

## Chapter 7253

To transplant the Mother of Pu-erh Tea, Charlie took the soil from his ring,  
And placed it into the space enclosed by the bluestone.

When it was less than two meters from the top,

He took the Mother of Pu-erh Tea out of the space as well,

Using spiritual energy to lift it and slowly place it in the center of the soil.

As the roots of the Mother of Pu-erh Tea were placed inside,

Charlie used more soil to completely bury them.

To his surprise, after the roots of the Mother of Pu-erh Tea were covered by  
the soil,

The already very lush leaves grew almost an equal number of tender green  
buds at an extremely fast rate.

As a large number of buds grew,

The trunk and branches of the entire tree visibly thickened instantly,

As if it had entered the next stage in an instant.

Charlie realized that this might be the Mother of Pu-erh Tea's own cultivation  
realm.

It had grown step by step from a tea tree to a tribulation-crossing stage,

And there must have been countless levels of realms to break through in the process.

Maria watched in amazement,

Looking up at the newly sprouted leaves, I murmured,

“It seems this is the most suitable place for it.”

“If it grows here, its growth rate will probably be more than a hundred times faster than outside.”

“Perhaps in another hundred years,”

“It will be able to undergo the Heavenly Tribulation again.”

Charlie smiled and said,

“Whether the Heavenly Tribulation can strike here is still unknown.”

Maria nodded gently and said,

“What you say makes sense, young master.”

“People say that the Heavenly Tribulation is a one-way ticket to the Immortal Realm.”

“But the cultivators who built this place back then even had the ability to interstellar migration.”

“Perhaps their strength is much stronger than the immortals who have successfully undergone the tribulation.”

Charlie agreed and said,

"I also think so."

"Judging from their teleportation array,"

"They are not beings from the same dimension as us at all."

"If it's just one tribulation,"

"I'm afraid we are still far from being able to reach them."

Maria smiled and said, "However,"

"This place is quite suitable for growing things."

"Judging from this growth rate, if medicinal herbs are grown here,"

"The herbs grown here will definitely undergo a great qualitative change."

Charlie smiled and said,

"I happen to have a cauldron that can make pills undergo a qualitative change."

"With the two buffs combined,"

"The effect of the pills refined should be even stronger."

Maria stared at the Mother of Pu-erh Tea and exclaimed again,

"Young Master, look!"

"She's sprouting new buds again!"

Charlie looked up and saw that the tender green buds from before had grown rapidly,

Visibly expanding from their initial curled state.

The color had changed from light green to emerald green,

While the existing leaves had turned dark green.

Now, a new batch of buds was sprouting from the base of each leaf,

And this time they were growing outwards in clusters,

Almost crowding together, like wood ear mushrooms.

At the base of each leaf, there were almost seven or eight new buds growing,

Making the leaves of the Mother of Pu-erh Tea so dense that they were completely opaque.

Maria exclaimed, "Young Master,"

"These buds are growing so fast!"

"I plan to pick some to make tea."

Charlie smiled and said,

"Then let me pick some for you."

"Do you want just the buds or both?"
