

F.D Emperor 89

Chapter 89: The Warring Kingdom World

In front of a plane known as the Warring Kingdom World, many other True Monarchs stood in the void while discussing and commenting on the battle between Yan Chen and Ji Qiang.

One of them complained, "Are these guys crazy? Don't they know that even the shockwave of their fight is enough to destroy the plane that our Heaven Chosens are taking their trials in?"

"Well, isn't the world fine?" commented another voice.

"However, these two guys seemed to be fighting for real--especially Ji Qiang. He even took out his Dharma Body without hesitation, forcing Yan Chen to do the same."

"Tsk, I don't think so. Although Ji Qiang looked like a brute who only acted on impulse, don't forget that he also grew up in a Dynasty full of schemes and intrigues. Didn't you see that he did not even use his supreme tier magical weapon?"

"So, that's how it is. He uses the name of revenge to teach the people of the Dao Opening Sect a lesson without totally offending them."

"Unfortunately, he hit his foot with an iron rod this time. He did not expect Yan Chen to cultivate the [Heaven Slashing Scripture] to such a high and profound level. Especially that last strike, it seemed to be the nemesis of his Dao of Judgement."

"Speaking of the [Heaven Slashing Scripture], I cannot stop marveling at its creator, the Sword Empress!"

"The Sword Empress was indeed a legendary Emperor. With the body of a female, she suppressed all her generation with one bamboo sword in her hand and became the second Emperor of the Ancient Era."

"And the Scripture she created was indeed powerful. Using everything between Heaven and Earth as a sword. Then slash Heaven itself to escape its shackles and limitations."

"The Dao Opening Sect is indeed lucky as an Emperor Lineage. First there was the Sword Empress, then they had the Absolute Sword, Wang Tian. Hopefully, they won't have another Wang Wei."

After saying this, the True Monarchs stopped talking for a while. Although they were of an older generation, they had to watch their descendants being completely suppressed by one man with a sword in his hand.

And what's even worse is the fact that in this generation, there are signs that indicate that another heaven defying Heaven Chosen was slowly growing up in the Dao Opening Sect in this generation.

After a few minutes of silence, another person said: "It seemed that Yan Chen took a different path in his cultivation of the [Heaven Slashing Scripture]. He seemed to focus more on the Dao of Gold in the Five Elements."

"Well, it makes sense. As a Supreme Realm cultivator, it's normal to have his own Path and focus. If he was totally bound by an Emperor's Scripture, he would never reach the realm he is currently at."

"Unfortunately, like us, he did not totally escape!"

"If he did, he would be the one fighting for the Heaven's Will in that generation instead of Wang Chang."

"Heh, the Wang Family's luck seemed to be endless. Each generation they always have a genius that can represent them on the world stage."

Meanwhile, inside the Warring Kingdom World, Wang Wei and his groups were teleported inside.

After a few minutes of dizziness, Wang Wei found himself in an open plain. After looking around, he frowned deeply.

"How can the spiritual qi be so low?" complained Li Jun. This was the same feeling many of them had.

"What do you expect from a Lower Thousand World?" responded Yan Liling.

After looking around, the group headed in one direction, trying to find a town or city to gather basic information of where they were and how this world operated.

Not long after leaving their landing spot, Wang Wei's group saw a cultivator using an Earth escape technique to travel in one direction. The cultivator seemed to blend with the earth, and with each step, he traveled underground instantly and appeared a few hundred meters away.

The first thing that Wang Wei noticed about this cultivator was the fact that this cultivator was in the Divine Sea Realm. More importantly, he was using the Origin System as a cultivating path.

Then an information he had read about in the sect's library suddenly appeared in his mind. The information was about how the majority of worlds in the community that revolved around the Myriad Emperor World also use the Origin System.

Then it dawned on Wang Wei. He realized that his ancestor, Emperor Qiyuan, was not a simple person. He did not just spread the origin path only to the Myriad Emperor World, but to the majority of worlds in the community.

Heck, he might even spread it to the other Worlds' Community.

"Young Master, should we capture this cultivator and ask for direction?" suddenly asked Wang Ju.

Wang Wei shook his head and said, "There is no need for that. Just follow the direction he went."

The reason that Wang Wei decided not to capture this cultivator was due to the spell he used. This is a Lower Thousand World, and yet this cultivator is using such a powerful spell in the Divine Sea Realm.

This can only mean that his background is not simple. In fact, Wang Wei was not scared of this person's background. With his strength, he feared no one in this world.

However, he just arrived in this world and did not have any knowledge or information about the distribution of power in this plane. He feared that he might offend some sect or family for trivial matters, then they combined together and forcibly exiled him out of this world, effectively failing this trial.

Despite deciding to be low-key, after a few minutes of trekking, the group encountered a bunch of bandits who stopped them. There were more than 20 of them, with one standing at the front.

One of the bandit said to the one standing in the front:

"Boss, look at the clothes of these people. I don't know what material they are made of, but they look expensive. Maybe we can kidnap them and ask their families for ransom."

However, the boss did not immediately give the order to attack. The reason for that is the fact that he did not see even a hint of fear in those people's eyes. Only a look of playfulness, a look of a human looking in the ground at an ant that they can easily squashed to death.

He had seen this look many times before and did not like it. It made him feel small, and it reminded him of the greatest failure of his life.

While the bandit boss was still pondering his next step of action, Li Jun motioned for General 5 to take action.

Without hesitation, General 5 mobilized his origin qi and rushed towards the Boss Bandit and attacked. However, the bandit boss seemed to have anticipated the attack and escaped it with a swift movement.

General 5 was quite surprised. In fact, not just him, everyone watching the attack were surprised. The reason for that was the fact that this person did not use blood qi to move. He was only using the strength of his body to move.

Upon seeing this, General 5 decided to test the strength of this strange bandit boss. Just like the first attack, General 5 decided not to use all his strength and continued to test the abilities of this bandit.

After evading the first attack, the bandit boss said, "Cultivator!"

General 5 looked up and down at this bandit, then asked, "You don't seem scared after knowing that we are cultivators? On the contrary, you seemed very excited."

"Of course not. As a martial artist, it is my dream and goal to fight and kill powerful cultivators like you."

"Martial Art? Isn't that the method used by mortals who did not have a Leakless Body."

After hearing the word "Leakless Body", the bandit boss secretly clenched his hand and a hint of hatred flashed deep in his eyes before disappearing. Then, he continued:

"After my last humiliation, I dedicated myself to martial arts until I developed my own intent. Now, let's test my new found strength with you."

After saying this, the bandit boss took a deep breath, gathered all his body's strength and punched toward General 5.

Although this punch was a normal one, without any lights or vision appearing, General 5 felt like an explosion was happening in his mind and he froze for a few seconds.

Without making any response, the bandit boss' punch soon arrived and hit general 5 in his stomach. With the force behind this punch, it is very likely that the general would be heavily injured.

However, when the punch was about to hit, the origin qi inside general 5's divine sea automatically operated and protected him.

After being hit, he woke up from his brief stupor and took more than five steps back before stopping.

The bandit boss looked at the intact general 5, looked at his hand, then muttered, "After all these years, the gap is still so unsurpassable. Heaven is unfair, Heaven is unfair."

Meanwhile, Wang Wei and his group were again surprised by the bandit boss' attack. As a mortal, he managed to push back a cultivator--and one in the Divine Sea Realm too. This fight has increased their understanding of mortals.

"What is the intent that this bandit spoke of? Is it the same intent of our world?" asked Yan Liling.

"No, it is not."

Everyone turned their heads and looked at Wang Ju, hinting at her that she should explain the meaning of her words.

"In this world, due to the low level of spiritual qi, cultivators have a very difficult time entering the Heaven and Earth realm. As such, they developed the concept of intent (fist intent, sword intent) as a way to slowly cultivate their spirits--until it reached the standard to enter the Heaven and Earth realm."

"Since intents are essentially a manifestation of the spirit, even mortals can technically cultivate it as well--given that their bodies are strong enough to bear it."

After hearing this, Wang Wei immediately decided to learn this method of cultivating intent. Although this method is of no significance to him personally, he can still provide it to the sect and ensure that it becomes easier for the other disciples to enter the Divine Altar realm in the future.

Wang Wei smiled happily after making such a plan. He had just arrived in this world and already got some benefits.
