

# ANCIENT TEARS BLOODLINE

## Chapter 7 - SAFEZONE 1012 OUTPOST 1

Early in the morning at the Outpost office of Safe Zone 1012, James Lockwood was sitting in his chair, In front of him were two people, Mr Ferral and Granny Park they were discussing Zack.

Granny Park said, "James when are you going to visit Zack? Recently he is been asking about academies out there, you know I can not tell him about that unless He gets past the qualification test".

James raised his eyebrow slightly, He is been busy lately, a population of 10 million people in the SAFE ZONE 1012, People think 1012 is just some kind of fancy number or important military code, only designated and important people know that it is not a fancy number but actually.

it is a total number of safe zones under our particular sector, only God knows how many sectors are out there, some people say that sectors are managed by High-level organizations.

He is been reporting to his senior about the numerous cases of monsters attack lately, After thousands of year now Humanity has been expanding greatly only a few portions of our planet is covered by humans, Rest were unexplored Areas.

Due to the increase in the size of the human population in our safe zone, I have been given a task to explore the outskirts of areas of borders, try to explore unmarked areas, and report the situation about the environment, terrain, list of monsters, and their Power level.

There are numerous casualties in our recent expedition, the number of attacks increased significantly, looks like someone attacked the monster belongs to the monster tribe! Unless we killed their monster leader, we won't have some good night's sleep! James thought inwardly.

Because of this, he forgot about that situation of Zack, he thought Zack is 7 years old, Now he realized, Zack is now 8 years old! When he completed the adoption papers he learned about Zack's parents, they settle in this outpost only 5 years ago! and it is registered as Special Trainee Warriors and their mission is to explore the unmarked zones.

But when I tried to access the data 5 years ago, it shows unauthorized access, I don't know they were posted on some other secret mission or spy mission, but both are dangerous, he started sweating when he thinks about that because he noticed one particular thing in their database.

It is reported that they were married but had no child, looks like their parents not updated their database and not even registered about Zack when they were alive! It is troublesome now both of his parents were dead, he decided to let Zack know about his parents when he joins certain force and has some ranking power.

He heard about several old sly foxes and greedy powerful people sitting in commanding positions in certain organizations, he doesn't want to involve in cause and effect! It is dangerous for him and Zack, So he decided to adopt Zack and gave his Surname.

He kept things about Zack's history to himself, He told Granny Park And Mr Ferral that Zack's Parents were ordinary Hunters registered under PARAZAM HUNTER LEAGUE, For Zack's sake he created a false profile of him.

And He is a child who belongs to some other Trainee Apprentice Warrior couple, who lost their lives during a monster invasion that happened 7 years ago, in the outskirts town of Zetros.
