

## Deeply 331

### 331 Get lost (11)

Yu Jia's eyes congealed. After thinking for a while, she reached out and touched su Wan's pulse. Her expression slowly became a little serious.

Su Wanwan looked at her expression and couldn't help but feel a trace of uneasiness in her heart. Yu jiaxuan, no, there won't be any problems, right? "

Yu Jia quietly took her pulse for a while before withdrawing her hand. She raised her eyes and looked at su Wan, her red lips slightly opening, " Wanwan, I think you have to see our gynecology department before you go to see a psychiatrist.

"Yu, Yu Jia, you, what do you mean? I, I'm fine, why do I need to see a gynecologist?" Su Wanwan swallowed her saliva and her voice trembled a little.

Yu Jia sighed, but he had to tell her the cruel truth. I suspect that you might be pregnant.

"Impossible!" Su Wanwan's first reaction was to deny it. I took birth control pills every time. It's impossible for me to get pregnant.

Wanwan, the birth control pill isn't a 100% success rate. Everything can have an accident. Your symptoms are similar to pregnancy, and so is your pulse. However, as a doctor, I can't say things that I'm not confident in, so I need you to do a checkup. I'll write you a list now and arrange for someone to do a checkup for you.

Yu Jia got up and was about to walk towards the desk when su Wanwan suddenly grabbed her hand as if she was afraid of something and kept denying, " no need, I won't get pregnant. How can I be pregnant? I won't, so there's no need to check, no need!

Wanwan, don't be like this. Calm down. I'm just suspicious and I didn't say for sure. Maybe I'm wrong. It's always good to get a thorough check. The earlier we know, the earlier we can plan, understand? "

Yu Jia didn't want su Wanwan to be so passive and evasive. She pulled her hand away without any explanation, walked to the desk, wrote a list, and then called her Assistant Nurse to come in and let her accompany su Wanwan to the examination.

Wanwan, you can go with her. I still have a few patients here. I'll come and find you after I'm done. Xiaofeng, help me take care of my good sister.

The nurse nodded. okay, don't worry.

During the entire examination, su Wan's heart was heavy and perturbed. She once hoped that she could have a child with PEI Munian. With his eyebrows and eyes, with her nose and mouth, that child would definitely be the most beautiful and lovely child in the world, because that was the crystallization of their love.

But now, there was no love between them. There was only his hatred for her and her despair for him. Furthermore, he had Xi Zhiwei and Xi Zhiwei's child. They were about to get married. At this time, if she had a child, how ridiculous would that be?

No, she didn't want a child. She couldn't have a child. She couldn't!

Su Wanwan's mind was so tense that her head seemed to be affected. Her head hurt fiercely again. She couldn't help but hold her head and groan in pain.

The nurse went to get the test results for su Wanwan. When she came back, she saw su Wanwan sitting on the bench. She seemed to have a headache, so painful that her whole body was curled up, and her forehead was full of cold sweat.

The nurse was shocked. She took a few steps forward and held her. miss su, what's wrong? " Is it a headache? I ... I'll help you to the brain Department."

Su Wanwan couldn't care less about the pain. She only grabbed the nurse's hand and said anxiously, " what's the result? "

"Congratulations, you're pregnant," the nurse said with a smile.

The word "pregnant" resounded in su Wanwan's ears. A sharp pain suddenly hit her head. Her vision went black and she lost consciousness.
