

Dark Ages 24

Chapter 24 - Base meat

Mutant ants, no matter how they mutate, they are still ants in nature.

The ant has three single eyes and a pair of compound eyes. The eyesight is very strong, but mainly the pair of tentacles. This is the origin of the ants' sensitive touch and smell.

Huh!

Moda took the first shot with a shield. As a result, there was a sound of clashes of gold and iron, followed by a fierce pair of large pliers in the mutant ant's mouth.

He slammed, and the huge force lifted him out, smashing more than ten meters away, it was incredible.

He Moda, burly and tall, weighing at least 150 kilograms, was hit by the mutant ant that was half a meter long and had a thick bucket.

Seeing this, a group of people's faces changed greatly, and they waved their steel knives to greet the mutant ants, but they still clanged. Soon, a group of students who surrounded the ants were beaten by the huge power of the mutant ants.

Stubborn, too powerful. The power of mutant ants is scary and scary. The power of four hundred times their own weight is enough to make people desperate.

"what..."

A knife and shield hand was bitten by a mutant ant and slammed the steel knife, and then fell to the ground on the spot, then watched the ant rush up in a few steps, and a pair of huge sharp steel teeth were cut to his throat like pliers. The head must have moved on the spot.

Suddenly the student screamed in horror, a figure rushed forward, the broken bone sword broke the air, and chopped on the antennae of the ant.

Click!

As the two tentacles fell to the ground, the mutant ant made a loud scream, and then quickly backed away, his head flicked and looked extremely manic.

Qin Tiange was Qin Tiange. When he saw someone in danger, he went straight up and cut off the antennae of the mutant ant.

In the last life, Qin Tiange worked hard for fifteen years in the last days. He saw more mutant ants, and naturally knew the weaknesses.

"Look, I'll just say it once."

Xi Qintian Goti stepped forward, calmly, and said, "Mutant ants, essentially ants, rely on a pair of antennae to distinguish the route, which is the main origin of their touch and smell, which is one of the weak points of mutant ants."

After he finished speaking, he stepped forward in two steps, holding up the broken bone tang knife and stabbing a compound eye of the painful mutant ant.

I saw a thump, the compound eyes burst, and a nasty yellow-brown liquid sprayed out from it, emitting a stinky smell.

Hiss ... Mutant ant screams, powerful force shakes his mind, and wants to throw Qin Tiange out, but unfortunately the power of the two is not much different, because Qin Tiange's power has been increased by 30 times, close to How can the force of four thousand pounds be easily shaken?

In order to teach this group of students some experience in hunting mutant beasts, Qin Tiange explained it in detail so that they know how to distinguish the weakness of mutant beasts and how to hunt and kill these mutant creatures.

Qin Tiange drew his knife, then pierced the other compound eye severely, and then said, "Mutant ants have three single eyes and a pair of compound eyes. As long as you seize the opportunity to blind these eyes, the mutant ants will be severely damaged. , Lose the senses of vision, touch, smell and so on, and kill as many times as you want. "

Everyone was shocked, watching the mighty mutant ants, which were seriously damaged by Qin Tiange's hands. First, a pair of antennae was cut off, then two compound eyes were burst, and finally, three single eyes were pierced.

These are the weaknesses of mutant ants. Otherwise, the mutant ants are as hard as iron, and ordinary weapons cannot be broken at all. Only by targeting these weaknesses can it be effective.

The mutant ant screamed sternly, losing its tentacles and eyes, and it had fallen into the darkness, turning completely in place.

"Finally, to kill an ant, start with the soft place under it, like this ..."

Qin Tiange said, suddenly stepping forward from the left, with a bang, the mutant ant's body was turned over, revealing the soft place under the belly.

With a slamming noise, the broken bone tang knife directly pierced into the mutated ant's soft abdomen, and a spot of disgusting mucus splattered on the spot, emitting a strong acid smell and corroding the ground.

"These liquids have strong acids, which can corrode human skin. If they are not careful, they may be corroded to death." Carefully avoided these strong acid mucus, Qin Tiange stabbed the mutant ant with a knife.

Xu said, while teaching and killing, the whole process didn't take much time, it was only ten seconds, and Chen Xi and others were stunned.

"Qin brother mighty!" Moda and others came back, admiring one by one, arrogant.

Xi Qin Tiange waved his hand to interrupt them, and then said, "Mutant ants do not have the mutated nuclei, but they have a good thing."

Speaking of him, Chen Xi's curiosity arose, and he came up and asked, "Tiange, what's the good thing you said?"

It wasn't just her. Liu Ye also stepped forward and looked curiously at the dead mutant ant, somewhat scared in her heart.

Well, girl, afraid of bugs is normal, not to mention such huge mutant ants? Just thinking about the scenes of countless mutant ants crawling, she couldn't help it, her face turned pale, obviously frightened by her imagination.

Click!

As soon as I saw it, Qin Tiange lifted the broken bone tang knife and stabbed, and the original hard-shelled carapace was instantly broken, and the blade was pulled, and soon the mutant ant carcass was opened.

He was digging out a piece of crystal clear thing inside the scabbard of the mutant ant's neck. It looked like jade and beautiful.

“What is this?” Liu Yan stared, staring at the bright white thing on his palm.

Xi Chenxi almost put her eyes in front of that thing, her whole body was white and shining with a strange luster, only the size of a slap, but she exuded bursts of strange incense, which made people urge to take a bite.

Qi Qin Tiange's mouth slightly angled, staring at the big slap in the palm, explaining: “This is a good thing. It is a unique product of the mutated ant. I call it basal meat.”

“Based meat?”

Everyone stared, listening inexplicably. Only Chen Xi and Liu Yan looked thoughtfully, and seemed to think of something, but they were not sure.

He only listened to Qin Tiange and explained, “The so-called basic meat is the meat that has been specially evolved by biological genes, and this strange piece of meat is the most precious part of the mutant ant's body.”

Genetically evolved biological meat is called basal meat This is the past. People found that there are no crystal nuclei in some mutant beasts, but there is such strange meat, so it is called genetically evolved meat.

“What's the use of this meat? Is it for eating?” Liu Ye seemed to think of something, his face was pale, his eyes widened.

Qin Tiange smiled and said hehe: “Of course it is used for eating. The muscles that evolved after the mutation of ants are definitely a rare treasure that enhances our human physique. If you stew them with some mutant wild animal bones, add Some mutated herbs are definitely a pot of tonic soup, and their medicinal properties are not inferior to the enhanced version of the quenching agent. “

“Really?”

Tamarix's face changed immediately, and his original disgusting expression immediately showed his eagerness. When he heard that there was such a benefit, he suddenly showed a strong appetite, and wished to swallow this piece of basic meat directly.

This is the charm of power. Even if the girl who hates bugs hears that eating this kind of meat can get a powerful promotion, she immediately abandons the fear in her heart and has to make people feel the infinite charm of power.

“Is there a lot of such mutant ants?” Chen Xi asked anxiously suddenly.

Qin Tiange laughed: “Be assured that not all ants or creatures can mutate successfully. For example, not all of us humans will become zombies. Some creatures fail to mutate, most of them die, but there are also those who have not died after evolution failed. , You will see later. “

“Now, let me talk about the next plan ...”

Roar!

“Ah ... be careful!”

Suddenly, a huge black shadow burst out of the grass, and immediately fell a nearby boy, and screamed everyone.

The sudden change of events suddenly changed the face of Qin Tiange, suddenly turning his head, staring sharply at the dark shadow.
