

## Chapter 204

In modern society, the power of money has been rampant among ordinary people, from six years old to 80 years old, all know the importance of money. And you have to pay before you enter the hospital. The owner of the snow farm has no chance to run. The herdsmen are not stupid now. They will call the police as soon as there is a signal. There is no certificate for this kind of secretly dry snow field. One must be caught.

In remote areas, you have a lot of luck. If you work for a few years, you can earn more money for a few years. Take care of the relevant nodes around you. Maybe you can go up several steps in your wealth level after a few years. But if you have bad luck, you can't keep your hard money for a few years in case of an accident. The police immediately took control of the owner of the snow field and closed the snow field.

In the hospital, patients who can live in ICU for a long time can not get rid of these situations. The rich, leaders and employees are injured on duty. The public here must be public, not working. Because the price of ICU is really expensive, super price, and the charging unit is generally measured according to 10000 yuan.

The human body is a complex body. The collapse of various physiological environments can lead to major diseases. The electrophysiology of the body is a very important human secret that has not been really solved at present.

Bayin was rescued, but the next treatment is still very important. In particular, a correct post resuscitation treatment can avoid many unnecessary sequelae.

120. The patient can be directly taken to the emergency department for necessary rescue. If you want to send the patient to the ICU, you must first pay the hospitalization fee or say hello to the leader, who must be above the level of hospital president. The family members of the owner of the snow farm paid 100000 first. This fee can't go to medical insurance because it's an accidental injury and all kinds of insurance can't go.

Because it was the weekend, there was only one attending doctor Huang Wenzhi on duty in the ICU. After Zhang Fan sent the patient into the ICU, he explained the situation to Huang Wenzhi.

This patient must first ensure to maintain good respiratory function. After cardiopulmonary resuscitation, it must first ensure whether there is rib fracture, pneumothorax and pulmonary edema. Fortunately, Bayin is still young, the organic content in the ribs is high, and the toughness is sufficient.

These complications have not occurred. The trouble is that although he has the pulsation of the great artery, he can breathe autonomously.

Hypoxia is very harmful. It can deplete the brain's oxygen reserve in a few minutes and lead to brain death. The bedside ventilator began to be used directly. This is the first step to ensure the circulation of oxygen and the stability of circulation function.

The stability of circulatory function is a prerequisite for the effectiveness of all recovery measures. Simply, the pressing of Zhang Fan and them all the way makes Bayin's circulatory function begin to take effect. But I can't rest assured that electric shock has disturbed the electrophysiology of the body, and there may be cardiac arrest or various cardiac fibrillation at any time. ECG, arterial pressure, CVP and urine volume must be strictly detected.

At present, we can use drugs to maintain normal circulation, but we can't rely entirely on drugs. We must get rid of these supports as soon as possible. Human nature has a lazy side, and these organs also have a lazy side. Under the long-term assistance, they will also get used to relying on.

For respiratory and circulatory arrest, the first thing to pay attention to is the brain. The second is the kidney. Many patients after resuscitation are in vain because of renal failure. The heart is electrophysiology, while the kidney is chemical physiology. It is very necessary to monitor the acidity and alkalinity of body fluids and various macromolecular substances.

Many patients and their families don't understand. I just have a bad cold. Why do you have to draw blood and test your urine and urine? In fact, this is a preventive mechanism. Many small diseases will produce some special biochemical reactions, and then cause a series of adverse reactions, which will make small lesions seriously ill, and then kill people.

Zhang Fan helped Huang Wenzhi deal with the patient. Although there was only one doctor, there were many nurses. Six nurses in the Department are carrying out the doctor's orders with high frequency.

"It's OK. All indicators are normal, and there are no obvious changes in bilateral pupils. Fortunately, it was found early. You've been pressing the guarantee circulation, otherwise the patient will be finished directly." Huang Wenzhi said to Zhang Fan.

"But we still have to observe to see if we can survive tonight. Once there is brain reperfusion injury, it will be in trouble." Zhang Fan nodded and then said.

Zhang Fan is very familiar with ICU doctors. After all, many patients undergoing surgery have to spend a day or two in ICU. Zhang Fan often comes to ICU to check the postoperative patients after ward rounds in the morning, so he is very familiar with these ICU doctors and nurses.

"Well, that's right. Why don't you be on duty tonight? I heard you'll come to our department for transfer next week?" Huang Wenzhi and Zhang fan are joking. The patient is now in stable condition and they are relaxed.

"I really can't today. My girlfriend is still waiting downstairs. I'll trouble you today, brother Huang. "

"I'm kidding. You're serious. When did you have a girlfriend? That's fast enough! "

"All right, brother Huang, I'll give you the patient. I'm leaving now and I'll report to you tomorrow." Zhang Fan jokingly said that he meant that Huang Wenzhi was already the director of ICU!

"You stinky boy, hurry!" Huang Wenzhi watched Zhang Fan walk away and returned to the Department.

The work in ICU is very boring. We always observe various instruments endlessly. Nurses are also very busy. ICU patients are special care patients. If these patients do not have bedsore before entering the Department, but have bedsore in ICU, they will directly be regarded as a medical accident. So it's impossible for the little girls in this department to want to sleep. They can be two or three years old in one night!

After returning to the car, Zhang Fan reported the patient's situation to several people. Seeing that Shaohua's red eyes looked like crying, he asked, "what's the matter?"

"It's not that I love you. I'm crying." Jia SuYue took over the conversation and said. If it had been before, she would have ridiculed Zhang Fan, but after these two things, she understood Zhang Fan a little, so she gave face and didn't laugh at Zhang Fan.

Shaohua asked Jia SuYue to say that she had made a big red face. She was a little embarrassed. There were many people, and it was hard to say anything. After turning her hair, Jia SuYue also had red eyes.

"Then why are your eyes red?" As soon as the words were spoken, Zhang Fan secretly regretted that it was inappropriate to ask! But it was already asked, and there was no way. Without waiting for Jia SuYue to reply, he said to Li Liang, "let's go to the emergency department first! Otherwise, there will be scars on the ears. "

"I've brought some iodophor and absorbent cotton. There's no other good way. Let's disinfect you first. Our is also a perceptual woman. When we see 120, we are even excited to cry. " Wang Yanan said that he would disinfect them.

After a simple treatment, although it is still extremely itchy, you must not scratch it at this time, otherwise the scratch of frostbitten skin is a scar, and it is still permanent.

When Zhang Fan drove a few people home with Shaohua, he received a call from Shaohua's parents. Aunt Shaohua's children are engaged tomorrow. Today they went to the county. Because the matter

had been fixed long ago, the old man didn't want to bother Zhang Fan and Shaohua. He informed them when he left.

After pressing and worrying all the way, the patient was saved. The result of mood ups and downs and emotional tension was severe hunger, "let's go to eat the big dish \* \*! Then eat a plate of belt noodles, which is really inappropriate for a president. " Zhang Fan's saliva is about to stay.

"All right! Let's go. I'm hungry, too. Looking at Li Liang today, I thought of you, really! I feel terrible. " At this time, Shao Hua, sitting in the co pilot's seat, slowly poured out his heart.

"No way! What do you say to do? " Zhang Fan touched Shaohua's face and said softly.

"How can we go out together?" Shaohua grabbed Zhang Fan's hand touching his face, gently snuggled his face on Zhang Fan's hand and felt his temperature.

"It's not that we have something to do when we go out, but because I'm a doctor. If I hadn't been a doctor today, I wouldn't have come forward to make curious observation and rescue. Believe it or not, there are definitely many people in the snow field who don't know what happened today."

"Well! But you must promise me that you must protect yourself when rescuing others in the future. "

"Well, I will." This remark is pure nonsense. When saving people, the doctor's adrenal gland is also soaring. When in fact, he has turned into Superman and moved forward bravely. And this kind of Superman situation is particularly easy to happen when it is not in the hospital.

This will never happen in the real hospital, which may also be human dependence. When you are helpless, only you can save others. At that time, don't say that the blood is coming, at least you have the courage to work hard. If a doctor shrinks when others are in danger, he has lost what he can never get.

Whenever a passenger gets sick on a train or plane, as long as there is a doctor on the train and plane, no matter how much he hates the job, as long as there is a doctor's heart, he will definitely stand up. At this time, he or she, who is used to life and death, is definitely adrenaline racing, which is the feeling of standing on the top of the mountain. Not everyone can break the wrist with death! This is also the charm of the doctor profession. Some doctors often say a sense of achievement. In fact, this is the greatest sense of achievement of a profession!

In the frontier, big dish chicken is definitely one of the delicious foods. It has special spicy skin and tomatoes that absorb plenty of sunshine. The little rooster in those years tasted really beautiful after simple cooking by the cook.

After eating chicken, eat a wide white leather noodles with chicken soup, and the taste buds will explode.

This is not the end. Finally, drink a cup of gevas fermented with honey. The feeling of fullness in the

stomach is really comfortable. Then gently burp, even if it's for a fairy.

Frontier people are honest and not very smart in business. In their early years, there was a joke about big plate chicken, saying that it was a group of single PE teachers who gathered together to eat big plate chicken.

More than a dozen people ordered a plate of chicken, and then a total of more than 30 bowls of white leather noodles. This is the particularity of the Frontier Hotel. If you eat noodles in a restaurant, you can ask for noodles. As long as you have thick skin, the boss will definitely add noodles until you are full, and there is no charge for noodles.

After dinner, they didn't go shopping again. Zhang Fan's ears were still running. When they got home, Shaohua sat next to Zhang Fan and carefully observed Zhang Fan's frostbitten ears.

She cautiously touched Zhang Fan's ear and asked, "does it hurt?"

"No pain, now it's itching!" Zhang Fan smelled the faint smell of flowers from his sweetheart and couldn't help holding Shaohua.

"Stop it, you're hurt." Shao Hua surprisingly didn't resist today. He would never give Zhang Fan such an opportunity in peacetime.

"It's okay. It's not an injury." Speaking, Zhang Fan gently pressed Shaohua on the sofa. The soft and sweet fragrant tongue is just a Yufeng that can be grasped.

Zhang Fan's heart burns like a mountain fire, like a turbocharger, or a twin turbine. Shao Hua also felt the difference of Zhang Fan, gently stroked Zhang Fan's face with his hands and said, "not here!"

Zhang Fanhu, who was holding the tent, picked Shaohua up. It was too sudden. Shaohua was surprised and said "Hmm!" From the living room to the small bedroom, Zhang Fan moves at the fastest speed. If there is a world ranking, Zhang Fan is estimated to be able to enter the top three.

The girl's room is full of pink. All kinds of dolls“ Easy! You little fool, don't tear your clothes. " Shaohua tapped Zhang Fan gently.

This really can't blame Zhang Fan. Zhang Fan in the hospital always has a sharp pair of scissors if he needs to take off his clothes when he meets an emergency patient.

Now, this special device makes Zhang Fan, a fierce cow, want to break it.

What language to describe it? It's sweet, hot and trembling. Shaohua is constantly shaking gently! Confused eyes. There is no sweetest thing in the world.

When Zhang fanmeng took off his pants, the phone rang!

Take it or not. Three seconds after the confrontation between heaven and man, Zhang Fan smiled awkwardly at Shaohua, picked up his pants and answered the phone.

"Zhang Fan, come on! My wife had a miscarriage!" Li Hui was crying on the other end of the phone and was out of breath.

"What's going on?" Zhang Fan asked in wonder. Li Hui's cry of a big man directly made Zhang Fan instantly open all venous channels, and the congestion of the cavernous body was recovered!

"I don't know! I was on duty today. Her mother called and said, "my wife is popular!" Li Hui spoke helplessly. His only friend in this place is Zhang Fan.

At this most vulnerable time, he called Zhang Fan, which was a consolation. He really needed a consolation. He wanted to be a father, but the child had an accident!

"Where are you now?" Zhang Fan asked while wearing his pants. Shao Hua's eyes are bright at this time. He has come out of his love fan, with a blushing face. Hold the quilt on your chest with both hands. Listen to Zhang Fan's dialogue curiously.

"The door of Obstetrics and gynecology. I don't know. What can I do now. I don't know!" Li Hui spoke incoherently.

"All right! Wait for me. I'll be right there. "

After hanging up, Zhang Fan was very embarrassed and said to Shaohua, "Li Hui said his wife had a miscarriage. She was crying. Want me to go over and have a look. "Although he was talking to Shaohua, Zhang Fan was ashamed and didn't dare to look at Shaohua's eyes.

"Then go quickly. Do you need me to go too?"

"No, no, that! You have a good rest, have a good rest, I'll go first!" Zhang Fan, who fled, wanted to smash the phone!

Shao Hua, lying in bed, looked at Zhang Fan who fled. The corners of his mouth rose gently, and his smile became stronger and stronger. Finally, he couldn't help laughing!

Hey! Women are always complex creatures.
