

Cultivation System: Stronger with Age - Chapter 1463 - 642: Powerful Immortal Venerable

Chapter 1463: Chapter 642: Powerful Immortal Venerable

Liang Butong of the Blood Cloud Sect, with that cultivation technique that can greatly enhance one's strength and body size,

has just now earned the admiration and awe of the many soldiers at Chaokou Pass of the Great Yan Kingdom. After all, the giant physique over three meters tall, the powerful force and speed, truly seem nearly godlike!

The Ghost Servant Sect magic of Demon Dongtan Twelve from the Ai Clan's Invincible Corps, on the other hand, instilled fear and panic among the soldiers of Chaokou Pass in the Great Yan Kingdom, because those bullet-resistant paper people and paper horses, and the paper birds that could carry airborne bombs flying around, were simply not something the soldiers could fend off!

Yet, these so-called "Immortal Venerables" methods,

could not at all compare to Lin Xuankong's seemingly effortless Five Elements Immortal Technique!

Whether it was the visual impact of the Immortal Technique or the overwhelming feeling it gave, it far surpassed the techniques displayed by Liang Butong and Dongtan Twelve!

As Lin Xuankong raised his hand, thousands of stone pieces of varying sizes soared into the sky. In the eyes of the Great Yan Kingdom's soldiers, this scene was like a true divine demon that could destroy the world!

And the attack caused by Lin Xuankong's Immortal Technique,

made the soldiers of the Great Yan Kingdom even more excited and thrilled!

The thousands of stone pieces shot forward simultaneously, with dozens directly intercepting the six paper birds carrying airborne bombs diving down, meeting them with lightning speed, colliding with the six paper birds and six airborne bombs!

Even if they were ordinary stone pieces, no matter how hard the granite... it would absolutely be impossible to cause significant damage to the paper birds crafted by Dongtan Twelve, nor to the sturdy airborne bombs!

But the thousands of stone pieces Lin Xuankong propelled,

each carried the Condensed True Qi of a Transcendence Second Layer Early Stage cultivator. Such True Qi, not only when applied to a stone piece but even if applied to a tender piece of tofu, would be enough to shatter thick steel plates, and not just one layer of steel plates!

Thus,

when those dozens of stones carrying Lin Xuankong's Condensed True Qi,

collided with those six paper birds and six airborne bombs,

the six resilient paper birds were instantly shattered to bits by the stones, transforming into a flurry of paper bird fragments, as if those paper birds weren't magical artifacts refined by a cultivator with secret techniques from the Ghost Servant Sect, but merely piles of garbage made from worn-out paper!

Similarly, the six massive, explosive airborne bombs, upon being violently struck by the stones carrying Lin Xuankong's Condensed True Qi, were directly disassembled, without even having a chance to explode, turning into a mist of metal fragments and gunpowder!

What shocked everyone present the most was,

that after smashing through the six paper birds and six massive airborne bombs, the dozens of stone pieces did not slow down due to the collision but continued to maintain their original speed, heading towards Dongtan Twelve's position high in the sky!

The six paper birds diving down with immense momentum, and the six massive airborne bombs, couldn't cause any impact on these stones carrying Lin Xuankong's Condensed True Qi, as if those six diving paper birds and those six massive airborne bombs were merely illusions, nonexistent in this world...

Seeing Lin Xuankong's propelled stones so terrifying and fierce, with such overwhelming power,

all the soldiers on the first defense line were exhilarated, each gripping their weapons tightly!

In the eyes of every soldier, there appeared intense anticipation and hope. They fervently wished that the stones currently propelled by Lin Xuankong could, just like smashing those six paper birds and six massive airborne bombs, shatter that Dongtan Twelve of the Ai Clan's Invincible Corps and all his remaining paper birds to pieces as well!

However, after experiencing the failure of 'Immortal Venerable' Liang Butong, the soldiers didn't cheer prematurely. After all, they hadn't yet seen Dongtan Twelve's failure with their own eyes, and they dared not celebrate too soon as they did before!

In a moment,

all the soldiers of Chaokong Pass on the first defense line of the Great Yan Kingdom were wide-eyed, gripping their weapons, holding their breath, awaiting...

High above,

Demon Dongtan Twelve of the Ai Clan's Invincible Corps, upon seeing Lin Xuankong suddenly propel so many stones, his expression changed drastically,

He, a cultivator of the Absolute Spirit Mini World, only a Transcendence Realm Second Layer Late Stage cultivator, had never seen such miraculous, powerful, and astonishing sights!

Even though their Ghost Servant Sect's Sect Master was already a 'Tier Four Immortal Venerable', capable of easily commanding a thousand or more powerful servant ghosts, even the Sect Master could not, with a casual wave of a hand like Lin Xuankong, turn stones between heaven and earth into magical artifacts to attack others!

Who the hell is this black-clad demon-faced guy? Which sect does this black-clad demon-faced guy hail from? Why have I never seen or heard of such terrifying Immortal Techniques in my hundred-plus years of cultivation! Isn't this like the techniques of celestial deities in legendary myths? How could it be that in this world, there truly exists a cultivator capable of using such Immortal Techniques?
