### Chapter 35 Bountiful Harvest

...

Inside one of the forest around the Calderock Village, three Swordmen were dealing with a giant bear.

This Bear have a 10-meter height and the furs on its body were in night-black color. The movements of the bear were quite fast despite having a massive size of its body. And because of that, the three swordsmen were having a hard time dealing with this bear.

As for the swordsmen identity? Naturally it is Shin and his Clones.

Shin spend almost a day finishing all the quest that he have accepted earlier. So it also mean that he already deal with the other monsters and bosses around the Village. He also manage to increase his level to 45 in the process.

But he also have a massive headache, which is the last boss of the Quest given by the Village Chief, the 'Black Iron Dusk Bear'.

This boss have the defense and strength of the 'Dark Swamp Crocodile King', coupled with the size and power of 'Shadow Golden Boar'. But what is the most troublesome of all, is this OP bear also possess the agility and flexibility of the 'Dark Swamp Serpent King' and 'Alpha Shadow Wolf'.

ROAR!!!!

Shin and his Clones were thrown backwards because of the shockwave caused by Giant Bear's roar.

"Tsk, The damage of [Yamato] can't keep up with the defense of the monsters that have higher rankings. I guess I need to prioritize finding the requirements for its upgrade." muttered Shin as he is wait for the Bear to finish its roar.

And as he is waiting for that, he take another look at the informations of the bear.

Well that was understandable. After all, he have been dealing with this Bear for almost an hour already.

When Volibear is done with its roar, it directly charge towards Shin with a great force while leaving a bunch of dust behind and also sending fragments of stones in the air.

A bunch of damages appeared on top of the Bear's head, reducing its HP down to 5%.

"Heh, this newly created skill sure is perfectly fit against great size monsters. The larger their body the more damage I can deal." smirk Shin when he saw the bunch of damages above Volibear's head.

Naturally, the Bear is gotten furious because the large chunk of its HP have been rifted off. The furs of Volibear become erect, while the aura that it releasing become terrifying.

And without further ado, the Bear uses another 'Stampede'. But this time, with a greater speed and more powerful momentum.

Shin immediately jump to his back before using 'Sun-Ray Dash' backwards. But unfortunately, Volibear's speed is faster than him because of its berserk state.

Shin have left with no choice but to use is final lifesaving skill, since his 'Moonlight Steps' is still in cooldown. He combined the powers of the Sun and the Moon before forming a purple energy sphere around him.

'Slayer Skill: Eclipse Pulse'

The barrier around Shin take the whole impact of the 'Stampede', and resulting for it trembled uncontrollably. At the same time, he is also send sliding backwards because of the powerful force accompanying the change.

Volibear ignored the Sun Clone and continue pursuing Shin, he has the main aggro after all. And since the duration of the 'Eclipse Pulse' is 10 seconds, Shin become fearless.

He hold the [Yamato] in front of him vertically, while channeling the power of the Moon on it. Then he swings his sword 5 times in the air, sending 5 vertical crescent sword waves towards the incoming bear.

'Slayer Skill: Crescent Cleave'

But as if Volibear expected that move, the bear swings its right front paw sending 5 vertical energy waves of its own.

'Monster Skill: Dusk Claw'

Swoosh!

Boom!

Swoosh!

Since the 'Dusk Claw' of Volibear are stronger than Shin's 'Crescent Cleave', the bear's energy waves shattered Shin's sword waves and continue moving towards its target.

Bang!!!

Shatter.....

The barrier around Shin were destroyed because it failed to handle the powerful impact of the monster's skill. Fortunately the energy waves of the 'Dusk Claw' skill immediately dissipated the moment it shattered the 'Eclipse Pulse'.

Shin is gotten a little off guard when he saw that both of his attack and defense were easily destroyed by that energy wave. He didn't expect for the bear to have this kind of rise in power the moment it entered a berserk state.

Volibear don't want to give its target more time to breath, so it immediately opens its mouth and try to bite Shin the moment it manage to catch up to him.

'Monster Skill: Savage Bite'

But unfortunately for the bear, Shin already swings his blazing sword on his front, sending a fiery fire sword 'Qi' straight to Volibear's mouth.

Volibear pause for moment when it is hit by the 'Flame Burst', but the bear still continue its bite after.

Shin take advantage of that split second pause to swiftly sheath his sword, before ducking forward and barely dodging that bite.

Then Shin position himself below Volibear's neck before unsheathing his sword with great speed and slashing it to that expose neck of the bear.

Then the Bear powerfully swipe its left paw towards Shin planning to slap him like some kind of housefly.

'Monster Skill: Swipe'

But too bad for the bear, Shin already predicted that move. He bend his knees before jumping upwards while doing a corkscrew flip in the air.

Volibear's left paw almost scratch Shin's body. But unfortunately for it, no matter how near that 'Swipe' is, Shin still manage to avoid it narrowly.

MISS

Volibear is gotten more enraged because its 'Swipe' still failed to hit its mark, so it immediately opened its mouth once again and use another 'Savage Bite' at Shin, who is still spinning in the air.

But how can Shin let himself to get hit by that bite without retaliating? He adjust his center of gravity to slow his descend. Then he enfold his sword with the power of the sun before slashing it towards the jaws of the bear who is coming after his life.

'Slayer Skill: Hell Execution'

At the same time, the Sun and Moon Clones jumped above the giant bear's back while also releasing an opposing auras with each other. Then they simultaneously swung their swords in the air, sending different kinds of sword 'Qi's towards the giant bear.

The opposing sword 'Qi's intervene with each other, before fusing into a rotating purple cross while continuing its descend.

'Clone Combined Skill: Eclipse Cross'

Volibear is about to get successful on landing a clean hit on Shin. But unfortunately for it, reality is too cruel.

When its jaws were about to bite at Shin, the 'Eclipse Cross' sent by the twin clones landed on the back of the bear's head first, causing for the bite to be interrupted. And what makes the situation worst is that Shin's 'Hell Execution' landed at the same time, slashing on the bear's chin.

And those items are a pitch-black leather belt which is part of the [Ruler's Equipment Set], a yellow skill book and two rainbow colored gemstones. But the best drop is last item, No... to be more specific, it is not an item but a pet.

"Huh? The set effect of [Ruler's Set] is still not been revealed? Then it means that this equipment set have more than 5 parts. Well that was good for me, the more parts it have the better its set effect." muttered Shin to himself. Then he turned his attention to the other drops.

"Hmm... This guy is a perfect meat shield in battle. Hmm..? Should I take this one as my pet when I reach level 50?" muttered Shin as he considering the pros and cons of taking the bear cub as his pet.

After few moments of thinking, he come up with the decision of not taking it. "Nah~, this guy is not suited for my fighting style. I prefer a pet that gives me some buff or one that have fast attacks like me. And with it, I can do a lot more complicated combos during the battle."

"OK, its time for me to submit all these quest and continue my travel towards the Seventh Outpost. Good thing that I still have more than a day to spend for that. As for completing the [Ruler's Equipment Set], I'll investigate about it when I'm done with my main quest."
