

Dark Ages 76

Chapter 76 - Raise a goblin

Buzz buzz!

In the sea of flowers, a huge thing suddenly flew up. It was a bee with a dazzling pattern all over the body. Wasps, horse wasps, poisonous bees, killer bees, etc., were all available and there were many.

These mutant bees are aggressive and full of aggression. Seeing Qin Tiange's living creature immediately has an instinctual offensive nature, flying madly.

“Wo 艹...” Looking back, Qin Tiange couldn't help swearing.

Look at the dense and numerous huge poisonous bees, each one meter long and the size of a car tire, is just a cricket killing machine.

Even Qin Tiange's heart can't help but be frightened, his scalp is numb, he runs wild all the way, and crushes a huge plant.

“Train conductor, slow down!”

At this moment, Wu Xinlan was nervous in the cockpit, and he kept calling the train captain to slow down, and he almost stunned the train captain.

He also wants to slow down, but the situation can't be slowed down at this moment. Once it slows down, the railroad tracks coiled by grass and vines will inevitably make the train unable to pass normally. At that time, it will face the terrible attack of countless killer bees. Who can survive?

I didn't slow down, why did Qin Tiange get in the car? The train conductor was tangled, and Wu Xinlan, the beautiful flight attendant, grabbed his arm and shook it, and asked him to slow down.

“The power of love is too great.” The captain smiled bitterly, looking at the magical Wu Xinlan, the flight attendant lady looked nervous Qin Tiange.

When he sighed and decided to slow down the brakes, Qin Tiange rushed out and shouted loudly.

“Accelerate, the train captain is accelerating.” A roar came, shaking the train captain who was about to brake and decelerate, and the deceleration became acceleration.

There was a roar of trains, and then the train accelerated, and rushed into the ocean of countless weeds and flowers, raging on.

As soon as the train accelerated, it quickly rushed across the sea of flowers, and Qin Tiange ran after him along a channel rolled out by the train.

“God, hurry up, hurry up!”

At the rear of the train, at the last carriage window, Liu Ye and others shouted nervously.

Her face was full of anxiety and anxiety, her fists clenched, and she looked at Qin Tiange, who was running after him, and there was a large crowd of killer bees behind him.

These poisonous bee riots meant that countless colorful fantasy butterflies had to avoid it. However, these killer poisonous bees seemed to know the power of fantasy butterflies, and none of them dare to approach.

Once the poisonous bee approached, it was bound to be fainted by the colorful halo surrounded by the phantom butterfly, which was the phantom butterfly's own defense ability.

Each species has its own self-preservation ability. The poisonous bee is a terrible poison needle, and the butterfly is a colorful powder of psychedelic enemies.

"Still chasing?" Looking at the numerous giant poisonous bees that were still chasing behind him, Qin Tiange flashed a little anger on his face and was annoyed.

Suddenly a look of embarrassment appeared in his face, holding a pot of mutant lotus flower in his right hand, the speed increased at a speed of ten meters per second, eleven meters, twelve meters, and finally reached a terrifying speed of fifteen meters per second to distance him.

A person can reach a speed of fifteen meters per second. What kind of scene is that? In Liu Yan's and others' eyes, Qin Tiange's speed suddenly accelerated, and he caught up with the train round.

"Let you try it, the power of plasma bombs!"

Qin Tiange, who was catching up with the train, suddenly took out a dark thing, which was a grenade, a new plasma bomb, and a one-star technology product.

He bit his pull ring with his mouth, and suddenly threw a high back. Plasma bombs landed in the swarm of poisonous bee swarms flying away suddenly.

Boom!

With a loud noise, the sky exploded a splendid electromagnetic light, innumerable electro-optical flashes intertwined, covering a range of thousands of kilometers, hundreds of thousands of scary poisonous bees were torn into powder by the extremely high temperature electromagnetic slurry on the spot. .

Plasma bombs are powerful and horrifying. One goes down and kills thousands of huge poisonous bees, causing a commotion in the swarm. Many poisonous bees are also blasted off by the scattered electromagnetic energy.

This plasma bomb blocked countless poisonous bees. Qin Tiange finally got rid of their pursuit, successfully caught up with the train, and grabbed the parking space and turned it up.

Woo!

"Finally safe!" Qin Tiange breathed a sigh of relief, glanced at the crazy poisonous bee swarm behind him, densely packed, and the scene of thousands of poisonous bees flying was extremely scary.

I saw that these poisonous bees didn't chase anymore. Even if some of them caught up, they could no longer catch the rapid Mercedes trains, and they were quickly thrown away.

At this time, the train drove out of this sea of flowers and broke into an open plain.

"Qin brother, are you okay?"

Entered the carriage and saw Moda and others asking nervously, Qin Tiange felt warm and nodded with a smile, indicating that he was all right.

Voided Moda and others, Liu Yan and Long Xiaoya, and even the beautiful flight attendant Wu Xinlan who rushed over did not leave, but looked curiously at the strange lotus that Qin Tiange brought back.

"Tiange, you just ventured to catch this mutant lotus back?" Liu Yan was curious and looked at the strange lotus carefully.

This is a mutated lotus flower, with a little consciousness, it can be said that it is a refined lotus flower. Liu Ye curiously reached out and wanted to touch one of the black lotus flowers.

Wow!

The next moment, Liu Yan retracted like lightning, his face frightened, and he took a big step back. It turned out that just now she wanted to touch the lotus with her hands, but the black lotus trembled. Suddenly, a green lotus leaf struck her severely, scaring her.

"Monster?" Wu Xinlan was so pale that she was shocked.

Xiaolong Xiaoya didn't go up to but just waited and see, and was really curious about these flowers and trees that had mutated consciousness.

"You better not touch, it will cause an attack." Qin Tiange said with a smile, and then he said: "This lotus should have just mutated and generated a little consciousness, which is not as good as that of the century-old banyan tree. Variation is powerful, but victory is manageable. "

A few people heard it, and they were shocked. Liu Ye asked in surprise: "Tiange, it seems like you are saying that this mutant lotus is under your control?"

"What? You, you want to raise a monster?" Wu Xinlan was startled, afraid to look at that lotus plant, this is a mutant monster.

Qin Tiange looked at the three people's scared faces, disapprovingly said, "Would you just raise a little fairy? Any fuss?"

After he said a smile of excitement on his face, he carefully looked at the mutant potted lotus he brought back. This is a baby.

I don't say the biggest colorful lotus flower, just the five lotus flowers of different colors around the surroundings, it's an amazing baby.

“I’ll give you a bit of food first.” Qin Tiange took out nine crystal nuclei from the space bracelet, one of which is a Samsung-level brain crystal, which is a zombie brain crystal.

He buried nine brain crystals in the soil of that flowerpot. Soon, the lotus suddenly produced a strange change. The green leaves like the emeralds were swaying together and gently coiled around Qin Tiange’s. The arm, as if coquettish, seemed very happy.

Moreover, on top of the six lotus flowers, even the slightest clouds and mists began to flow, and the glow of rays of light was extremely gorgeous, and a scent of fragrance was emitted, which made the spirit unbearable and shocked.

“This ...” Everyone was stunned when they saw this scene, but Qin Tiange really raised a goblin with brain crystals.
