

BloodLine 287

Chapter 287 Chance!

(From MC Perspective)

The Brown Alpha Wolf successfully reaches full momentum before Zack could reach it.

Seeing the enemy rushing towards it, the alpha roared back and tackled him with its huge giant paw. Suddenly, a sharp claw extended from Alpha's paw and made a clash against the blade.

"Clang" the clashing sound resonates in the area.

From its giant paw, I felt equal opposing pressure weighing down on me.

I stagger backwards due to impact, but the alpha seems to be in the same place.

Right now the Alpha's strength is really shocking. It pushed me backwards with its one paw alone.

The Alpha Wolf left the corpse of its companion. Now it's entirely focused on the enemy. Its eyes reddened further, the next moment it made a giant leap towards Zack all of a sudden. The Alpha wants to take a bite out of Zack with its razor sharp teeth.

My perceptual ability is already in an active state, so every move is magnified before my eyes. When it made a giant leap, I ran a common leg technique to move backwards.

If I use, Lightning Phantom technique then it will expose my element straight away. So right now, I have no choice other than to fight like the old ways.

I brought my black sword forward to avoid its gigantic mouth.

Next moment,

When the alpha sees the black sword, a hint of light flashes before its eyes. It courageously takes a bite at the sword.

"Clang"

I was caught off guard by its bite strength. Both of my palms turned numb due to the vibration. But fortunately the black sword is made of good material. It didn't break directly. I try to take back the black sword from its mouth. But I couldn't, the alpha had no intention to open its mouth.

My instincts urge me to use a lightning wheel attack. If I use it right now, it will be far more destructive. It will directly blow away its jaw from the lightning explosion.

Maria Frazier trembled on the other hand. "The Alpha must be at Class 2 Mid Stage." She misunderstood in her heart. She would have fainted if she knew the alpha strength right now is no less than Initial Class 3 Stage.

Time progresses,

Maria is silently watching the clashes between the two. She couldn't help but frown, "Why doesn't he use his element ability?" Then suddenly she realises something. She and Zack may be classmates but she actually isn't aware of his abilities.

Whenever she brings up the conversation with him, Zack has diverted the matter knowingly or unknowingly. At that time, She thought Zack was maintaining his privacy. So it's normal for him to hide his information.

But the situation right here is different. He is fighting against the alpha wolf in a life or death situation. Then why doesn't he use his elemental ability? Her mind comes up with a lot of questions? "It's impossible for a Warrior to level-up without elemental ability." A curious glint flashes in her eyes while watching the confrontation between these two.

More than fear of Alpha, right now she is wondering about Zack. In curiosity, she continues to watch the fight.

"Damn!" This alpha is the same as me, Our physical powers balance out each other.

If this goes on, I'm afraid there will be trouble.

Not only me, the alpha appears to be more frustrated. At this time, I'm betting on one thing. I don't think it can maintain its Class 3 strength so far. It's not at its natural level. The alpha's real level is at Class 2 Peak stage.

And this is also one of a kind experience. I didn't hear of such an ability to gain Class 3 strength before. I want to see, How long can it hold on? When it reverts back to its original state, then I will end it.

The other hand, the alpha is getting impatient. After realising that the enemy is slipping away, the alpha wolf finally uses its elemental ability to attack.

Right now, both of them are confronting each other. It suddenly uses the earth element ability to control soil under the opponent's feet. From steady ground, it quickly converted to loose sand. Which makes enemy feet slip away suddenly.

"What the f**k? Such an incredible soil manipulation ability" I exclaimed in surprise while keeping my feet away from the soil.

This is going to be a headache. I became more alerted when seeing the Monster's earth element. I wonder, what kind of other ability does it has?

Seeing the enemy didn't get caught in his trap, the alpha again roared back in anger. It continues to leap against Zack in aim of biting his neck.

Time progresses, 10 Minutes later,

From time to time, the alpha wolf uses soil manipulation ability. But Zack with his perception evades all kinds of attacks in time.

The Alpha Wolf is frustrated by the enemy. It's getting restless as its momentum begins to drop down slowly.

"Hmmm" I noticed some change in my perception. Finally, I can stop being defensive.

I inched closer against it and swung my sword at it's back to test Alpha's current strength.

"Clang" the clashing sound resonates the area again.

This time I only took two steps backward from the collision. I grinned by watching his momentum drop. I sighed in relief as my assumption came true. The Alpha has some kind of bloodline ability, which increases its strength for some time.

This time, I took the initiative to attack.

Maria was bored with their confrontation. Initially, She was scared and worried about his fight. But as the time goes on, she couldn't help but think Zack is using the alpha as a sparring partner. If not for her injury, she would have joined in the fun too.

Eventually, she forgets about Zack's elemental ability. As the time goes on, she also notices some changes in alpha. "The Alpha ran out of energy?" She muttered in confusion. No way, it's monster. Why it's energy drop down suddenly?

She racks up her brain to find the answer. And again there is no answer. Then she observes Zack who is having a wide smile on his face for whatever reason.
