

# ANCIENT TEARS BLOODLINE

## Chapter 6 - Awakening Of SoulChip

After 3 years of usual living in this orphanage environment. Zack Lockwood is now 8 years old.

Late at night, Zack is sleeping in his bed peacefully, then the Ancient bloodline in his Soul slowly starts to emerge glowing like it's awakening from a deep slumber.

After 8 years of living in his body looks like it has now enough energy. The bloodline now entirely shining like a tiny star in his soul and starts to cover his entire body from the bloodline.

A spark starts to show and the spark is divided into two and slowly enters his brain and unlocks the brain's 7th region, and the other spark enters his body Constitution, Changing his Physical Structure.

Despite all of this happening Zack is sleeping peacefully. unaware of his surrounding, his goal towards his future is already been set in stone.

Early in the morning, Zakes wakes up, don't know why he feels energetic and his mind got a lot clearer than before.

Suddenly ding! echo into his mind.

"Lord's inheritor is recognized waiting for Completing the inheritance test"

Such a Command Sound ran through his mind, like a bolt Zack got up from his bed, he walks and opens up the window and looks outside.

His vision got clearer, he can notice minute things which are not pickup by the brain signals before, but the range of his brain waves that analyze the surroundings is quite low since he only awakened 5% of his brain.

Suddenly a Command tone ran through his Mind.

"Lord's inheritor has successfully awakened 5% of his brain's 7th region, hereby increasing his brain's analytic and memory abilities and awakened basic physic required for starting the inheritance test"

Since his brain ability awakened Zack calm down quickly and start to comprehend what is happening though?

After careful analyzing he only knows he has somehow become powerful both in mind and body, seemed to be unlocked and they are both synchronized.

He doesn't know how to describe this mysterious feeling he is feeling better there is no panic, no tension like something happens to his body.

After a couple of minutes, Zack asked in his heart, Hello! Who are you? Where are you? Where is this voice comes from?

Spirit in his Soul answered.

"Lord's inheritor as per rules I can only clarify rules for passing inheritance test, failing to pass the test inheritor would die, to avoid prying eyes of the heaven to reveal ancient bloodline only after passing the inheritance test bloodline can be assimilated to the inheritor"

"Thereby avoiding cause and effect"

"As per rules, the inheritor has to unlock his Brain 100% completely and level up the basic human Physic from level 1 to Domain level Physic level 15, to get the whole inheritance successfully"

"Until then the inheritance Spirit Sleeps into deep Slumber thereby protecting Ancient Tears God Bloodline"

"The Inheritor is required to level up his both brain and body to successfully pass the test thereby inheriting both inheritance and Advanced intelligence auxiliary tool Spirit! Until then it would be unable to contact the inheritor as per rules"

The Spirit sounded through his mind. Zack carefully listened to every single thing and asked spirit again but there is no reply,

Zack again has to go through what was happened and realized he needs to complete the test to contact that voice again he thought inwardly.

Now he needs to join the academy and train hardly hereafter Zack quickly realized About Super Elite forces, it is very confidential he doesn't know any information about them he only knows about his location which is safe zone 1012 which is under the rule of some Sector.

Other than that he doesn't know anything. looks like he needs to go to the library, earlier he goes to the library for reading the story of warriors now he needs information about everything.

Granny once said confidential information was not available in the library and advised his cot to look for them.

Only by getting stronger and recruited through certain organizations, then he would get certain chances that too would have a limited degree of accessibility.

Now he needs to take one step at a time Zack thought inwardly.
