

Chapter 1561 - 1561 Wang Tianze's Difference

1561 Wang Tianze's Difference

Back when Yang Mo first met Wang Tianze, she was trying to hook up with him.

After all, Wang Tianze's conditions were too good. If she could be with him, she wouldn't need to worry about the Yang family at all.

To her surprise, Wang Tianze was not half interested in her.

When he was seduced by her, Wang Tianze was not moved at all.

!!

Afterward, Yang Mo realized that Wang Tianze could not be interested in her because he was gay!

When she found out about this, Yang Mo was dumbfounded!

She had no contact with these things in the Land of Fantasy, nor did she know that such people and feelings existed in this world.

Wang Tianze was so brilliant and so good, but he liked the same sex?

What a pity!

However, after knowing Wang Tianze's secret, she quickly changed her thoughts.

She was not short of men and would not choose such a man at all.

So what if he was good-looking? It was not like he was hers!

To her surprise, a few years later, Wang Tianze approached her and said he wanted her to help him have a baby.

Having a baby?

Yang Mo was immediately confused.

What a nonsense request!

This was too much!

Who would want to give a child to a gay man? How much would it hurt the mother to have a child?

Wang Tianze's explanation was that he had approached her because she was a Hua native and well-qualified in every way.

Such a good mother would surely give birth to a child that would also be very good.

That was the kind of child they needed in the Wang family.

This statement made the corners of Yang Mo's mouth twitch, not feel happy at all.

If they wanted a child so badly, they could find a surrogate!

However, Wang Tianze refused.

Their Wang family was a very traditional family. When they found out he was gay, his parents and grandparents were furious.

After a struggle, the elders said as long as he had a child, then they'd let him be.

The child could not randomly be born.

First of all, the baby could not be of mixed race.

Although it was said that mixed-blooded children were smart and beautiful, the Wang family would not allow mixed-blooded children to confuse the lineage of their Wang family!

Second, the child's mother must also be outstanding.

Only an excellent mother could give birth to an excellent child.

However, the Wang family had a very grand vision.

In their opinion, an ordinary girl could not meet their requirements.

Yang Mo was good. She was a child of the Yang family and had good looks and intelligence.

It would be great if she could have a child with Wang Tianze.

After learning about the situation here, Yang Mo was stunned.

How could Wang Tianze make such a thing so simple?

Although he was really outstanding, he was not worth the sacrifice she made, right?

So, she firmly refused Wang Tianze's offer.

To her surprise, Wang Tianze seemed to have a new target.

However, what Wang Tianze would find lovely would only be the same sex.

A gay guy like him wouldn't find girls cute.

Moreover, they would feel that girls were stealing resources from them.

Yang Mo knew Wang Tianze's thinking very well, so she naturally wouldn't think wrong.

"Are you talking about Qiao Yanjue?!" Yang Mo asked in shock.

"Yes," Wang Tianze didn't deny it and nodded with a smile.

"How is he lovely?"

Yang Mo felt like she was going crazy. How was a big man cute?

"He's lovely." Wang Tianze smiled very brightly. "He did it this time."

Yang Mo froze for a moment, thinking she had heard incorrectly, or rather, she was stupid, so she was mistaken about the cause-and-effect connection here.

“He did the thing, so... He’s lovely?”

Where was this reasoning coming from?!

Chapter 1562 - 1562 The Filter Is Too Thick

1562 The Filter Is Too Thick

Wang Tianze smiled, “After he did this, he even sent me a message.”

This time, Qiao Yanjue was behind the scenes manipulating the matter.

However, Qiao Yanjue told him the truth without him having to investigate much at all.

“He took the initiative to tell you?” Yang Mo was shocked. “What’s he up to? Provocation, right?”

!!

It must be a provocation!

Otherwise, who would take the initiative to tell others about being the culprit?

“But he’s still cute.”

Wang Tianze’s smile remained unchanged.

Yang Mo rolled her eyes. This guy's filter was too thick!

Qiao Yanjue did such a thing and ruined Iron Eagle, and he still thought he was cute?!

It was horrible, right?

She was a straight girl who couldn't understand his thoughts.

"So what are you going to do now?"

"Take my time," Wang Tianze smiled. "There's no rush."

After this incident, he understood that Qiao Yanjue was not a cutie who was easily bullied.

Moreover, Qiao Yanjue was very angry, so of course he couldn't confront him directly.

Looking at Wang Tianze's smile, Yang Mo couldn't help but shiver.

His expression was scary!

On the other side, Qiao Yanjue, who didn't know he was being treated like a "cutie," was talking to Xia Xibei about the incident.

Iron Eagle was a company invested in by Wang Tianze, and his shares were quite large.

If something happened to Iron Eagle, he would definitely lose a lot of money too.

Although Wang Tianze was the young heir of the Wang family, these losses were not meaningless to him.

He took the initiative to inform Wang Tianze that this matter was done by him because he wanted Wang Tianze to know that he had a temper.

If Wang Tianze were sensible, he would not mess around.

If not, he would not be nice about it!

Of course, that was what he said, but Qiao Yanjue didn't just drop his guard against the Wang family.

He was not so stupid as to think that after this incident, Wang Tianze would really be so obedient and give up attacking him.

Even if he had suffered once before, he couldn't do so another time.

For this reason, he had someone keep an eye on Wang Tianze to see what the other party would do.

To his surprise, he received the news that Wang Tianze had gone to Yang Mo's lab.

"Wang Tianze has contact with Yang Mo?" Xia Xibei was also surprised. "When did the two of them... Get together?"

Could it be that they were a couple?

Qiao Yanjue obviously also thought of this, but soon he shook his head.

"If the two of them were a couple, Wang Qun shouldn't be looking for you to fulfill the marriage contract anymore."

Although the Yang family was messy because of too many descendants, it wasn't bad. If Wang Tianze and Yang Mo got together, the Wang family wouldn't break them up.

After all, they were all in the same circle and quite compatible.

"Whether they're a couple or not is not certain, but what is certain is that they definitely have a relationship," Xia Xibei hummed lightly.

Qiao Yanjue nodded approvingly and asked again, "How is your research going?"

“Almost done,” Xia Xibei nodded.

Since she had learned about what Yang Mo wanted to do, she acted on it.

Yang Mo wanted to research cancer-related drugs, and she also had the same research.

She was ready to present the results ahead of Yang Mo.

When the time came, Yang Mo’s face would definitely look interesting.

In this way, Yang Mo would also know her identity.

However, that was not a problem. After all, Yang Mo had already started attacking her when she did not know her identity before.

Chapter 1563 - 1563 Development of Medicine

1563 Development of Medicine

Xia Xibei could care less about other things, but she was concerned about Yang Mo. After all, it was her goal to crush Yang Mo.

Now, knowing that Yang Mo and Wang Tianzhe knew each other, her mind came up with a new idea.

After she whispered a few words to Qiao Yanjue, the two of them revealed a wry smile in unison.

For the next few days, Xia Xibei continued to shoot.

!!

In these few days, there was no movement from Wang Qun's side either.

She was quite satisfied that Qi Zhi'an had clarified things, so Wang Qun didn't dare to mess around.

After solving the urgent problem, she used the filming break to develop drugs.

Cancer has always been a big problem for human beings.

Every year, many people die because of cancer.

Once diagnosed with cancer, it was a nightmare for the whole family!

To treat cancer, each patient could spend a lot of money, dragging the whole family down without any effect.

Even if there were an effect, the person was very weak after the chemotherapy and various other treatments.

Therefore, all major pharmaceutical companies were trying to find a cure for cancer.

Xia Xibei did not want to do anything in this area before.

She knew that if she interfered in this area, everything might change afterward.

Of course, the most important thing was that no one around her had cancer.

She didn't have the mind to do these things when it was not her business.

Besides, she had a lot of things to keep her busy and no time to deal with them.

Now, after watching Yang Mo's process, she realized that she also had a great anti-cancer drug on hand.

In the Land of Fantasy, because everyone was cultivating and there were enough spiritual plants, not many people were suffering from cancer.

People more often encountered bumps on the road of cultivation, and physical issues were not a problem. Even a broken arm or leg could be quickly healed.

Even if someone had cancer, it could be solved quickly.

It could be said that in the Land of Fantasy, cancer was just a very simple and minor disease that could be solved with a little effort.

In this case, Xia Xibei, who had been in the Land of Fantasy for decades and was almost assimilated, no longer felt that cancer could be such a terrible thing, let alone thought of using this aspect to gain more attention for herself.

This time, she was startled because of Yang Mo.

In fact, the reason why Yang Mo started researching this area was because of Xia Xibei.

At first, because she was a disciple of Xia Xibei, Yang Mo was exposed to a lot of content in this area.

However, due to the limited time, she was not fully aware of the process.

This was why Yang Mo put so much effort into re-researching.

She had only roughly touched on this aspect and knew the general path and solution, but the specifics still needed to be studied.

However, she was already much better than other researchers in this world.

Cancer was a terrible disease for many people that could not be completely eliminated with the current technology.

People still didn't know where to start to solve this problem.

Yang Mo had made such progress because of opportunity.

Still, such a head start would not be enough in front of Xia Xibei.

It may have taken Yang Mo a few years to get through all of this.

However, it was something that already existed in Xia Xibei's mind.

Qiao Yanjue prepared a big lab for her. It was also in Rose Manor.

Rose Manor had now become their home base. In addition to cultivating, they could also conduct research here.

Chapter 1564 - 1564 New Anti-Cancer Drug

1564 New Anti-Cancer Drug

Although Xia Xibei was only doing research in between filming, she was fast.

A few days passed, and Xia Xibei had already gotten the results.

Her knowledge of both this world and the other world was very deep to have such a frightening speed.

However, while there were results, there was the question of how to present them.

!!

Xia Xibei thought about it for a while and decided to collaborate with others.

This drug could purify cancer cells and transform them into normal cells.

If this miraculous effect were to be told, it would definitely be ridiculed to death!

Which idiot was clamoring for attention?

Not only could the drug kill the cancer cells, but it was also able to transform them back into normal cells.

What a joke!

How could it be that good?!

If Xia Xibei had dared to say that to everyone, she would have been made fun of!

Moreover, the drug had just been developed and could not be marketed immediately. It had to be tested to make sure it was harmless to humans and effective before being marketed.

Even Xia Xibei could not just put a new drug on the market.

Therefore, she chose to collaborate with CG University.

CG University was the same university she had rejected before.

She had stopped a shooting incident there before, and then the university extended an invitation to her to enroll, which she refused.

However, CG University was a very famous university.

Many fans were still lamenting that she had refused this university's invitation before. It was a pity!

She could have waived her college entrance exams if she chose to attend this university!

However, no one could change Xia Xibei's mind or decision.

CG University was also famous in medicine. After all, the best department in this school was the one in medicine.

They published quite a few results every year.

This time, Xia Xibei decided to collaborate with CG University to launch this anti-cancer drug.

Of course, there was another very important reason: she knew the president of this university!

The president approached her personally, thanked her, and invited her to join the university.

Although she refused, the two of them also exchanged their contact information and even followed each other on social media.

This made the fans very happy; who else knew the president of a famous university this well?! It sounded very impressive.

That was why Xia Xibei wanted to do a collaboration with the president.

One needed to have a strong enough channel to bring this drug to the market successfully.

CG was a very powerful school, so if you let them come forward, you would definitely have very good results.

So, when the results were officially achieved, Xia Xibei contacted the president of CG University.

When the president received the call from Xia Xibei, he thought it was a bit strange.

Since that incident, Xia Xibei has not contacted him.

Of course, this was normal. After all, their circles did not intersect, and Xia Xibei, as a star, was also very busy.

So, why did she contact him today?

The president was confused and picked up the phone.

When the call was answered, Xia Xibei exchanged a few pleasantries and went straight to the point.

“I have a new drug, an anti-cancer drug. I want to collaborate with you.”

“What?”

The president was flabbergasted, thinking he had heard wrong.

“A new anti-cancer drug. A drug that can transform cancer cells into normal cells.”

Xia Xibei's explanation widened the president's eyes, and he huffed, "Are you kidding me?!"

It had been so long without any contact, and now she was joking with him?

However, this kind of joke was too much!

They would be roasted to death if it was announced!

Chapter 1565 - 1565 Ridiculous Joke

1565 Ridiculous Joke

Nowadays, people knew that cancer cells were cells that had been mutated, and even if they divided, they were still cancer cells and could not be transformed back into normal cells.

It was like the human body. If the body was already old, it couldn't be returned to its original state. This was an irreversible change.

Xia Xibei told him that there was a drug that could transform the changed cancer cells back into normal cells. Wasn't that a joke?

It was ridiculous!

!!

The university president thought he had seen a lot of things, but he had never thought that Xia Xibei would tell him such a fantastic and ridiculous joke!

If Xia Xibei had backtracked on her previous decision and wanted to re-enter this school, there might still be a chance to talk to him about it. After all, she did save many people before.

Now, she was using this excuse to make jokes, and the president felt that she was being unethical.

The president was not happy and showed it in his words.

Hearing the president's attitude, Xia Xibei smiled, "Let's talk about it in person. It's not easy to discuss over the phone."

After that, they made an appointment to meet at the university.

After all, Xia Xibei was a big star. If they met outside, there was no telling if they would be photographed, and then there would be some kind of scandal.

Besides, a meeting at school would verify it immediately.

If she was joking, it would be straightforward to break it down.

The president decided to get the professors of the medical school to come along, which was not a large number. Even if Xia Xibei was lying, not many people would know about it and it would not be a disgrace.

The next day, Xia Xibei arrived as promised.

Upon meeting the president and a medical professor, she flashed a big smile and then talked about her intentions.

“I’ve brought the data and the drugs.”

She carried a box in her hand, which was not too big nor too small, and looked quite substantial.

She pulled out a pile of papers from inside, along with a few bottles.

The professor looked at them with a dumbfounded expression. What was this about?

However, when he looked at the titles on the documents, he looked aghast.

Anti-cancer drugs?

“Can I take a look?”

“Please,” Xia Xibei nodded.

She had brought it over, it was what she wanted them to see.

The professor took the documents and began to read them.

At first, his expression was a little disbelieving, and a little mocking.

The documents began by getting straight to the point- that it was possible to turn cancer cells into normal cells.

This kind of statement almost made the professor want to throw the documents back.

However, he also recognised Xia Xibei.

Who didn't know that Xia Xibei had saved the school's students before?

Moreover, several of this professor's prized students were among those who were attacked in the first place.

It could be said that if it wasn't for Xia Xibei, those few students would have been harmed as well.

So even if he scoffed at what Xia Xibei brought to the table, it was not good to turn the other cheek immediately.

He'd take a look first and see how a layman could be so clueless.

However, the professor's expression grew more and more grave and serious.

By the time he had quickly looked through the documents, his face was expressionless.

He picked up the bottle in front of Xia Xibei, "Is this the new drug you were talking about?"

"Yes," Xia Xibei nodded. "I believe there are mice for experiments in the lab."

No need to make it clear, everyone understood.

Every laboratory had experimental mice, and many of them had been injected with cancer cells.

So, Xia Xibei didn't have to go looking for other mice.

Just provide them with the drug and they would naturally be able to find the answer.

"Okay, let's go over there and take a look!"

Chapter 1566 - 1566 Doing Experiments

1566 Doing Experiments

The professor stood up, very serious and eager.

The president looked at his movements and was confused.

Could Xia Xibei be right?

Otherwise, the professor would not have to be in such a hurry.

!!

“Let’s go to the lab first!”

The professor took the lead and went outside, holding the bottle of medicine given by Xia Xibei in his hand.

Xia Xibei looked to the president, “Let’s go there too.”

The president nodded with a bewildered expression.

What else could he do if he didn’t follow?

Soon, the three of them arrived at the medical building.

This building was for medical students, and there were many laboratories inside.

Even though it was now the weekend, there were many students here.

However, everyone was either busy in the labs or walking outside in a hurry, their faces serious.

Xia Xibei walked in with a relaxed look that didn't fit in with the rush of the place.

She had a light smile on her face, as if she was sightseeing.

Some of the students who passed by froze for a moment after seeing her, and their steps slowed down slightly.

Why did this big star come here?

However, medical students who had studied until they were about to go bald had no time to chase after stars.

Although everyone knew Xia Xibei because of the previous incident and felt curious about her presence here, no matter their curiosity, it was not worth mentioning when they had such heavy loads of homework.

As for going online to say that Xia Xibei was here now, that was even less likely.

They were very busy!

Besides, if the professor found out, it would be a disaster!

How could they still have time to chase stars? That meant there was not enough homework! More homework!

Xia Xibei smiled at the students who were complaining in their minds and followed the professor to the lab he mentioned.

Before entering the lab, they changed into the lab's uniforms.

After getting ready, they entered the lab.

Inside was a very large laboratory full of experimental equipment.

It would take a lot of time to learn how to work this equipment, let alone to master all of these things!

Seeing the professor come in with Xia Xibei, the students who were busy working inside were also confused.

Was this big star here to study? Or was she here to play?

Xia Xibei smiled at them, and then they were kicked out by the professor.

A few students were confused as they were kicked out and were flabbergasted.

What was this?

The professor kicked the students out because he didn't want the story to get out.

If these medicines were fake and useless, then Xia Xibei would be ridiculed. After all, Xia Xibei was the life-saver of their students.

However, if these medicines were real, then even more so, the students must not know about it!

Who knew if they would tell the truth about it? Who knew what would happen if others found out?!

After clearing the place, the professor brought out the cancer-stricken mice.

Looking at the sad-looking mice, the professor's expression was very serious.

He first took out a drug and started to conduct laboratory tests.

After half an hour of testing, he was shocked to see the results.

It really worked!

These were the most effective things for cancer cells!

After making sure that these things are correct, he took a deep breath, drew a little blood to keep a sample, then fed the medicine to the mice.

After half an hour, he drew blood from the mice again.

After testing the blood and seeing the results, his eyes widened and he drew a breath.

His reaction made the president anxious.

“How is it? Is it okay?”

Chapter 1567 - 1567 I Did It By Myself

1567 I Did It By Myself

The professor’s hand began to tremble, and he could not speak.

The president was in a hurry. He got close to the screen, and after looking at the diagram clearly, he also drew in a breath.

Although the president was not in the medical department, he had a little bit of understanding of the situation.

Although he did not know how to do the experiment or get the results, he still knew how to see the results.

!!

The cell images on the screen were very clear, and there was a comparison of the previous situation, so the changes in those cells that represented abnormalities were very obvious.

Before taking the drug, one could see that this mouse had many cancer cells in its body.

However, after taking the medicine, the cancer cells were reduced by a lot after only half an hour.

Oh no, it wasn't a reduction. It was a change!

The previously cancerous cells had been transformed back into normal cells at this moment!

The number of cells had not decreased, but the change was huge!

The president was stunned looking at this comparison chart.

It was true!

Irreversible changes had really happened!

This was no less than total rejuvenation!

The president was still shocked when the professor turned around and stared intently at Xia Xibei, “Where did this medicine come from?”

“Didn’t I tell you? I researched it myself,” Xia Xibei shook the document in her hand.

“You researched it yourself?!” the professor shouted in shock, his voice breaking.

Was she kidding?

They had worked for so many years, but they had not achieved effective results, and she, a young woman, was able to have such achievements?

“You have a team?” The professor frowned. “If such achievements existed, you can’t covet the team’s credit.”

Although it was an individual who came out to receive the award, behind this achievement was the effort of the whole team, and the credit of the team cannot be erased.

The professor thought that Xia Xibei might still be young, to want to take all the credit for the team.

If that were the case, she would have a bad reputation afterward.

"I don't have a team," Xia Xibei shook her head, "I did it all by myself."

This statement made both the professor and the president gasp, dumbfounded.

She could produce such fantastic results all by herself?

It couldn't be!

The professor took a deep breath and seriously stared intently at Xia Xibei, "You didn't lie?"

"I'm not lying."

Xia Xibei smiled confidently, "I worked it out all by myself!"

The president again drew in a breath, "Amazing!"

Xia Xibei smiled, "However, the results of the experiment still need to be verified."

Of course, she was not half worried about the results.

No matter how they verified it, the result would be the same.

The professor's face was very complicated, looking at Xia Xibei with a look of disbelief.

If Xia Xibei really did this by herself, then it would be incredible!

She alone did what so many people had been unable to do all their lives. She was simply a genius among geniuses!

If this matter were announced, it would definitely shock everyone!

"Good. I will continue to work on this," the professor nodded, "When I have the results, I will inform you."

Xia Xibei nodded, "Okay. If you run out of the drug, you can let me know."

She was not afraid that they would keep the results to themselves.

They were world-renowned figures, and with their character, they would not do such a thing. Even if they dared to do so, Xia Xibei could make them suffer consequences.

Chapter 1568 - 1568 Natural Surveillance

1568 Natural Surveillance

After explaining the matter to the professor and the president, Xia Xibei left the university.

After returning to Rose Manor, she took a break, wore a disguise, and went to the building where Yang Mo was.

She whistled near the building.

Although it was a whistle, no one else could hear her because the sound was only audible to the spider.

!!

Soon, a small spider crawled down the wall.

Xia Xibei hid in an unoccupied place and touched the spider.

Then she attached spiritual power to the little spider and let it go up again

.

Xia Xibei could attract the attention of the spirit beast through these low-frequency sounds.

Moreover, she had left a command on the little spider before, so this sound was more attractive to the little spider.

Only those who were stronger than her could break the command on the little spider.

It was a pity that Yang Mo's strength was not strong enough to discover the abnormality of the little spider.

For Xia Xibei to re-establish contact with the little spider, she could re-use this command to call it over and then re-attach the spiritual power.

Now, the little spider quickly accepted her spiritual power and crawled back.

Soon, Xia Xibei saw the situation inside the lab through the spider's eyes.

In the lab, Yang Mo and some students were doing experiments.

Based on the lab's various equipment and some computer data, Xia Xibei understood Yang Mo's progress.

It seemed that during this period of time, Yang Mo had not made much progress.

While this kind of thing was not very difficult for Yang Mo, it was not easy either.

She may be quite a bit better than others, who hadn't been exposed to this research, but she was still quite a bit less effective than Xia Xibei.

After determining what was going on here, Xia Xibei revealed a smile.

The results from Yang Mo's side wouldn't be available after the results from the university were finalized.

Also, if something were to go wrong in the middle, it would have to be done all over again.

However, no matter what, Xia Xibei was one step ahead of her.

After determining Yang Mo's progress, Xia Xibei prepared to draw back her spiritual power.

However, just as she was about to do so, she saw Yang Mo pick up the phone.

"Old Wang, dinner? Something to discuss with me? All right. 7:00 p.m. at the Moon Restaurant."

Old Wang?

Xia Xibei immediately understood that it was Wang Tianze.

She knew that Yang Mo and Wang Tianze knew each other before, so it must be typical for the two of them to have dinner together.

Xia Xibei was silent for a while and decided to continue following!

Maybe if she followed Yang Mo, she would discover more things.

Since she knew that Wang Tianze had set Qiao Yanjue up, her impression of Wang Tianze was even worse.

He was a real scum!

How could anything good happen when two scum got together? Who knew if they would come together to set up a trap for others?

So, Xia Xibei decided to follow them and see!

At around 6:30 that night, Xia Xibei arrived at the Moon Restaurant, where they had arranged to meet.

She found a random seat and started waiting for them to arrive.

After ten minutes, she saw a good-looking couple come in.

At the sight of the two of them, Xia Xibei pursed her mouth. Sure enough, they were here.

When Yang Mo passed by her side, Xia Xibei again connected her spiritual power to the small spider in Yang Mo's bag.

This was a natural surveillance device!

How could Yang Mo and Wang Tianze know that this little spider had "betrayed" them?

Chapter 1569 - 1569 Pretty Little Spider

1569 Pretty Little Spider

Yang Mo and Wang Tianze looked outstanding. Even in the M country, where the people were generally tall, they were not at all inferior.

The two of them were also dark-eyed and dark-haired, which drew even more attention from the crowd.

However, both of them were used to such gazes, so they were naturally calm and relaxed.

Before starting to talk, Wang Tianze placed a small instrument on the table.

!!

It was a jamming device. Any listening devices within a ten-meter range of it wouldn't work.

As for the restaurant's surveillance, it would not be able to record their conversation, so he didn't worry about it. Their voices would not record clearly since their voices were so low.

They chose to meet outside because they were very cautious.

However, they did not know that they still had natural surveillance by their side.

Looking at Yang Mo's little spider resting docilely on the table, Wang Tianze gave a light laugh and raised his eyebrows, "Can you help me find such a spirit animal?"

"No," Yang Mo refused again.

It was so hard to raise a spiritual beast.

She put in a lot of effort for this little spider!

She had seen some very smart little animals around other people.

However, there was still a long way to go before they could open their spiritual wisdom.

To get them to open their wisdom, they had to have a lot of spiritual plants and spend a lot of spiritual energy.

Otherwise, you'd have to wait.

Maybe after a decade or so of slowly nurturing with spiritual energy and conditioning with spiritual plants, there may be changes, but by that time, these little creatures may have already died.

This was not the Land of Fantasy, where spiritual energy was abundant and spiritual beasts were everywhere.

Even Yang Mo would not be able to find so many spiritual animals.

Wang Tianze understood this. After all, Yang Mo had explained it to him before.

So, he didn't think too much about it, just casually asked.

The spider was quite scary, but this one was still quite cute, especially when it was a spirit animal!

Once you became a spiritual beast, even an abominable face looked cute.

Not to mention that this little spider looked quite exquisite.

As the spider grew prettier and prettier, it looked like a crystal.

Others walking by might think it was a small crystal ornament.

Yang Mo handed the menu to the waiter, then said to Wang Tianze, "Well, what do you have to say? Hurry up."

If Wang Tianze asked to meet her, it would definitely be for something.

After all, Wang Tianze was also very busy.

With all these things happening at Iron Eagle, as the person in charge behind the scenes, he also had to help. He couldn't really just do nothing.

However, even if he did, the clients did not accept this.

After all, what Iron Eagle did had earned too much hate. Who wanted to let it go?

So, Wang Tianze was quite busy these days.

"Annoyed," Wang Tianze grunted unhappily.

"Annoyed?" Yang Mo looked at him, then laughed, gloating. "Being pressured to get married again?"

Wang Tianze was now thirty years old, still very young, but that was not young for the Wang family.

Moreover, Wang Tianze's situation was so special that the family was very worried.

If this continued, who knew what he would cause?

Over the years, although Wang Tianze had many boyfriends over the years, he was not exposed because of his discreteness and the help of the Wang family.

Only, now there were some rumors that he had a different sexual orientation.

If such rumors spread back to the home country, would he still be able to get a suitable wife?

Even then, the family could not help but pressure him often.

If he didn't have a child, then they'd keep pushing!

Chapter 1570 - 1570 Tweedledum and Tweedledee

1570 Tweedledum and Tweedledee

Wang Tianze pursed his mouth, "Annoying!"

His expression was somewhat irritated.

Others thought he was laid back- Well, he did have an easier life than others.

However, he also had things that bothered him. On the marriage front, his family was absolutely impossible to talk to.

!!

Having to deal with their prodding every day was getting on his nerves.

“Well, you’re not independent,” Yang Mo shrugged.

“Hah,” Wang Tianze hummed and gave her a look. “You’re talking as if you can be independent.”

Both of them were similar in their background.

Although they were both excellent children in their families, they were still a bit far from having their families completely uninvolved in their own affairs.

They were not yet at the point where they could be completely independent without relying on the family’s resources.

Since they had to use the family’s resources, they had to listen to their arrangements.

Most importantly, they were surrounded by various brothers and sisters, with too many competitors.

Since there were too many competitors, they could not be so carefree.

It was also because of this reason that they worked together.

After all, they had the same plight.

“Okay, let’s not hurt each other.”

Yang Mo snorted, “Didn’t your dad already help you find a target? Hurry up and get it on!”

“Stop it.” Wang Tianze let out a laugh. “After my dad’s many efforts, the Qi family still refused.”

“Refused?” Yang Mo frowned. “The marriage contract your families had previously set up is just gone?”

“Right.”

Wang Tianze leaned back in his chair with a dissatisfied face, “The Qi family said that it was an arrangement of the elders, and now it’s all about free love.”

“Your father is not angry?”

“He is angry. He’s been obsessed with this for a while.” Wang Tianze shrugged, “But the Qi family is firm.”

Moreover, this matter was indeed a previous verbal agreement, and there was no written agreement. It was simple to refuse it.

So the Qi family refused.

“The most important thing is that we don’t collaborate much with the Qi family.”

This was why the Qi family could refuse so readily.

The two families didn’t have much business collaboration. Even if they wanted to hold each other back using this angle, it was not that easy.

Yang Mo raised her eyebrows. “You can also try on your own! I didn’t know that you were the kind of person who listened when people refused you.”

Yang Mo’s words made Wang Tianze laugh out loud with a look of understanding.

“You seem to have a lot of grudges against Xia Xibei?”

Although he knew before that Yang Mo had ill will towards Xia Xibei, her reaction today further illustrated this.

“Yeah, didn’t you already know that?” Yang Mo didn’t deny it, either. “So, hurry up and get her, then abuse her properly. How cool is that!”

“But I’m more interested in Qiao Yanjue.”

“You’d better take it easy.” Yang Mo rolled her eyes at him. “Doesn’t the aftermath of the last crisis still give you a headache?”

Previously Wang Tianze set a trap for Qiao Yanjue, which was busted.

Then, Qiao Yanjue’s counterattack was ferocious.

Originally, Iron Eagle’s problem was not very troublesome. This time, it festered, and the subsequent development made Wang Tianze also have plenty of work.

If he still continued to provoke Qiao Yanjue, who knew how much trouble there would be?

“But if you let Xia Xibei give you a baby, and she finds out that you like Qiao Yanjue, won’t she tear you apart?” Yang Mo advised him not to mess around. “At least for these two years, you should not mess around. Stay calm. Otherwise, I can’t help you.”
