Chapter 331 - Not long memory

“Okay, let’s go for a big meal! All the restaurants in Munich are up to you to choose, and I’ll come to treat you! You know, I just changed the contract with Bayern last year, and I can afford this consumption!” Next, Lu Qiujian also played an upstart, Bayern has already given him the bonus of last year, that is not a small sum!

And as long as he is willing, whether he chooses Nike or Adidas, signing his name on the contract they provide, he will immediately get a huge income, but he really has no time to shoot advertisements or attend business events, so give up! Anyway, with the salary of Bayern and the income of the Renaissance company of Simmons, it is enough to maintain a high-quality life!

Seeing that Lu Qiujian did not fall into frustration, the friends regained their cheerfulness. Although their hard work during this period of time was not satisfactory, they were somewhat lost, but should n’t they be the most disappointed? Since no one has lost confidence, we should also get together and prepare for the next experiment!

The group was busy and hi-pi once, and others got a short vacation to rest and play to recover; Lu Qiujian still stayed in the laboratory to explore the reasons for the failure of the experiment.

Slowly, cooperative units around the world also transmit their analysis results to cern, there is no conclusive evidence of the existence of dark matter! No surprising data found! There is no data that matches the model described by Lu Qiujian! Bad news came one after another. Until the work of the last cooperative unit was completed, the discoveries that Lu Qiujian and all the staff of the experimental group jointly expected still did not appear.

“Ah, it seems that this time I really didn’t find it!” Lu Qiujian scratched some scattered hair. “So what is the problem? Is the energy level of the experiment not enough? Or is there a problem with the choice of the proton beam?” Let ’s go to Geneva to discuss with Dr. Evans and Dr. Lafayette! Let ’s take a closer look at the analysis results of other partners to adjust the next test plan based on this result! ”

“Dr. Lu, do you still choose unsweetened black tea as last time?” On the flight to Geneva. The flight attendant asked kindly.

“Okay, thank you very much!” Lu Qiujian nodded subconsciously. It seems that his route to Munich and Geneva is too diligent. Even the flight attendants on the plane know themselves! Think

carefully, since coming to the University of Munich. I have to fly on this route several times almost every month!

Fortunately, I chose Munich instead of staying in Princeton! Otherwise, the long journey from the United States to Geneva is enough to toss people!

“Lv, do n’t worry. Although I did n’t achieve the experimental goal this time, I also got some data that I had never had before; cern ’s senior management has not lost confidence in you yet. They also actively asked when the next experiment is planned. I can report it! “As soon as he entered cern, Dr. Evans sent good news and instantly drove away the dark clouds in Lu Qiu Jian’s heart.

“This is great! I’m still thinking about how to convince them!” It seems that cern has more confidence in himself than he expected! Could it be that Hawking bet? Lu Qiu Jian made a joke with himself.

“Let’s go. Let’s go to the meeting room together! We have put forward some possible reasons why the experiment failed. Let’s discuss and discuss together to see if we can find out the real reason!” Dr. Evans said Qiu Jian entered the small conference room of the experimental group.

As they started a heated discussion, the news that the first experiment to explore dark matter failed to achieve the desired effect began to spread, which made some media overjoyed.

In a glorious office building outside China, a metropolis in the south, a media practitioner who stared at cern’s official website studied for half a day and slapped the table fiercely, “I said that this experiment will definitely not succeed! How is it? This surnamed Lu is an old man? “

Ok? The colleague next door pulled out his head and glanced, whispering in his heart. I remember that the university you wrote on your resume is a literature major, and you still dropped out midway. Why didn’t you work for a few years? Can you understand even the forefront of high-energy physics? so smart?

Li Yifeng immediately established the document and began to carry out further processing according to the news published on the cern official website. Of course, he has not forgotten the news of the bet of Professor Hawking and Lv Qiu Jian. Two contrasts, the fingers flew on the keyboard, and soon An extremely eye-catching report was announced.

As soon as the printed manuscript spit out from the printer, Li Yifeng quickly picked it up and ran into the editor’s office. “Editor, I have an article here. Can you see the newspaper for tomorrow?”

“Huh? What’s it about? Bring me to see?” The editor-in-chief took over the manuscript that Li Yifeng respectfully handed over and turned over Erlang’s legs. “” Science can’t talk big, the Japanese education system should be rethought “? The title looks good!”

“It’s about Lv Qiujian, who was held up to heaven by other media! When I first met in Beijing I saw that this guy was not much different from those bricks called beasts, only There is a mouth to brag! I really want him to do something, certainly not! “Li Yifeng has completely forgotten that Lu Qiujian cracked the Poincaré conjecture and helped cern adjust the Higgs boson experiment plan. Of course, He didn’t understand these achievements. He only knew that Lv Qiujian is now experiencing a little setback. So what are you waiting for now?

“A young student who is only 22 years old hasn’t got his Ph.D., and even the arrogant and the greatest scientist after Einstein, Professor Hawking, bet. Is this not blinded by pride or what? I? Falling into deep thinking, what kind of education system can train such students who don’t know the height? This must be a problem of our national education system. “The editor-in-chief nodded from time to time in the wonderful part of his text.

At this time, Li Yifeng deliberately ignored the fact that Lv Qiujian had obtained a double doctorate from Princeton and Beijing Normal University. He also put Hawking on the name of the greatest physicist after Einstein. He did not know Heisenberg, Dirac, Yang Zhenning and Weinberg saw how they felt. But I am afraid that he has only heard the name of Hawking at his level?

“Well! The article is good!” The editor-in-chief, keeping in mind the interests of his master, is certainly not happy to see a world-class scientist appearing in China. It would be better if this article can stink him. A good layout, see the name! “

Chapter 332 - Smear

“Hey, why don’t you say that these young people in our country are not humble at all! Even a young man didn’t even get a doctor to run and bet on Hawking!” When the newspaper came out the next day, there were many unidentified people fooled At first, someone began to post the contents of the newspaper online, and expressed some concerns about the state system.

“Huh, how does the name Lu Qiujian feel a bit familiar? It seems to be a football player? You know the cultural level of the football players in our country, you know, it ’s not unusual for such people to make jokes! Go abroad! “Gradually some people started to join the crusade.

“That’s! People who haven’t researched the rice country, he still wants to research it, it’s a dream!” This is the spiritual national of the rice country.

Slowly, the more floors were built, the more people began to express their contempt for Lu Qiujiang; but some people who knew something about it came out and refuted, “Scientific experiment? How could one succeed, and Hawking and others There have been more bets, this is just a joke between peers! Did n’t anyone and everyone bet on Ding Ding last time on the first floor! “

“Betting must be of equal strength in order to bet! He played football and betting on physics? Is there anything wrong!”

“Lu Qiujiang is not just a player, he is also a doctor of Peking University, and has won the first prize of the National Natural Science!”

“What’s wrong with Peking University? Can domestic schools compare with foreign countries? As for the first prize of National Natural Science, although I haven’t heard of it, but what’s going on in the domestic awards, are you still unclear?” Conscience netizens.

“What about the Princeton doctor? What about the Wolf Prize? You said that it is not good at home. Both of them are foreign! Lu Qiujiang is not just a domestic degree and award!” Slapped in the face.

“And being able to be responsible for the development of the European Nuclear Center’s test plan has confirmed the strength of Lu Qiujiang, not to mention that he has successfully helped Professor Higgs confirm the existence of the Higgs boson!”

Although someone always helps Lu Qiujiang to distinguish, you can never convince others on the Internet. In most cases, everyone here has their own conclusion before speaking, and no one seriously thinks about what you say! Soon the post was occupied by netizens who criticized Lu Qiujiang.

Looking at the domestic website of Liu Yuzhou, it was called gnashing teeth! Immediately log in to the account to debate, but it was not long before being drowned in the sea of replies, without causing a wave.

This makes him almost depressed! Want to call Lu Qiujiang to complain. Fearing to affect other people’s emotions, he had to hold the depression in his heart.

And Li Yifeng was extremely happy to see you offend me. Do you see my ability now? Anyway, your image in the hearts of domestic netizens is ruined! No, I have to rush out another manuscript and criticize him again! See if you dare to offend me! So he began to replenish various materials, and a fresh and hot article was born.

After writing. He touched his chin for a long time, and then modified a few words that he didn't think were appropriate. Then he printed the manuscript with satisfaction and sent it to the editor's office.

"Editor-in-chief, I have written another manuscript here, which is about the criticism of the current educational system and academic system. And this one is a series of manuscripts. I would like to take this opportunity to address this concern of the masses. Let's dig deeper!" Li Yifeng seemed to ask for help from the people at this time.

"Well, how many people like this college entrance examination-oriented exam education have harmed! Now this problem is getting more and more serious, and it is time to change it! Only quality education can cultivate real talents!" Nodded his approval. The children in his family have already started to attend kindergarten. He can't bear to let his children and other children of the same age go to the Dumu Bridge for the college entrance examination.

It would be nice if quality education were to be implemented. With its own economic strength and connections, whether it is calligraphy, painting, foreign language, or musical instrument, what kind of big-name teacher can't find it by itself? This is the real win at the starting line!

Of course, relying solely on quality education is not enough. What if my child is unable to support the mud from the wall? In addition to emphasizing quality education, we must also attack the current college entrance examination admission system, emphasizing the independent admission of colleges and universities! Then you can operate it yourself! Our newspaper has a good relationship with many colleges and universities. How big is it to get an independent enrollment for our children? If a school pushes three and blocks four, aren't I afraid of digging deep into their black spots?

"Yes! Look at what kind of people our education has cultivated?" Li Yifeng looked distressed. "Copying the academic achievements of Professor Yale, and speaking to a great scientist like Hawking, it's almost like we Chinese. His face is completely lost! "Well, he also knows that his Chinese are really rare!

"I will help you to make a few changes. Then you can take it and publish it!" The editor-in-chief took out his Montblanc fountain pen to modify a few places on Li Yifeng's manuscript, and then handed it back.

"Oh! I said that I always felt a little lack of effort in this article, but I couldn't find out what went wrong! Now that you have changed it, I suddenly feel a sense of empowerment!" Li Yifeng, a vice

president For Zhanfu's appearance, I looked at the few places where the editor-in-chief had praised, "I thought I had studied with you for so many years, and I should have half of your skills! It seems that it is still far away!"

The editor-in-chief was extremely comfortable, and waved his hand, "I haven't written a manuscript for a long time, it's rusty! Please go back and modify it, I will arrange a good layout for you!"

Li Yifeng just left with satisfaction. After the second article was published, the emotions of the readers were mobilized again. Li Yifeng made persistent efforts, and he created them one by one.

The time soon came to October. With the publication of Li Yifeng's article, people's views on the Internet on Lu Qiujian are getting worse and worse! Although some college students and enthusiastic fans who understand Lu Qiu's accomplishment helped explain, but because Lu Qiujian himself never came forward to reply, the situation still showed a tendency to be one-sided.

"Editor-in-chief, I wrote another manuscript. Would you like to help me?" Li Yifeng pushed the door of the editor's office again.

But the editor-in-chief did not show a smile this time. He looked at the computer screen with his eyebrows closed. After a while, he turned around and sighed.

Chapter 333 - Loud slap (18/34)

()

Ok? what happened? Li Yifeng is still a little puzzled. Is it because I've been so outspoken recently that people have been whispering? Who is the one? Old Liu or Xiaosun's bitch? Li Yifeng screened several colleagues he did not deal with on weekdays, and handed over the manuscript again, "Editor-in-chief, you look again. I wrote this article very carefully, I feel more than the previous articles Strong! "

"Don't read it! These things are meaningless to you!" The editor-in-chief sighed and twisted the display to Li Yifeng's side. "You still have to look at this first!"

"Ah !?" Li Yifeng opened his mouth and moved his eyes to the display. The editor opened the news page. He saw the name of Lu Qiujian in the news. When the news was finished, Li Yifeng's face was white. Now! Oops, I seem to have lost my mind this time!

At the same time, the people who flew Lu Qiu Jianhei on the Internet were attracted by a new message, and the situation suddenly reversed! On October 4, 2005, the Permanent Secretary of the Royal Swedish Academy of Sciences Normark announced the winners in Swedish and English in the Royal Academy of Sciences conference hall, and awarded the Belgian physicists Francois-Engle, Robert-Brout and the United Kingdom Physicist Peter Higgs 2005 Nobel Prize in Physics.

The reason for the award is due to the theoretical prediction of Higgs boson. The Higgs boson is a boson with zero spin predicted by the standard model of particle physics. It is the last undiscovered particle in the standard model. It can help to explain why other particles have mass.

And CERN discovered this particle that has plagued the physics community for many years in the experiment at the beginning of this year. The predictions made by Higgs, Engle and Braut 40 years ago become a reality. The three of them will share the 800 SEK prize.

This made people suddenly realize that it was the Nobel Prize award season! Just as netizens in China began to regret that no Chinese scientists won awards this year, Li Yifeng's article originally intended to continue to use this to criticize the education and scientific research system in China, but Higgs's acceptance speech dumped his resounding note. Slapped.

In an interview, Higgs first reviewed the process of proposing the Higgs mechanism, and then praised Lu Qiu Jian's contribution in the award process with great length. "In addition to the above personnel, I would also like to thank Lu Qiu Jian from China. It was he who improved CERN's experimental plan and provided better data analysis methods, so that the Higgs boson was successfully discovered during the experiment without Lu's contribution. I think I have to wait a long time to get this award! You may even miss the Nobel Prize, you all know that I am very old! "

At the same time, Prof. Engle and Prof. Braut also expressed their gratitude to Lu Qiu Jian in an interview with reporters in Belgium!

"I heard that Dr. Lu is conducting research on dark matter recently. Do you think he might succeed? To know that this will undoubtedly also be a Nobel grade achievement!" The reporter asked what everyone wanted to ask.

"He is on the right path! I believe that within a few years he will come to a result that will shake the entire physics session!" Professor Higgs' confidence in Lu Qiu Jian is full.

"Haha, then can we expect Professor Hawking's album!" The reporter also knew the bet.

“Yes. What I want to say is that I played sand hammer when I was a kid! If Lu and Stephen don’t mind, I want to join their performance too!” Professor Higgs joked in a good mood.

This news was quickly quoted by major media in China. This year’s Nobel Prize also has a credit for Chinese scientists. The Nobel Prize winner Professor Higgs is optimistic about Lu Qiu Jian’s future and other topics quickly occupy the top of the major media. Version!

Now the netizens are excited. The previous posts that despised Lv Qiu Jian were turned out one by one to set the whip; the reason why netizens refused to believe Lv Qiu Jian’s strength a while ago is because the media is more authoritative than netizens. High, the authority of the Nobel Prize winners is obviously higher than that of Li Yifeng’s media, so it is natural to see a reversal!

“The Nobel Prize winners all acknowledged the strength of Lv Qiu Jian! You are still talking one by one! Are you blushing?” Words like this have been swiped from time to time in the posts that were noisy.

The IDs of Hei Qiu Jian had been silent before. They wanted to take Li Yifeng’s report to tell the story, but his weight obviously could not be compared with Higgs.

then. They spread their anger on Li Yifeng, and pushed his misguided responsibilities to his reports; it was not that we deliberately asked Dr. Hei Lu! Blame it on these newspapers for lack of morality!

In order to scrub their responsibilities, they began to humanize all kinds of deeds from Li Yifeng, and soon he accused Lu Qiu Jian of plagiarism and trying to find out the loopholes in Lu Qiu Jian’s cracking of Poincare’s conjecture paper at the press conference of Beijing Normal University Chanted out! So the netizens clamored that this product was revenge with old complaints!

Fuck, our country has a promising young scholar, and the Nobel Prize winners have said that Dr. Lu is likely to win the Nobel Prize! You are so black on him! Can people without morality and principles be journalists? Li Yifeng quickly came out and apologized! Then roll the media circle!

For a time, criticizing the posts of Li Yifeng and his newspaper office flooded the entire network, and even more people found the websites of relevant departments to brush complaints, call the media where he is located, and so on.

Fuck, these gang mobs! Before Li Yifeng watched them, Hei Lu Qiu Jian looked very cool. But now it’s my turn to accept it! One after another, the pages are closed.

“Xiao Li, come to my office!” The editor-in-chief summoned him via the internal telephone.

With a chuckle in Li Yifeng’s heart, there was a sense of ominousness; he moved to the editor’s office, and asked with a nodded head. “Editor-in-Chief, you have something to do with me?”

“Xiao Li! Sit!” The editor-in-chief looked at his old love admirer with complicated eyes lit a cigarette, took a deep breath, and tapped on the table with his fingers. Xiao Li. The recent pressure in the club is relatively big! So, it is involuntary to make such a decision. You must avoid the wind! Wait until this time passes, and then you will come back! “

“Ah! Editor!” Li Yifeng opened his mouth.

The editor-in-chief threw out a document that read “The decision to expel Li Yifeng, the interim editor of this newspaper”, and Li Yifeng suddenly lost his sight, almost fainting!

Chapter 334 - All revealed

I have done a lot for the newspaper! I’m in trouble for the group! You can’t do this to me, I want to see the boss! I want to see the boss! Li Yifeng roared in his heart! But he didn’t dare to say it in the end. What kind of virtue the group he worked for knew for himself; if he was willing to carry it on, he might come back after two years in the tabloid; if his face was torn It’s over, nothing else, just the group holding the handles of him is enough for him to drink a pot!

“Don’t be too sad, who made things happen to this point!” If it wasn’t Higgs’ speech, they would certainly be able to hold on, but now they only have to abandon the soldiers to protect the handsome, the editor-in-chief appeases Li Yifeng, “rest assured, Everything you pay for the group will be remembered in your heart! One day you will still be able to come back! “

Li Yifeng’s head was dizzy, and he was coaxed out without knowing what he said; back to the big office, the security guard was already waiting there, “Do you need me to help you pack things!”

Can’t you wait! Li Yifeng picked up the keyboard on the table and wanted to smash it, but he finally endured it! Kicked and started to pack things with a slap in the face; people in the same office didn’t seem to see it, staring at the computer pretending to be busy with their work.

But Li Yifeng knows that they have something for gloating, and look forward to the superior, but there is no sympathy for the same disease, and I do n’t know how they will arrange it when I leave!

Came out of the newspaper office with a piece of paper box, took the elevator to the downstairs, and looked back at the striking signboard at the top of the office building. Li Yifeng regretted that Nima I had trouble with whom, why did I find him!

What makes him even more depressed is that he was not compensated for the expulsion of his newspaper. He signed a temporary employment contract before, and the basic salary only accounts for a small part of the salary results. When working, he has considerable bonuses and manuscript fees every month. His income, coupled with his extortion from the name of the newspaper, made him not see this basic salary in his eyes, and now he only reacted. It turned out that the company was already prepared!

Hey, this time my reputation in the media circle is stinking. Those big newspapers are afraid to think about it. What kind of work should I find to support myself? Li Yifeng, who returned to the rental house, was in deep thought.

the next day. The newspaper office where Li Yifeng once worked posted an apology statement in the size of a fingernail in an obscure corner of the newspaper, claiming that the newspaper had been fooled by Li Yifeng before publishing a series of remarks. Yun Yun was expelled, but there was no word of apology to Lu Qiuqian.

Of course, these domestic twists and turns Lu Qiuqian did not know. He devoted himself wholeheartedly to the improvement of the second test plan. Besides, the only concern recently is probably the final ownership of the Nobel Prize.

So far, all the awards have been announced. Except for Higgs, Englert and Brout, they won the Nobel Prize in Physics and a prize of 8 million Swedish Krona. This prize is about 1.3 million US dollars. Higgs monopolizes 4 million kronor, and Englert and Brout split the remaining 4 million kronor equally; this is because Higgs's achievement was completed independently by themselves, and the result of the two was completed in cooperation.

As for the Physiology and Medicine Award won by two scientists from Australia, Barry Marshall from the University of Western Australia and Robin Warren from Perth Royal Hospital for the discovery of the bacteria that cause gastritis and gastric ulcer-*Helicobacter pylori*. Winning this honor is the fifth time the good friends have won the award together.

Robert Grubb from the California Institute of Technology, Richard Schrock of the Massachusetts Institute of Technology, and Yves Chauvin of the French Petroleum Institute won the Nobel Prize for their contributions to the research on the olefin metathesis reaction of organic synthesis Chemistry Award; among them, the contributions of Xiao Wan and Schrock are mainly reflected in

the basic principles of olefin metathesis reaction, and Grubb inherited and developed their achievements. This achievement on the one hand improves the output and efficiency of chemical production, while reducing by-products; on the other hand, its by-products are mainly ethylene, which can be reused. It is an outstanding example of basic science benefiting mankind, society and the environment.

Then another scholar Lu Qiuqian once worked with won the award. Robert Ouman, who had exchanged mathematics with Hebrew University, and Thomas Schelling, a professor at the University of Maryland, strengthened the cooperation of the world through the analysis of game theory. Together with the understanding of conflict, he won the Nobel Prize in Economics; by the way, Professor John Nash, who has dealt with Princeton many times in Princeton, is the authority in this field and is known as the father of game theory.

After being praised by critics as Bernard Shaw, the most important British playwright Harold Pinter won the Nobel Prize in Literature, which made Lu Qiuqian a little disappointed. If the American rock singer Bob Dylan won this award It will be much more interesting.

As for the award that is least authoritative and most controversial, it belongs to the International Atomic Energy Agency and its Director General ElBaradei. The reason for the award is to prevent nuclear energy from being used for military purposes and to ensure the safest and peaceful use of nuclear energy. In the past, whenever the Nobel Prize release week was a time of turmoil for netizens in China, the economy of China is now developing rapidly. However, there has never been a Nobel Prize in the natural sciences category, which makes many netizens feel unwilling; but this year's situation is slightly better, because of Higgs's remarks, they hope that Chinese scientists will win the Nobel Prize. All entrusted to Lu Qiuqian.

In major forums. Dark matter quickly became a hotspot in the discussion. No matter what they understood or not, they had to go in and mix them up. They really confirmed the existence of dark matter from all angles of joining Lv Qiuqian, so he can analyze whether he can win the Nobel Prize in Physics. The results of the analysis are very optimistic.

There is a netizen whose id is called Xiaoyao Supreme is even more eloquent announcement. Lu Qiuqian must be able to win the Nobel Prize for the discovery of dark matter within three years. If Lu Qiuqian did not win the prize within three years, he will live broadcast Ding Ding!

As soon as this building came out, it was immediately put on top by the moderator. Almost every netizen who entered this section should go in and leave a message to express his concern for Xiaoyao.

The noisy Novo release week is over. The real award ceremony will not be held for a while. Lu Qiuqian was a little envious after seeing the enthusiasm of the media. It would be nice if his name appeared on the award list! Then he devoted more attention to the modification of the dark matter experiment plan. As long as the experiment is successful, is it still a matter of time to win?

Chapter 335 - Fail again

Time will soon come to mid-October, and all preparations for the second experiment have been completed! Lu Qiuqian changed some experimental data this time according to the feedback information from the previous experiment. Logically speaking, the probability of success of this experiment is much greater than the first time; he stood in the general monitoring room again, picked up the microphone and released it The command to start the experiment.

Like last time, there was no anomaly in the experiment. At first glance, it seemed to be completed successfully, so the global cooperation units were busy again and began to analyze the data generated by this experiment.

“Good luck, I hope this experiment will find something interesting!” When he was about to leave for the airport, Lafayette patted his shoulders on behalf of all the members of the experimental group and sent blessings.

“I hope so!” Lu Qiuqian replied with a smile, but he was not quite sure in his heart. The data accumulated in just one experiment was still not enough to perfect the experimental plan. This time, unless luck broke the table, otherwise the dark matter would Hope is not great.

Went back to Munich, and began a nervous busy again, and Dietrich, Ludwig, Frederick and others were busy in front of the computer all day and night under his leadership. However, until all the data was processed, the expected results were not obtained. There is still no evidence of the existence of dark matter in these data.

After the last set of data was processed, Dietrich shook his head helplessly. It seemed that good luck was to leave him after all, and he failed to bring good news to Lu Qiuqian.

“Lu, in fact, the effect of this experiment is still very good! It gave me a lot of inspiration. I feel that I can write a good article with some data!” Ludwig comforted everyone for a while. Lu Qiuqian.

“Wow, congratulations, if you encounter any problems during the writing process, please feel free to contact me!” Lu Qiuqian knew that this experiment produced several papers to be completely not a problem, but these were not what he wanted! This kind of paper says that it is fine to exaggerate as much as he wants, but there is only one chance for the title of the dark matter discoverer!

“Okay, don’t worry about this! I think you need a vacation!” Professor Xuft looked at Lv Qiujian’s frowning slightly and couldn’t bear it. He knew that his proud student had worked hard for a long time. , From modifying the experiment plan, presiding over the experiment preparation to conducting data analysis. He really hasn’t rested for a long time, what should he do if he continues to have trouble in this way? He went directly to Lu Qiujian and turned off his computer. “Come on, accompany me to dinner. Then I will give you a long vacation to relax and wait for the end of the holiday before thinking about work!”

“So good!” Anyway, the data of other cooperative units have not yet been processed. I will study how to modify the next test plan and I do n’t have the conditions. I just take this time to relax and maybe put the experimental things aside. Instead, inspiration came to my mind!

People always need care and greetings when they are frustrated. They made a phone call with Xia Xiao. Her soft voice made Lu Qiujian quickly forget the troubles. The two agreed to be in Tokyo when the World Club Cup in December. meet.

So what’s next? Let’s go play a few games with Bayern! I have used too much of my brain for a while. Even if I work now, I am afraid that the efficiency will not be very high!

“Oliver, you guys have been awesome recently! I all feel that I am going to lose the qualification to play!” When I came to the training ground, Lu Qiujian kindly greeted these teammates.

“You seem to be busy lately? There are far fewer competitions than last year! If you go on like this, it will be very unfavorable for you to choose the European Golden Globe Award early next year!” Kahn kindly reminded.

“Everything will depend on the next month!” If November has not been successful, I am afraid that cern can hardly give yourself a chance? “Next month. I think I can spend most of my time in Munich!” It was useless even if I was in Geneva at that time!

“That happened to be the time of the World Club Cup! This name is really awkward. According to my meaning, it is enough for the European Champions Cup champion and the South American Libertadores Cup to decide who is the strongest club in the world. Could Oceania ’s club cause any trouble to us? ”Kahn vomited for a while, apparently disliked this change from FIFA, and then he suddenly seemed to think of something, sneaking on Lu Qiujian ’s shoulder,“ Lu, when you arrive in Tokyo, you should take us to Hipi Hipi! Asia is your place! “

Dear! Is Asia great? Lu Qiujiang was unable to talk, and I and you, the geographic blind, have nothing to say! "Sorry, Oliver. My girlfriend is in Tokyo, and I'm going to date her!"

What! girlfriend! Kahn was stunned. He came to Bayern for more than a year. He hasn't heard Lu Qiujiang talk about it yet! Why did a girlfriend suddenly appear? "Uh. Which country is your girlfriend? What are you doing? There are photos?" Kahn's gossip fire burned up immediately a series of questions.

His big voice attracted the attention of all Bayern players on the field. Ze Roberto, Lucio and other lively guys came with a large wave of people, and there was a situation that they would not want to leave without actually recruiting!

"What are you doing! Did I say that the training is over!" Fortunately, Magath hurriedly released Lu Qiujiang from the predicament in time, and the training was back on track.

Lu Qiujiang used this time to participate in two games, one is the league away game against Cologne. This fish-bellied team had wanted to struggle a bit, but after seeing Lu Qiujiang appear on the starting list, he gave up automatically and sent five guards and four midfielders to open the iron bucket array. Unfortunately, he still did not escape. After Lu Qiujiang's free kick, Bayern won 3-0.

Then there was the unlucky Juventus. Ibrahimovic played abnormally in this game and wasted opportunities one after another. Bayern ushered in a big victory again under the leadership of Lu Qiujiang, almost locking the position of the group's top position. .

These two games adjusted Lu Qiujiang's state very well. He returned to cern in Geneva with a relaxed and happy mood, ready to meet the next experiment; now all the data has been processed, combined with the previous two experiments As a result, it is possible to integrate the experimental scheme most likely to find dark matter?

Everything depends on the results of this experiment! Lv Qiujiang knew that his chances were about to run out, and began to revise the experimental plan with a broken mind.

Chapter 336 - Change plan

"Did you see it today? That Chinese Chinese Lu is back! I heard it is preparing for a new experiment!" In a corner of cern, the two young men whispered to each other.

"I saw it. I just saw him walk into Dr. Evans' office when I came in from the door! God, why is he so young that he can lead the experiment, we are so much older than him but we have to come and fight him "A curly hair, looking like twenty-six-six, said depressed," Look at what others are doing,

discovering the ultimate mystery of the universe, as long as you succeed, you can get the Nobel Prize! And me! Like a blue collar with nothing Workers look at that boring gear all day long! With a few mistakes, you may not get my PhD! “

Cern also has a lot of young people who are studying for a degree to do internship here. They are often responsible for some seemingly insignificant but not low-tech tasks, such as the operation of a detector element, the daily collision of pipes Checking, and being responsible for the maintenance of a gear as the curly-haired youth said; such work is undoubtedly boring, and it seems that it has not been fruitful.

“A new experiment, and then a new failure!” Another young man with a mustache is about the same age as him, and it should look like an intern; corporate employees like to despise the boss when they talk privately, students together When I am chatting, I like to satire the teacher. These hard-working interns naturally want to spit out the big boss like Lu Qiuqian.

“Yeah, then I’m afraid Cern won’t give him a chance anymore?” The eyes of the curly-haired young man shone with unclear ambiguity. People in foreign industries will look forward to geniuses in other fields, but the same industry is not necessarily the same. ! The young men of the Barcelona basketball team will praise La Marcia for another great genius, and La Marcia’s partners don’t know if anyone cursed Messi for being injured to make himself high? I think there will still be people who do n’t think so.

Curly hair youth’s current psychology is somewhat different from those of La Masia’s malicious teenagers. At least the ability to enter La Masia has proved their strength. Messi is very likely to get a chance if they are injured, and even if Lu Qiuqian fails, it is impossible for them to get their turn. He said such words more to the detriment of others, just want to make him feel a little bit better!

“It must be so!” The young man with a mustache has a heart. Well, even if Lu Qiuqian was eliminated by cern, he wouldn’t be able to get himself on top; but in case the staff adjusts to change his job, it’s good! Eh, if you change the care gear to the surveillance detector, you can sit here anyway, right?

“Ha! Then let us look forward to the fall of a genius!” The curly-haired youth was excited, even if he didn’t get a direct benefit from here, but think about if someone would name Lu Qiuqian in his own face in the future; You can make a sad expression and say, hey, that’s a genius. It’s just a bit of bad luck, it’s a pity! This kind of feeling is so cool under yy!

“Hey! Where are the two of you! Don’t hurry up and do your work!” While the two of them were happy, the foreman called them to move bricks ... Um, no, it was the person in charge of their

group that asked them to continue to contribute to the great plan of mankind to explore the mysteries of the universe.

“Okay, Mr. Smith! Let’s go here. Let’s go!” This roar caused the two young men with great enthusiasm to bow down immediately and nod their heads to busy themselves.

Of course, a dialogue like this in Cern will definitely not only happen between the two of them, but Lu Qiuqiu has no knowledge of it. Of course, even if he knows it, he will not care about it; even if it is based on his own achievements. These people can’t catch up with them for a lifetime, so why should normal people be angry with ants!

“Look at the difference between the data this time and the last time?” Lu Qiuqiu turned on the computer for two days at the same time, and opened the left and right bows on the keyboard to call up the analysis results of the previous two experiments. Scanning the past with ten lines at a glance, at the same time the brain is running fast to analyze these data in depth, trying to find out the secrets contained in these vast seas of data.

Fortunately, Jonas Bolak is unlikely to appear in Cern, otherwise, when he sees this scene, he will beg for Qiuqiu to join his team!

Two monitors still seem to be insufficient! The ability of the slow display to display data gradually cannot keep up with the speed of Lu Qiuqiu’s processing data! Lu Qiuqiu found two computers in a circle around his seat, and processed data on four computers at the same time. The rotating chair turned fast, and his hands were like Maxim’s “Wild Bee Flying Dance.” The keyboard flashed quickly, bringing out afterimages, crackling and crackling sounds. Fortunately, the room in which Lu Qiuqiu lives is very sound-proof. Otherwise, the tenants next door do n’t want to sleep tonight!

“Well? These sets of data seem very interesting! It seems to contain a certain pattern!” Massive data flows through. Lu Qiuqiu’s eyes suddenly stopped moving quickly.

“Let me take a closer look!” Lu Qiuqiu selected these sets of data separately and substituted them into the formula he designed for a detailed calculation. After a long time, he shook his head again, “No, no, this formula cannot be used here!”

Well, change the formula. I changed several formulas one after another, and finally found something that surprised him. Through this formula, those sets of data formed a perfect logical chain. Aha! The problem turned out to be here! Lu Qiuqiu couldn’t help but slam his fist, and the reason why the previous two experiments failed was clearly presented in front of his eyes.

“Then, as long as these problems are solved, the energy sector will be adjusted to ... Replace the proton beam used before ... Then atlas detector and ams detector ...” He quickly operated again, One by one, the revision opinions are sorted out ..

The biggest problem is finally solved! It wasn't until close to dawn that Lu Qiujian stopped his busy movements and stretched out a long lazy waist; well, let's get here to work today. Wake up tomorrow to conduct in-depth research on today's discoveries, he closes one by one Computer, ready to go to bed.

Just got up from the swivel chair, only to hear a clatter, the swivel chair fell apart! Well, it seems that I just exercised too much, and I can't carry the swivel chair ...

Chapter 337 - Last chance

“I heard Dr. Lafayette's assistant say that Lu once again submitted his own experimental plan, and it looks like we should be busy again!” Still in that corner, the curly-haired young man and the mustache got together again.

“Oh my god, the internship of our two can be over in a month. I thought it would be easy for a while! Now it seems that I will be busy again!”

“I still intend to use this time to complete my reply, but now it is planned to be completely broken! He is simply a crime!” Moustache said indignantly, as if his thesis can affect the changes of human civilization!

“But it seems that this experiment has received a lot of attention. I saw Professor Hawking and Professor Higgs again in the exchange center! There are also some physicists in the United States and Germany!” The eyes of the curly-haired young man are full of Envious, “Professor Higgs looks extremely happy this time, probably because he won the Nobel Prize. If I can have half of him in the future. Oh no, a quarter of the achievements will be satisfied!”

Come on, it's good to get a degree at your level! I think I have the possibility of achieving a quarter of Higgs' achievement. Moustache despises his face and keeps a smile on his face,” This is already the third Nobel Prize made by cern. I do n't know who will be next. A lucky one. “

In 1984, the Italian scientist Carlo Rubia and the Dutch scientist Simon VanderMeer who worked in cern for many years won the Nobel Prize in Physics for their key role in the proton-antiproton collision experiment and the discovery of w and z^0 particles; In 1992, French scientist Chapak won

the Nobel Prize in Physics for inventing the multi-line proportional detector and promoting the particle detector.

With the discovery of the Higgs boson, which provided sufficient reasons for the Nobel Prize, Higgs, Englert and Brout, this is indeed the third Nobel Prize made by CERN now!

“If the guy succeeds in this trial, it is very likely to win the prize!” The curly-haired young man’s face is full of depression. Why are you so young that you can hit the Nobel Prize, but we can only fight for you, maybe you even don’t even know the name! The staff involved in the experiment is up to four digits, and of course Lu Qiujiang will not know their names.

“He proposed a brand new theoretical model. If the experiment successfully verifies this model, then he will win this award without controversy! It may even be awarded next year!” Moustache’s tone was sour. Full of jealousy.

“Doesn’t he want to create a record of the age of the Nobel Prize ?! The premise is that this experiment can succeed!” The curly-haired youth said a little unwillingly, “If this experiment still fails, I think he is in a long time. There will be no new opportunities in time!”

“Let’s wait for the final news!” Moustache raised his eyebrows, obviously he would not expect the news of Lu Qiujiang’s success; but because of a trace of shame. Didn’t let him say such a thing that let us toast Lu Qiujiang’s failure!

“Mr. Smith is here! Let’s work quickly!” The curly-haired young man’s eyes caught the figure of the person who dreaded him, and quickly flashed to his work position.

This is the fourth time that Lu Qiujiang has stood in the general monitoring room. The first experiment was with the Higgs boson, and the next three experiments were with his own dark matter; it was the same group of people around him, but his mood is completely different now; if it is said that the first two times are still a little uneasy. I don’t know what the experiment will take, but this time he seemed confident.

“All the preparations are ready, let’s start now!” Dr. Evans checked the preparations for the experiment as usual, and turned his attention to Lu Qiujiang.

Lu Qiujiang took the microphone from his hand without hesitation, and decisively issued an order, “I announced that the third dark matter exploration experiment will now begin!”

“Received by the collision experiment group, the countdown of the proton beam emission starts, 3, 2, 1. Launch!”

“Atlas detector is operating normally!”

“Ams detector is operating normally!”

Each group started the intense work according to the original plan, and all the links were carried out smoothly according to the test plan; but this time, will you still not get the desired gains as before? Dr. Evans was frowning and thinking. Before that, he had heard some rumors that were not very beneficial to Lu Qiuqian. Among the cern high-level officials, the questioning of Lu Qiuqian’s test plan was growing louder!

“Hopefully a good result this time!” Dr. Lafayette also whispered aside, he also smelled a wind; since Lu Qiuqian came to cern, he soon conquered the opponent’s ability, he also I sincerely hope that Lu Qiuqian can get what he deserves.

“Do you say Xiao Lu can do this time?” Professor Wang from Huaguo University of Science and Technology, working in the atlas experiment group of cern, whispered to his compatriots and colleagues.

“I see it, he was full of confidence when I met him yesterday” Professor Liu from Qilu University responded while looking at the display.

“Hey If you said that if you really found such a thing this time, wouldn’t Xiaolu be able to ...” Professor Wang couldn’t help but yy.

“Natural subjects are slightly less influenced by politics. This is his own experiment. If he succeeds, the hope is still great!” Although Professor Wang did not finish his words, Professor Liu already understood what he meant. .

No doubt they are discussing the Nobel Prize. There are many scientists who have missed the Nobel Prize for some inexplicable reason before; for example, Zhou Zhi, a Chinese female scientist who has worked in the Cold Spring Harbor Laboratory for many years, has made outstanding contributions in the discovery of broken genes; but The principal of Cold Spring Harbor Laboratory and the famous father of DNA, James Dewey Watson, clearly has a moral level that is not consistent

with his academic level. For some reasons that are not suitable for publicity, Watson recommends the Nobel Prize. The candidate did not recommend Zhou Zhi.

Ultimately, Richard Roberts, recommended by Philip Sharp and Watson, won the Nobel Prize in Physiology and Medicine in 1993 for the discovery of the broken gene, but Zhou Zhi was forgotten by the Nobel Committee.

But Lu Qiujiang did not have this problem, and his contribution during the dark matter experiment was obvious to all. Everyone knows that from the formulation of the theory to the experimental plan, and then to the organization and implementation of the experiment, it is done by him alone or dominated, and his credit cannot be concealed.

“So, everything depends on the results of the experiment!” Professor Wang said.

Chapter 338 - European Golden Globe

At 18:00 on November 28, 2005, local time in Paris, countless journalists flocked to the Place de la Cardin on the Champs Elysees. . Who will win the European Golden Globe this year? Is Ronaldinho of Barcelona? Lampard of Chelsea, Gerrard of Liverpool? Lü Qiujiang of Bayern Munich, everything will be announced in an hour.

Many fans who came from all over the world also wore their own idol jerseys and appeared near the awards venue, shouting their names.

“Ronaldinho! Ronaldinho!” Several fans wearing Barcelona No. 10 jerseys raised a cartoon of Ronaldinho holding the Golden Globe trophy above his head, to show support for the biggest hero who helped Barcelona win their first league title after 1999.

“Lampard! Lampard!” A group of fans in blue jerseys next to them shouted unwillingly. Lampard has maintained a very stable performance in the past year, helping Chelsea win the English Premier League championship after 50 years. And to become the player with the most goals in the team, his voice of winning is not low.

“Gerard! Gerard!” Then Liverpool fans wearing red jerseys joined in again, but unfortunately the Red Army was dragged down by their team’s record, and the hope of winning was not very big compared with the first two; Liverpool did not perform well in the Premier League last season and this season. Although they entered the Champions League knockout, they were defeated by Lu Qiujiang’s Bayern and lost the chance to reach the top, which made Gerrard lose. Less points.

“Henry! Henry!” Due to his reasons in France, the fans who support Henry are probably the most. They wear French team uniforms and the fans and Arsenal fans form a temporary united front. The Henry in the Premier League last year Twenty-five goals were scored in the game, which won the Premier League Golden Boots. If it was n’t for Lu Qiu Jian ’s sudden rise, he has a great chance of winning the European Golden Boots; but although he personally performed well, Arsenal last season Chelsea won the championship, which also put him in a disadvantageous situation in the selection.

“Who do you think will win this year?” At the award ceremony at Cardin Square. Several reporters started gossip while waiting for the event to start.

“I think Ronaldinho has the highest probability of winning! He won the Spanish La Liga title and the Copa America championship last season, and he played very well in the game!” Pro Barcelona
» Reporters took the lead in throwing their candidates.

“Come on, what’s the relationship between the Copa America championship and the European Golden Globe? This is not the selection of Mr. World Football, after all, it is more important for the player’s performance in the European arena!” Pro Real Madrid’s “Marca” reporter retorted . Although Real Madrid do not have a player with great hopes, they can’t watch the players of the enemy win the trophy! Well, if he let him take it and Real Madrid is digging him up, it seems good!

“As for the league champion! The La Liga champions are of great weight, but we also have the Bundesliga champions, not to mention we also won the European Champions Cup and the German Cup! Get a European Golden Globe Award! So I think Lu Qiu Jian has the best chance of winning! “The reporter of” Kicker “magazine is not willing to be outdone. It has been many years since the Summer League and no German league players have won this award.

“The Triple Crown won’t necessarily win the Golden Globe. Manchester United won the Triple Crown in 1999, but that year’s Golden Globe winner was Barcelona’s Rivaldo!” The reporter of the “World Sports News” was somewhat lacking The year that Manchester United won the championship relied on the strength of the team as a whole, and none of them had much more performance than other teams; but Lu Qiu Jian was different. If nothing else, just watch the second half of the UEFA Champions League final The gap should be understood Lu Qiu Jian’s role in Bayern.

This kind of topic can not be discussed until the final winner is announced, as the stars of the major clubs enter the stadium. These reporters stopped the argument; they quickly raised the camera in their hands and pressed the shutter desperately, the flash suddenly turned on.

Ok? How come people seem to be wrong! Before they could even think about it, Elnor, the editor-in-chief of “French Football”, came to the stage and announced the official start of the 50th European Golden Globe Awards ceremony.

After the completion of various bedding activities, it was finally the most compelling award-giving session. Ronaldinho, Lampard and others who had the greatest hope of winning the audience looked serious, and looked forward to staring at the stage. .

Erno did not make them wait too much, and immediately announced the results of this selection; Lu Qiujiang from Bayern Munich won the Golden Globe this year with 248 points, and Ronaldinho from Barcelona 142 points ranked second, Chelsea Lampard ranked third with 121 points. From fourth to tenth place are Henry of Arsenal, Gerrard of Liverpool, Shevchenko and Maldini of Milan, Adriano of Inter Milan, Ibrahimovic of Juventus , Milan’s Kaka and Chelsea’s Terry Below is Lu Qiujiang from Bayern Munich invited to the stage to receive the prize! “Elnor’s right hand rested on the trophy beside him, looking at the figure walking on the stage with a strange expression.

All reporters were also stunned, and the flash did not turn on again until the winner went to the stage; this is not to blame, but it seems that this situation has never appeared in their memory.

“Thanks to” French Football “, thanks to the judges, thanks to the friends of the media ...” General Manager of Bayern Munich Hernes took the trophy from Elnor and began to announce the award.

After a series of thanks. He held the trophy and began to explain why he was on the stage, “Unfortunately, Dr. Lv Qiujiang is now conducting a very important physical experiment at the European Nuclear Center. This experiment is related to the cracking of the ultimate mystery of the universe. Come to receive the award; on behalf of Dr. Lu Qiujiang, I would like to express my sincere apologies to the organizing committee, all guests and media friends who are present. “

Ronaldinho, Lampard and other people under the stage could not be more depressed, and ran happily. It ’s okay to give the award to others, but it ’s too shocking for you as a winner to not show your face!

A few Chinese reporters in the press room thought of a very important thing after being excited. Fuck, there is no photo of Lu Qiujiang holding the trophy. How should the news tomorrow be published!

Chapter 339 - Where did Lu Qiujiang go (20/34)

The Golden Globe Awards are presented at two o’clock in the morning in Beijing, China. Although the vast majority of people have already slept at this point, there are still many die-hard fans staying

in front of the computer and brushing their pages to wait for the results of the Golden Globe Awards; When the news of Lu Qiujiang's award came out, the entire network suddenly fry.

Nima Chinese players won the European Golden Globe! Haven't you been so powerful before this? Immediately, countless people popped up in major forums and QQ groups. Various congratulatory messages and posts immediately began to screen the slaughterhouse. If there is any regret at this moment, it is probably the photo holding the Golden Globe trophy. Hernes was built instead of Lv Qiu!

What is Lu Qiujiang doing? Even absent on such an important occasion? Countless fans asked this, and soon Hernes's declaration of award was translated, and the fans were immediately entangled. It turned out that people went to do experiments! Well, what kind of experiment is really so important?

So the last experiment about dark matter was again remembered by the majority of netizens. The posts that despised Lv Qiujiang were pulled out again to whip the corpse. The vast majority of netizens who said the wrong thing remained silent, but there were a few People jump up and down to swear to Lv Qiujiang's experiment is doomed to fail! I don't believe it. Can the Nobel Prize be cultivated by this kind of education system in China?

Li Yifeng didn't sleep tonight. Looking at the posts on the Internet that praised Lu Qiujiang, he couldn't sleep anxiously. Anyway, he was already unemployed and he didn't have to go to work tomorrow, so be happy! So the posts that cursed Lu Qiujiang's failure in this experiment were quickly issued, and then quickly deleted by the moderator. He changed the vests one by one and did not escape the moderator's butcher until the vest was completely consumed.

The offices of the major sports media are even brighter. The reporters and editors, under the stimulus of coffee and cigarettes, resisted the drowsiness and quickly wrote various press releases. Each printing house was also ready to start immediately, although today It's not the release date of many newspapers, but such a big thing happened, it must be indispensable for a supplement!

"Red Flag, we have received your manuscript! You have reached the front of most domestic media this time! You can rest assured. The bonus is ready for you! But you can't rest now, it must be in the shortest time Find Lu Qiujiang for an exclusive interview! Is it okay to have a relationship with you? Readers are not very satisfied with the speed of your latest update! "The editor-in-chief of Sports Weekly made a red phone call across the ocean.

Other media can only use reports and pictures from foreign websites. Is that comparable to the first-line reports of their own newspapers? What is certain is that this supplement will surely create their

newspaper's release record! We must make persistent efforts and ride the craze for winning Lv Qiujian without passing. Get the interview! "In Economy Class, buy First Class without a ticket! In a word, this interview will be done at all costs! I believe you can do it! Whether our newspaper can seize the opportunity to become the number one sports media in China depends on you. ! "

"Yes yes! Just now Henes said that Lu Qiujian is now in Geneva, and I will take the fastest flight immediately!" Feng Hongqi replied in a hurry, although it was already night, but for the bonus, for himself Future. To witness this historical moment even more, he intends to fight.

"Quick! Go to the airport!" Feng Hongqi snapped a handful of euros into the driver's hand as soon as he got into the taxi. "As long as you can catch the plane, these are yours!"

Hush ~ The driver whistled loudly and glanced at the flight information on his phone. "The man in a hurry found my Daniel's taxi. I have to say you are a lucky guy! Fasten your seat belt! I Make sure you will catch your flight on time! This is a vomit bag, get it! "

Amount, I don't feel motion sickness? What are you doing for me? Feng Hongqi looked at the bag inexplicably, but soon he understood. This unremarkable Renault taxi buzzed with the speed that surprised the F1 driver, and the discomfort caused by the super high speed made him vomit.

"Sir, the airport is here, I wish you a pleasant journey!" Daniel flew a beautiful tail and parked the car at the entrance of the airport; Feng Hongqi shivered and pushed the car door, and his feet fell softly to the ground.

Taxi driver Daniel shrugged helplessly. He felt that he was not in a good condition today, and he had not yet fully exerted his strength. How could this passenger be like this?

"Sir, are you okay? If you don't go in, I'm afraid it will be too late to pass the security check!" Daniel got off the car and said Feng Hongqi.

"Well. Flight?" Feng Hongqi immediately heard the word like chicken blood, immediately got up, got up from the ground, and rushed to the airport with the luggage.

It seems that he really has something urgent! If it were not for me, he would definitely delay the trip! Daniel. You are such a great guy and did another good thing today.

After more than an hour of flight, the plane landed at Geneva Airport! At this time, it was already late at local time. Feng Hongqi did not disturb Lu Qiujiang, so he decided to go to a hotel near Cern to stay at and find Lu Qiujiang tomorrow morning.

Walked out of the airport. A taxi stopped in front of him, "Sir, do you need a taxi?"

Vomit ~ Feng Hongqi almost vomited again, Daniel's taxi was just too exciting! Fortunately, the taxi driver's style is very different from Daniel's, and he was steadily delivered to the hotel near Cern.

After completing the check-in procedures, after washing, Feng Hongqi set the alarm clock at six in the morning, and then went to sleep; he got up early the next morning and hurried to the media reception department of cern to apply for it.

"Are you going to visit Mr. Lu Qiujiang?" The staff of cern wrote down his application. "We have recorded your application. If there is news, we will contact you as soon as possible!"

"Can you help me and ask Dr. Lu when I have time? I just arrived from Huaguo, and I have to go to France for other interviews in the afternoon!" Feng Hongqi could not help but lied.

"Well, okay, let me ask you!" The staff was persuaded by the gaze of his face and picked up the phone to start dialing. After several calls on the face, the staff showed a regretful expression. It is reported that Mr. Lv Qiujiang has just left cern and is preparing to take the nearest flight to Munich!

"

Munich! Feng Hongqi immediately rushed out like a wind after listening, rushed out of the gate of cern and reached out to stop a taxi, "Quick! Go to the airport!"

Chapter 340 - Interview on the plane (21/37)

Just less than an hour after coming out of Geneva Airport, Feng Hongqi is once again preparing to return here, even as a journalist for many years, but this rhythm has never happened in his long career.

"Dr. Lu! I am Feng Hongqi from Sports Weekly. That's right, your memory is really good. Congratulations on winning this year's European Golden Globe Award.... Are you on the plane now? Oh I haven't arrived at the airport yet ... Which way is it convenient to disclose your flight number? I'm also on the way to Geneva Airport. If you don't mind, I want to take the same flight with you! Okay, I Remember! See you later at the airport! "Feng Hongqi was relieved after hanging

up the phone, and quickly checked the Internet with his mobile phone. It seemed that he had no time to catch up!

Immediately called the airline to book a ticket, he did not hesitate to reserve a seat in the first class. Just now Lu Qiuqian had stated that he was very busy recently and could not accept the visit, so this time on the plane was his only Chance! Lu Qiuqian must be sitting in first-class cabin. Only if he finds a way to sit next to him can he have the opportunity to conduct an interview!

This time the driver is still not as good as Daniel, but fortunately, this time is much more than the time from the Champs Elysees to Charles de Gaulle Airport; Feng Hongqi finally entered the security channel before stopping the ticket check.

Arrived at the waiting room, he saw Lu Qiuqian really waiting inside, stepped forward to say hello and just wanted to ask a question, the sound of starting registration sounded on the radio, he had to put the recorder back in his pocket again.

Arrived on the plane, the two people's seats were not next to each other, Feng Hongqi took advantage of his good communication skills, convinced the man next to Lu Qiuqian to agree to the request to change seats.

"Dr. Lu, I'm really sorry! I know you have worked hard recently, but the majority of fans want to know your feelings after winning the Golden Globe Award. So I rushed over!" Feng Hongqi said sincerely, "But if you are tired I won't disturb you anymore! You have a good rest first. Only when you have time later, remember to say hello to me! "

"It doesn't matter, Geneva is only an hour to Munich. Even if you want to rest, you won't have a long rest! Just ask what you want! Just don't make too much noise, it's not good for other passengers!" Lu Qiuqian closed the book in his hand Said.

"Eh, thank you!" Feng Hongqi turned out his pen and small book, and started his own question. "Fans are very concerned about the reason why you are absent from the award ceremony. Can you please confuse us." He was at the hotel I have n't forgotten to go online to see the domestic response.

"Because I am currently hosting the dark matter test plan of the European Nuclear Research Center, the award ceremony was held at the most critical moment of the experiment. I can't get away anyway! Here I want to report to the organizing committee, the Bayern Club and Fans apologize. If I have the opportunity next time, I will definitely go to receive the award in person! "Lu Qiuqian said sorry!

“So you are very confident in winning the Golden Globe Award?” Feng Hongqi keenly discovered the meaning hidden in his words. Presumably he will not participate in the ceremony next year as a supporting role?

“If this trial is successful, my time will be slightly more relaxed, and I don’t have to look forward to staying in Geneva! In this way, there will be more opportunities to participate in the competition! I also hope to help Bayern achieve better results!” If you fail, you have no way to be busy!

Hey, that’s good news for the majority of fans! Feng Hongqi quickly thought of another layer after the surprise, “So you are confident in the success of this experiment?”

“I have done everything I can, if I can’t succeed in a short period of time, I can’t do it!” But according to my own calculations, the probability of success in this experiment should be great?

Despite that, Lu Qiujian’s determined attitude made Feng Hongqi taste a lot. Reminiscent of the dark matter information he had previously found, his heartbeat suddenly accelerated, according to the point of view of the information he had seen. If Lu Qiujian succeeded in this experiment! Wouldn’t it be fine? .

Compared with that award, the weight of the European Golden Globe seems to be much lighter! No wonder Lu Qiujian won’t attend the Golden Globe Awards! First, playing football is just his hobby, his main business is still physics; second, if you let yourself choose, I’m afraid I hope to win the Nobel Prize?

“Reporter Feng! Reporter Feng!” Lü Qiujian could not help shouting that he had not spoken for a long time.

“Oh, I’m really sorry! This news really surprised me!” Feng Hongqi took a few deep breaths and continued to ask after his mood calmed down a little bit. “So you are very confident about the dark matter found in this experiment? “

“Is the conclusive evidence of the existence of dark matter!” Lu Qiujian first changed his statement before answering his question. “Scientists should have confidence in each of their experiments, but as for whether confidence will be translated into the correct result, it is two things!”

“So. If this experiment is successful, what impact will it have on the development of human science?” In the first class of the plane, a sports reporter and a PhD student in physics chatted about the most cutting-edge topics in physics.

The stewardess walking in the aisle to provide services to the passengers also noticed the abnormal situation here; this beautiful woman with brown hair and enchanting body could not help but keep in mind. After returning to her place after the service, she couldn't help but ask her colleagues, “Who is that young man in first class? I see that there seems to be a reporter interviewing him? “

“Are you talking about that?” A colleague pointed in the direction of Lu Qiujian, and after seeing the brown-haired stewardess nod, he said, “He is a football star, and he just won the Golden Globe this year yesterday!”

“Well? How did you know him?” The brunette stewardess asked suspiciously.

“My boyfriend is an out-and-out fan!” My colleague said bitterly, “Yesterday I went to his house and he stared at the TV for an entire hour! He didn't pay any attention to me, and the most appeared on TV is the photo of this person! How can you not impress me! “

“Poor baby!” The dark-haired stewardess comforted her, and then her eyes became very wonderful; wow, football star, isn't that rich? She seemed to think of something, and immediately took out the mirror to put on makeup.

The plane landed at Munich Airport, and the interview ended; Lu Qiujian walked out of the cabin with simple luggage; he was stunned when he passed by the stewardess standing at the hatch; eh? What seems to be stuffed in his hand?
