

Doomsday 56

Chapter 56: Bird mutations are difficult to survive

Di Ping was a person who rarely envied others, but at this time he was really envious. He felt that a warrior was not as good as a mage. He should study again that he should not blindly choose a profession. This is not a game. It is not fun and can be changed again.

"Oh right, I don't know if I can choose again?"

Di Ping suddenly brightened his eyes and thought.

"Dip... once the inheritance cannot be changed again, please don't change the master class. The fighter class is one of the strongest classes!"

Just thinking that the cold voice of the system suddenly rang out in his mind again, directly criticizing Di Ping.

"Ah! Can you hear me?"

Di Ping was immediately overjoyed when he heard the voice of the system. The system usually ignores him at all, but sometimes suddenly makes a statement. Why did he suddenly speak today? Is the system not mechanical, but intelligent, so you have to ask yourself ask.

My mind was quiet, there was no sound, as before, the system ignored Di Ping at all.

"System, why don't you speak, make a sound?"

Di Ping asked again, but the system remained silent.

"Where are you from? Say something?"

Di Ping did not give up and then asked.

"Master, what's wrong with you?"

Gina stood not far away, watching Di Ping muttering words in his dazed mouth, not knowing what happened to him, and asked a little worried.

"Oh! It's okay!"

When Di Ping heard Gina's voice, he stopped and cursed at you in his heart. Then he replied in a sad and listless manner.

"Crystal core!"

Di Ping suddenly slapped his head, aren't the corpses in this place all crystal nuclei? I almost forgot the business.

Putting down the system, I have the opportunity to talk about it slowly in the future. It is too dangerous to stay in the wild now!

Di Ping quickly walked forward and first took out a crystal core from the mutant cat's corpse. It was the size of a small finger and was only a little bit larger than the one taken from a mouse. Di Ping was a little nervous when he looked at the mutant gibbon corpse. I don't know if these mutant birds have nuclei.

"Don't worry about it, just take a look and you'll know!"

Di Ping let go of his worry about gains and losses, and stepped forward to break open the head of a mutant gibbon. A mutton white jade as small as a red bean appeared on the mutant gobbler's head. Di Ping was overjoyed. There was actually a small crystal nucleus, but a mosquito. It's also meat at a young age!

Gina watched Di Ping look for the crystal nucleus in the broken mutant gibbon. She didn't know where she had taken out a knife to help find the broken corpse to find the crystal nucleus. After ten minutes, all the mutant gobblers had broken through. The core collection is complete.

Di Ping didn't dare to delay, and led Gina forward quickly, leaving this place where the matter was wrong.

Fortunately, there is a bus stop at five or six hundred meters ahead. There is a bus parking lot inside. This station is located under the viaduct. There is a small house in the station, which should be the place where the staff on duty lives. Di Ping said slightly. It opened with a click.

The room is relatively simple, only about ten square meters, a small bed, a small table and a chair, and a small TV on the table is nothing else. He brought Gina into the door, and Di Ping closed his hand gently. When he came, he breathed a long sigh of relief.

He took the backpack from his back, took out two bottles of mineral water and handed it to Gina. He sat down on the chair and took a few mouthfuls to quench his thirst.

Gina also gently twisted the mouth of the bottle and placed it on her rosy lips. She took a sip and covered the bottle. The red lips were stained with water, and she seemed to feel her rosy tongue and playfulness. Li licked his lips, if Di Ping saw that he was calling for help again, and he was exchanging crystal coins at this time!

He wanted to see how much the crystal nucleus of the mutant gobbler could be worth.

"Di...34 crystal nuclei in exchange for crystal coins, 16 crystal coins obtained"

Di Ping was overjoyed when he heard 16 of them. Originally, he thought it would be good to change a few. He did not expect it to be so much higher than his expectations. 14 of them are enough to recruit a C-rank hero. His strength can be further strengthened. Today he Looked at the giant eagle.

With the emergence of the giant eagle, it is conceivable that the birds have also completed their mutations. After that, when a large number of mutated birds appear, the human living environment will deteriorate further, and it will be difficult to move at every step, and its own strength must be further strengthened. , In order to survive better in this last days.

Before the end of the world, with the development of human urbanization, the living space of animals has been compressed step by step. Wild animals have become less and less. Only some mountainous or remote areas have wild animals survive. This is the country's return of farmland over the years. The result of returning to forests to protect the ecological environment.

So at present, most of the mutant animals in cities are mutant cats and dogs. More mutant animals come from the zoo in the city center, and the animals in several pet markets in the city.

But a bird is different. Although birds are also squeezed to survive before the end of the world, there are still many birds, even in urban areas. Although there are few birds of prey, there are still many common birds.

Therefore, Di Ping has a sense of urgency. Strengthening is what he wants most at the moment. So, with a thought, the system interface opens and Di Ping opens the tavern. Two heroes are still displayed in the tavern frame, but the value of the coin above the hero is already It has changed from zero to 16, and the soul energy value has also changed, it has become 72, Di Ping immediately became happy, knowing that 72 is enough for himself to be upgraded to three levels.

No nonsense, let's upgrade first! At this time, recruit heroes first, let them go, and become stronger is the most important thing.

He hurriedly exited the tavern, clicked on his avatar, and directly clicked on the upgrade item. After three clicks, Di Ping did not blink, three golden lights flashed, and Di Ping's level had become Tier 1 and Tier 4 Up.
