

D Emperor 4021

Chapter 4021: Difficulty of merit points

"Okay, the rules told you, who of you will go up and start the inspection first!"

Heavenly official said.

"Let me do it!"

Immediately, a young man stepped forward and came to the edge of the well of merit, and then waved his hands, and one jade bottle flew out, and these jade bottles were filled with drops of demon spirit blood.

Lu Ming glanced and found that there were more than two hundred drops of demon spirit blood.

As for these demonic spirit blood, the demons from which realm come out, it is difficult to judge.

When the young man waved his hand, the cap of the jade bottle opened, and a drop of demon spirit blood flew out and flew into the well of merit. The glow of the well of merit immediately became stronger.

The young man waited nervously.

Less than a minute later, a line of merit appeared over the well of merit, and suddenly a line of numbers appeared.

'865'.

This figure emerged above the well of merit.

"865 merit value, unqualified, failed to pass the assessment, withdraw the jade symbol and merit value."

Tianguan calmly announced that with a wave of his hand, the young man's jade charm was taken away.

"How could it be? How could it be? I killed so many demons, how could it only be worth more than 800 merits?"

The young man shouted in disbelief.

"How strong are the demons you killed? I tell you that a demon with a heavy weight of an ordinary **** is worth at least one merit point!"

Tianguan said with a cold face.

"what?"

The young man's face was pale.

Not only him, but others are similar. A demon with a heavy emperor's weight is only worth a merit, which is too valuable.

Some youths compared their own demon spirit blood, and their faces showed a decadent look.

"Of course, the calculation is not based entirely on cultivation. The greater the potential of the demon, even if the level is low, the merit value is still amazing!"

Tianguan said again.

This gives a lot of hope in life.

The potential is not so judged by the naked eye.

Of course, the more genius the character, the stronger the potential. Of course, it is not necessarily. Some people who have great wisdom and foolishness, and those who have grown up late, do not show up at the beginning, but the potential is amazing.

And some of them are very talented at the beginning, but their potential is very limited.

Who knows, among the demons he killed, is there any amazing potential?

The previous young man retreated in decay, and immediately, another young man stepped forward.

However, the merit points obtained by this young man were only over a thousand and eliminated.

Next, five or six consecutive youths stepped forward, and none of them qualified. The highest one had more than 4,000 merits.

By the time the eighth young man went up, the merit of this person finally reached 5,000.

5535!

Uh!

Above the well of merit, this figure flew directly into the jade rune and disappeared.

Then, Yu Fu flew back to the young man.

"Congratulations, you have become a third-class sky soldier. That piece of jade rune is your identity jade rune. It contains your information and merit points. You have to take it away!"

Heavenly official said.

"Thank you Master Tianguan!"

The young man was overjoyed, collected the jade charms, and came to the next official.

As long as those who pass the assessment will come to Tianguan under the head, waiting for the next step.

Next, one by one young people stepped forward, Lu Ming found that the success rate is really not high, only about one-fifth of the success rate.

"More than 10,000 merit points!"

Suddenly, a cry of exclamation came out.

Next to the well of merit, a young man stood proudly.

"This guy..."

Every day he pouted, because this young man is exactly the ten-winged angel of the angelic family, La Feide.

The merit of this person actually exceeded 10,000. It is indeed the top demon who controlled the big killer. Many of them died in his hands. Many of them are high-level demons.

"Good, pass!"

Tianguan nodded with satisfaction.

After Rafid had collected it, he came to Tianguan and stood proudly, looking provocatively at Lu Ming.

It means, come, Bibi, who has more merits.

"Rubbish!"

Lu Ming faced La Feide, and compared to the mouth, there was no sound.

However, Lafide could naturally see that his face was gloomy, and his eyes flashed with a murderous eye.

The next thing to go up to check is that some of the demon generations, the least, can get five thousand merit points, many, even close to 20,000.

Those who are close to 20,000 merit points are all extremely powerful generations, who used the hole card or shot with all their strength, and the fighting power even exceeded God Emperor Jiuzhong.

"It's him, it's okay!"

At this time, Lu Ming found a young man.

Bloody clothes!

The peerless arrogance of the blood race is one of the candidates of the universe arrogance list.

"Hey, he's going up now. With his strength, he should be in the tertiary zone. Isn't there anybody in the triple strike zone yet?"

Some people are puzzled.

"You are wrong, he did not go to the third-level area, but in the second-level area!"

"In the second-level area? That's right, **** clothing's cultivation behavior is lower after all. Going to the third-level area is a bit dangerous. It's safer to stay in the second-level area!"

"Hehe, but I heard that the **** clothes were almost dead in the second-level area. It seems that he is like that, and it is not true!"

Some people are talking, but these people did not deliberately lower their voices, because these people are all peerless monsters, all of them enter the third-level area to participate in the assessment, they are not afraid of the **** clothes.

Bloodcoat Cangming's face was ugly, and he glanced at those people without saying much.

As a result, he received nearly 30,000 merit points.

Even Lu Ming had to sigh that the blood-clothed Cangming's strength is indeed great. In the Eight Snake Mountains, there is no demon at all as his opponent. It is estimated that the God Emperor Nine Heavy Devil who died in his hand is not rare.

Therefore, we can get so many merit points.

Lu Ming, if they weren't the last to **** a lot of demon spirit blood from the demon in Shenxia Peak, they would definitely not get so much demon spirit blood.

Even now, they have no idea.

Soon, the people who participated in the assessment in the second-level area were almost over.

At this time, Ling Yuwei stepped forward and took out her demon spirit blood.

"so many?"

At the scene, everyone saw the demon spirit blood taken out by Ling Yuwei, and they all stunned with wide eyes.

Not to mention the quality, but the quantity alone, it is really amazing. Ling Yuwei's cultivation behavior, it seems that the Divine Emperor is triple, how can he kill so many demons?

Except for a few people such as Lu Ming, others were full of doubts.

Including Tianguan!

Tianguan had seen Lu Ming, Dan Dan and Ling Yuwei quit the Eight Snake Mountains very early and returned to the city. They thought they were timid and quit early.

Lu Ming said they had completed the assessment, and Tianguan did not believe it at all.

It is inevitable that some dumbfounded.

"So much demonic spirit blood is estimated to be low-level. If it is all the devil spirit blood of the Divine Emperor, even if the number is large, it will not reach the value of five thousand merits!"

Tianjiao of an angelic family sneered.

Chapter 4022: 120,000 merit points

Due to Gabbert's reasons, these angels' arrogance is very unpleasant to Ling Yuwei, and they will naturally degrade and ridicule when they have the opportunity.

Ling Yuwei was too lazy to control them and put the blood of the demon spirit into the well of merit.

Among the wells of merit, a brilliant brilliance immediately radiated, and at the next moment, a line appeared.

63789!

At the scene, the eyes of most people suddenly rolled round.

Sixty three thousand seven hundred and eighty nine!

This is the merit of Ling Yuwei!

More than doubled than the **** clothes.

"How is it possible? How could he have so many merit points!"

"how can that be!"

Many people exclaimed, and the angelic tribe was red just now.

No one doubts whether the Well of Merit has made a mistake. This is the top treasure of Tiangong, and it is impossible to make a mistake.

There is only one fact, that is, Ling Yuwei really got so many merits.

Many people showed an expression of envy, jealousy and hatred.

More than 60,000 merit points, this will not disappear, but will be recorded in the identity token, and can be exchanged for various treasures in the Tiangong.

How many treasures can this be exchanged for?

It is strange not to envy!

Even Tianguan's old face turned slightly red.

He used to think that several of Ling Yuwei were timid and withdrew from the Eight Snake Mountains in advance. He didn't believe that they had completed the task ahead of time.

But in fact, Ling Yuwei not only completed the task ahead of time, but also had an astonishing number of merit points, which exceeded the assessment target by more than ten times.

"Okay, yes, pass!"

Tianguan nodded again and again, of course, he wouldn't blame Ling Yuwei for losing his face just because he looked away.

His mind is not so small.

"Haha, it seems that I have not less!"

With a smile, stepping forward, he also took out the demon spirit blood.

The amount of his demon spirit blood is no less than that of Ling Yuwei.

When the well of merit was inspected, everyone was surprised again.

64765!

The merit points gained every day are 64,675 points, which is slightly more than Ling Yuwei's merit points.

More than 60,000 merit points appeared for two people in a row, which surprised everyone.

The point is, the two are still together.

"how is this possible?"

This question kept flashing in everyone's mind.

He laughed every day and enjoyed the "worship" of all the people in China.

In his view, the eyes of those around him looked at him with worship.

He put away the jade fu and walked triumphantly to Tianguan.

Then, it was Lu Ming's turn.

Lu Ming stepped forward, many people's eyes could not help looking at Lu Ming.

Because Lu Ming, Dan Dan, and Ling Yuwei were obviously together.

The harvests of Ling Yuwei and Dandan are so amazing, then, Lu Ming with them, is there such a harvest?

Especially for the angels, the one who stared at Landing most is Lafayette.

Lu Ming's face was calm, and he walked over to the well of merit, and then took out the jade bottle filled with demon spirit blood.

"Really so many?"

Everyone was taken aback.

The amount of demonic spirit blood Lu Ming produced is no less than that of Dan Dan and Ling Yuwei.

And the quality of them together will certainly not be low, Lu Ming probably also has more than 60,000 meritorious service.

"Damn, how could the three of them get so much demon spirit blood?"

"And their strength is not so strong, you know, the merits of the **** clothes are not half of any of them!"

"Could it be that the demon spirit blood on Shenxia Peak was obtained by them?"

There was a voice in the discussion, which shocked everyone.

Anyone who has participated in the battle of Shen Xiafeng bursts out with a brilliant light in their eyes.

It must be so!

They concluded that the three Lu Ming must have obtained the demon spirit blood above Shenxia Peak, otherwise, in the second area of the Eight Snake Mountains, with the strength of several people in Lu Ming, how could they get so much demon spirit blood?

It only makes sense to **** the demon spirit blood on Shenxia Peak.

Although, they don't know how Lu Ming did it, but it must be right.

"Damn, we work hard, but they take advantage of the fisherman!"

"It must be so. We were desperate for shock and penetrated the large array of demons, so that they could take advantage of it!"

The arrogance of Rafid and several angels, a sharp voice sounded, full of jealousy.

This remark makes people of other races look pretty.

In the battle of Shenxia Peak, all major races suffered heavy losses, but in the end they got nothing and fled in embarrassment.

But the last fruit was picked by Lu Ming and they could not bear it.

"good very good!"

The **** clothes whispered lightly, his eyes cold and cold like a knife, constantly sweeping towards Lu Ming several people.

Shen Xiafeng's battle, Xue Yi Cang paid a heavy price, almost fell there, but the fruit was picked by Lu Ming several people, in his heart, he already included three Lu Ming into the list of must-kill.

"quiet!"

Tianguan snorted, and the scene suddenly fell silent.

"I don't care about any contradictions between you. There is no problem how you solve them outside, but in the Tiangong, you must keep the rules of the Tiangong. There are celestial rules in the Tiangong. It is forbidden to fight against each other between the soldiers. do you understand?"

Tianguan scolded.

"understand!"

Everyone can only answer.

"You, go ahead!"

Tianguan's eyes turned to Lu Ming.

Lu Ming nodded his head, his thoughts moved, and the demon spirit blood in the jade bottle flew into the well of merit.

The well of merit immediately radiates dazzling brilliance, and then a line of figures emerges.

123567!

Sisisi...

When everyone saw this number, they took a breath and froze there.

Over a hundred thousand, there are more than 120,000 merit points.

how can that be?

The amount of demon spirit blood Lu Ming got was obviously similar to Dandan and Ling Yuwei, but how could the merits be so amazing, so much more?

"Damn, damn..."

Blood and rain, Lafide and others shouted in their hearts, red light in their eyes, all jealous.

Thousands of merits, how many treasures can be exchanged?

Not to mention them, even Lu Ming, Ling Yuwei, and Dan Dan were a little dazed.

Demon spirit blood, they are equally divided, but Lu Ming, how come there is so much?

Is it... the demon spirit blood of the demon prince?

By the way, definitely yes, only this explanation.

The greater the potential, the more merits you get.

The devil prince's talent is amazing, and the potential is certainly amazing.

Lu Ming guessed before them that the demon spirit blood of this devil prince would definitely be able to exchange many merit points.

I just didn't expect that there would be so many, almost 60,000 merit points.

A person, worth 60,000 meritorious service, is almost the sum of Lu Ming's other demon spirit blood.

Chapter 4023: Sky Armor

In any case, Lu Ming was very satisfied with the achievement of more than one hundred thousand merit points at once.

Because, more than 100,000 merit points, it is the level of the second-class sky soldier.

In other words, as soon as Lu Ming became a heavenly soldier, he could become a second-class heavenly soldier, enjoying greater power and better treatment.

"Good, good, good!"

The Tianguan nodded again and again, and looked at Lu Ming with surprise.

Lu Ming is only the second emperor of the Divine Emperor. Not only did he pass the assessment, but he can also get hundreds of thousands of merit points at once.

The line of merit wells flew into the identity jade card, and then the identity jade card flew to Lu Ming.

Lu Ming took the identity jade card in his hand and swept the consciousness, and some information appeared in his mind.

This information is basically his basic information, the origin of his name and his cultivation status.

In addition, there is a line.

Merit points: 123567/123567.

One represents the total merit points and one represents the merit points that can be used.

After Lu Ming's inspection, there were still a few people left in the second-level area, but no one could have as many merits as Lu Ming's three of them.

After the inspection of the second-level area, it is the turn of the third-level area.

Everyone's attention was transferred to these people in the tertiary area.

Lu Ming is also looking at these people carefully.

The ability to go to the third level area is absolutely amazing.

Either it is some arrogant arrogance with extremely high combat power, or it is a group of very old and extremely advanced people.

Those who are older, one by one, the atmosphere is thick and unpredictable, Lu Ming speculates that these people's cultivation behavior should be in the Divine Emperor Realm.

Those young monsters, one by one, are full of heroic energy, and they are full of swallows. Although they have not reached the Divine Emperor Realm, they are definitely above the seventh level of the Divine Emperor. .

Sure enough, the people in the tertiary area have achieved great results. The first person to go up for inspection has a merit point of more than 30,000, which is higher than the **** clothes.

This is still the least one, and the merit points received next are higher than one.

Even, the merits of one and a half people directly exceeded 100,000, more than Lu Ming, and there are not few.

Everyone is envious, but also knows that the third-level area is too dangerous. Not only there are demons in Divine Emperor Realm, but also the number of demons above the seventh level of the Divine Emperor. If they are not strong enough, they will only be beaten to death.

Of course, if the strength is sufficient, the speed at which the devil is hunted and the merit points are obtained will also increase greatly.

After a period of time, everyone has finished the inspection.

"If you don't pass the assessment, leave now!"

The Heavenly Officer announced that then the Heavenly Soldier stepped out and took those who failed the assessment away from here.

"You have passed the assessment, congratulations, and you have officially become a Sky Soldier. Next, you come with me and award you the Sky Soldier armor!"

Heavenly official said.

With the Tianguan, everyone came to another hall.

In this hall, a lot of Heavenly Soldiers were guarding, and the Heavenly Officials went up to negotiate. A few Heavenly Soldiers entered the Hall. Soon after, the Heavenly Soldiers came out, followed by several other soldiers wearing Heavenly Officer costumes. Year man.

"The standard armor has already been taken out. Let's start the third-class soldiers, Lafayette..."

One of the heavenly officials began to roll call.

Lafayette stepped out immediately, the sky officer's hand gleamed, and immediately, a pair of silver-white armor appeared.

Rafid's eyes lit up, and many people also showed their expectation.

Although this armor is only the standard armor of the third-class sky soldiers, it was created by the master refiner of Tiangong.

Take the standard armor of the third-class sky soldier, which can withstand the full blow of the God Emperor Nine Heavy Masters. This is a life-saving at a critical moment.

Especially some weak third-class soldiers, which means life-saving treasures.

This is the standard armor of the third-class sky soldiers. It is said that the standard armor of the second-tier sky soldiers is more mysterious and can even withstand a single heavy attack by an ordinary Divine Emperor.

Divine Emperor's blow is absolutely earth-shattering and can penetrate the starry sky, while the second-tier Sky Soldier's standard armor can block Divine Emperor's blow, showing how high the value is.

This kind of armor is worthless!

Of course, no one dares to sell the standard armor of Tiangong.

No one dared to buy it. People who were not in the Tiangong Palace used Tiangong's standard armor or magic soldiers and were found by the Tiangong Palace.

Lu Ming also looked forward to it.

He was a second-class sky soldier, and the standard armor he obtained was a armor that could withstand the full blow of the heavy power of the Divine Emperor. This means that the people in the Divine Emperor Realm are almost difficult to break.

It is said that the standard armor of the first class soldiers is even more mysterious.

Lafayette took over the armor, and then it was his turn.

Ling Yuwei and Dan Dan are all third-class soldiers, and they received the standard armor of the third-tier soldiers.

Then, it was the turn of the second-class sky soldier.

Lu Ming received his armor.

The standard armor of the second-class sky soldiers is also silver-white, but it is mostly inlaid with a few strands of golden patterns.

Soon, everyone received the standard armor.

"You have received the armor, so put it on now!"

The Tianguan Road leading the way.

Everyone nodded, and began to input divine power into the armor.

Lu Ming also entered the taboo power into the armor. This armor was an unowned thing, and it was very refined. After a few minutes, Lu Ming refined, and the armor flew into Lu Ming's body, and then Lu Ming A layer of armor emerged on the surface of the body.

The armor squirmed like mercury, covering Lu Ming's entire body with only one face.

This kind of armor can change the size according to the owner's intention, so everyone wears it and fits very well.

At this moment, Lu Ming's face changed slightly, because he felt that a strange force appeared in the armor, rushed into his body, and then scattered into his limbs, all the cells in.

"How is this going?"

"How come there is a strange power in my armor?"

Some people have exclaimed, it seems that not only Lu Ming is like this, but everyone is like this.

"You can rest assured!"

Tianguan smiled and said: "This is a kind of forbidden force, and it is harmless. As long as you abide by the rules of the sky and do things for the Tiangong, do not say what you should not say, do not do what you should not do, wait for you to accumulate enough merits and leave. When you are a soldier, you will be unlocked!"

Everyone's heart sank.

It seems that this is the means by which Tiangong controls the sky soldiers.

This kind of power penetrates into their cells. If they dare to violate the rules of the heavens, or betray the heavenly palace, it is estimated that that force can kill them instantly.

Especially at some ages, his face is a bit ugly.

Chapter 4024: The chemical tower and the role of merit

Some older people look even more ugly.

Because, as you get older, you have limited potential, and I am afraid that it will be difficult to withdraw from Tianbing in the future.

"Also, don't try to refine this power in vain. Your power cannot be refined, even the power of the top ten races..."

Tianguan continued to open his eyes, glancing at the demon Tianjiao of the top ten races.

The face of some top-notch monsters has changed.

Among these people, some peerless heroes are candidates for the universe arrogance list, and some have mastered special powers, such as the fighting **** Yuanwen, and control the fighting power.

Just now, they did secretly try to refine that force, but unfortunately, they failed to return. At this moment, they were pointed out by Tianguan, and their faces were even more unsightly.

Lu Ming's heart also sank.

Unexpectedly, Tiangong actually has such a means.

"Boy, don't worry, other people can't help the power of the ban, but for you, there is no problem!"

"Your forbidden power is contained in every cell. This force is in front of the forbidden power and has nothing to hide. If you want to refine it, you can easily refine it!"

The voice of the bone demon sounded.

"indeed so!"

Lu Ming nodded silently in his heart, this strange power penetrated into his cells, but what is the use of penetrating into the cells, each of his cells contains taboo power, which can easily refine this power.

No wonder Feihuang dare to call him into the Heavenly Palace, it is estimated that all this has been expected.

"However, it is better not to refine this power now, it is easy to be discovered. When you want to leave the Temple of Heaven in the future, it is not too late to refine this power!"

Bone Magic Road.

Lu Ming nodded and let go of his heart.

Others become Heavenly Soldiers, it is estimated that they will be tied to the chariot by Heaven Palace, but he will not, he comes and goes freely.

"However, Dan Dan and Ling Yuwei are controlled by this force. I can refining myself, but I can't help them refining. If something happens in the future, they can't be involved!"

Lu Ming thought.

After a while, everyone accepted the fact.

Anyway, they joined Tiangong and became Tianbing. They already had psychological preparations and knew that they must obey Tiangong.

In addition, as long as enough merit points are accumulated in the future, leaving Tiangong, Tiangong will release this power, not controlled by this power for a lifetime.

Otherwise, the senior figures of all races will not let them come to the Heavenly Palace to become Heavenly Soldiers.

Obviously, many of those older people have become heaven soldiers when they were young, and now they are free.

These young monsters, Tianjiao, entered the Heavenly Palace to become a Heavenly Soldier. They were originally trained. With the help of the environment of the Heavenly Palace, they will be lifted after they have learned enough and accumulated enough merits to leave the Heavenly Palace.

It's just that when you are a Heavenly Soldier, you have to honestly obey the orders of Tiangong.

"Okay, the basic process has been completed, now, I will take you to a place, that place, I believe you will like it very much!"

Tianguan smiled.

Soon after, Lu Ming came outside the ancient tower.

The ancient tower is not high, only seven floors, looks very old, full of traces of years.

"This ancient tower, called the Forged Tower, is one of the most important holy places for cultivation in the city of Dreamland. In it, you can learn the source divine power factor, you can also learn the source mystery, you can improve your cultivation, and you can also practice. Other secret techniques are faster than your own practice, I do not know how many times faster!"

"Even, there are some other fortunes in it. This is your reward for becoming a soldier!"

Heavenly official said.

"Cultivation Tower!"

Many people's eyes light up.

They had heard before that after becoming a soldier, Tiangong would give a chance.

Everyone will gain something, some people can be awakened by their original divine power factor, some people can get a breakthrough in their original secret, some people can get a breakthrough in their cultivation, and some people can get a breakthrough in their physical secret...

Said, it should be the chemical tower!

"You have just become soldiers, you can enter the chemical tower, and practice for three years for free!"

"Third-tier sky soldiers can only enter from the first floor, second-tier sky soldiers can enter from the second floor, and first-tier sky soldiers can enter from the third floor. There is no doubt that the higher the number of layers, the better the effect. The bigger it is!"

"Wait for the three-year period, and then go in to practice, it will consume merits!"

Tianguan explained.

"You must go in now for three years, or can you wait for a while before you go in?"

Someone asked.

"You don't have to go in now, you just became a soldier, and you have a ten-year period of adaptation. In these ten years, you don't have any tasks. You can practice with peace of mind. In this decade, you can go in whenever you want. !"

Heavenly official said.

Everyone nodded, and at this moment, naturally no one went in.

"Okay, the chemical tower has been introduced. Let me take you to an important place!"

Heavenly official said.

After a while, they came to another hall.

On the main hall, there are five big characters: merit exchange hall.

"This is the Hall of Merit Exchange. Here, you can use contribution points to exchange countless kinds of treasures. You can even publish missions here with Merit Points. Or, use Merit Points to ask Tianjun-level power to direct you to practice!"

Heavenly official said.

"Is it really possible to ask the Tianjun-level mission to practice?"

An old man of very high grade asked, his eyes very excited.

Tianjiao of some top tribes is okay. Among them, there are already Tianjun-level characters.

For some smaller races, there are no Tianjun-level characters in the clan. You can also look forward to these legendary characters. If you can have Tianjun-level characters to guide you, the cultivation will definitely advance by leaps and bounds.

Especially for those who are older, they joined the Tiangong and became a soldier. They were stuck in a bottleneck for too many years and wanted to seek a breakthrough.

If there is a Tianjun-level character pointing, is the breakthrough still a dream?

"Of course, as long as there are enough merit points, hehe!"

Heavenly official said, hehe laughed twice.

"Then...please ask Tianjun for advice once, how many merit points do you need?"

The old man asked before.

"At least ten thousand merit points start!"

Heavenly official said.

"Thousands...million merit points!"

Everyone looked at each other.

In this assessment, how many merit points did the people fight to kill?

It is only tens of thousands more, and the most is more than one hundred thousand, with a distance of tens of millions. I don't know how far it is.

To accumulate tens of thousands of merits, I don't know when it will be.

Many people sighed in frustration.

"So, you will have to complete the missions of Tiangong well in the future and get merit points, merit points, that is, the more the better!"

"Okay, several important places have been introduced. Now, let me go to Tianhe!"

Heavenly official said.

Chapter 4025: More than a thousand ancient secrets

There is a Tianhe around the city of Mengtian, here is the barracks of the Tianbing.

Normally, the soldiers without missions are stationed here.

The vastness of the Tianhe, above which, there are huge buildings suspended.

A large number of soldiers enter and exit.

After Lu Ming and them, they lived here. Tianguan took them and assigned them a place to live.

In the barracks, many sky soldiers glanced at them curiously. These sky soldiers were accumulated by the Tiangong for countless years, and the number is very large.

Every once in a while, Tiangong will recruit a group of heavenly soldiers in the entire wilderness universe. At the same time, if it encounters the right people, it will be recruited into the heavenly soldiers after heavy selection.

Therefore, the number of soldiers is still very large.

After arranging their place of residence, Tianguan left.

"The spirit here is really rich!"

In a large room, Lu Ming sat cross-legged, feeling the air in the air and sighing.

The richness of the spirit here can even be compared with the resurgent dragon clan star.

Not to mention others, such a cultivation environment alone is very exciting.

Lu Ming hadn't practiced for a while, and Dan Dan and Ling Yuwei came together.

"Muyun, do you want to build a chemical tower to practice?"

Ling Yuwei looked at Lu Ming and couldn't wait.

"I plan to go to the Merit Exchange Hall first!"

Lu Ming said.

Among the fortification towers, you can enlighten the source divine power factor, or the source secret technique, or the physique secret technique, but Lu Ming is now a taboo body, and these cannot be cultivated. If you enter the make tower, there is no suitable one, is it a waste of time? .

Lu Ming intends to exchange some secret techniques, and then enter the cultivation tower to practice.

"Also, we have so many merit points, let's go to the merit exchange hall to spend and talk about it!"

Once and for all.

Okay, the three of them went to the Hall of Merit.

In the Palace of Merit Exchange, there are naturally strong guards in the Temple of Heaven, but they are now officially Heavenly Soldiers, with identity tokens in their hands, and they are naturally unhindered, entering the Palace of Merit Exchange.

"this is..."

As soon as they entered the Hall of Merit Exchange, the three were shocked by the scene inside.

Inside the hall, it is very broad, not an ordinary hall, but a void.

In the void, there are light clusters flying, looking from a distance, like being in a starry sky.

They saw that some sky soldiers were flying in the void, and some sky soldiers came to a light group, reached out and touched the light group, and the body of the sky soldier disappeared.

The three were quite surprised, and then flew towards the nearest light group.

As we got closer, we found a few words on the light group: body protection!

Then they looked at another light group.

There are also a few words on this light group: Healing God Pill!

"It seems that these different luminous groups represent different types, and what kind of luminous group should be entered for the exchange. In this luminous group, there should be no holes!"

Ling Yuwei analysis.

Lu Ming and Dan Dan also nodded.

Then, a few people scattered and began to find the classification they needed.

Lu Ming looked at them one by one. He needed secrets and various secrets.

As for the rest, he doesn't need it for now.

For example, Shenbing, Shendan, he doesn't need it for now.

He wants to exchange some common secrets, or three thousand ancient secrets.

Lu Ming looked at them one by one.

‘Magic mystery!’

‘Secret speed!’

...

Lu Ming has discovered several light groups in a row, all of which are some secret techniques.

"Aren't there three thousand ancient secrets?"

Lu Ming found them one by one, a moment later.

‘Three thousand ancient secrets! ’

Suddenly, a light group caught Lu Ming's eyes.

"There are really three thousand ancient secrets, go in and see!"

Lu Ming reached out his hand. When his finger touched the light group, his body shrank quickly. The next moment, he rushed into the light group and disappeared.

At the next moment, Lu Ming's figure appeared in a hall.

This hall, with many jade cards, is suspended in the air.

If you look closely, there are more than a thousand pieces of jade.

Each piece of jade has some information on it.

‘Great Rip! ’

‘Great Destruction! ’

‘Great fortune! ’

...

A variety of ancient mysterious techniques, reflected in Lu Ming's eyes.

It is all ancient secrets, and every jade symbol is a great ancient secret.

Lu Ming felt his heart beating.

There are so many ancient secrets.

There are more than a thousand kinds.

He has devoted himself to thinking that there are only three kinds of ancient secrets. There are more than a thousand ancient secrets here.

Worthy of being the Temple of Heaven, it is too rich to surpass any force in the universe.

"Look at how many merits you need..."

Lu Ming looked carefully.

'Great Tear, redeem 100,000 merit points!'

"Great destruction, 300,000 merit points!"

"Great chemistry, one million merit points!"

....

Seeing the back, Lu Ming's face was green.

Great tearing is okay, as long as one hundred thousand merit points can be made, it can be one million merit points, which is really scary.

You have to know that this is just to exchange for the past. Can you succeed in cultivation?

"The Great Artificial Technique, the Three Thousand Ancient Secret Techniques, ranked in the top 100!

Lu Ming saw another line of introduction.

"It seems that the three thousand ancient secrets are also superior!"

Lu Ming thought.

Lu Ming looked at them in a variety of ways, and Lu Ming actually saw Great Kamikaze, Great Demon Sword and Great Fragmentation.

The price of Grand Cleavage is the same as that of Grand Rupture, which is one hundred thousand merit points.

The great magic sword technique is more expensive, 120,000.

Great Kamikaze requires 200,000 merit points.

Lu Ming knows that the Great Kamikaze is indeed more mysterious, not only has the power to attack, but also can increase the speed, which is more expensive and normal.

"Great Divine Wind Technique only costs 200,000, and Great Makeover Technique actually costs 1 million, which is really much different!"

Lu Ming sighed.

He found that the merit points on his body could only be exchanged for one of the lowest-level ancient secrets.

"Which one is it?"

Lu Ming frowned.

It's really difficult to choose

Lu Ming does not consider the attacking and destructive mysteries such as the Great Tear and the Great Destruction.

Because of the overlap with his mastery, even if he practiced, his combat power was not greatly improved.

"I really want to choose the big move!"

Lu Ming stared at a piece of jade.

This piece of jade is a big move.

Once the cultivation is successful, the body can move freely in the starry sky. It is not known how many times faster than the launching of the teleportation engraved on the body, and it is also mysterious.

Even, cultivation to the peak state can move other people's attacks, and even move the stars in the starry sky to attack the enemy.

In short, the magical effect is endless, and it is much more mysterious than the great magic wind.

However, the ridiculously high exchange price also requires one million merit points, the same as the Great Maker.

Chapter 4026: Lack of merit

The big move requires a million points of merit. This number makes Lu Ming only stare.

Only now has Lu Ming truly realized the importance of merit points.

Previously, although Tianguan said how important the merit points are and how many treasures can be exchanged, it was just heard, not personally felt.

Now, when real treasures are in front of us, but we can't have them, we only feel the importance of merit points.

"Honors, I want merits!"

Lu Ming shouted in his heart, looking at those three thousand ancient secrets, his eyes were red.

In the end, Lu Ming chose to choose and choose a big ancient secret technique, called the big **** technique.

The big shackles, as the name implies, can restrain the enemies after they are cast, and let the enemies be like fish on the board and let anyone slaughter.

Although there is not much attack power, but the auxiliary force is extremely strong. If used well, it is a big kill.

The great **** requires 120,000 merit points.

Lu Ming took out the identity token and said to the void: "I exchange for the big shackles!"

Uh!

The identity token in his hand flew out directly, and flew towards the jade rune of the big bondage. The two collided. Then, both the identity token and the jade rune of the big **** flew back to the landing. Lu Ming caught in his hand.

Quickly swiping the identity token, I saw that the merit points became like this: 123567/3567.

The front is the total accumulated merits, and the back is the remaining amount.

Suddenly, there was only one fraction left. Lu Ming felt a bit of pain, and then quickly looked at the jade symbol of the big bondage.

"Give you three hours, write down the great bondage!"

At this moment, Lu Ming suddenly heard an old voice.

Lu Ming felt awkward in his heart that he understood that this was the strong guardian of the merit exchange hall. Such a strong, the realm was simply unpredictable.

Lu Ming quickly began to remember.

However, with Lu Ming's current memory, it takes no more than three hours to write down the Great Bondage. It only takes a moment for Lu Ming to record the Great Bondage exactly.

I watched it again and confirmed that it was all right. Lu Ming said: "Senior, I have written down!"

Uh!

The jade symbol of the great shackles flew out again, suspended in mid-air.

"drop out!"

Lu Ming thought about it, and the next moment, his body withdrew from this space and reappeared outside the light sphere.

"There are more than three thousand merit points left. What should I choose? Go and see other secret techniques!"

Lu Ming felt a move in his heart, and then chose a sphere of light that read "Defensive Secrets" and entered the sphere of light.

Among the spheres of light, there is a huge stone room. In the stone room, huge shelves are placed, and on the shelves are placed jade pieces.

Under the jade symbol, there is a sign, which indicates what secret technique this is, and what effect it may have.

Undoubtedly, these are ordinary defensive mysteries. Lu Mingling swept away and was a little shocked, because there were too many of them, which were more than 100,000 yuan.

In other words, there are 100,000 kinds of secret techniques.

This is just a defensive secret technique, not including other types.

Lu Ming was amazed. The Tiangong ruled the endless years of the colossal universe, and the collection was too rich.

Lu Ming has accumulated up to now, which is only 1,300 kinds of common secret techniques.

"One hundred merit points and one secret technique!"

Then, Lu Ming found that the prices of these mysteries are the same, all of which are one hundred merit points.

Speaking of which, one hundred merit points and one ordinary secret technique are also surprisingly expensive.

You should know that in the Dark Universe, killing an ordinary devil with a heavy demon, the merit value is almost a bit.

One hundred ordinary gods and one demon need to be fully killed to redeem a common secret.

To be honest, it is cheaper to buy outside.

It's just that if you buy it outside, you can't buy so many secret techniques.

"There are more than 3,000 merit points left, and you can only exchange more than 30 common secret techniques, which is not useful, let's take a look at other ones first!"

Lu Ming exited the ball of light and continued to watch it.

A variety of categories, seeing Lu Ming dazzled.

All kinds of magic medicine, magic pill, all kinds of weird materials...

"Broken Divine Soldier Classification!"

Suddenly, Lu Ming saw a classification, his eyes flashed slightly, and the interest was unintentional.

If the ball wants to grow and evolve, it needs a lot of metal, all kinds of metal, all kinds of magic soldiers.

But the complete magic soldier is expensive, and the broken magic soldier will definitely be very cheap.

Unexpectedly, the merit exchange hall, even the dilapidated soldiers, have exchange.

Lu Ming entered the light group, and then seemed to enter another starry sky.

This is a void, there are countless magic soldiers suspended in the void, to be precise, it is a broken magic soldier.

A glance at the past, I don't know how many kinds, how many pieces.

These magical soldiers are incomplete, such as a golden sword, only half left.

A dark spear, with a dragon entrenched, only half left...

All the magical soldiers are crippled, and there is no spirituality at all, and the spirituality is completely depleted, so it is only put here. If there is still spirituality, maybe the master refiner of Tiangong can be repaired.

These broken **** soldiers have a line on them, indicating the price to be exchanged.

"These broken soldiers are cheap..."

Lu Ming looked at it.

The price of these broken **** soldiers, the lowest is only one merit point, a few higher merit points...

Lu Ming was able to exchange a bunch.

However, for the ordinary Broken Divine Soldier, Lu Ming does not plan to exchange it. If he wants to change it, he will replace it with a very high level of Broken Divine Soldier.

The ball has a special function. After absorbing and refining a certain kind of magical soldier, it will have some of the functions of that kind of magical soldier. , How much should there be?

"Ball, look for yourself according to your feelings!"

Lu Ming on the ball fairway.

"it is good!"

The ball flew out immediately, a pair of eyes aiming randomly.

There is nothing to hide, metal life is also alive, brought in his hands, it is estimated that the master here has long been found.

The ball flew forward, and the general broken magic soldier was directly ignored by him.

Suddenly, the ball's eyes glowed, staring at a torn sword, his mouth wide open, shouting: "I want this, I want this..."

The ball was so excited, Lu Ming knew that this broken sword was certainly extraordinary, and flew over quickly, and at first glance, a bitter smile.

This dilapidated warrior actually needs a full 50,000 merit points in order to be exchanged.

"That, ball, look at the others!"

Lu Ming smiled awkwardly.

The ball can only go to see the other, then take the open, the ball hit a few pieces of broken soldiers, but Lu Ming can not afford to exchange.

Chapter 4027: The land of nature

The ball has fetched several broken magic soldiers in a row, but Lu Ming didn't have one that can be exchanged.

The most expensive broken spear actually required one million merit points, as high as a top-level ancient secret technique, which is simply shocking.

At the same time, Lu Ming was also very excited.

This is just a broken magical soldier, even the spirituality is lost, and even such a high price, it is conceivable how terrible this magical soldier's history is. If it is swallowed and refined by the ball, the harvest is absolutely difficult. Imagine.

Merit points, or merit points, he found that he seriously lacked merit points, incomparably lack merit points.

There are so many good things in Tiangong. If you look at them casually, they are all coveted. Unfortunately, there is no merit, so you can just watch them.

In the end, Lu Ming selected some cheap dilapidated soldiers and exchanged for some. In this way, there were only dozens of Lu Ming's merit points, hundreds of thousands of merit points, and they ran out in a few moments.

Lu Ming retreated and waited quietly.

After a little while, Ling Yuwei and Dandan only finished the exchange.

"The merits, I want the merits, I already knew that the evil spirit blood of the demon prince will not give you, my treasure..."

As soon as he saw Lu Ming, he wailed, his eyes were full of flames, and that was the fire of greed.

Although Ling Yuwei is better, her eyes also emit inexplicable light, turning her head from time to time to look at a few light balls, a look of reluctance.

Obviously, they also saw the treasures that made them very exciting, but unfortunately, there are no merit points to exchange.

"Lu...Mu Yun, after ten years, we must make more merits!"

Dandan shouted again, and excitedly almost spoke.

"That's natural. Let's go back first. I plan to practice for a while and then build a chemical tower. What about you?"

Lu Ming said.

He had just got the big shackles, and he planned to practice for a while before he went to make the tower.

Anyway, it only takes three years to enter the chemical tower. If you want to go in later, you will have to consume merit points.

So, no hurry!

"I plan to go to the chemical tower to practice first!"

Ling Yuwei said.

"Me too!" said Dan Dan.

Lu Ming nodded. Everyone's cultivation plan was different. Naturally they didn't have to force together. Immediately, the three left the merit exchange hall, and then separated. Lu Ming returned to the Tianhe military camp. Dan Dan and Ling Yuwei went to the cultivation tower for cultivation.

After returning to the barracks, Lu Ming swallowed the dilapidated soldiers he had exchanged for, and he took out the big shackles and practiced.

The difficulty of the practice of the big **** is similar to that of the big fragmentation and the big demon sword. With the improvement of the cultivation, Lu Ming constantly transforms himself. His consciousness is becoming stronger and stronger, and he is aware of various secret techniques and speed. faster and faster.

Without the help of any external force, Lu Ming introduced the practice of big **** in just two years.

In these two years, it was very calm, and no one had bothered him.

Although those of the angelic tribe hated Lu Ming, they wanted to kill Lu Ming. However, the Tiangong had a stipulation that the soldiers could not kill each other. Naturally, no one dared to violate the rules of heaven.

After getting started with the practice of big bondage, Lu Ming got up and went to the chemical tower.

The chemical tower is divided into seven floors. He is a second-class sky soldier and can enter the second floor.

The second layer can be made better than the first layer.

After verifying with the identity token, Lu Ming successfully entered the second floor of the chemical tower.

As soon as he entered the second floor of the chemical tower, Lu Ming appeared on a bridge.

This is a stone bridge that extends all the way forward, and there is a void around the stone bridge.

Endless void.

Lu Ming walked forward along the stone bridge.

After walking for about half an hour, a stone ladder appeared on the side of the stone bridge, leading into the void below.

The void here is very strange, it seems that there is a mysterious force blocking Lu Ming's sight, so that he can not see too far away, so he looked down, can not see the end of the stone ladder, as if extending to a distant place.

"Below this stone staircase, it should be a place of fortune, let's take a look!"

As soon as his thoughts moved, Lu Ming walked down the stone ladder, stepping down at least tens of thousands of steps, and Lu Ming came to an end and came to a flat earth.

"this is..."

As soon as he stepped on the ground, Lu Ming felt a thick mountain-like breath ahead.

This breath is old and unprecedented, like the breath of the beginning of the universe.

This kind of breath, Lu Ming is very familiar, clearly is the breath of primitive gods.

"In front of me, I saw the breath of primitive gods, and it was extremely rich!"

Lu Ming was extremely curious and hurried away.

The further forward, the stronger the breath of primitive gods.

Lu Ming once entered the place where the original gods were bred in the primitive spirit world, and experienced that kind of breath personally.

At that time, Lu Ming needed the help of a copper copper coffin to resist that breath.

At the moment, Lu Ming feels that the breath of primitive gods here seems to be catching up with the place where the primitive gods were bred.

However, Lu Ming's current cultivation practice, I don't know how many times he is stronger than that time, he has been able to resist with his own strength.

Moving forward for a while, Lu Ming found that there were many sky soldiers sitting on the ground.

These sky soldiers, all wearing silver armor with gold rims, are obviously second-class sky soldiers.

The light of these people is shining and they are practicing with all their heart.

"All are using the breath of primitive gods to understand the source divine power factor, or the source secret technique!"

Lu Ming thought.

The breath of primitive gods here is too strong, and it is the perfect place to practice the original divine factor or the original secret technique.

In the Taixu dynasty, they used primitive gods to enlighten the primal divine power factor or primitive secret art. The primitive gods contained the flesh and bones of primitive gods and possessed the breath of primitive gods.

However, the breath of primitive idols is far from comparable here.

Cultivate here, the original divine power factor or the original secret technique can definitely increase rapidly.

It is normal to practice here for three years and one of them has a major breakthrough.

No wonder it is an opportunity, a fortune!

"What the **** is there in front of me, how can there be such a strong original spirit breath!"

Lu Ming raised his eyes and looked forward, wanting to see clearly what was ahead, but unfortunately, there was a mysterious power in front to block his sight, and he could not see far.

Instead, Lu Ming was curious and wanted to find out.

Lu Ming went on and went forward.

Lu Ming found that the further forward, the stronger the breath of primitive spirits, but the pressure is also increasing.

Therefore, as we move forward, the number of celestial soldiers practicing decreases.

Lu Ming also felt terrible pressure, pressing on him as if walking on a few planets.

However, when he urged the power of taboo, he could easily withstand this pressure.

Chapter 4028: A living primitive deity

With the power of taboo, he can easily withstand this pressure and make Lu Ming's pace easy and very fast.

When we walked back, we couldn't see a Heavenly Soldier practicing here anymore. The pressure here is already terrifying.

Lu Ming didn't stop, and continued to move forward for a few more hours. Suddenly, the line of sight in front was suddenly bright.

Then, Lu Ming was stunned. Then, the bigger his eyes were, the bigger his mouth was, the more he stood there, looking silly.

Shocked, very shocked.

Because there is a huge figure ahead.

This figure is really too tall, standing there, towering into the sky, a huge body, like a planet.

Not an exaggerated statement, but a fact.

This huge figure is so huge that it is really not smaller than the average planet in the starry sky.

Primitive god!

These four words appeared in Lu Ming's mind.

Yes, this figure is the original god.

Not a phantom, nor a phantom, but a real, primitive god.

Moreover, it is a living primitive deity.

However, this primitive deity was covered with dense runes, and at the same time, there were eight huge chains on his body, which locked him.

Eight chains extend all the way to the other eight directions.

The runes and chains completely locked this primitive deity. This primitive deity was weak in breath, but not yet dead.

When Lu Ming came, the primitive deity opened his eyes, and Lu Ming immediately felt that two terrible beams appeared, and there seemed to be two rounds of sun appearing in the sky.

Then, a terrible pressure blew towards the landing.

"not good!"

Lu Ming retreated suddenly, but was still swept by that force, and there was a crackling sound in his body, and his bones broke dozens.

With a snap, Lu Ming's body was like a meteorite, and he retreated backwards. In an instant, at least a few hundred thousand miles back, he fell heavily on the ground and spit out several mouthfuls of blood.

However, Lu Ming couldn't care about the injury, the taboo force was running, his figure retreated, and he stepped back more than a million miles before Lu Ming stopped and gasped.

Horrible, it is terrible.

If he hadn't stepped back just a moment ago, he was almost crushed by the breath.

"Is this the original god? The terrifying strength is just to open a pair of eyes..."

Lu Ming secretly shocked.

This primitive **** was obviously sealed by runes and locked by chains, and his breath was weak, but just opened his eyes just now, Lu Ming could not bear the pressure, it was really terrible.

What is the realm of this primitive **** in its heyday?

Tianjun level, or stronger?

Lu Ming could not speculate.

"In this day and age, there are really primitive spirits alive, and they are still imprisoned in the Heavenly Palace. If it spreads, I am afraid that it will cause an uproar!"

"The details of the Tiangong Palace are really terrible!"

Lu Ming thought, the closer to Tiangong, the more powerful Tiangong felt.

At the same time, I also felt a strong pressure.

Because sooner or later, he will be opposite to Tiangong.

One is because he is a taboo body, and the other is because Xie Nianqing.

"Unfortunately, I was not here in the past, otherwise, the progress must be fast, this is too suitable..."

Immediately, Lu Ming sighed.

He is now practicing a taboo body. It is useless to practice here, but in the past, he mainly cultivated divine power and original secret techniques. It is too suitable to practice here.

Here, there is a real, living primitive deity. What could be better than the cultivation of the source divine factor and the source mystery here?

When I came here in the past, I could definitely advance by leaps and bounds.

"I don't know what happened to the cultivation of the dragon clan's parent star in the past? But it shouldn't be bad to think about it!"

Lu Ming thought.

After all, the dragon clan's parent star is now recovering, and the cultivation conditions are also unique. In addition, the dragon clan's parent star, with two phoenixes and Ao Qian, two world figures pointing, cultivation is absolutely amazing.

"This is not suitable for me to practice, or go to another place!"

Lu Ming shook his head and walked back, along the stone ladder, back to the stone bridge, then along the stone bridge, continue to move forward.

After walking for a while, I saw another stone ladder leading to the bottom.

Lu Ming went down this stone ladder and came to the flat ground again.

Wow!

As soon as he came to the ground, Lu Ming heard the sound of the waves in front of him, and at the same time, there was still a strong original spirit breath.

"It still has the breath of primitive gods, is it also primitive gods in front?"

Lu Ming was puzzled and went forward.

Soon, he saw a hubo. Among the hubo, it was not water, but a special liquid, which became purple gold.

The sound of the waves I heard before was transmitted from here, and at the same time, the breath of the original gods was also emitted from here.

Lu Ming saw that many Heavenly Soldiers were soaked in Hu Bo's liquid, and their bodies were shrouded in various colors.

"This liquid... is it?"

Lu Ming's eyes widened.

"There is no doubt that this liquid is the blood of primitive gods!"

Bone Magic coldly said.

Sisi...

Lu Ming took a breath.

So much liquid is actually the blood of primitive gods, no wonder there is a strong primordial spirit breath.

"The blood of the primitive gods is not necessarily red, there are various colors. The primitive gods blood here is obviously refined, and the killing is wiped out, leaving only a not very rich atmosphere for people. Absorb refining, refining divine body and divine power, and improve cultivation!"

Bone Magic Road.

"It's such a big deal!"

Lu Ming sighed.

Actually use the blood of primitive gods to practice.

Lu Ming couldn't help but think of the primitive gods who lived in front of him, if they understood.

Tiangong imprisoned primitive gods without killing them. They were using primitive gods to cultivate strong men.

The primitive deities were reduced to a tool for cultivating strong men in Tiangong.

"The primal spirit blood, I should be able to absorb it!"

Lu Ming stepped out and fell into the lake.

Suddenly, a terrible angry machine rushed to Lu Ming, Lu Ming's body was as painful as a knife cut.

The primordial spirit's blood machine did not wipe out the cleanness. Obviously it was deliberately left by the Tiangong, and it could hone the people who practice here.

After being struck by this qi, the potential in Lu Ming's cells was stimulated and turned into a taboo force.

At the same time, the cells of the whole body greedily absorbed the energy from outside, and a wave of pure energy poured into Lu Ming's body from the blood of the original gods, forming a virtuous circle.

"Great, cultivation here, my cultivation speed will be greatly improved!"

Lu Ming's eyes were exposed, and he continued to practice. In just a few days, Lu Ming discovered that his cultivation practice had improved a lot.

Chapter 4029: Original sound

Cultivating in the blood of primitive gods, the cultivation for the promotion is very fast. Although it is not comparable to the battle of life and death, it is also faster than the step-by-step cultivation by oneself. I do not know how many times faster.

The key is to practice here, without consuming the energy of the spirit wood heart, you only need to absorb the energy of the blood of the original god.

But at this time, Lu Ming still ended his cultivation.

"Let's go ahead and see what else, and make a decision!"

Lu Ming got up, left here, returned to the stone bridge, and continued on.

This time, after walking a distance, I found that the stone bridge was at the end.

At the end, there is also a stone staircase leading down.

Lu Ming walked along the stone ladder to the ground below.

This land is full of strange rocks. These rocks have strange patterns on them, and Lu Ming doesn't know them at all.

Following these rocks and walking forward for a while, Lu Ming suddenly heard a mysterious sound, which came into his ears.

It's hard to describe what this sound looks like, just upon hearing it, Lu Ming felt that he was completely quiet and his mind fell into ethereal.

"This... is this the original sound?"

Knowing the sea, the bone demon exclaimed and seemed very excited.

"Original Divine Sound? What is that?"

Lu Ming asked.

"Primitive Divine Sound, known as the earliest sound in the world, is the first sound that appeared when the universe first opened. The extremely mysterious is the Divine Sound, which can help people understand the Tao!"

Bone Demon explained.

Lu Ming was shocked. It was actually the first divine sound of the universe.

"Tiangong dominates the vast universe. Sure enough, there are some good things. Have you seen these rocks? It should be left from the beginning of the universe. After a wonderful arrangement, they can continue to emit the original sound of the gods, kid. The speed of various mysteries is thousands of times faster!"

Bone Magic Road.

"Okay, then give it a try!"

Lu Ming said, continue to move forward, because he felt that the more forward, the better the original Divine Sound.

In front, the figure of the sky soldier has begun to appear.

Some soldiers sat on the spot, quietly comprehending.

However, compared to the previous two places, the number of soldiers trained here is much smaller.

After all, most people in the wilderness universe are practicing divine power.

The cultivation of divine power, the source of enlightenment, is the best way to practice in the first place.

If you want to polish the **** body and improve your cultivation, the second place is the best.

Those who practice here are generally enlightened by some secret techniques, or constitutional secret techniques, so the least people practice.

However, here is the most suitable for Lu Ming.

Lu Ming found a place and sat cross-legged. Almost instantly, he entered an ethereal state. In his mind, the cultivation method of the Great Kamikaze method appeared.

And, there will be some comprehension soon.

"It's easy!"

Lu Ming found that it is not easy to know how many times it is easier to learn the secret technique here than before.

Immediately, Lu Ming closed his eyes, his heart was unscathed, and he began to understand the Great Kamikaze technique.

Anyway, no one dared to start, but can practice with peace of mind.

Time, day by day, about three months, Lu Ming opened his eyes.

Broke through

Great Kamikaze actually broke through.

Before, Lu Ming had already practiced the Great Divine Wind Technique to the level of Xiaocheng, but now, the Great Divine Wind Technique has directly reached Dacheng.

The more ancient secret techniques, the more difficult it is to raise to the back, and the harder it is to rise. If it is outside, there is no hundred years of cultivation.

This is because he is a taboo body and a perverted reason.

And here, it is done directly in three months.

"Perverted, your boy's taboo body is amazingly savvy, combined with the original Divine Sound, it is simply perverted!"

Bone Demon shouted, full of jealousy.

This is the first time the bone demon is full of jealousy.

"Haha, keep going!"

Lu Ming was also overjoyed.

He intends to practice here first.

Although in the second place, you can promote cultivation to the realm, but after weighing the pros and cons, Lu Ming still practiced various secret techniques.

This was decided by Lu Ming's careful consideration.

After all, he has only three years and limited time.

In terms of cultivation, he is a taboo body. As long as there is pressure, as long as he experiences a life-and-death battle, he can constantly excite the potential in the cell, and cultivation will improve soon.

Practicing in the second place, although it can also quickly improve cultivation, but relatively speaking, it is not cost-effective here.

Because, practicing various secret techniques, under normal circumstances, is very time-consuming.

And here, a lot of time can be saved, and the comparison between the two is still a good deal here.

After all, under normal circumstances, Lu Ming's cultivation is relatively simple, but practicing secret art is not that simple.

In addition, under the same realm, the higher the mysterious skill, the stronger the combat power.

In the Temple of Heaven, Lu Ming's strong enemies are around, and the higher the cultivation base, the more attention will be paid to those strong enemies, and the lower the cultivation base, the more the enemy will despise him.

At the same level, the stronger the fighting power, the more beneficial Lu Ming is.

After thinking about these factors, Lu Ming planned to learn various secret techniques here first.

After the Great Kamikaze practice to Dacheng, Lu Ming temporarily put down and began to enlighten the Great Fragmentation, from entry to cultivation to Xiaocheng, which is simpler. It only took a few days to succeed, and then it took several months to practice to Dacheng.

Then, there is the Great Demon Sword and the Great Bound.

After spending a year and a few months, Lu Ming cultivated all four ancient secrets to Dacheng, and after the exhibition, the power was greatly improved.

After the completion of the four great ancient secrets, Lu Ming began to understand those ordinary secrets.

In the past, although the ordinary mysteries turned into mystic runes and melted into the cells, they did not practice until they became perfect, but they were just getting started. After being melted into the cells, they could be slowly promoted.

But now that there is such a good environment, Lu Ming intends to practice all ordinary secret techniques to Dacheng.

Ordinary occult techniques are much easier than ancient occult techniques, but there are too many and there are 1,300 kinds.

So many mysteries are also time-consuming. It took Lu Ming more than a year to practice 1,300 kinds of ordinary mysteries to great success.

In this case, Lu Ming's taboo power is also stronger.

Now, although Lu Ming's cultivation base is still the second level of the Divine Emperor, his combat power is stronger.

Of course, there is no ability for Lu Mingduo to kill the enemy across several levels.

After all, in Divine Emperor Realm, it is too difficult to kill the enemy across one level.

Previously, Lu Ming was able to kill enemies across five levels, but now, about five and a half.

Can not kill the enemy across six levels.

Only half of it is already amazing.

Now in the same battle of the same level, Lu Ming is absolutely confident that he can defeat the Fighting God Yuanwen.

The premise is that there is not much improvement in fighting God Yuanwen.

Chapter 4030: Shrine Mie

At this time of cultivation, there is still half a year before the three-year deadline.

In the remaining six months, Lu Ming intends to go to the second place to practice and improve his cultivation performance.

"This is really a good place. If you get more secrets or ancient secrets in the future, you can come here to practice and save me a lot of time!"

Lu Mingsi, and then got up and left. Soon after, he returned to the second place, entered the Hubo completely composed of the blood of the original gods, and began to condense the power of taboo.

The cultivation here is fast, and of course it can't be compared with the effect brought about by life and death.

Life-and-death fights sometimes increase suddenly, and here, it is a gradual progression, and there is an ascension every moment, such as a long stream of water, a natural success.

When the three-year period was about to come, Lu Mingxiu made another breakthrough and entered the triple realm of the Divine Emperor.

"There should be a few days left, just consolidate the cultivation, can not be wasted!"

The time has not yet come, Lu Ming continues to practice, even a few days, can not be wasted.

It's free now, but if you want to come in and practice for a few days in the future, you need to consume merit points.

Seven days later, Lu Ming's identity token suddenly glowed, and a force enveloped Lu Ming. Under a roll, Lu Ming discovered that he had left Hu Bo and appeared at the bridgehead of the stone bridge above.

In front of him, there seemed to be a layer of prohibition that blocked his way.

Time is up.

"It's really stingy, not a day!"

Lu Ming pursed his lips, a look that he had never had before, and then turned and left the chemical tower.

When he returned to his residence, he found that Dan Dan and Ling Yuwei were also there.

Dandan and Ling Yuwei had already gone to the chemical tower, so they came back long ago.

After practicing in the chemical tower for several years, Dan Dan and Ling Yuwei have gained a lot.

He found that both of them achieved a breakthrough in their cultivation.

Dandan stepped into the Divine Emperor's second level, Ling Yuwei stepped into the Divine Emperor's fourth level.

As for the source mystery and the source divine power factor, without hands-on, I can't see how much the two have gained.

But the harvest is definitely not small.

"You were on the second level, and cultivation only broke through one level? I thought, at least you can break through two levels?"

Ling Yuwei looked at Lu Ming curiously.

For the second floor of the chemical tower, the effect should be better than the first floor.

"I spend most of my time enlightenment on the mystery of the source!"

Lu Ming lied a little, he didn't have the original secret technique.

"Let's step up and consolidate our cultivation. In a few years, we will have a mission!"

Ling Yuwei did not struggle, but changed the subject.

"Do you know, what tasks will we do at that time?"

Lu Ming asked.

"I have inquired. Generally, I have just become a Heavenly Soldier. The first ten years are a period of adaptation. There is no task. After ten years, new Heavenly Soldiers will send the Dark Universe to guard the Southern Sky City for a hundred years!"

Ling Yuwei said.

"Is it still the dark universe?"

Lu Ming moved.

Fortunately, you can take the opportunity to search for some demon spirit blood and exchange for merit points.

"I don't know what conditions our Heavenly Soldiers need to contact the core characters of Heavenly Palace!"

Lu Ming muttered.

"I have already inquired that the core characters of the Tiangong, such as the proselytes and other disciples collected by the majors of the Tiangong, are all practicing in the core of the Tiangong. They rarely come to the Dream City and want to get in touch with those characters at least. God's level!"

This time he was talking.

He knew Lu Ming's true identity, and knew that Lu Ming's purpose in joining Tiangong was for Qiuyue.

So, after he came out of the chemical tower, he asked about it.

Both of them come from powerful races. In the past, some people in the race had already become heaven soldiers, so naturally they had channels to get some news.

"God level?"

Lu Ming frowned.

If you want to become a general, the total merit points must be at least 10 million accumulated.

Lu Ming is now far away from the merit points of 10 million.

"It's okay, while accumulating merit points, while practicing in Tiangong, Qiuyueji people have their own appearance, it should be fine!"

Lu Ming thought.

He is useless even if he is in a hurry, it is better to practice with peace of mind and improve his strength.

After all, the cultivation conditions of the Tiangong are not comparable to other places.

Moreover, Feihuang and Ao Qing told him that the big man in Tiangong would take the initiative to take away a young man, mostly because of his talent, and brought it back to cultivate.

After all, Tiangong secretly cultivates a number of arrogances, and Tiangong also needs to be continuously injected with fresh blood, so as to maintain its prosperity.

Ling Yuwei looked at Lu Ming and Dan Dan curiously, and felt that they knew each other before, but Lu Ming and Dan Dan didn't say anything, and she didn't ask much about it.

Next, they practiced in the Tianhe military barracks with peace of mind, consolidating the realm, polishing the foundation, and enhancing their strength.

For five or six years, for a few people, it was just a blink of an eye.

In an instant, they have become heaven soldiers for ten years.

At this time, the drums of the battle sounded, and all the soldiers in the barracks gathered to form a neat formation above the Tianhe River.

"Liu Fang, Hou Yong..."

Several tall men wearing purple armor came to them.

God will!

In the Tiangong barracks, only the generals were wearing purple armor.

These people are all gods, and their breaths are as thick as mountains, unfathomable.

One of the gods will begin to pronounce names.

"Muyun, Ling Yuwei..."

Soon, Lu Ming read their names.

After the name is spoken, the **** will say: "These people follow us to the dark universe. Over the next hundred years, you will spend time in the dark universe south heaven city. Kill the devil!"

"Yes!"

Everyone answered loudly.

"set off!"

With an order, the crowd followed several gods and set off toward the dark universe.

Even if he came here for the second time, he would still be shocked by the scene along the road. After a while, they came to Nantian City again.

Nantian City is huge, lying on the vast land, blocking the devil from entering the abyss universe from the abyss.

Lu Ming they are stationed at the northern wall of Nantian City. This section of the wall is the wall they need to protect.

Of course, in this section of the city wall, it is impossible to have only these new sky soldiers, and many old sky soldiers. These new sky soldiers mainly cooperate with the old sky soldiers to hone themselves.

Of course, the city wall of Nantian City is said to be a city wall, but it is not as broad as it is. It is needless to say that it is natural.

Wide, but also tens of billions of miles.

More vast than many planets.

It is said that some parts of this city wall are made of the remains of the planet.

Above the city walls, at a glance, there are endless military camps with huge buildings.

Lu Ming, they are in a barracks.
