

I Can Enter The Game

Chapter 8: Expanding the Sales Channel! Who Cares if the Night View is Beautiful? 1

It was a good idea to mass-produce watermelons with Quality 2 and sell them at the price of imported special watermelons, but there were only a few watermelons with Quality 2 at the moment. He had even eaten one.

Therefore, he had to take care of the business in front of him first. At least he had to repay the debt at home first and pay the down payment for a house so that his mother could live better. Then, he could bring Mo Qing home to live together openly.

At the thought of this, Qin Lin walked behind Zhao Moqing and hugged her waist. His hands became naughty. "Moqing, why don't you not go back tonight?"

1

How could Zhao Moqing not understand? She said coquettishly, "If I don't return tonight, my mother will definitely know that I'm with you? When the time comes, she'll nag again."

Qin Lin sighed. "Then what should we do? It's been too difficult holding it in these past few days."

1

"Hmph!" Zhao Moqing grabbed the dishonest hand on her and snorted. "I'll call home later and say that my colleagues are eating outside. I'll be back later tonight?"

"Good idea. I'll book a room." Qin Lin skillfully took out his phone and went online to book a big bed in the bathtub of the East City Hotel.

The bathtub was not big, and the bed was not booked.

1

They had clearly registered their marriage, but they still acted like they were in an underground relationship. Was it easy?

After booking a room, he took out his wallet and looked at the two small umbrellas left inside. They were still enough.

1

“Mom, don’t worry. I’m not with him. I know. I won’t let him take advantage of me!” Zhao Moqing promised over the phone before hanging up. Then, she held Qin Lin’s arm and said, “Look, my mother is guarding against you like she’s guarding against a thief... Why don’t we lay our cards on the table with our family? I want to stay with you every day.”

“Give me some time.” Qin Lin hurriedly stopped Zhao Moqing’s impulsive thoughts.

Neither of them would feel good if they revealed their cards.

His mother would be happy and guilty. Zhao Moqing’s parents would definitely be upset and frustrated. Even if they pinched their noses in the end and acknowledged it, the relationship between the two families would be stiff and there would always be a knot in their hearts.

The average room in Youcheng County now was 12,000 yuan per square meter. A 100-story house with all kinds of procedures was about 1.3 million yuan. The down payment was about 400,000 yuan. Coupled with the renovation, it should cost more than 600,000 yuan.

4

In the past, he really did not have the confidence to do so. But now, if he expanded his business and guaranteed that he could sell 24 boxes of ripe watermelons every day, he would be able to earn this money in two months.

1

If the character’s level increased and he could open more places, the time taken would be even shorter.

When the time came, he could pick Mo Qing up openly and give her a big surprise. He could also explain to Mo Qing’s parents. Wouldn’t it be better for the two families to settle the matter happily?

“Okay, I’ll listen to you. Let’s go.” Zhao Moqing nodded with a smile.

She had never doubted Qin Lin. Even if the man she chose could only take the path of a showdown, in the end, she was still willing to choose him.

5

East City Hotel was the largest hotel in Youcheng County. It was by the river and had a beautiful night view.

However, who would be thinking about the night view when a man and a woman came to a hotel to get a room?

After registering at the front desk and getting the room card, Qin Lin held Zhao Moqing's hand and entered the elevator to go upstairs. As soon as they entered the room and the door was locked, he could not wait to remove the defense on Mo Qing. Then, he held her hand and went straight to the large bathtub.

1

...

1

Qin Lin then held Zhao Moqing's hand in satisfaction and left the hotel. They went to the night market to eat something before sending her home.

After saying goodbye to Zhao Moqing, Qin Lin returned home and looked at the game in his mind.

When they were messing around in the hotel, he had received a notification that weeds and insects had appeared in the game. At that time, he could not care less.

The next day, he got up.

The watermelon in 24 square meters was ripe again.

Qin Lin controlled his game character to pluck it and placed it in the storage room. Then, he removed the withered watermelon vines and planted seeds again. This way, another batch would mature in the evening.

In the storage room, including the batch that had matured yesterday evening, there were already two batches of watermelons.

He locked the door.

He entered the game.

When he arrived at the storage room, he saw a mountain of watermelons.

Seedless watermelon: 836 (Quality 1)

Seedless watermelon: 7 (Quality 2)

There were a total of 843 watermelons in the two batches. Furthermore, seven Quality 2 watermelons were separated.

After exiting the game, Qin Lin casually ate a bowl of porridge and went to the warehouse. He spent some time moving all 843 watermelons out of the game and then took another video to send to the WeChat group.

A moment later, Liu Dasheng and the other bosses appeared one after another. However, they were all people who had been wholesale previously, and there were no new orders.

Other than selling fruits, this group of people sold vegetables, seafood, and so on. Their sales potential was only so high.

After some calculations, there were more people booked today. There were 411 people.

Qin Lin quickly loaded the watermelons into the car and spent three hours pulling them in batches. He sent them over one by one. In the end, there was a total of 4,521 catties and 6,781 yuan in income.

1

However, when he returned to the warehouse, there were still 422 watermelons left. A batch would mature in the afternoon, and there would be more than 400 watermelons. He had to find a new channel.

1

Furthermore, he had a goal. It was the big RT-Mart in the Eastern Commercial Square.

The Eastern Commercial Square was the center of traffic in Youcheng County. It had the largest parking lot. There were all kinds of shops in the entire square's commercial building. There were bars, KTVs, cinemas... All kinds of entertainment.

The big RT-Mart was in the best position on the first floor. It was very big and had a complete classification area. It had the largest customer flow in Youcheng County.

The sales of the watermelons in Liu Dasheng's fruit and vegetable shops might not even be as much as in the watermelon area of the RT-Mart.

Qin Lin quickly carried two watermelons into his small electric car and rode to the RT-Mart.

What he needed to do now was to get his watermelon into the supermarket.

He had also asked around and found out that other than special bidding channels, the purchase of the RT-Mart would also often be wholesale of some goods at a 'promising' price.

Of course, there was a way.

When he arrived at the office of the supermarket, Qin Lin stuffed a pack of cigarettes into the security guard's hand and asked about the purchasing manager's office.

After putting a pack of cigarettes into his pocket, the security guard enthusiastically helped Qin Lin move a watermelon to Manager Chen's office.

The security guard had seen many people like this coming to the procurement department. There was only one goal. Manager Chen had also instructed that such a person would directly pick him up from his office.

Manager Chen was a fat and greasy man with a big belly. After knowing Qin Lin's intentions, he pretended to look at the two watermelons he had brought carefully. "The outer appearance of the watermelons is not bad. They're good watermelons."

"Manager Chen, do you think this watermelon can enter the supermarket?" Qin Lin asked.

Manager Chen immediately looked troubled and said, "Xiao Qin, you also know that there are many fruit channels who come looking for me every day. I've already worked with others. I have to be honest in business."

"..." Qin Lin knew that the meat show was coming. If he was really honest, he would not have told him so much. He immediately said, "Manager Chen, supermarkets also want to make a profit, right? The wholesale price outside is 1.5 yuan per catty. I can give in a little. 1.3 yuan per catty."

Manager Chen still looked troubled. "Xiao Qin, you know that my position is very difficult!"

Qin Lin knew very well and immediately smiled. "Manager Chen, then I'll give in a little more. 1.2 yuan a catty. You have to let me earn some?"

2

He knew that he was the only one who could make this deal. After all, he was doing it for free.

Manager Chen smiled. "Xiao Qin, since you're so sincere, our supermarket will take your watermelons. However, your invoice wholesale price will be 1.4 yuan per catty."

1

“Don’t worry, Manager Chen. I understand.” Qin Lin smiled, but his heart was filled with complaints.

He had long known about this. 1.4 yuan a catty was one cent cheaper than normal wholesale. He had already instructed the supermarket. As for the 20 cents a catty, it had fallen into Manager Chen’s pocket.

Although one catty was only 20 cents, what if there were 5,000 catties a day? That would be 1,000 yuan, which was 30,000 yuan a month.

This was only a watermelon. Think about it. There were so many kinds of fruits in the entire supermarket. If there were more, how much profit could Manager Chen earn in a month?

Seriously...

The profit at this price was especially equivalent to his profit.

It was really an era where channels were king. Since he had the ability to sell it at this price, he could not be jealous. He might as well not look at the price and go to other districts.

1

When he returned home, he received a notification in his mind that worms and weeds had invaded his crops again. He immediately controlled the game character to remove the weeds and insects.

The next day.

Qin Lin woke up early in the morning. The watermelons had ripened again. The shop owners had sent him a message early in the morning to wholesale the watermelons.

They were clearly used to looking for him to wholesale watermelons.

He went to the warehouse and moved the ripe watermelon out of the game.

This time, there was no Quality 2 watermelon. There were a total of 428 Quality 1 watermelons.

He took a video and sent it to the WeChat group. Seeing that there were no new orders, he calculated. These shops were similar to yesterday. There were a total of 408 wholesale shops. After delivering 4,732 catties, he would earn a total of 7,099 yuan.

1

In the evening, the watermelon ripened again and was sent to the RT-Mart. It was a total of 4,970 catties and 5,964 yuan.

1

He had received a total of 13,063 yuan today. His balance had reached 46,409 yuan.

After sending the watermelons to the RT-Mart, Qin Lin rushed to the Industry and Commerce Bureau. His original shop only had relevant documents for self-employment. Now that he was grading watermelons, he felt that he needed to apply for a wholesale fruit license. Otherwise, if something went wrong, it would be troublesome.

However, when he arrived at the Industry and Commerce Bureau, he filled in the information for a long time. In the end, he was told that he did not need to apply for a wholesale license.

Qin Lin then realized that he was ignorant.

It turned out that Article 35 of the Food-related regulations stipulated that the types of fruits were single. If one did not reach the basic size, the fruit farmers could directly distribute them without a wholesale license.

Qin Lin left the Industry and Commerce Bureau and had just returned home when he received an unexpected notification in his mind.

[Character level increased. You can develop new land! Level 2 land upgrade authority is open. You can upgrade six plots of land!]

Qin Lin's eyes lit up as he immediately looked at the game screen in his mind.

Indeed, six more plots of land lit up, indicating that it could be developed.

Furthermore, a symbol that could upgrade the number of lands appeared on the screen, followed by the suffix o/6.

In other words, not only could he open six more slots of new land, but he could also upgrade six slots of basic land to Level 2.

Qin Lin did not hesitate at all. He immediately controlled the game character to pick up a sickle, an ax,... and other tools to clean the weeds, stones, and wooden blocks in these six squares. Then, he used a hoe to develop the six squares and planted watermelon seeds immediately.

He did not plan to sell these six plots of new melon in reality because upgrading to level 2 land required game gold.

3

Furthermore, after upgrading to Level 2, he could totally plant other more expensive things.

Watermelons with six squares were ripe twice a day. One square could be upgraded in two days.

This way, he could complete the upgrade of Level 6 level 2 land in 12 days.

Over the next two days, the previous 24 slots made Qin Lin earn 26,123 yuan again. His bank card balance reached 72,532 yuan.

The newly opened six boxes of watermelons were all sold in the game. One box of level 2 land was developed.

After upgrading a level 2 land, Qin Lin immediately controlled his game character to leave the ranch and go to the Ore Town Seed Shop outside the ranch to check.

The seed shop had dense seed categories. What was available in reality and even what was not available in reality was here.

The requirements for the land level were marked behind each seed. It would only be opened if the seed was planted. If the requirements were not met, it would be gray and not open for the time being.

Qin Lin immediately searched among the many level-2 seeds, including vegetables, fruits, and various plants.

He directly chose to plant fruits to check. Many fruits were far more expensive than watermelons.

However, most of the seedlings were planted for other reasons. The restrictions on him were very big and not secretive enough. He directly ignored them.

In the end, he found a level-2 fruit seed that was very suitable for his current situation.

That was red strawberries.

Qin Lin checked online. At this stage, it was no longer the red strawberry season. In other words, red strawberries were already considered out of season fruits at this time. The price of ordinary red strawberries on the market had reached 15 to 25 yuan per catty.

If it was a special variety like cream strawberries, it would cost at least 50 yuan per catty. However, fruits could be planted in Level 2 lands without these special varieties of strawberries.

Seeing the price of ordinary red strawberries, Qin Lin immediately went to the seed sales point in Youcheng County.

It was still that big sister. She still remembered Qin Lin. "Brother, what seed do you want this time?"

Qin Lin said, "Sister, are there any red strawberry seeds?"

The sales lady immediately introduced to him enthusiastically, "Yes, yes. Red strawberry seeds are 45 yuan for 2 catties!"

Qin Lin bought strawberry seeds again and paid to return home. He entered the game immediately and placed the strawberry seeds in the seed storage box.

When he returned to reality, Qin Lin looked at the game screen. There were indeed strawberry seeds in the seed storage box.

Qin Lin immediately planted the strawberry seeds in the Grade 2 land.

At night.

After watering the plants and pests, he fell asleep with anticipation.

When he woke up the next morning, he looked at the game screen in his mind. Other than the green watermelon, there was a red and green strawberry that was especially eye-catching.

Qin Lin entered the game immediately and came to the place where the strawberries were planted. From the outside, the game screen was only a small box. In the game, the entire patch of red and green made him feel refreshed.

In the past, when he was dating Zhao Moqing, he often went to the strawberry plantation to pick strawberries himself. Of course, it was not to save a lot of money. Couples just liked that kind of atmosphere.

Qin Lin plucked a few strawberries. They were plump and bright red. They were definitely appetizing.

At the same time, he saw the message:

[Red Strawberry: Quality 1]

[Remarks: Although it's not a special type, it's a game product. It tastes great. It's the best among red strawberries. Delicious +1, sweet +1, taste +1.]

Similarly, the strawberries produced by this game had the same delicious, sweet, and taste of +1.

Although the note said that, Qin Lin was an experienced person. He still wanted to experience it personally. He placed a strawberry in his mouth and ate it.

The juice immediately overflowed in her mouth. It was soft, juicy, and fragrant.

1

One word: Delicious!

Two words: Very delicious!

If ordinary strawberries were sold for 15 to 25 yuan, the strawberries produced by his game could definitely exceed 25 yuan or even higher.

When he returned outside, Qin Lin controlled the game character to click pick and put all the ripe watermelons and red strawberries into the store.

This time, other than watermelons, he had also harvested 50 catties of red strawberries. However, he directly chose to sell these red strawberries in the game. He would upgrade the other five level 2 lands that could be upgraded first.

Because he had begun to plant strawberries to sell in the game, the time it took to upgrade all six plots of land to Level 2 had decreased a lot. It was completed in seven days.

Over the past seven days, Qin Lin's watermelon wholesale had earned another 94,211 yuan. The balance on his card had even reached 166,743 yuan.

He had earned more than 160,000 yuan in 13 days. This was something he had not dared to imagine in the past.

Now that the level 2 land had been upgraded, his income would increase by a lot.
