

## Chapter 7254

After gathering several buds, the atmosphere shifted to a more relaxed pace. Maria took out a clean handkerchief and spread it in her palm.

She reached out and pinched off some buds from the drooping branches,

Smiling as she said to Charlie,

"The tenderer the better, of course."

"But we should also add some older leaves."

"Generally, better teas are made with one bud and one leaf."

"Then one bud and two leaves, or one bud and three leaves."

"Since the Mother of Pu-erh Tea is growing so well,"

"We should naturally pick more tender leaves."

Charlie didn't know there was such a distinction,

So he immediately helped her pick the newly sprouted buds from the Mother of Pu-erh Tea.

While they were picking the buds together, Charlie casually popped one into his mouth.

He chewed it gently and immediately felt the refreshing tea aroma and tender texture.

What surprised him even more was that the newly grown buds of the Mother of Pu-erh Tea had much more spiritual energy than before,

Perhaps even ten or a hundred times stronger.

In the past, the buds and leaves of Pu'er tea were precious.

Tea made from dozens or even hundreds of leaves could have a spiritual energy content that could prolong life and strengthen the body for ordinary people.

But for a cultivator like Charlie,

It was basically just a drop in the ocean.

But now the situation has drastically changed.

The buds and leaves of the Mother of Pu-erh Tea not only have a much higher spiritual energy content,

But their quantity has also increased dramatically.

Stronger and more abundant,

If used properly, this would be a formidable source of spiritual energy.

Moreover, unlike the thousands of spirit stones,

Which are non-renewable resources,

And likely nearly nonexistent on Earth,

The buds and leaves of the Mother of Pu-erh Tea can continuously grow.

Charlie speculated that the reason the spiritual energy content among the buds and leaves of the Mother of Pu-erh Tea became so high after its transplantation was that it absorbed the ridiculously dense spiritual energy here.

Charlie had no way of verifying the exact strength and quantity of the spiritual energy here,

But judging from the level and strength of the cultivators who built this place,

The spiritual energy here was practically inexhaustible for someone of his cultivation level.

He felt like an ant who had accidentally found a food depot left behind by human civilization,

When they withdrew from Earth.

While the food depot was finite,

Its upper limit was so high that it was practically limitless to him.

With such abundant spiritual energy here,

It wouldn't matter if another Mother of Pu-erh Tea were consumed alongside.

In Charlie's view, even the Mother of Pu-erh Tea couldn't consume spiritual energy much faster than he could.

Moreover, what's even more remarkable is that he couldn't take the spiritual energy here with him.

He could only use it here.

However, the Mother of Pu-erh Tea seemed to have transformed the spiritual energy that couldn't be taken away into a different kind that it could carry away.

Its wildly growing buds and leaves were a way of taking away this spiritual energy,

Which was naturally a good thing for it.

Moreover, the growth rate of these buds and leaves was incredibly fast.

The speed at which the two of them could pluck them was far slower than the speed at which the tender buds grew.

The Mother of Pu-erh Tea seemed to be under a spell,

Growing and growing desperately.

If those tender buds weren't plucked within thirty seconds,

They would unfurl into small leaves.

If they were left for a few more minutes,

They would become large leaves.

In the half hour that the two of them were plucking them,

The Mother of Pu-erh Tea had grown at least several more batches of tender leaves.

The entire tea tree had reached an exaggerated level of lushness,

Like a whole acre of wheat huddled together.

Its trunk had also grown from the thickness of a bowl to the thickness of a plate,

Its overall size is expanding more than two or three times.

Charlie could even feel that its root system was also growing at an extremely fast rate.

Before long, the roots would fill the entire space enclosed by the bluestone.

As Charlie plucked tender leaves, he sighed,

"I feel this space is still too small."

Maria smiled and said,

"It doesn't matter."

"Its roots will eventually grow tightly together,"

"And then we can make the stone enclosure bigger."

Charlie exclaimed,

"These buds have extremely high spiritual energy content."

"For cultivators who have just attained enlightenment,"

"They are simply the best cultivation material."

"If Miss Lin can also achieve enlightenment,"

"That would be even better!"
