completed the morning routine in one hour.

Then I entered the essence chamber. I turned on the switch. World energy began to fill the room.

I came to the middle of the room. I sat cross-legged on the ground. Then I closed my eyes and started running the purple lightning method.

The lightning rune in my mind flickered. The purple lightning force from the world energy entered my body.

I began to circulate the purple lightning force in my body. After circulation, the purple lightning force entered inside the dantian.

I continued to repeat the process.

A few hours later,

I walked out and entered the bath to take a shower. I spent another 20 minutes in the bath.

I walked out later and changed into warrior clothes. I had participated in two battles. Those two battles weren't easy ones.

I had escaped narrowly from the last battle. The black energy affecting my body was gone. The ancient healing technique was useful.

I was able to remove it on time. It didn't affect my foundation. Then I closed my eyes and rested. I'm waiting for the battle alarm to sound.

The foreign creatures were so close to eliminating me. I know this time it's going to be even more dangerous.

I had participated in other warrior camps as well, but for the first time, I was panicking. I know if I used other inheritance forces, I would gain a certain victory.

But it will expose my cards. Already, the foreign creatures were targeting me very badly.

If the foreign creatures were to know about my other inheritance forces, then I would face certain death. I doubt even Dean Jerome would save me.

Buzz!

Shortly afterwards, the battle alarm sounded again. I stood up from the sofa and rushed to the door.

I opened the door and walked outside. I saw the warriors going towards the teleportation platform.

Many warriors lost their lives in the previous battle, but the replacements have come. I didn't know how many were going to lose their lives this time.

I was sure that the foreign creatures would try to kill me first. So the pressure on the other side would be reduced.

Next, I came to the teleportation platform. I followed the line to enter the platform. Just then, I perceived killing intent behind me.

My eyes flashed with a cold glint. I almost forgot about the planted spies. They are still waiting to harm me. If they get the opportunity, they will do it.

A look of realization dawned on me. I should not let my guard down against the warriors as well. They could join the foreign creatures to kill me.

I stepped inside the platform. The others stood beside me. The platform activated. The next second, we disappeared from the spot.

Shortly afterwards,

We reached the battlefield. We walked out of the barrier and entered the battlefield. My eyes were on the warriors next to me.

They didn't make any move. They, too, glanced at me. Then they left with their group. I looked back at the barrier before walking forward.

Swoosh!

I brought out the white bone staff again. Then I held the staff in my hand. I activated my perception. I could perceive the battlefield around me.

I calmed my heart and waited for the foreign creatures to appear. I'm sure this time I might have to use other inheritance forces.

Last time, I was so close to using the blood force.

This time, if I am pushed, I have decided to use a small amount of the blood force. With the blood force, I can endure a longer time on the battlefield.

Phew!

I released a breath. Then I saw an army of foreign creatures appearing on the horizon.

A quick gleam appeared in my eyes. I felt like I was fighting all alone. But I was not afraid. I am going to walk out of the battlefield alive today.

On the other hand, the warriors coming out from the barrier were shocked to the core. They froze on the spot.

They didn't have to go to the frontline because the front line was moved forward by the foreign creatures. They didn't separate; they stayed there. They are going to fight from here.

Chapter 1439: Steady fight!

Battlefield 5

Seeing so many foreign creatures appearing ahead, the warriors were shocked to the core.

They had mixed reactions, knowing there was going to be a tough fight. There were warriors from other universities as well.

The Dark Shadow and Silver University warriors were unwilling, but they had no other choice. They had to fight now.

They were aware that Supervisor Kenny was watching their battle, but none of them took the initiative because they saw Zack Lockwood standing ahead. The foreign creatures were targeting him.

They could all see the foreign creatures moving towards him, so no one stepped forward to help or join the fight.

Even the Star University warriors showed hesitation; they were not ready to support Zack Lockwood.

The warriors from the medium and small-sized factions were scared.

If it had been only one or two foreign creatures, they would have helped Zack Lockwood without any hesitation, yet the situation in front of them was terrifying.

They were afraid to help, but these warriors watched Zack Lockwood closely.

Unlike the elemental faction warriors, they were actually worried about him. However, they didn't see any fear on Zack Lockwood's face. He looked confident.

On the other hand, I felt the killing intent in the air. The foreign creatures were determined this time. I held the white bone staff tightly, then I covered it in purple lightning force.

Boom!

An 8ft tall foreign creature made a move against me. It was a Silver Mark level creature.

The four-legged beast was the smallest among them. I caught its movement in my perception. I raised the staff and brought it downward.

Boom!

The bottom end struck the body of the foreign creature. The lightning power exploded, blasting the creature backward. It crashed onto the ground. This all happened within seconds.

Swoosh!

The other foreign creatures made their move, attacking at the same time. I used my perception to evade the attacks, my body shifting here and there.

Boom!

The black streaks of light missed me and hit the ground. At the same time, I swung my white bone staff to land a decisive blow.

The foreign creature fell to the ground after receiving the hit. These Silver Mark level creatures didn't have the strength to fight back.

Puchak!

I targeted their heads to end their lives in one blow.

Time passed.

The warriors outside were shocked. They had started fighting against the foreign creatures, but they were fighting one-on-one.

When they looked at Zack Lockwood, they were stunned to the core because he had already killed five foreign creatures and injured more than ten.

This record was shocking to them. They understood why the foreign creatures were targeting Zack Lockwood; he alone was enough to wipe them out.

Still, they didn't have the strength to join and help him. They could only assist him by killing the foreign creatures directly in front of them.

...

Hidden Space (Foreign Creature Side):

The tall foreign creature watched the battlefield. Unlike the previous time, the creature was not worried.

The higher-ups had seen through the talent of the human warrior. The creature had obtained a black orb and had already given it to one of the Gold Mark creatures.

When the time was right, the creature would use it. Right now, their main goal was to target Zack Lockwood so that he would consume more inheritance force.

...

Hidden Space (Human Side):

Supervisor Kenny was watching the duel. Fine beads of sweat appeared on his forehead; he was worried again.

The last two times, Zack Lockwood had been able to leave the battlefield successfully, but Kenny doubted it would be the same today.

He wanted Zack Lockwood to be safe, but he saw a low probability of that. The foreign creatures might have come with a plan.

That was why he was worried. He didn't know why Dean Jerome had sounded so confident earlier.

Instead, he was curious whether Zack Lockwood had used his most powerful methods yet. He, too, wanted Zack Lockwood to use every means possible to survive the battlefield.

...

Outside:

Boom!

The staff swung horizontally before striking the body of a Silver Mark level creature. Its side was badly damaged.

Puchak!

Black blood splattered across the ground. Yet, the creature didn't give up.

It attacked using its long hand, which was large enough to capture me. I circulated the purple lightning force. Just as the hand was about to touch me, I shouted:

"Staff Technique!"

I thrust the staff upward, the tip filled with purple lightning power.

Boom!

The top end of the staff broke through the palm. The purple lightning power exploded, rampaging through the huge hand. In a flash, the black hand was smashed into smithereens.

I broke free from the creature and retreated to widen the gap, then struck other nearby creatures.

The Silver and Gold Mark warriors were mixed together, but I used the same force on all of them.

As time passed, the purple lightning force in my dantian began to reduce.

The foreign creatures were targeting me non-stop, but I noticed there was another wave of creatures that had yet to attack, as if they were waiting for something to happen.

My eyes turned icy cold. I realized that the foreign creatures were up to something treacherous.

I was familiar with this feeling; I recalled when the Purple Mark level foreign creature had broken into the battlefield to kill me. I was getting a similar vibe again.

I stopped using the purple lightning force. Instead, I attacked the creatures using only blunt force. I decided to force out the hidden cards of the foreign creatures.

Otherwise, I would consume all my purple lightning force before the end. I didn't want to use my other trump cards yet, so using blunt force was my only option.

Boom!

I struck the oval head of a foreign creature. It was stunned for a second and stumbled backward, but it didn't die. If I had used the purple lightning force, its head would have been crushed.

Swoosh!

I retreated and widened the gap. I noticed the other warriors were fighting hard as well, but I was the one facing the vast majority of the foreign creatures on my side.

Chapter 1440: Bloodline power in action

Battlefield 5

Time passed, and the battle continued to intensify. My plan to use brute force was failing badly; the foreign creatures got up after taking a single hit.

Taking advantage of the opportunity, the foreign creatures acted in unison. They pushed away the other warriors near the target.

As time passed, they were able to encircle the target and bring him to the middle of the battlefield.

On the other hand, I observed all of this. I knew from the beginning that the foreign creatures were up to something.

But I was able to hold on this long using brute force. If they had paid attention to him earlier, I wouldn't have had a chance to endure this long.

...

Hidden Space (Foreign Creature Side):

The tall foreign creature was watching the battlefield. The creature was happy. The plan was being executed. The target was surrounded by the creatures.

...

Hidden Space (Human Side):

Supervisor Kenny felt something was wrong. He saw that Zack Lockwood had stopped using the purple lightning force earlier.

That kid had been fighting using brute force only. He was surprised by Zack Lockwood's move.

He was also surprised by the activities of the foreign creatures. They had surrounded Zack Lockwood.

An unknown sense of crisis appeared in his heart. Kenny was sure that the foreign creatures were up to something, and he was sure it wouldn't be good for Zack Lockwood.

...

Battlefield 5

One of the foreign creatures took out a black orb. The creature immediately activated the black orb and threw it toward the target.

A black light appeared above the target. The next second, a barrier appeared. It covered Zack Lockwood and more than a hundred foreign creatures inside a black domain.

Because of the black domain, communication was cut off. The black domain didn't spread; it covered only several hundred meters.

There were a few foreign creatures outside the domain, still fighting against the other warriors.

Meanwhile, Supervisor Kenny was dumbfounded. He couldn't see what was happening inside the black sphere; it was completely blocked.

At the same time, the tall foreign creature was happy. The plan was executed successfully. He was not worried about witnessing it with his own eyes.

There were more than a hundred foreign creatures inside the sphere. The target wouldn't be able to escape. His inheritance force wouldn't be enough for him to slay all the foreign creatures.

..

Black Sphere:

"What's going on here?" I asked myself.

I saw I was surrounded by the foreign creatures. The creatures didn't hide their intentions. They took something out and held it in their hands.

My gaze fell on the objects. They appeared to be like sharp stones. But I wouldn't underestimate them. For the first time, I was seeing the foreign creatures using external objects.

I felt a do-or-die crisis. I put away the staff and observed every creature using my perception. I finally stopped my resistance and started circulating the bloodline and shock force.

A bright blue water force, with a tinge of gold and silver color, spread from my dantian through my body.

I raised my hand. A bright blue and golden-silver water drop appeared at the tip of my forefinger. Seeing that, my mouth curved into an arc.

I looked at the Gold Mark Level foreign creature carrying the black stone in its hand. I simply pointed at the creature's forehead.

Boom!

The water drop shot at the target. In a flash, the water drop reached the forehead of the creature. The foreign creature was stunned.

It only saw the blue drop for a second. The next second, the water drop pierced its forehead and exited from the back.

Puchak!

The head burst into pieces like a watermelon. Black blood splattered across the ground. The huge body of the foreign creature fell to the ground.

Swoosh!

The speed of the water drop didn't slow down. It went through the bodies of the creatures behind it, one by one.

Boom!

The foreign creatures exploded one after another. Their body parts splattered across the ground. The foreign creatures were all stunned.

The visuals sent cold shivers down their spines. In the blink of an eye, five foreign creatures were dead because of a single water drop.

Seeing the result, my mouth curved into an arc. It was no ordinary water drop. It contained two types of Inheritance force: bloodline power and shock force power.

The bloodline power contained boiling water, and the shock force added explosive power to it. I had long wanted to use this power.

Now that I have used it, I don't care whether Supervisor Kenny sees it or not. Dean Jerome and Faction Leader Francesca knew about this power.

But my main secret was the sealing force. As long as I don't use that, I can still find ways to combine the others.

I collected my thoughts and circulated a further fusion of these two forces. Then I raised both of my hands, left and right.

Swoosh!

Ten water drops appeared at the tips of my fingers. Looking at the hesitating foreign creatures, I sneered.

Boom!

The next second, I released the water drops at them. Ten blue water streaks shot out in straight lines.

Ten straight lines appeared at the same time. They flashed for a second before piercing the heads of ten foreign creatures simultaneously.

Puckak!

Ten heads exploded at the same time. Like torrential rain, black blood dyed the ground. The ten drops didn't stop. They struck the bodies of other foreign creatures behind them.

Boom!

From time to time, bodies exploded in the air. In the blink of an eye, I killed more than 20 foreign creatures.

If this continues, I will end the battle in five minutes. I continued to shoot water drops at the foreign creatures.

The Gold Mark foreign creatures finally felt something was wrong. They saw the target was not using the purple lightning power.

Instead, he was using another force that was blue in color. Compared to the purple lightning power, the blue force was taking the lives of their creatures much faster.

Before they could take action, a few more bodies exploded in the air. The ground was dyed in dark blood.
