

Doctor 2701

Chapter 2701: Invaders Approaching

In the icy and desolate expanse of the boundless space, a figure surged through like light and lightning.

The figure, clad in white, stood in stark contrast to the surrounding infinite darkness.

The fierce astral winds and immense pressure of the endless space were such that any ordinary Emperor Realm expert entering would have to circulate Immortal Law to form a Defense Qi Shield just to linger for a brief moment.

Flying for a single breath in the endless space equated to moving ten thousand miles in the outside world.

Thus, Emperor Realm experts preferred to tear through the void, traversing the endless space to reach distant destinations quickly.

The white-clad figure was none other than Fang Bai.

Previously, Fang Bai had obtained some Starshine Stones from the Heaven Devouring Great Emperor's Spatial Demon Ring; however, upon returning to the Emperor's Palace, he distributed those stones to the Hundred Flowers Empress, the Great Luo Immortal Emperor, and some other Immortal Emperors.

Starshine Stones could only be found in the depths of the endless space and were extremely difficult to obtain. For Emperor Realm experts, they were as essential as Immortal Stones and Immortal Elixirs are for Immortals — indispensable cultivation resources.

Fang Bai was now an Emperor Realm expert, and his unique physique made him a one-of-a-kind existence in the Immortal Realm. He could linger in the endless space relying solely on his formidable physical body, without needing to form a Defense Qi Shield for protection.

This was something no other Emperor Realm expert could accomplish.

Hence, Fang Bai decided to share his Starshine Stones with other Emperor Realm experts in the Emperor's Palace and enter the endless space himself to seek more.

For Emperor Realm experts, the depths of endless space harbored many unknowns.

Throughout history, numerous Emperor Realm experts had ventured into the depths of endless space, seeking to discover just what kind of world it was and what treasures it might hold, yet almost all went and never returned.

Thus, Emperor Realm experts deemed the depths of endless space exceedingly perilous and dared not enter lightly.

Upon learning that the Heaven Devouring Great Emperor had once reached the Divine Realm, Fang Bai speculated that the endless space was not boundless. Perhaps its far shore was the Divine Realm, the dream of Emperor Realm experts.

However, what the Divine Realm truly looked like, or how it differed from the Immortal Realm, Fang Bai did not know.

Perhaps only the Heaven Devouring Great Emperor, reborn from the Divine Realm, could explain it clearly.

Fang Bai's yearning for the Divine Realm stemmed from the tales that cultivating within it could lead to the realm of immortality.

Throughout the Immortal Realm, which Immortal did not wish for limitless life and undying eternity?

Fang Bai once pondered whether those Great Emperor Level Experts who had vanished among the three realms eons ago had indeed reached the far side of endless space and found the Divine Realm.

In his previous life, at his peak power, Fang Bai attempted to delve into the endless space. However, after just flying for a hundred breaths, he had to retreat because he couldn't withstand the fierce astral winds and terrifying pressure inside.

In this life, after interacting with the Heaven Devouring Great Emperor several times, Fang Bai realized that without reaching the Great Emperor Realm, seeking the far shore of endless space was likely impossible.

So, this time, he entered the endless space solely to find Starshine Stones for future cultivation and not to explore the deeper parts of the Endless Abyss.

Fang Bai traversed the endless space for several dozen breaths, gathering over a hundred Starshine Stones, before returning to the Emperor's Palace in the Immortal Realm.

"I've noticed that the current Starshine Stones in endless space are becoming scarcer. If this continues, future Emperor Realm experts will find it increasingly difficult to become a Great Emperor."

Fang Bai said with a wry smile to the Hundred Flowers Empress and the other Emperor Realm experts.

Upon entering the endless space, for every additional breath an Emperor Realm expert lingers, a large amount of Immortal Qi is consumed; yet to search for Starshine Stones, they must linger for a while.

Thus, any Emperor Realm expert who enters the endless space to search for Starshine Stones, upon their return to the Immortal Realm, will find their Immortal Qi nearly depleted and will need to focus on recovery for some time.

Fang Bai was no exception.

However, thanks to his unique physique, Fang Bai's recovery of Immortal Qi after returning from searching for Starshine Stones in endless space was several times faster than that of other Emperor Realm experts.

Originally, Fang Bai had the World Tree to provide an endless supply of Immortal Qi, but upon entering the endless space, some Immortal Trees and Immortal Fruits, including the World Tree, seemed to wither and no longer emitted Immortal Qi.

"It seems the World Tree belongs to the Immortal Realm. Now that immortal cultivation resources are scarce in the Immortal Realm, significantly limiting Immortal cultivation, if I become a Great Emperor, I hope to traverse the boundless stars and reach the Divine Realm, leaving the World Tree in the Immortal Realm to benefit the Immortals."

Fang Bai secretly made this decision.

Under Fang Bai's leadership and the guidance of several Immortal Emperors, the entire Emperor's Palace operated in a tense yet orderly manner.

Almost a hundred thousand immortals were assigned around the Emperor's Palace, relying on multiple Emperor Rank Formations set up by Fang Bai to prepare for the impending attack from six top-tier forces.

In Fang Bai's words, the Emperor's Palace was now ready for anything, just waiting for the six top-tier forces to arrive.

The disciples of the Emperor's Palace and those fighting alongside the palace were constantly motivated and inspired by Lightning Mink, Wu De, Ghost Hand, and other lower realm immortals, spending their days in an exhilarating state, eager to clash with the six top-tier forces immediately.

On this day, a few immortal birds subdued by the Qilin Immortal Emperor and Bixie Immortal Emperor flew over the Emperor's Palace, shrieking loudly.

These immortal birds had been patrolling and surveying thousands of miles away from the Emperor's Palace, providing early warnings for the palace disciples to prevent a surprise attack from the six top-tier forces.

"They've finally come!"

Fang Bai, leading several Immortal Emperors, stepped out of the Palace Master Hall, gazing at the immortal birds hovering in the sky, muttering to himself.

As he spoke, his expression was calm, and his tone was indifferent.

Before returning to the Immortal Realm and advancing to an Emperor Realm expert, Fang Bai constantly thought about rebuilding the Emperor's Palace and waging a revenge war against the eight top-tier forces.

However, as his power recovered and he had several interactions with the Heaven Devouring Great Emperor, Fang Bai's mindset underwent a significant change.

This change in mindset did not mean he no longer wished for revenge, but possessing immense strength and confidence, the matter of revenge seemed assured to him, without needing to expend much mental energy on it.

Now, he was more concerned about the Heaven Devouring Great Emperor who had escaped during the barrier battle.

Although the six top-tier Immortal Emperors posed a significant threat, they were out in the open, and for such threats, one could just meet them head-on.

But after the Heaven Devouring Great Emperor escaped, he vanished without a trace and never reappeared, which worried Fang Bai.

In Fang Bai's eyes, compared to the six top-tier Immortal Emperors, the threat posed by the Heaven Devouring Great Emperor was far greater.

If one day the Heaven Devouring Great Emperor regained his Great Emperor Realm cultivation, it would herald great calamity for the Immortal Realm when he reappeared.

Fang Bai certainly did not want the order he re-established in the Immortal Realm after defeating the six top-tier forces to be disrupted by the Heaven Devouring Great Emperor.

Therefore, upon learning that the six top-tier forces were heading toward the Emperor's Palace, while the other palace disciples were tense yet excited, his thoughts had already drifted far away.

Chapter 2702: Immortal Emperor vs. Immortal Emperor

"You don't need to worry, we still have a great chance of winning!"

Seeing that Fang Bai was somewhat "absent-minded," the Hundred Flowers Empress thought he was worried about the outcome of this battle and spoke softly.

As soon as she said this, the other Immortal Emperors also turned their gaze to Fang Bai.

"You are the Emperor's Palace Master, and now all the palace disciples and immortal allies are watching you. If you show a lack of confidence, it will greatly impact their morale. With the six major elite forces approaching, you should be full of fighting spirit and confidence!"

The Qilin Immortal Emperor reminded.

Among the nearly ten thousand immortals in the Emperor's Palace, Fang Bai was the most powerful, and he was the backbone of all immortals. His every move would have a significant impact, and the Qilin Immortal Emperor did not want other palace disciples to see him in a "distracted" state.

"We've conducted various rehearsals before, and the results show greater odds of victory. You shouldn't be worried!"

The Bixie Immortal Emperor glanced sideways at Fang Bai and said.

"How did you all deduce that I am worried? Let me tell you, in this battle, we will surely win! No one has more confidence than I do in the entire palace!"

Fang Bai came back to his senses, saw several Immortal Emperors watching him with concern, and replied with a smile.

The Tempest Immortal Emperor asked, "Then why just now...?"

Fang Bai said, "I just thought of something, that's all, lost in thought."

The Hundred Flowers Empress had a flash of insight, "Are you thinking about the Heaven Devouring Great Emperor?"

Fang Bai laughed, "You know me well, Baihua. Indeed, I'm not worried about this battle, but about the potential catastrophe in the Immortal Realm if the Heaven Devouring Great Emperor resurfaces."

The Hundred Flowers Empress thought of the Heaven Devouring Great Emperor's formidable strength, having been a Great Emperor Level Expert, and understood why Fang Bai was concerned.

"You're right! Compared to the six top Immortal Emperors, the Heaven Devouring Great Emperor is truly a more severe hidden danger!"

The Hundred Flowers Empress's radiant and beautiful face also showed a worried expression.

The Great Luo Immortal Emperor, who had past interactions with the Heaven Devouring Great Emperor, nodded in deep agreement.

As for the Qilin Immortal Emperor and the other four Immortal Emperors who had never dealt with the Heaven Devouring Great Emperor, they had only heard about him from Fang Bai, the Hundred Flowers Empress, and the Great Luo Immortal Emperor. Therefore, they did not feel that a reborn Great Emperor posed a greater threat than six top Immortal Emperors.

"Well, let's stop thinking about the Heaven Devouring Great Emperor for now! As of now, the Heaven Devouring Great Emperor is still only an Emperor Realm Expert. To restore himself to the Great Emperor Realm won't be that easy!"

Fang Bai exhaled a breath, smiling, "If one day he really does restore himself to the Great Emperor Realm, maybe by then I will have gained the strength to contend with him!"

Inside Fang Bai's Five Elements Space Ring, there was still a Great Emperor Pill. He believed that through his cultivation and the help of the Great Emperor Pill, his strength would make significant progress in the future.

Before long, Fang Bai and the other Immortal Emperors sensed the presence of the six top Immortal Emperors, knowing they had approached within thousands of miles of the Emperor's Palace.

The six top Immortal Emperors, each leading their own powerful forces, were closing in on the palace from six directions simultaneously.

Obviously, their objective was akin to their previous life targeting the Emperor's Palace; not only to destroy the New Imperial Palace but to annihilate the palace disciples and their allies.

"I will confront the Myriad Sword Immortal Emperor, Red Lotus Immortal Emperor, and the Qingtian Immortal Emperor! The other three, I'll leave to the six of you!"

Fang Bai swept his gaze over the Hundred Flowers Empress, Great Luo Immortal Emperor, Qilin Immortal Emperor, Bixie Immortal Emperor, Thunderflame Immortal Emperor, and the Tempest Immortal Emperor, and clasped his fists towards them solemnly, "The opponents are formidable, you must be cautious! If you find yourselves in jeopardy..."

He paused, pointing to the Lightning Mink on the side, raring to go, and continued, "You can send out a rescue signal, and Little Mink will provide support whenever needed."

The Lightning Mink pounded its chest with a resounding "thump," saying loudly, "If any of you can't hold on, remember to call me!"

The six Great Emperor Realm Experts, including the Great Luo Immortal Emperor, all smiled and nodded.

Although the six Immortal Emperors were tackling two with one, they did not have complete confidence to contend against three top Immortal Emperors. If Little Mink could offer assistance anytime, it would increase their odds of winning.

After watching Fang Bai leave, the Hundred Flowers Empress said to the Great Luo Immortal Emperor, "Shall we deal with the Ice River Empress?"

"Alright, as you say!"

The Great Luo Immortal Emperor smiled and nodded.

Among the eight top Immortal Emperors, the Hundred Flowers Empress hated the Ice River Empress the most.

The reason for the hatred stemmed from a thousand years ago when, before the eight top Immortal Emperors joined forces to attack Fang Bai, it was the Ice River Empress who, through deceit, approached Fang Bai and delivered an unexpected blow, causing Fang Bai to be injured and his combat power diminished.

Otherwise, Fang Bai might not have lost to the eight top Immortal Emperors, and that battle might have had a different outcome.

Hence, the Hundred Flowers Empress loathed the Ice River Empress to the bone, and she was the one she wanted to eliminate the most.

When Fang Bai took possession and reincarnated into the mundane world, what he shouted was "Fairy Spirit Qin," not Qin Yaorao, but rather the surname of the Ice River Empress.

"Shall we then deal with the Dragon Taming Emperor?"

Seeing that Fang Bai, the Hundred Flowers Empress, and the Great Luo Immortal Emperor each had targets, the Qilin Immortal Emperor set his sights on the Dragon Taming Emperor, also of the Beast Clan and an Emperor Realm Expert.

The Bixie Immortal Emperor naturally had no objections.

Thus, the two Beast Clan Emperor Realm Experts transformed into flowing light and flew up to meet the Dragon Taming Emperor.

"Only the Thunder Immortal Emperor left, let's go!"

The Tempest Immortal Emperor and Thunderflame Immortal Emperor exchanged smiles and also rode off on Auspicious Clouds.

Thus, of the eight Immortal Emperors in the palace, only the Lightning Mink remained in the Palace Master Hall Square, ready to provide support to palace disciples who encountered danger, while the other seven Immortal Emperors had all departed.

Fang Bai, moving like lightning, reached several thousand miles away in an instant, confronting the Myriad Sword Palace immortals led by the Myriad Sword Immortal Emperor.

To eradicate root and branch, to obliterate the reborn War Emperor and all palace disciples, the Myriad Sword Immortal Emperor and the other six top Immortal Emperors brought all their disciples with them.

Facing the Myriad Sword Palace disciples marching forward in a formation of at least a hundred thousand strong, mixed with numerous ferocious Immortal Birds and Immortal Beasts, they surged forth like an endless dark cloud, exerting a staggering aura.

"The... War Emperor..."

As soon as the Myriad Sword Immortal Emperor leading the Myriad Sword Palace immortals saw Fang Bai, his pupils constricted slightly, and he immediately halted.

The ten thousand disciples behind him also stopped one after another.

Back in the day, Fang Bai, under the title of War Emperor, swept the Immortal Realm and was nearly undefeated alone against the eight top Immortal Emperors.

Thus, although sensing Fang Bai's aura, knowing his current strength was far from what it had been in his previous life, the Myriad Sword Immortal Emperor still felt a bit uneasy remembering Fang Bai's past majestic prowess.

Fang Bai's appearance and attire at the moment were identical to that of the War Emperor of old, which is why the Myriad Sword Immortal Emperor recognized him at first glance.

Fang Bai restored his bygone appearance to psychologically intimidate the opponent, to instill fear before the battle even began.

"Myriad Sword Immortal Emperor, who would've thought we'd meet again!"

Fang Bai, looking at the tense and wary Myriad Sword Immortal Emperor, chuckled coldly.

Chapter 2703: One Slash Shatters Ten Thousand Swords

The Myriad Sword Immortal Emperor, truly worthy of being one of the top eight Immortal Emperors in the Immortal Realm, faced Fang Bai, and after the initial unease and tension, quickly calmed down.

"Unbelievable... truly unbelievable..."

The Myriad Sword Immortal Emperor looked at Fang Bai with a venomous and vicious gaze, gritted his teeth, and said, "Back in that battle, I thought you had perished completely, soul and body, yet I didn't expect you to reincarnate..."

After a pause, he continued, "But what does that matter? Although you've returned to the Emperor Realm and rebuilt the Emperor's Palace, your current power, and the overall strength of the Emperor's Palace are far inferior compared to back then..."

He sneered and said, "What a pity! You were too rash! If I were you, I would have stayed dormant and focused on cultivation, waiting until my strength returned to its peak, and the power of the Emperor's Palace strengthened, before announcing my presence to the Immortal Realm."

Fang Bai made a sound of "Oh" and smiled faintly as he replied, "Would it still be in time for me to regret it now?"

The Myriad Sword Immortal Emperor laughed loudly, "What do you think? A thousand years ago, I couldn't eliminate you, and many disciples of the Emperor's Palace escaped. Do you think we would make the same mistake again?"

Fang Bai said, "You're right! But when I think that if I lay low for another day, you bastards with hands stained with the blood of my palace's disciples will have another day of carefree existence, my heart is filled with rage that I cannot suppress. Therefore..."

He raised his hand and pointed at the Myriad Sword Immortal Emperor, his face solemn, his gaze sharp as a blade, and said coldly, "The blood debt from a thousand years ago, today your six top forces shall pay with blood!"

"With a handful of your palace's Immortals, do you dare to talk of revenge? You're seeking your own destruction!"

The Myriad Sword Immortal Emperor looked disdainful.

"Killing you all will be enough!"

As Fang Bai spoke, he disappeared from the spot and reappeared in front of the Myriad Sword Immortal Emperor, raising his hand with a Meteor Shower Fist strike.

Though this was the most basic Emperor Rank fist technique, when Fang Bai, with his Emperor Realm Cultivation, executed it once again, its power was incomparable to before.

The vast space before the Myriad Sword Immortal Emperor collapsed after the Meteor Shower Fist was cast.

Violent gusts of gales surged from the massive dark rift like a primordial beast charging out from the abyss, roaring toward the Myriad Sword Immortal Emperor.

The Myriad Sword Immortal Emperor, who had many encounters with Fang Bai in his past life, had witnessed his Meteor Shower Fist.

As Fang Bai struck, the initially indifferent him felt an overwhelming sense of powerless resistance, which surprised him greatly.

In his eyes, although Fang Bai's fist lacked the might of his peak a thousand years ago, it surpassed his own.

"How is this possible!"

The Myriad Sword Immortal Emperor was astonished, realizing that after ascending to the Emperor Realm, Fang Bai's aura was indeed less potent than his, yet his combat power exceeded his own.

Caught off guard and fearing Fang Bai's further moves, the Myriad Sword Immortal Emperor avoided a direct confrontation by shifting his form a thousand feet sideways, narrowly avoiding the strike.

Though he evaded, the formation of over ten thousand Myriad Sword Palace disciples behind him suffered.

The force of Fang Bai's Meteor Shower Fist, like a mountain of ten thousand feet, collided among the ten thousand Myriad Sword Palace disciples.

In an instant, clusters of blood mist exploded, hundreds of Myriad Sword Palace disciples were crushed by the overwhelming force.

The disciples of the Myriad Sword Palace initially thought the Palace Master would bear Fang Bai's strike and engage in a battle with him. They never expected the Palace Master to retreat a thousand feet, leaving their fates unattended.

As Immortal Emperors and Immortal King Realm experts, how could they withstand the fist force of an Emperor Realm expert?

Seeing one after another of their peers being blasted by the immense force and transformed into blood mist, incurring heavy losses, over ten thousand Myriad Sword Palace disciples were terrified and scattered abruptly.

Fang Bai unleashed a strike, crushing hundreds of Myriad Sword Palace disciples without the slightest pride.

In his view, the tens of thousands of Myriad Sword Palace disciples were nothing more than a rabble. Once the Myriad Sword Immortal Emperor was slain, they would disperse like monkeys from a fallen tree.

The same applied to the other five top forces.

Therefore, Fang Bai paid no attention to the fleeing Myriad Sword Palace disciples, shifting his form to confront the Myriad Sword Immortal Emperor once again.

"Damn it!"

Seeing Fang Bai wipe out hundreds of his palace's disciples in an instant, the Myriad Sword Immortal Emperor's heart burned with fury.

He lightly touched his brow, and a golden long sword flew out from his Sea of Consciousness, swiftly transforming into a towering giant sword, slashing towards Fang Bai.

As the giant sword descended, it turned into thousands of sword shadows, forming a dense curtain of swords, covering an area of hundreds of miles. The dazzling golden light was blinding, and the space around Fang Bai was completely sealed, leaving no room to escape.

The void beneath the sword curtain was sliced into pieces by thousands of sword shadows, exposing endless space, like giant beasts opening their mouths to devour Fang Bai.

This was one of the most formidable secret techniques of the Myriad Sword Immortal Emperor, akin to Fang Bai's Golden System Secret Technique, Myriad Sword to Origin.

The Myriad Sword Immortal Emperor aimed to overshadow the other five top Immortal Emperors, securing the Myriad Sword Palace's future leadership in the Immortal Realm. Thus, when he went on the offensive, it was a strike with his strongest killing move.

The newly established Emperor's Palace had several Immortal Emperors as support, but the six top Immortal Emperors only feared Fang Bai.

If Fang Bai were to die, the New Imperial Palace would crumble without force, and then the six top forces could annihilate them, slaughtering all Emperor's Palace disciples and supporting immortals, leaving no threat behind.

Had it been another ordinary Immortal Emperor under such an attack from the Myriad Sword Immortal Emperor's secret technique, they would only manage to fend it off with full effort and inevitably suffer wounds.

Watching Fang Bai's figure swallowed by the sword curtain spanning hundreds of miles, the Myriad Sword Immortal Emperor wore a triumphant expression.

He believed that despite Fang Bai's combat prowess surpassing his own, with the Emperor's Instruments in hand, he regains the upper hand over Fang Bai.

This sword strike, even if it couldn't severely injure Fang Bai, would leave him marked and slightly weaken his combat strength.

"Buzz!"

A deafening roar suddenly sounded, followed by a series of dense metallic clashes.

Thousands of blood-colored blade rays, like erupting volcanic magma, tore through the sword curtain that enveloped the sky.

The next moment, in the eyes of the incredulous Myriad Sword Immortal Emperor, Fang Bai holding the Blood-Drinking Mad Blade soared into the sky, once again suspended before the Myriad Sword Immortal Emperor.

"You... you..."

Gazing at the majestic emperor, sleeves fluttering, and the blood blade in Fang Bai's grip, the Myriad Sword Immortal Emperor's eyes showed hints of fear.

He could see that Fang Bai's blood blade was stronger than his gold sword in rank, counteracting the power of his Emperor's Instruments, and reclaiming dominance.

"I remember this secret technique of yours is called 'Myriad Sword Exterminate the Immortal', right? Well, compared to a thousand years ago, it indeed has become much stronger. So you should remember, I have a similar secret technique, Myriad Sword to Origin..."

As Fang Bai spoke, the Blood-Drinking Mad Blade in his hand flew into the air, surprisingly wielding the Myriad Sword to Origin Secret Art with the blade.

Chapter 2704: Joining Forces

A similar secret technique was unleashed by Fang Bai with the Blood-Drinking Mad Blade, its power several times stronger than the Myriad Sword Exterminate the Immortal from the Myriad Sword Immortal Emperor.

The Myriad Sword Immortal Emperor watched as the myriad blood-colored blades descended from the sky, feeling a life-threatening danger, yet realizing he couldn't tear the void to escape, leaving his face pale and heart terrified.

He never expected that Fang Bai, who had just been reborn into the Emperor Realm, could erupt with such formidable power.

Although he had the aid of that Blood Blade, Fang Bai's own combat strength was clearly superior.

The combination constituted a strong threat against him.

The Myriad Sword Immortal Emperor knew well that even if he exerted all his might to withstand this attack from Fang Bai, he would undoubtedly be seriously injured.

If Fang Bai launched several more attacks in succession, his ending would definitely be miserable.

Therefore, the Myriad Sword Immortal Emperor made a swift decision.

He wielded his Gold Sword to counter the descending blood blades while forming a Defense Qi Shield around himself and simultaneously sent out a series of urgent whistles, summoning other Immortal Emperors for aid.

Before charging into the Emperor's Palace, the six top-tier immortals had agreed that if any party faced a critical threat, they would use the whistle to seek help, and any available Immortals must rush to aid in time.

"Boom!"

In an instant, countless blood-colored blades unleashed by Fang Bai with the Blood-Drinking Mad Blade descended like a storm.

Several of these blades struck the sword curtain created by the Myriad Sword Immortal Emperor's Gold Sword, shattering it instantly.

Those few blood blades paused for a moment, and then continued to fall.

The Myriad Sword Immortal Emperor roared, concentrating all his Defense Qi Shield above his head to resist the momentum of those relentless blood blades.

"Sizzle!"

"Puff!"

Following a piercing sound of air being split, the thick layer of Defense Qi Shield above the Myriad Sword Immortal Emperor was torn apart by the blood blades, with one of the blades severing his left arm.

The Myriad Sword Exterminate the Immortal by the Myriad Sword Immortal Emperor failed to harm Fang Bai in the slightest, but Fang Bai's Myriad Sword to Origin managed to cut off an arm.

The two Immortal Emperors were instantly compared in strength.

Just then, two flashes of light appeared on either side, moving at incredible speed, and suddenly stopped several hundred meters away.

The two flashes materialized into two towering figures with Emperor Realm might, two Emperor Realm Experts.

"Red Lotus Immortal Emperor... Qingtian Immortal Emperor..."

Fang Bai glanced at the two Emperor Realm Experts, his gaze cold as a blade.

The Myriad Sword Immortal Emperor, with one arm severed, flew between the Red Lotus Immortal Emperor and the Qingtian Immortal Emperor, exhaling with relief.

"You two arrived just in time, or my life would be in peril!"

The Myriad Sword Immortal Emperor swallowed an Emperor Elixir, his Immortal Qi quickly circulating within, stopping the bleeding, and slowly regenerating a new arm.

"War Emperor..."

The Red Lotus Immortal Emperor and Qingtian Immortal Emperor looked at the Myriad Sword Immortal Emperor with an amputated arm, then at Fang Bai standing with eyes flashing coldly several hundred meters away.

As that familiar face entered their view, the two Immortal Emperors looked at each other and saw a bit of apprehension in each other's expressions.

They originally thought that with six Immortal Emperors arriving together, they could destroy the New Imperial Palace with overwhelming force and then encircle and kill the reborn War Emperor once again.

Yet, they never expected that before even reaching the Emperor's Palace, their ranks — including the Myriad Sword Immortal Emperor, Ice River Empress, Dragon Taming Emperor, Thunder Immortal Emperor — encountered interception by several Emperor's Palace Immortals.

And those without opponents, Red Lotus Immortal Emperor and Qingtian Immortal Emperor, planned to head straight to the Emperor's Palace, intending to destroy it first, only to suddenly receive a call for help from the Myriad Sword Immortal Emperor.

Upon arriving at the scene, they were shocked to find the Myriad Sword Immortal Emperor with his arm severed.

They believed that War Emperor's rebirth and recent entry into the Emperor Realm would make his strength at most on par with them, yet never imagined that after only a few exchanges, the Myriad Sword Immortal Emperor had been forced to amputate an arm.

Although losing an arm was not significant for a top-tier Immortal Emperor and it would soon regenerate, it was ample proof that War Emperor's power far exceeded their previous estimates.

The Red Lotus Immortal Emperor and Qingtian Immortal Emperor even thought that if they had arrived just moments later, the Myriad Sword Immortal Emperor might have lost more than just a left arm.

Seeing Red Lotus Immortal Emperor and Qingtian Immortal Emperor arrive and stand alongside the Myriad Sword Immortal Emperor, Fang Bai did not rush to attack again.

He knew that with his current strength, it would be difficult to slay three top-tier Immortal Emperors, and being able to repel them was sufficient.

"His strength is too formidable, only by us three joining forces do we have any hope of killing him!"

The Myriad Sword Immortal Emperor glanced at his newly regenerated left arm, relieved that it wouldn't affect his battle strength, then spoke to Red Lotus Immortal Emperor and Qingtian Immortal Emperor.

The Red Lotus Immortal Emperor and Qingtian Immortal Emperor nodded solemnly.

They knew that for the Myriad Sword Immortal Emperor to suggest joining forces meant that none of them were Fang Bai's match in a one-on-one battle.

Top-tier Immortal Emperors are extremely proud and haughty, unwilling to join forces against any other Immortal Emperor.

But the current situation was unique, as they faced the War Emperor, someone they couldn't approach before, who once exerted significant psychological pressure on them.

They understood that if they couldn't kill the War Emperor in this battle and he escaped, it would spell endless trouble.

Thus, in the next moment, they surrounded Fang Bai, each wielding Emperor's Instruments, ready to join forces to try and kill him.

Since the alliance of eight top-tier Immortal Emperors to besiege the War Emperor a thousand years ago, such a gathering of several top-tier Immortal Emperors was the first.

The three top-tier Immortal Emperors unleashed potent pressure, encircling Fang Bai, with terrifying compression rushing from all directions against Fang Bai's body.

If an ordinary Immortal was caught between such pressure, they would likely suffer severe injuries right away.

Yet Fang Bai wore a disdainful expression, refusing to summon a Defense Qi Shield, relying solely on his physical body to withstand the pressure from the three top-tier Immortal Emperors.

"Attack!"

The three top-tier Immortal Emperors were not expecting pressure alone to defeat Fang Bai, and they wielded their Emperor's Instruments, aiming at Fang Bai.

At the same time, the Hundred Flowers Empress, Great Luo Immortal Emperor, Qilin Immortal Emperor, Bixie Immortal Emperor, Tempest Immortal Emperor, and Thunderflame Immortal Emperor each faced off against a top-tier Immortal Emperor.

The tens of thousands of Immortals following six top-tier Immortals towards the Emperor's Palace bypassed the site of the battle between the Immortals, aiming directly for nearly ten thousand Emperor's Palace Immortals.

With tens of thousands of Immortals against less than ten thousand Emperor's Palace Immortals, they held an absolute advantage, expecting to destroy the Emperor's Palace and annihilate all Emperor's Palace Immortals swiftly.

Yet, as they encircled the Emperor's Palace, they discovered layers of formations implementing both attack and defense had already been activated around it.

"Kill!"

The tens of thousands of Immortals from top-tier factions, unaware of the formations' might, charged forward shouting war cries.

Chapter 2705: Offensive and Defensive Mastery

The first wave of Immortals from the six top-tier forces who charged into the Formations failed to break them as they had wished, and instead suffered a ferocious counterattack from the arrays.

In an instant, blood filled the air, flesh and bone flew, and miserable screams rang out without end.

The layers of Immortal Arrays personally laid down by Fang Bai were like one meat grinder after another, ruthlessly harvesting the lives of the Immortals from the six top-tier forces.

Not long after, that first wave of Immortals from the six top-tier forces who had fallen into the Formations were all annihilated within them.

The pervasive stench of blood, the severed limbs scattered across the ground, the vast number of destroyed Immortal Artifacts... all this proclaimed the might of the Emperor's Palace Formations and the grievous losses of the six top-tier forces.

Watching so many of their companions fall within the Formations, the Immortals of the six top-tier forces finally realized how fearsome those arrays were.

They no longer dared to risk their lives, but encircled the Emperor's Palace layer upon layer, shouting ceaselessly, trying to enrage the Immortals of the Emperor's Palace under the protection of the Formations into coming out to face them.

"Master Mink knows you all want to go out and fight a great battle to your heart's content, but the Palace Master already spoke: without his permission, no one is allowed to go out and fight on their own..."

Lightning Mink stood on the plaza before the Palace Master Hall, his gaze sweeping over the tens of thousands of Emperor's Palace Immortals all around, and shouted loudly.

He could see that the Immortals of the Emperor's Palace were all high-spirited, their battle intent surging; they had no fear whatsoever of the six top-tier forces whose numbers were nearly ten times their own.

If not for the restraint of himself, an Emperor Realm Expert, he feared that the impassioned Immortals of the Emperor's Palace would already have rushed out of the Immortal Arrays to clash with the six top-tier forces in a great battle.

In truth, Lightning Mink himself very much wanted to go out and battle the Immortals of the six top-tier forces, but when he thought of Fang Bai's instructions, he forcibly suppressed that impulse.

Fang Bai had told Lightning Mink that the overall strength of the six top-tier forces far surpassed that of the Emperor's Palace, and so this time the Emperor's Palace must respond primarily with defense.

As long as they could repel the six top-tier forces, it would already be a great victory for the Emperor's Palace.

Of course, if Fang Bai and the other Immortal Emperors could defeat the six top-tier Immortal Emperors, then the hundreds of thousands of Immortals from the six top-tier forces would collapse.

At that time, the Emperor's Palace Disciples could seize the momentum and strike, mercilessly beating the dogs that had fallen into the water.

Thus, all the Immortals of the Emperor's Palace were waiting, hoping for good news to arrive.

"They're fighting so fiercely out there! When will Master Mink get to have some fun too!"

Lightning Mink's Divine Sense diffused in all directions; discovering that the void in several directions was constantly collapsing and then being restored by the laws of heaven and earth, he knew that must be the battlefield of Fang Bai and the other Emperor Realm Experts. He did not know how their battle was faring at this moment, and he scratched his ears in anxious frustration.

"The strength of top-tier Immortal Emperors is by no means weak! I wonder if Fang Bai, facing three alone, can force his opponents back!"

"He has Divine Artifacts assisting him; that should be enough, shouldn't it!"

"I really want to go help him! Sadly my strength is too weak—if I leave the protection of these Formations, my life might be forfeit!"

"Fang Bai doesn't like to boast! If he dares to face three top-tier Immortal Emperors alone, that proves he has confidence in defeating them!"

"Just sit tight and wait! Perhaps good news will arrive very soon!"

...

Xia Chenyu, Qin Yaorao and the other Female Immortals, like the many Emperor's Palace Immortals, were gathered on the plaza before the Palace Master Hall, clustered together and whispering among themselves.

As for the hundreds of thousands of Disciples from the six top-tier forces being blocked outside the Emperor's Palace Formations, they simply did not take them to heart.

To break the Formations set up by Fang Bai, one would either have to be more accomplished than Fang Bai in the Array Path, or possess strength far surpassing Fang Bai's to forcibly destroy the arrays, or else wait until the Immortal Stones maintaining the circulation of the Formations were exhausted; aside from these, there was no other way.

As for the first two points, even the six top-tier Immortal Emperors were incapable of achieving them.

As for Immortal Stones, the Emperor's Palace reserves were vast, enough to sustain the circulation of the Formations around the Emperor's Palace for years on end.

Thus, with the Disciples of the Emperor's Palace under the protection of the Formations, they had no need to worry that the Immortals of the six top-tier forces would break the arrays and charge inside.

The tens of thousands of Emperor's Palace Immortals gathered on the plaza before the Palace Master Hall, idle with nothing to do, kept one eye on the movements around the Formations, while silently rehearsing Combined Assault Formations, waiting only for the six top-tier Immortal Emperors to be driven back by Fang Bai and the Emperor Realm Experts of the Emperor's Palace side, so that they too could rush out and slaughter to their hearts' content.

In the void to the southwest of the Emperor's Palace, ten thousand miles distant from it, the Hundred Flowers Empress and the Great Luo Immortal Emperor were currently standing shoulder to shoulder, joining forces in a great battle against the Ice River Empress.

The Hundred Flowers Empress, who hated the Ice River Empress to the bone, wore a beautiful face filled with killing intent, her silver teeth clenched, both hands gripping the Bipartite Dual Swords, which she

swung in interweaving arcs, transforming into ten thousand sword shadows, wishing she could slay the Ice River Empress with a single stroke.

The Great Luo Immortal Emperor had previously rehearsed combined attack methods many times with the Hundred Flowers Empress; his coordination with her was seamless, and for the moment they were faintly gaining the upper hand.

The Ice River Empress had not expected to be held up here by two Immortal Emperors of the Emperor's Palace, and she could not help but feel somewhat agitated.

Especially just now, when she heard the howling call for aid from the Myriad Sword Immortal Emperor, she realized that today's battle was by no means proceeding as smoothly as she had imagined beforehand.

Before coming to the Emperor's Palace, the six top-tier Immortal Emperors had already thoroughly investigated the Emperor's Palace's situation, and knew that including Fang Bai, there were eight Immortal Emperors stationed there.

Although the Emperor Realm Experts of the Emperor's Palace outnumbered them by two, as old-brand top-tier Immortal Emperors they had confidence in each fighting two at once; in that case, only if the Emperor's Palace had more than ten Emperor Realm Experts could it truly contend with them.

Yet the reality was that within just a few breaths of contact, the Myriad Sword Immortal Emperor, one of the six top-tier Immortal Emperors, had already begun to cry for aid; the other five top-tier Immortal Emperors had all heard that call.

However, apart from the Red Lotus Immortal Emperor and the Qingtian Immortal Emperor, the remaining three top-tier Immortal Emperors, including the Ice River Empress, were all entangled by the Emperor Realm Experts of the Emperor's Palace, unable to break free to aid the Myriad Sword Immortal Emperor.

The battlefields of the few top-tier Immortal Emperors were not too far apart, and they could occasionally probe each other with Divine Sense.

When the Ice River Empress discovered that the former War Emperor was actually fighting three opponents alone and yet not falling into disadvantage, she could not help but draw in a cold breath.

"No wonder, with his strength not yet restored to its former peak realm, he still dared to announce the reconstruction of the Emperor's Palace... If some time passes and his power fully recovers, I fear that even if our six top-tier Immortal Emperors join forces, we may be unable to defeat him."

Thinking of this, the Ice River Empress couldn't help but shiver, and resolved that in this battle Fang Bai must be slain no matter what, otherwise in the future it might be they, the six top-tier Immortal Emperors, who would be cut down.

The other several top-tier Immortal Emperors harbored the same thoughts as the Ice River Empress, knowing that this battle concerned their future life and death; thus all fought with Emperor's Instruments in hand, attacking with their full might.

"Ice River, a thousand years ago your hands were drenched in the blood of the Emperor's Palace Disciples—today I'll make you repay it double!"

With a cold shout from the Hundred Flowers Empress, the Bipartite Dual Swords danced, and curtain after curtain of sword light poured down like the waters of the Galaxy, cascading toward the Ice River Empress.

The Great Luo Immortal Emperor's face was solemn as his palms struck out again and again; massive golden palms, bearing boundless imperial might, followed close behind those curtains of sword light, rumbling as they smashed down upon the Ice River Empress.

Chapter 2706: The Sudden Appearance of the Demon Emperor

The battle between the six top factions and the New Imperial Palace is closely watched by the entire Immortal Realm.

The outcome of this battle is not only crucial for the survival of the six top factions and the New Imperial Palace, but it will also have a profound impact on the Immortal Realm.

The various sects and Loose Cultivators of the Immortal Realm, fed up with the oppression from the six top factions, naturally hope for the victory of the Palace to reshape the Immortal Realm's order and restore a fair, peaceful, and harmonious environment.

However, before the winner is decided, they can only keep this idea to themselves, not daring to openly express it.

Otherwise, if the Palace were to be destroyed by the six top factions, the Immortal Realm would remain the same, and these Immortals would continue to live under the shadow of the six top factions.

Except for a few sects and Immortals who have explicitly expressed support for either the Palace or the six top factions, the majority wisely remain neutral.

Claiming neutrality is actually just watching and waiting for the direction.

Once one side gains an advantage, some sects or Immortals among them will be unable to resist joining the side in the ascendancy.

The battle at the Emperor's Palace has continued for more than ten days without a clear victor.

All Immortals know that, given the evenly matched situation, this is destined to be a prolonged conflict.

Those sects or Immortals who initially did not favor the New Imperial Palace thought it would quickly collapse under the thunderous attack of the six top factions.

They did not expect the new Palace to not only withstand the assault of the six top factions but also fight them to a standstill.

According to some circulating rumors, the Emperor's Palace Master, with a single force, fought against three top Immortal Emperors without defeat, greatly hindering the six top factions' offensive.

The other three top Immortal Emperors were also entangled by six Immortal Emperors stationed within the Palace, unable to extricate themselves.

As for the tens of thousands of Immortals under the six top factions, when attacking the less than ten thousand Palace Immortals, they were thwarted by the Palace's layers of Formation. Not only did they fail to harm a single Palace Immortal, but they suffered heavy losses instead.

Through this information, some observant sects or Immortals understand that by relying on the numerically superior Emperor Realm Experts and the protective Formations surrounding the Palace, it has already maintained an unbeaten position in this battle.

Although the current strength of the War Emperor cannot be compared with his power from a thousand years ago when he fought against eight top Immortal Emperors, now only six remain.

Moreover, the Palace has been well-prepared in anticipation of this great battle, with seven Immortal Emperors assisting, making it unlikely for the six top factions to eliminate the New Imperial Palace.

One can imagine that if in this battle the six top factions cannot undermine the Palace, then the Palace will firmly establish its footing in the Immortal Realm, and some sects or Immortals who were neutral will undoubtedly choose to side with the Palace.

If this happens, the strength of the Palace and the six top factions will shift, possibly even reverse, causing the Palace to shift from defense to offense.

The six top Immortal Emperors understand this more clearly than anyone.

Hence, for them, this battle must be won and cannot be lost.

If victorious, the Palace will be destroyed, and the six top factions will continue to rule the Immortal Realm.

If defeated, it will mark the beginning of their decline.

Tens of thousands of Immortals from the six top factions surround less than ten thousand Palace Immortals, with repeated attacks and pauses, paying the price of thousands of fallen Immortals, yet still unable to breach the Formations around the Palace.

The battle between the six top Immortal Emperors and Fang Bai along with the Palace's seven Immortal Emperors also remains in deadlock.

No one can predict when the winner will be determined.

One day, a Demon Emperor unexpectedly tore the void and appeared at the battle site, joining the Red Lotus Immortal Emperor and Qingtian Immortal Emperor's side, attacking Fang Bai along with them.

"Carefree Immortal Emperor!"

When the three Immortal Emperors recognized the Demon Emperor's figure and appearance, they realized he was the City Lord of Bluewater Immortal City, a legend who fell into the Demon Dao after cultivating the Heaven Devouring Art, the Carefree Immortal Emperor.

Red Lotus Immortal Emperor and Qingtian Immortal Emperor were puzzled, not understanding why the Carefree Immortal Emperor was helping them.

Nonetheless, the Carefree Immortal Emperor's addition immediately gave them the upper hand, filling them with secret joy.

Despite the hostility between the Demon Clan and Immortals, at this moment, Red Lotus Immortal Emperor and Qingtian Immortal Emperor see Fang Bai as a life-or-death enemy, and they are willing to team up with the Demon Emperor to kill him.

Seeing the vacant gaze of the Carefree Immortal Emperor, Fang Bai realized he might be under mental control; otherwise, with the ruthless and unbridled nature of the Demon Clan, he would not merely attack him.

And who could control such a powerful figure as the Carefree Immortal Emperor? From the three realms, Fang Bai could only think of the Heaven Devouring Great Emperor.

The Heaven Devouring Great Emperor, who had been elusive, was a lingering shadow over Fang Bai's heart; thus, at the thought of him, Fang Bai's heart skipped a beat, and he immediately released his Divine Sense to detect the Heaven Devouring Great Emperor's whereabouts.

Although Fang Bai had severely injured the Heaven Devouring Great Emperor earlier, as time has passed, Fang Bai does not know what recovery he has made; if he has recovered seventy to eighty percent, his combat power equates to that of a top Immortal Emperor.

And in the current nearly evenly matched battle, if the Heaven Devouring Great Emperor and Carefree Immortal Emperor joined the six top factions, it would be an extremely unfavorable outcome for the Palace.

Fang Bai worried the Heaven Devouring Great Emperor would interfere in the battle, yet unexpectedly he indeed arrived.

Spatial fluctuations appeared as a rift opened, and a shadow flickered out from within.

"Hehehe..."

Upon hearing this eerie, cold laugh, Fang Bai realized the Heaven Devouring Great Emperor had arrived.

The aura emanating from the Heaven Devouring Great Emperor indicated his power had not fully returned to its peak; he was not in a state to confront Fang Bai alone, but he could match any of the six top Immortal Emperors.

"A Carefree Immortal Emperor and a Heaven Devouring Great Emperor comparable to a top Immortal Emperor, their appearance is indeed untimely!"

Fang Bai sighed secretly in his heart.

The Heaven Devouring Great Emperor resented Fang Bai for seizing his Great Emperor Pill and the Spatial Demon Ring; after fleeing, he sought a secluded location to focus on healing.

Once his injuries had recovered seventy to eighty percent, he was eager to reappear in the Immortal Realm, seeking Fang Bai's trail to reclaim the Great Emperor Pill and the Spatial Demon Ring.

Later, news of the newly constructed Imperial Palace spread, causing a stir in the Immortal Realm; inquiring circumspectly, the Heaven Devouring Great Emperor learned that the Palace Master was the Immortal who had seized his Great Emperor Pill and Spatial Demon Ring.

Yet, with tens of thousands of Palace Immortals, several Immortal Emperors on guard, and the formidable opponent Fang Bai, the Heaven Devouring Great Emperor dared not confront them directly.

Thus he lay in wait, silently biding his time.

He later encountered the Carefree Immortal Emperor who had fallen into the Demon Dao; the Heaven Devouring Great Emperor subdued him, controlling his mind for his own use.

Seeing the six top factions join forces against the Palace, the Heaven Devouring Great Emperor realized his chance had come.

Chapter 2707: Primordial Spirit Returns

Fang Bai was evenly matched with the Red Lotus Immortal Emperor and the Qingtian Immortal Emperor, making it difficult to determine a winner, but the sudden involvement of the Carefree Immortal Emperor immediately put him at a disadvantage, turning what was once a balanced offensive and defensive situation into a full-scale defense.

If the Heaven Devouring Great Emperor were to intervene subsequently, Fang Bai would have no choice but to retreat, relying on the Emperor's Palace Formation to stand against them.

However, it seemed that the Heaven Devouring Great Emperor was also quite skilled in formations, leaving Fang Bai uncertain if his own formation would be deciphered.

"Hand over the Great Emperor Pill and the Spatial Demon Ring, and I will immediately withdraw, no longer participating in the struggle between you. Otherwise, I will have no choice but to join these two Immortal Emperors in taking you down!"

The Heaven Devouring Great Emperor looked on gleefully at Fang Bai, who was suppressed by the combined forces of the Red Lotus Immortal Emperor, Qingtian Immortal Emperor, and Carefree Immortal Emperor.

The Red Lotus Immortal Emperor and Qingtian Immortal Emperor felt a jolt upon hearing the words "Great Emperor Pill."

As top-tier Immortal Emperors, they had never seen the Great Emperor Pill, but they had heard of it, knowing it was used by Great Emperor Level Experts for cultivation aid thousands of years ago.

Previously, however, they never thought to associate the Great Emperor Pill with Fang Bai.

And from where did the newly appeared Demon Emperor obtain the Great Emperor Pill?

They wondered this in their hearts, yet their offensive did not cease, lest they give Fang Bai a chance to breathe or even escape.

"You want the Great Emperor Pill? Keep dreaming!"

Fang Bai knew that if he returned the Great Emperor Pill to the Heaven Devouring Great Emperor, the latter's eventual rise to the Great Emperor Realm would pose a far greater threat to the Immortal Realm than the six top-tier Immortal Emperors.

Not relinquishing the Great Emperor Pill would at worst mean retreating to the Emperor's Palace, relying on formations to fend off enemies.

If the Emperor's Palace could not hold, he would simply gather the tens of thousands of Emperor's Palace Immortals into the Five Elements Space Ring and escape through a tear in the void with them.

Fang Bai believed that as long as he wanted to escape, no Immortal could stop him.

At that time, the only regret would be that the newly built New Imperial Palace with the Emperor's Palace disciples might be destroyed.

However, as long as he and the Emperor's Palace Immortals remained safe, they could rebuild the palace anytime, anywhere.

With this thought in mind, Fang Bai firmly refused the Heaven Devouring Great Emperor.

"If you don't hand over the Great Emperor Pill, then you shall die!"

As the Heaven Devouring Great Emperor spoke, he took up the Heaven Devouring Pot and joined in the siege on Fang Bai.

Upon seeing the Heaven Devouring Pot emerge, the Red Lotus Immortal Emperor and Qingtian Immortal Emperor exchanged a knowing glance.

When Fang Bai previously fought them both, his use of the Blood-Drinking Mad Blade already caught their attention, leading them to believe it was an extraordinary Emperor's Instrument, likely used by Great Emperor Level Experts, far surpassing the instruments used by them as Immortal Emperors.

They were contemplating how to distribute the Blood-Drinking Mad Blade after killing Fang Bai, only to find that the newly arrived Demon Emperor also wielded an Emperor's Instrument of no less rank.

Both top-tier Immortal Emperors felt a rush of excitement. Their brief exchange of glances revealed their mutual understanding.

They planned to first ally with the two Demon Emperors to slay Fang Bai, then turn on the Demon Emperors to claim the high-rank Emperor's Instruments and the Great Emperor Pill mentioned by both the Demon Emperor and Fang Bai.

As for the origins of the two Demon Emperors and why they collaborated against Fang Bai, they couldn't care less.

Of the two Demon Emperors, one was a top-tier Demon Emperor, the other an ordinary Demon Emperor, and the Red Lotus Immortal Emperor and Qingtian Immortal Emperor felt confident in removing them both after beheading Fang Bai.

Thus, with Fang Bai ensnared by the encirclement of four Emperor Realm experts, only wielding the Blood-Drinking Mad Blade to fend off enemies, he was in a precarious situation.

Though reluctant to expose too many trump cards, the appearance of the Heaven Devouring Great Emperor forced Fang Bai to go all out.

Light glimmered at the center of Fang Bai's brows from his Sea of Consciousness.

In the next moment, the Five Elements Origin Qi Cauldron and the Pangu Axe appeared beside Fang Bai.

Gripping the Blood-Drinking Mad Blade, Fang Bai could spare no attention to control the Five Elements Origin Qi Cauldron and Pangu Axe, having to rely on these two Divine Artifacts to autonomously guard against foes.

This inevitably weakened the power of the two Divine Artifacts.

The Heaven Devouring Great Emperor stared intently at Fang Bai's Blood-Drinking Mad Blade, Pangu Axe, and Five Elements Origin Qi Cauldron, greed shining in his blood-red eyes.

He could never fathom how this mere Immortal from the Immortal Realm, Fang Bai, came to possess these three Divine Artifacts.

The expressions of the Red Lotus Immortal Emperor and Qingtian Immortal Emperor were no different from that of the Heaven Devouring Great Emperor, intensifying their eagerness to slay Fang Bai.

Fang Bai's Pangu Axe and Five Elements Origin Qi Cauldron successfully blocked the Heaven Devouring Great Emperor's attack yet showed signs of struggling to continue.

Meanwhile, Fang Bai still faced the onslaught from the combined forces of the Red Lotus Immortal Emperor, Qingtian Immortal Emperor, and Carefree Immortal Emperor.

Continuing this way would only lead to Fang Bai's eventual defeat.

Fang Bai originally intended to call forth the Lightning Mink from the Palace Master Hall to aid him but quickly dismissed the idea.

With the Lightning Mink stationed at the Palace Master Hall, the tens of thousands of Emperor's Palace Immortals found a source of confidence, besides, the Lightning Mink understood some formation techniques, paying attention to the Palace Formation for any issues.

If the Lightning Mink were to leave, the Emperor's Palace Immortals would sense the critical situation and their assured victory belief might waver.

"I am a true Emperor Realm expert now, my realm solidified, and my Primordial Spirit no longer as fragile as before. It's time to exert strength!"

With this thought, Fang Bai's mind moved, and the Golden Attribute Essence Spirit and Wood Attribute Essence Spirit in his Qi Sea responded to his summons by abruptly opening their eyes.

The aura around Fang Bai surged, divine radiance revolving around his Qi Sea, brimming with luminescence.

Under the astonished gaze of the Red Lotus Immortal Emperor and the three other Emperor Realm experts, two Primordial Spirits appeared by Fang Bai's sides.

The two Primordial Spirits mirrored Fang Bai in appearance, although their eyes lacked some vitality.

The Golden Attribute Essence Spirit emanated a dazzling golden glow.

The Wood Attribute Essence Spirit was surrounded by a verdant glow, exuding a powerful life force.

Once both Primordial Spirits were by Fang Bai's side, one firmly grasped the Pangu Axe, while the other held the Five Elements Origin Qi Cauldron atop its palm.

"Finally willing to bring out your Primordial Spirit to assist in battle?"

The Red Lotus Immortal Emperor and Qingtian Immortal Emperor sneered at Fang Bai unveiling his two Primordial Spirits.

In his previous life, Fang Bai possessed a unique Desolate Ancient Divine Body of the Three Realms, with all five Innate Spiritual Roots, causing significant wariness among the eight top-tier Immortal Emperors.

However, with Fang Bai's former physical body destroyed, the Desolate Ancient Divine Body no longer existed. In this life, though reborn through a takeover, it was unlikely he could repeat acquiring an exceedingly rare Desolate Ancient Divine Body from the Immortal Realm.

After returning to the Immortal Realm, Fang Bai continually concealed his aura, suppressing his cultivation level.

Based on gathered information, the six top-tier Immortal Emperors speculated that Fang Bai probably only possessed a Dual Attribute Innate Spiritual Root, a far cry from the body possessing all five Innate Spiritual Roots in his previous life, thus putting their concerns at ease.

Chapter 2708: What Is Your Motive

The Red Lotus Immortal Emperor and the other top three Immortal Emperors had long anticipated that Fang Bai, with his dual attribute innate spiritual roots, when driven to the brink, would certainly use his primordial spirit to aid in battle.

However, even though Fang Bai had the aid of his primordial spirit, they too had theirs, which meant that the combat strength enhanced by both parties' primordial spirits would cancel each other out, leaving Fang Bai still at a disadvantage.

Yet, despite their calculations, they never expected Fang Bai to possess several divine artifacts.

As Fang Bai released his two primordial spirits, each taking hold of the Pangu Axe and the Five Elements Origin Qi Cauldron, they positioned back-to-back with Fang Bai, forming a triangular stance to launch a fierce counterattack against the Red Lotus Immortal Emperor, Qingtian Immortal Emperor, Myriad Sword Immortal Emperor, Heaven Devouring Great Emperor, and Carefree Demon Emperor.

The three top Immortal Emperors were secretly shocked, realizing that Fang Bai's two primordial spirits, with the cooperation of the Emperor's Instruments in their hands, had their combat strength soar, surpassing them.

They understood that if not for the assistance of the two Demon Emperors today, even if they resorted to their primordial spirits to fight against Fang Bai, they would still be no match.

"Join forces to kill this immortal, and everything on him will belong to you!"

The Red Lotus Immortal Emperor transmitted his voice to the Heaven Devouring Great Emperor.

He knew very well that only by borrowing the power of the Heaven Devouring Great Emperor and his control over the Carefree Immortal Emperor could they possibly kill Fang Bai.

If Fang Bai does not die, then in the future, it would certainly be them, the few top Immortal Emperors, who would perish.

Thus, to kill Fang Bai, the Red Lotus Immortal Emperor didn't hesitate to ally with the Heaven Devouring Great Emperor, a Demon Clan Emperor Realm expert.

Even though he verbally said that after killing Fang Bai, everything on Fang Bai would belong to the Heaven Devouring Great Emperor, his true intention was that once Fang Bai was killed, he would join forces with the Qingtian Immortal Emperor and Myriad Sword Immortal Emperor to eliminate the two Demon Emperors.

Traditionally, immortals and demons cannot coexist.

The Red Lotus Immortal Emperor and the other top Immortal Emperors were, after all, Emperor Realm experts admired by countless immortals in the Immortal Realm and held high prestige and status.

While they could temporarily team up with demon experts for interests, peaceful coexistence was impossible, and mutual trust was even more difficult.

Once they eliminate Fang Bai, the greatest threat, a life-and-death battle is bound to erupt between them and the two Demon Emperors.

"Haha... fine, it's settled then!"

The Heaven Devouring Great Emperor laughed heartily, his figure shuddering, and a primordial spirit appeared at his side.

At the same time, the Carefree Immortal Emperor's primordial spirit also emerged.

The Red Lotus Immortal Emperor and the other top three Immortal Emperors exchanged a glance and released their primordial spirits as well.

Thus, both sides unleashed their primordial spirits to aid in battle, laying all their cards on the table.

On Fang Bai's side, his physical form holding a divine artifact, and his two primordial spirits also wielding artifacts.

Fang Bai used his physical form to fiercely battle the Heaven Devouring Great Emperor, the Carefree Demon Emperor, and their two primordial spirits.

Though facing four opponents was somewhat taxing, he wouldn't show signs of defeat anytime soon.

"If this immortal isn't eliminated, he might become my greatest obstacle on the path back to the Great Emperor Realm!"

The more the Heaven Devouring Great Emperor fought, the more shocked he was, feeling Fang Bai's combat strength had rapidly improved from their previous battle. If this development continued, coupled with the Great Emperor Pill he had, Fang Bai might actually cross into the Great Emperor Realm before him.

With this thought in mind, he, along with the Carefree Immortal Emperor and their two primordial spirits, intensified their attacks.

Meanwhile, Fang Bai's two primordial spirits fought against the Red Lotus Immortal Emperor and the three other Emperor Realm experts and their primordial spirits, making it a two versus six.

Ultimately, the primordial spirits were slightly weaker than the physical form, and even with the assistance of divine artifacts, they were struggling under the nearly frenzied attacks of the three top Immortal Emperors and their primordial spirits.

Just as Fang Bai was considering whether to reveal more cards, to summon a third primordial spirit to aid, the void above fluctuated again, and another Emperor Realm expert tore through the void and emerged.

"War Emperor, I'm here to help you!"

A clear female voice sounded by Fang Bai's ear, followed closely by a streak of purple light rushing forward swiftly.

Upon hearing this voice, Fang Bai immediately knew the identity of the newcomer.

Tang Wenrou, after entering the Immortal Realm, was once taken in by Zixia Palace, and the Palace Master, Empress Zixia, valued Tang Wenrou highly and provided focused cultivation. However, Fang Bai appeared later and took Tang Wenrou away.

Though Tang Wenrou left Zixia Palace to become a disciple of the Emperor's Palace, Empress Zixia, who knew Fang Bai's true identity, held no grudge, knowing Tang Wenrou would achieve greater success in the immortal path by following Fang Bai.

After the establishment of the New Imperial Palace, Empress Zixia dispatched an envoy to congratulate immediately upon receiving the news, thus establishing a good relationship with the Emperor's Palace.

This time, Empress Zixia's appearance was likely due to learning of the top six powers' massive invasion of the Emperor's Palace, and she hurried over to assist.

"Empress Zixia arrives just in time! I can hold on for now; may I trouble you to lend a hand to my two primordial spirits!"

Fang Bai shouted loudly.

Without a word, Empress Zixia stepped forward to assist Fang Bai's two primordial spirits.

Though Empress Zixia wasn't a top Immortal Emperor herself, her involvement relieved a considerable amount of pressure from Fang Bai's two primordial spirits, stabilizing the situation for the time being.

"A dignified top Immortal Emperor, conspiring with Demon Clan Emperor Realm experts to attack an immortal sect—what's your intention?"

Fang Bai's voice suddenly echoed, like heavenly thundering, booming in the void and spreading far and wide.

Upon hearing Fang Bai's words, the faces of the Red Lotus Immortal Emperor and the other top three Immortal Emperors changed dramatically, realizing things might take a turn for the worse.

Beneath the command of the six top powers are tens of thousands of immortals who, although loyal to their respective Immortal Emperors, would find it difficult to accept an alliance with the Demon Clan.

After all, whether the six top powers defeat or are defeated by the Emperor's Palace, it remains an internal struggle among immortal sect forces, with no room for demon experts' involvement.

The Demon Clan harbors ambitions toward the Immortal Realm, constantly seeking to invade and assimilate it into demonic territory, thus all immortals in the Immortal Realm view the Demon Clan as mortal enemies.

Immortals collaborating with demon experts to attack immortal sect forces signifies aiding evil, harboring malicious intent, which immortals absolutely cannot agree to.

Therefore, if Fang Bai's words reach the ears of the tens of thousands of immortals under the top six powers besieging the Emperor's Palace, it will stir a massive uproar.

If this message further spreads throughout the Immortal Realm, the esteemed image the six top Immortal Emperors built over millennia will crumble instantly.

The Red Lotus Immortal Emperor and the other top three Immortal Emperors could only lament inwardly, as they couldn't very well drive away the two Demon Emperors now to prove their innocence, could they?

Moreover, even if they could drive the Demon Emperors away, how would they then withstand Fang Bai and his two primordial spirits' attacks?

Not to mention, there's also Empress Zixia, who stands on the Emperor's Palace side!

Though the distance to the Emperor's Palace was only tens of thousands of miles, Fang Bai's voice seemed to traverse this space, exploding beside the tens of thousands of immortals under the command of the six top powers besieging the Emperor's Palace.

"What?"

Upon hearing Fang Bai's voice, the first reaction of the immortals under the top six powers was disbelief.

However, some immortals couldn't resist transforming into streams of light to fly to the source of that voice, quickly confirming and returning with the news that indeed, the Red Lotus Immortal Emperor and the other top three Immortal Emperors had teamed up with the two Demon Emperors.

...

Chapter 2709: Primordial Spirit, Fight!

The three top-tier Immortal Emperors, including the Red Lotus Immortal Emperor, never anticipated that Fang Bai's words would have such a significant impact.

When it was confirmed that the three top-tier Immortal Emperors indeed allied with two Demon Emperors to attack the Emperor's Palace Master, tens of thousands of immortals under six top-tier forces were in an uproar.

Among the tens of thousands of immortals who came to eliminate the Emperor's Palace, only half were disciples of the six top-tier sects, with the other half being elite disciples from various other affiliated Immortal Sects and sects.

The disciples of the six top-tier sects were loyal to their own sects, but the disciples from other Immortal Sects were not necessarily so.

If in this battle the six top-tier Immortal Emperors were defeated by the Immortal Emperors of the Emperor's Palace, the first ones to flee would definitely be the disciples from other Immortal Sects.

Since the battle tens of thousands of years ago, the Demon Clan and immortals became arch-enemies, and subsequently, the Demon Clan repeatedly invaded the Immortal Realm, leading to the fall of many immortals and resources being plundered.

Therefore, almost all immortals in the Immortal Realm deeply detest the brutal, bloodthirsty Demon Clan, and even the supreme Immortal Emperor allying with them is unforgivable.

Now, three esteemed and influential top-tier Immortal Emperors of the Immortal Realm openly allied with two Demon Emperors in an attempt to kill the Emperor's Palace Master.

When the accurate information was relayed back, it immediately caused intense dissatisfaction among the disciples affiliated with the six top-tier forces.

"What are those Immortal Emperors trying to do?"

"They actually allied with the Demon Emperors... don't they know the Demon Clan is the mortal enemy of our Immortal Realm?"

"Could those two Demon Emperors be invited by several Immortal Emperors to assist in the battle? If so, why would Demon Emperors want to help them?"

"Hmph! The Demon Clan has long coveted our Immortal Realm's cultivation resources. I guess those Immortal Emperors must have exchanged large amounts of cultivation resources to gain the help of the two Demon Emperors!"

"Matters of the Immortal Realm, we immortals will resolve ourselves! Bringing in Demon Emperors to interfere might lead to chaos!"

"I refuse to ally with the Demon Clan! I won't participate in the matter of eliminating the Emperor's Palace!"

"I'm quitting too!"

"Now that these two Demon Emperors have infiltrated the Immortal Realm, who knows if there are other Demon Clan experts with them? Fellow immortals, return to your sects and inform the higher-ups to be on high alert!"

"Let's go."

After a commotion, half of the tens of thousands of immortals from six top-tier forces left, riding auspicious clouds or transforming into streams of light.

Although half of the tens of thousands of immortals flew away, those remaining were still numerous, but their confidence and morale were greatly impacted.

Inside the Emperor's Palace, nearly ten thousand Emperor's Palace Immortals protected by layers of defensive arrays cheered loudly upon seeing the situation.

Previously, so many immortals from the six top-tier forces surrounded the Emperor's Palace but couldn't break through the defensive arrays; now, with their numbers halved, it's even more impossible to breach the arrays.

The Dragon Taming Emperor, Thunder Immortal Emperor, and Ice River Empress, who were battling Immortal Emperors of the Emperor's Palace from other directions, also heard Fang Bai's voice and noticed the departure of many immortals.

They struggled to understand how those two Demon Clan Emperor Realm experts appeared here and why they allied with the Myriad Sword Immortal Emperor and others to attack Fang Bai.

They desperately wanted to fly to the battlefield with the Myriad Sword Immortal Emperor to clarify the situation and disengage from the two Demon Emperors, but were held back by two nearby Immortal Emperors, unable to extricate themselves, feeling both anger and urgency.

At this moment, to be able to defeat or not be defeated by the opponent, all participating Emperor Realm experts released their Primordial Spirits.

Consequently, the Emperor Realm experts, along with their Primordial Spirits, amounted to over thirty Emperor Realm experts engaging in fierce battle around the Emperor's Palace.

Fortunately, the Emperor's Palace is built around the Heavenly Cave, and when Fang Bai set up the palace's defensive arrays, he integrated gales from the Endless Space, making the formations exceedingly strong.

Thus, even as dozens of Emperor Realm experts battled fiercely nearby, causing rivers to sever and seas to dry, skies to collapse and lands to sink, the Emperor's Palace remained unharmed.

This battle marked the largest and most participated conflict involving more Immortal Emperors since the Emperor's Palace battle a millennium ago.

Although no immortals dared to risk themselves to observe closely, this didn't affect the continual attention of billions of immortals in the Immortal Realm towards this battle.

Days later, Fang Bai's divine sense scattered and he noticed his two Primordial Spirits, along with Empress Zixia, showing signs of fatigue when facing attacks from the Myriad Sword Immortal Emperor, Red Lotus Immortal Emperor, Qingtian Immortal Emperor, and their Primordial Spirits, realizing the battle couldn't drag on.

Any damage to the Primordial Spirit would significantly affect Fang Bai's physical form.

At the moment determining the life and death of the Emperor's Palace, Fang Bai hoped to avoid any adverse events.

"Water Element Spirit, Fire Primeval Spirit, Earth Element God, come forth to fight!"

Fang Bai decided to reveal additional cards, using them to secure victory.

He had previously released the Golden Essence Spirit and Wood Element God; this time he released the Water, Fire, and Earth Primordial Spirits.

Deploying five Primordial Spirits to assist in battle was something only Fang Bai with the Desolate Ancient Divine Body could do.

The Desolate Ancient Divine Body is regarded as the strongest physique, one that's exceedingly rare in the Immortal Realm.

The six top-tier Immortal Emperors once believed the reborn Fang Bai couldn't possibly have such immense fortune as his past life, possessing the Desolate Ancient Divine Body.

Thus, when they came to the Emperor's Palace, they were overly confident, believing they could easily crush Fang Bai and eliminate the palace.

However, when Fang Bai released the Water, Fire, and Earth Primordial Spirits, whether it was the Red Lotus Immortal Emperor, Qingtian Immortal Emperor, Myriad Sword Immortal Emperor, fighting Fang Bai directly, or the Dragon Taming Immortal Emperor, Thunder Immortal Emperor, Ice River Empress from other directions, all had their pupils contract, showing fear.

Even the Heaven Devouring Great Emperor looked at Fang Bai with a tinge of fear.

The surprise was how Fang Bai possessed such a formidable physique, no wonder he could defeat him in the previous battle.

The fear was that now he was no match for Fang Bai; with such a rare physique, Fang Bai's advancement speed might surpass his own, likely reaching the Great Emperor Realm before him.

Once Fang Bai reaches the Great Emperor Realm, with divine sense perception, he could monitor movement across tens of thousands of miles; at that time, it's feared he'd have nowhere to hide in the Three Realms.

"Gold, Wood, Water, Fire, Earth... Five innate Spiritual Roots..."

"Another Desolate Ancient Divine Body... How is this possible!"

...

The six top-tier Immortal Emperors stared at the five Primordial Spirits before them, recalling the War Emperor who pushed through the Three Realms and won every battle, their faces turned ashen, their hearts filled with despair.

A millennium ago, all eight top-tier Immortal Emperors were present, using scheming and catching the War Emperor off guard, resulting in injuries and weakened combat power, leading to their significant victory.

However, at this moment, although the War Emperor hadn't fully restored his peak strength, it's only three top-tier Immortal Emperors facing Fang Bai, even with two Demon Emperors joining, it was far from the power of eight top-tier Immortal Emperors united.

Moreover, with past lessons, the War Emperor wouldn't give them another chance to strike stealthily.

So, they all felt there's no hope of victory in this battle against the Emperor's Palace.

Escaping unscathed would already be a great fortune.

Chapter 2710: Today's Humiliation, I Will Remember!

The three Primordial Spirits of water, fire, and earth that Fang Bai released, two of them joined up with the metal and wood Primordial Spirits and engaged in a fierce battle against Red Lotus Immortal Emperor, Qingtian Immortal Emperor, Myriad Sword Immortal Emperor and their Primordial Spirits.

The remaining Primordial Spirit teamed up with Fang Bai himself to confront Heaven Devouring Great Emperor, Carefree Demon Emperor and their Primordial Spirits.

With the addition of these three later Primordial Spirits, Fang Bai instantly reversed the decline and seized the upper hand.

When Fang Bai released these three later Primordial Spirits, Red Lotus Immortal Emperor's side had already lost their will to fight and were pondering ways to escape.

Although they knew that once they fled this time, it would be extremely difficult to ever find a chance to turn things around, it was still better than being defeated by Fang Bai now and ending up dead and the Dao extinguished.

Fang Bai seemed to have anticipated that once they fell into disadvantage they would give rise to thoughts of fleeing. Coordinating with his five Primordial Spirits, he rapidly set up the Liuhe Extinction Formation, trapping Red Lotus Immortal Emperor and the other two top Immortal Emperors, Heaven Devouring Great Emperor and the other two Demon Emperors, together with their Primordial Spirits, within the Formation.

In this way, it was equivalent to Fang Bai, together with his five Primordial Spirits, trapping Red Lotus Immortal Emperor and the other four Emperor Realm Experts and their Primordial Spirits.

Six against ten—though Fang Bai's side was at a numerical disadvantage, in overall combat power they still held the upper hand.

The Emperor Realm Experts fighting in the other three directions probed the changes happening on this side and reacted differently.

The few Immortal Emperors belonging to the Emperor's Palace naturally beamed with joy, spirits soaring, and pressed their attacks on their opponents even harder.

The three top Immortal Emperors including Ice River Empress, however, knew that things had taken a bad turn. All of them were secretly gathering power, preparing to flee.

But Immortal Emperors' senses were extremely sharp. After Ice River Empress and the other two top Immortal Emperors gave rise to the thought of escape, they inevitably became somewhat distracted; this manifested in battle as a drop in combat strength and was immediately perceived by the several Emperor's Palace Immortals.

Thus the few Immortal Emperors of the Emperor's Palace intensified their assault, hoping to pin their opponents down; even if they could not ultimately take their lives, they could not allow them to escape unscathed.

"It's about time Master Mink went out and showed his skills!"

Lightning Mink, sitting in command on the plaza before the Emperor's Palace Master Hall, watched in all directions and listened in all eight.

His Divine Sense detected that Fang Bai and the few Emperor's Palace Immortals had already gained the upper hand. Knowing that this battle had reached its final stage and that victory was almost certain, he couldn't help feeling his heart itch.

At this moment, the disciples of the six top powers surrounding the Emperor's Palace still numbered in the hundreds of thousands. However, because the two Demon Emperors had intervened in this battle, a considerable portion of those disciples were deeply puzzled and confused, so much so that their fighting intent and morale were greatly affected.

Therefore, when Lightning Mink charged out alone from the Emperor's Palace Defensive Array, his entire body radiating Killing Qi, the disciples of the six top powers who sensed the powerful imperial might on him immediately lost their nerve.

"Kill!"

Lightning Mink let out a violent roar, both fists blasting out in a rapid chain like lightning.

Huge fists of Immortal Qi, like towering mountains, smashed down with an unstoppable momentum, successively crashing into the disciples of the six top powers.

If the disciples of the six top powers had been able to work as one, joining forces in an assault, they would have had no need to fear Lightning Mink's exploits.

But their minds were already scattered and their morale greatly diminished. Seeing an Emperor Realm Expert descend upon them like a war god and launch a fierce and ruthless assault, they couldn't help but feel fear.

When the punches Lightning Mink unleashed reaped the lives of hundreds and thousands of disciples from the six top powers, the hundreds of thousands of disciples of all six top powers instantly scattered like a swarm of locusts driven apart, fleeing in panic in all directions.

"Kill!"

Seeing this, Lightning Mink deactivated all of the Emperor's Palace Defensive Arrays and released tens of thousands of Emperor's Palace Immortals.

Those Emperor's Palace Immortals had long been gathering their strength. The moment the Formation was removed, Immortal Artifacts in hand, some rode Auspicious Clouds, some turned into streaks of light, some mounted Immortal Birds, and, shouting "wah wah," charged off in all directions to pursue and slaughter the panic-stricken disciples of the six top powers.

The hundreds of thousands of disciples of the six top powers collapsed like a crumbling mountain. They thought only of fleeing the Emperor's Palace as quickly as possible to preserve their lives and had no mind to resist.

Thus, the battle between the Emperor's Palace Immortals and the disciples of the six top powers turned into a one-sided massacre.

Led by Lightning Mink, the nearly hundred thousand Emperor's Palace Immortals, thinking that killing each disciple of the six top powers would earn them one Space Ring, all had eyes shining with greed and were wildly excited.

Even female Immortals like Qin Yaorao and Xia Chenyu, who normally disliked killing, were influenced by the Corpse Mountain Blood Sea Killing all around them. Each wielded an Immortal Artifact, their delicate shouts ringing out as they continuously reaped the lives of the disciples of the six top powers.

"It's over..."

The collapse on the Emperor's Palace side in turn affected the top Immortal Emperors like Red Lotus Immortal Emperor. They knew the general trend was gone and could not be reversed.

Thus Red Lotus Immortal Emperor and the other two top Immortal Emperors exchanged a knowing glance, then sent a voice transmission to Heaven Devouring Great Emperor and Carefree Demon Emperor. The five Emperor Realm Experts reached a consensus in an instant.

They retracted their Primordial Spirits, then poured out their full strength and jointly unleashed their power, blasting open a gap in the Liuhe Extinction Formation composed of Fang Bai and his five Primordial Spirits. Before Fang Bai could mend this gap, they rushed out from within the Formation.

"If my strength had recovered to the peak of my former years, they wouldn't have been able to break the Liuhe Extinction Formation so easily..."

Seeing that his Formation still ultimately failed to trap the five Emperor Realm Experts, Fang Bai could not help feeling great regret.

However, there was no way he would let the five Emperor Realm Experts escape so easily.

Thus, when the five Emperor Realm Experts tore open the void and prepared to escape into the Endless Space, the four Divine Artifacts—the Five Elements Origin Qi Cauldron, Blood-Drinking Mad Blade, Pangu Axe, and Houyi Bow—were each unleashed by four of Fang Bai's Primordial Spirits. They smashed, slashed, chopped, or shot toward the five Emperor Realm Experts.

Meanwhile, Fang Bai and another Primordial Spirit also attacked at the same time, charging side by side toward Heaven Devouring Great Emperor.

The five Emperor Realm Experts had already torn through the void and were just about to enter the Endless Space to flee. Faced with the attacks of Fang Bai and his five Primordial Spirits, all of them, except Heaven Devouring Great Emperor, were somewhat flustered.

"This humiliation of today, this Emperor will remember! Sooner or later, this Emperor will come back and fight you again!"

Heaven Devouring Great Emperor enlarged the Heaven Devouring Pot as a protective barrier, blocking the attacks of Fang Bai and that Primordial Spirit of his. Using the momentum, his figure entered the Endless Space, leaving a vicious statement for Fang Bai before the spatial rift closed.

Fang Bai failed to injure Heaven Devouring Great Emperor and also knew he could not catch up. He could only give a bitter smile and sigh.

Heaven Devouring Great Emperor escaped unscathed by relying on the Heaven Devouring Pot, this kind of Divine Artifact, for protection; but Red Lotus Immortal Emperor, Qingtian Immortal Emperor, Myriad Sword Immortal Emperor, and Carefree Demon Emperor did not have such fortune.

Drawing upon Divine Power through the four Divine Artifacts unleashed by his four Primordial Spirits, Fang Bai's might surged skyward as he shattered the Emperor's Instruments the four Emperor Realm Experts such as Red Lotus Immortal Emperor were using for protection.

Although Red Lotus Immortal Emperor and the other three Emperor Realm Experts fled into the Endless Space with their damaged Emperor's Instruments, with their Emperor's Instruments destroyed, they themselves also suffered injuries of varying severity.
