

Chapter 260

After the 15th day of the first month, even if the Spring Festival is over, working people begin to pack their bags and prepare to go. This is a year. No matter how warm the house is and how cold it is outside, they are going out. Farmers also began to prepare spring fertilizer, and the footsteps of pedestrians on the road changed from slow and leisurely during the festival to faster and faster.

In the morning, there are not a few people chasing the bus with steamed stuffed bun in their mouth, telephone and briefcase. They haven't slowed down from the Spring Festival. The students should also pay attention. The school will start soon.

Shaohua has prepared many things for Jingshu " You must take this and that. No, check these in! " Shaohua prepares too many things for Jingshu. Jingshu can't move the big box directly.

"Sister-in-law, there are too many! I bought a lot of things at school. "

"It's strange that I believe you. I can't bear to go to school. I'll just get everything ready for you. You just go by plane. I'll check this thing for you to your school. " Shaohua is busy preparing things.

"Sister in law!" Jing Shu is a little coquettish holding Shaohua!

"Well, what's the matter?"

"When will you and my brother get married?"

"Hi! You have to ask your brother. "

"Did he propose to you?" The two girls packed up things in the small bedroom. There were some private things. It was not easy for Zhang Fan to go in as a brother. They inadvertently looked at the book in the study outside and leaned out to look at the small bedroom.

Jingshu flew away in a plane. At the small airport, Zhang Fan outside watched the plane fly away before leaving with Shaohua. After the new year, we will live, and there are a lot of things this year.

The first is their engagement. After discussing with Zhang Fan, Shao Hua and the two old people, they finally put the engagement date on October 1 and engaged with the blessing of the country!

The family building of the hospital has also been handed over and is waiting for distribution. The community of the hospital has a good location and the price is much cheaper. According to the current

form, Zhang fan can definitely get a set, that is, it's hard to say what the floor is. After all, the young qualifications are far from others.

The next step is Shao Hua's examination registration. Shao Hua has taken the CPA examination in one year. The pressure is really great. Although Shao Hua's study is good and hard, it is really difficult for him to be called one of the four most difficult candidates in China. Although Zhang Fan kept persuading and didn't worry, she just didn't listen. She must pass the exam in a year.

There are also private hospitals. This is not a small thing. After operating for several months, we have seen profits, but this is not a thing. The hospital is a complex, not a small shop. We must have a professional manager. At present, there is no competitor in tea vegetable city. As long as the hospital has been booming for half a year, there will definitely be predators.

One thing after another, we can't stop. If we want to live a good life, we must keep running. The hospital's emergency center has also started internal decoration. In the new year, due to the establishment of the emergency complex building, the hospital is also preparing to recruit a large number of new doctors this year. Of course, the new doctors are all graduate students.

Within one year, the municipal hospital developed very rapidly under the leadership of Ouyang. In the past, the traditional Chinese medicine hospital was a bit of an equal share with the municipal hospital, but within a year after Ouyang came to power, the municipal hospital directly crushed the traditional Chinese medicine hospital.

It is not that Chinese medicine is not good, but that there are no good Chinese medical experts in the frontier tea vegetable city. Although it is the name of traditional Chinese medicine hospital, their treatment is too simple.

Surgery is a department of orthopedics and general surgery. Orthopedics also has the specialty of being a place name family medicine. Chinese medicine did not play it directly. Other departments are the same. Under the name of traditional Chinese medicine, they mainly use the diagnosis and treatment method of Western medicine.

In Ouyang's words, take the state subsidy and give it to the patient! In a word, it has no own characteristics. In the current social development trend, whether hospitals or other industries, unless it is a monopoly industry, it is really not easy to live without its own things and characteristics.

Because of Ouyang's aggressiveness, there is no future for traditional Chinese medicine hospitals in the urban area. If there is no source of disease, there will be no resources. Without resources, both doctors

and leaders are not very happy. Therefore, after multi-party negotiation, the traditional Chinese medicine hospital is ready to move! Move out of the city as a whole and go far away to the new city. The original place was handed over to the preventive health care center.

This is the power of Ouyang. An old lady took advantage of the general trend to beat the traditional Chinese medicine hospital that competed with Lao Huang but did not lose the wind and fled! An industry has become the leader of the industry. Whether it is the inclination of funds or the attraction and introduction of talents, it has great advantages.

The development situation of the hospital is very good. The community next to the hospital is also more valuable. Both bosses and capable people want to have life security, especially some retired energetic people. It is best to live near the hospital.

The allocation of rooms in the hospital is very serious, and people say hello in all aspects. There is no need to follow the internal price of the hospital, but according to the world price. Ouyang had left ten sets, which were originally used to manage all aspects. As a result, too many people greeted.

Ouyang's nature is direct. The prophet of Chunjiang water heating duck. Sometimes, health experts in a region may know or hear things earlier than other officials, because these experts have contacts after they have qualifications.

Basically, through the relationship, we have casually contacted experts from all over the country, and then there are many teachers, masters and Daniel of these people. I know a little more, a little earlier. Although it's gossip, sometimes gossip may preserve its value than red headed documents.

Housing distribution shall be scored according to working years, professional titles and educational background. Doctors are 30 points more than nurses! After the old doctors finished, there were only young doctors left. The scores of these people were almost the same, but there were not many houses.

Many people began to look for people in all directions. Zhang Fan was very safe. Shaohua was a little worried, "why don't you look for sister Wang?"

"Don't worry! No one is looking for it. "

"All right! If we can't, we can't. It's a big deal. Let's go to the old house and get married. Don't be stressed again. As long as I have you, I'll be satisfied. "Shaohua comforted Zhang Fan in turn and kissed Zhang Fan. Um! It smells good!

When it was the young doctor's turn, Ouyang began to specify the rules. There were almost no medical schools in the northwest, and there was only one. Ha ha, Zhang Fan's school is!

This is not enough. Ouyang is more absolute. Doctors without a practice certificate, no matter how old they are, are not in the sequence of room distribution, and then add points according to the scores of the practice examination.

That's it, hey! In the ranking of resident doctors, Zhang Fan ranks first among the heroes! In other words, Zhang Fan was the first to choose a house. The rules came out. No one dared to cheat. This is the advantage of the technical unit. We all know that the rigid indicators can not be reached.

After the house distribution is the decoration, Zhang Fan owes millions, but he doesn't worry at all. Because the private hospital has made a profit, he began to pay back a little!

On this day, Zhang Fan met an old acquaintance and friend he hadn't seen for a long time!
