

## D. School 100

### Chapter 100 - IQ crush

After winning the gold medal in the International Olympic Mathematics Competition, Tao Zhexuan published a book at the age of fifteen, called "Tao Zhexuan teaches you how to solve mathematics wisely". The content of that book is actually "I have no other, only IQ Gower!" "

This caused people to deeply feel the frustration of being crushed in IQ when reading this book. Alexander Norwich is in the mood now. He is also a star of the famous University of Mathematics Moscow University, and he has also emerged in the mathematical world of Lucia. His genius, from a young age to a big one, did not know how many times he was praised for being smart and a genius.

But Lu Qiuqian's essay made him wake up from this beautiful feeling. Any one of these four essays is enough for him to study for a while to fully understand Lu Qiuqian's ideas.

In other words, maybe it took him much longer to understand the thesis than Lu Qiuqian wrote the thesis, this guy is a devil! Alexander Norwich did not inherit literary talents from Yesenin, Pushkin and other Lucia predecessors, so there was no way to come up with a gorgeous rhetoric to describe Lu Qiuqian's genius. It took a long time to hold back such a word.

"This situation is awful!", With a grunt, another vodka poured into Alexander Jevich's stomach, and he thumped his desk hard. "You just made me lose faith in math!"

"Well, maybe these are his research results for months or even a year!", Alexander Jevich tried to comfort himself. It is not uncommon for a person to publish multiple articles in arXiv. After all, this is not an official journal. It is just a platform for the exchange of results that does not need to be reviewed. There are more mathematicians who have published multiple articles here. Tao Zhexuan's number of papers on this does not know how many times it is compared to Lu Qiuqian; what can be done with only four articles? ? Give him a few months to get five or six articles to post.

"Well, it must be the case. He must have sent out the results of several months at once! It doesn't take long for him to register! It may be that I just knew arXiv soon!" Alexander Alexandrovic said the more he believed, I took another vodka and finally fell into a sweet dream under the influence of alcohol.

With a bang, the door of the room was opened from the inside, and Alexander Jevich was wearing a single coat to feel the temperature outside. “The temperature today is almost minus five degrees, which is really warm! It is a good weather for swimming in the river! “

Packed up swimming trunks, ice-cutting guys and other swimming essentials, Alexander Jevich was satisfied with the outdoor bag on his back and prepared to find a clean place to swim for a few hours of swimming, and then came back to start the study; yesterday let those from arXiv The papers downloaded on the website are tormenting and I have no mood to do research. I hope I can get better today.

Walked to the door, when he was about to pull up the door handle, he saw his computer screen still shining from the crack of the door. Should I go or not?

After a while, Alexander Norwich decided to go back and turn off the computer. There is not much income for doctoral students, and electricity bills are not a small expense. Save it!

Just covered the mouse with the palm of your hand, the display immediately turned on, and the arXiv page that you forgot to close before drunk yesterday appeared; hell! As soon as he saw this, he felt that he was frustrated by the good mood brought by the warm weather of minus five degrees.

Will you see his new article today? But if there is one, I will definitely download it and watch it. Isn't this a delay in swimming? If not, wouldn't my mood be better? Alexander Jevich was caught in a tangle.

Then look! I do n't believe that in just two days you can come up with something new! He gritted his teeth and clicked on Lu Qiuqian's name on the page. After a while, the search results showed up.

In the search result list, a new paper appeared after the paper on counting geometry. Immediately, Alexander Jevich seemed to have ten thousand grass and mud horses running past.

I bought a watch last year, and you let other people live! Terence-Tao is just two or three articles a month! You're the fifth in half a month?

Tom, he dropped the outdoor bag on the ground, angrily opened the paper page to enter the download, mom, let me see what you wrote this?

Without entanglement, Alexander Jevich put aside the warm weather and pleasant swimming plan, and sat on a chair to quietly look at Lu Qiuqian's new paper.

This time it is an article about analytical number theory! I said you can't catch a sheep wool? What does it mean to always live in the east and west! Alexander Jevich couldn't help but talk.

Didn't find any loopholes. After reading the paper, he was even more frustrated. He scratched his head hard and didn't even notice the hair that was stabbed.

Well, it is probably in collaboration with others to write so many articles in such a short period of time, Alexander Jevich has found another reason; um, it must be so, is n't Terence-Tao so? Most of his articles published on arXiv are suitable for others to cooperate with.

There must be a lot of mathematicians with profound research in different fields around him, and then he and these people have collaborated to make so many achievements, which is the crystallization of collective wisdom.

Alexander Jevich reached out and drank the rest of the bottle yesterday, shook it, um, some, and then took a big bite; then returned to all the pages and looked at it!

I saw only one sign of Qiuqian-Lv under the title of the paper, and there was no name of the collaborator in his mind; he put his eyes almost on the screen, and finally determined that there was no separation between Qiuqian and Lv. Comma, this is an author and not two people.

咚, Alexander Jevich hit his head on the table with a depressed head, this feeling of being crushed on IQ is too disturbing! For a whole day, he didn't go anywhere. He kept refreshing in front of the computer, trying to see if Lu Qiuqian would issue new articles in a short time.

It has been almost thirty hours since this analytic number theory article was published! Alexander Jevich did not wait for a new article to appear, and finally seemed to be able to go to bed.

Refresh again and go to sleep! He smiled and clicked on Lu Qiuqian's name. The search function of the website immediately turned to Lu Qiuqian's paper list. In the list, another new article appeared, and suddenly blinded him!

Ah ah ah ah ah! Alexander Jevich wailed, God! Are you still letting people sleep?
