Chapter 285 Unexpected Surprise?

(From MC Perspective)

Following day,

I reached the core area after traveling for an hour. Fortunately, I didn't come across any monsters last night. Which saved me from energy consumption. Right now, looking at the open terrain. I feel this place is a common spot for Monsters to roam around.

I'm only standing at the premises of the core area, but it has already made me tense. Class 2 Monsters were nothing. But Class 3 Monsters were different.

I recalled the old memories, where the Class 3 Peak worm monster caused havoc at the Black Forest Monster Zone.

Shaking my head, I put behind those depressing thoughts. Right now, I can only hope to not come across those monsters.

Suddenly, I heard a howling sound.

"What?" I muttered. I had a bad premonition when I heard the sound.

Then I used the perception to investigate the area. "Hmmm" I was taken back.

Few meters away from here, there are a lot of movements. Three dim blue lights are surrounded by five dark red dots. Why does it feel like Deja Vu? Don't tell me they become prey for Monster Pack.

My heart beats faster after realising the situation. Should I help them or not? If it were one against one then it's fine. But it was a group of Monsters, I can already see the result of the clash. Three Adventurers will definitely die miserably.

Let's drive those monsters away, then it will be fine. I used phantom lightning technique to move towards the direction. Strangely, It's a few meters away from me.

Strangely, I didn't come across them. Fortunately, It's just one pack. If it were many of them, even with my double repair strength. I won't hesitate to flee.

A ten minutes later,

I arrived at the spot. Seeing the pack of wolves, I held my sword tightly. Then my eyes immediately set on the victims.

My pupils constrict seeing them. "What is she doing here?" My chest tightens seeing injured Maira.

She is half- conscious, beside her two of her clan members were fighting against the Wolf Monsters. Both of them were males. By looking at their appearance, it seems they were on the verge of death. They were barely keeping their life.

But unfortunately it's too late to save them.

These Brown Wolves were commonly seen species across many Monster Zones.

They were very cunning, fast and agile.

I rushed towards her and crushed the healing pill and put it in her mouth.

Seeing Zack's sudden appearance. Two of the Frazier Clan members were surprised and sighed in relief.

After putting the healing pill in her mouth, I didn't wait any further. I came closer to them and shouted, "Two of you get behind me. I'll take care of it."

After saying that, I rush towards the nearest wolf using phantom lightning technique. And swung my sword at its abdomen.

"Thank Goodness, Finally someone came to help" One of the Male warriors breathed in relief while covering his injured abdomen.

"Quick, Check young lady's condition." The other warrior hurries to check Maria Frazier's conditions.

Both of them are not in the mood to see Zack's battle. After confirming that young Miss is doing fine, the warrior answered, "Young lady is fine. Let's go back and assist the person." Even on the verge of death they decided to help Zack.

The Class 2 Wolf rolled backwards from the collision. "It's a Initial- Class 2 Monster" I grinned after confirming.

Then I will end them before alpha comes back. I can guess alpha must be around somewhere near. Seeing these monsters were at Initial level, I guess alpha must be a Class 2 Peak Monster.

Before it comes back, I need to end these monsters.

The Brown Wolf roared back, but unfortunately it wasn't able to do anything. I swung my sword again and sliced its neck. Blood spurted from the monster as it lost its life miserably.

The remaining wolf got angered and the first brunt was taken by those two Frazier Clan members.

One of the Warrior's movements got slow due to injury. As a result his neck is bitten by a wolf and loses his life in the end.

"Ahhhh " Seeing his companion dead, the other Warrior waved his sword frantically.

But unfortunately he got pounded by three other wolves. One of the wolves collided with the sword and the two wolves were ripping his body parts apart. This scene is very miserable.

The other end, Zack got delayed by the fourth monster.

"This!" Seeing their death, I don't know how to react. Even if they survived from the monsters, it's hard to save their life.

Their injuries were so deep that their life can't be saved by healing pills.

From beginning to the end, Maria is clueless about what is happening around her. She wasn't even aware that she swallowed the healing pill unknowingly.

The healing pill energy spreads around the body and begins to heal the wounds.

Fortunately, after killing those guys. The wolfs turned towards Zack. They didn't even glance at Maria who was unconscious.

Seeing four of them coming towards me, I grinned.

As one by one these monsters began to surround me, I stayed in my spot. Not due to fear, but it's a perfect situation to use the lightning attack.

Seeing the prey is not moving away from the spot. The four wolves pounced on Zack the next moment. Each of their sharp claws were aimed at his chest and abdomen.

When the four wolves came closer towards me, I used the Lightning Technique.

"Lightning Wheel"

A purple color lightning wheel formed in an instant.

The wolves got alarmed in mid air. But it's too late to back away. As their body came in contact with the lightning wheel, an explosion happened.

"Bang"

The destructive lightning tore through their bodies. As a result, four scorched bodies crashed in different directions. No, no need to look at them, they were dead.

"Phew!"

I like this one shot kill. Then my experience changed drastically as I rushed towards Maria. I don't know whether she swallowed the pill or not.
