

First Strong 163

Chapter 163 - Threat!

In absolute terms, it doesn't take long for two people to fight. But everyone is highly focused on watching, and the situation on the field is also changing instantaneously, so that everyone feels that there have been several rounds of fighting.

At the beginning of the Chu River, many people cheered up, and soon afterwards, they made a copy of the bread and made everyone scream. I didn't expect the speed of the swells to be fast and the body to be different. I actually got out of that situation.

The pursuit of the Chu River has just begun, but it is a large-scale counterattack that ushered in Shen Lang!

Chu River just kicked out a big stone, but Shen Lang kicked out, but at least a dozen.

At this point, no one has ever said anything cool. Except for some of the points that were almost knocked out, the rest were watching.

Xie You was secretly nodding, and they were in the back alley that night. He felt that Shen Lang had this ability and it was not unexpected. It seems that if the Chu River does not reach the virtual state, the big ones do not use the magic weapon, and it is impossible to turn over the ship in the gutter!

More than a dozen monitors of the size of the stone smashed in the past, Chu River one by one to open, so open and big match, originally looked very cool, more interesting than a trick.

But this is only a few seconds, and there is another variable. The Chu River is a positive and intuitive feeling. When a stone is over a few other stones, other people can see more clearly because of the distance and angle. It is obvious that Shen Lang pushes the last stone and speeds up to Chu. In front of the river!

This made many people exclaimed, although they still have confidence in the Chu River, but it has begun to be so absolute.

After the Chu River saw it, the pupil contracted slightly and immediately responded. If you follow the normal schedule, he must first push the stone that has been speeding to the front, but such a “cutting in the queue”, the first few pieces to fly, will be smashed on him.

So he did something that no one else thought of, and the body slid back to the front with both feet up!

If you dodge to the side, it is understandable, but it is undoubtedly risky to go ahead in this way. If you are not good, you will be hit by a stone.

However, the adventure is adventurous. His trick is to go through the clouds. The feet are directly shoveled to the front of the sinking waves. The hands are guarded in front of the body. If there is a stone on the body, you can also One side.

“Good!” Several superb warriors screamed in unison.

This is not like the battle of the self-cultivators, it is more like the battle of their super-wu people. They can understand and of course have a sense of substitution.

Others worried about the Chu River, but also secretly relieved. Seeing that adventure is a success, it becomes a wave of passiveness.

The hand pushes the boulder quickly, and the next wave of Shenlang is not so stable. The Chu River is so strong, as long as it is shovel, it is a small meaning to directly scrap the two legs...

At this time, everyone saw a magical scene!

The speeding forward of Shen Lang, when encountering a blockade, is as smart as a football player, and does not flash to the side, but it is just a good way to avoid the Chuhe’s feet!

The hand that pushed the stone was actually hooked up, so that the original stone that had lost its target would continue to move forward quickly, forcibly changed the angle and went straight down to the bottom!

Everyone seems to have seen a football player taking the ball while he is still in the dunk...

This change also surprised Chu River. From his current point of view, it is difficult to change his tactics, and his feet are slashed, and he can only find another way. The body can avoid the stones that fly over, and this piece of stone that has been “grabbed” is difficult to avoid.

When the “slam dunk” came over, the boulder came to him!

His hands are guarded in front of him. If you are kicking in before, you can throw it on one side. But now it’s the smashing of the waves, and I can’t hold it.

He had to put his hands on a support, block the momentum, and let his body accelerate to land, then quickly rolled up and rolled a few meters straight out to the side.

“Oh—” a dull sound, the stone smashed on the ground, and when other hollows, it also fell to the ground.

After the tumbling, the Chu River had stood up and stood up, and was not injured.

However, with such a master, he was forced to use “smashing”, which is really a very lost face.

What is even more embarrassing is that he immediately got up and stood up after rolling, but Shen Lang did not pursue it, but looked at him with a sly look.

“I understand, you are not only mixed, but also rolled.”

The sigh of Shen Lang not only made the Chu River shy, but everyone else felt that there was no light on his face. It is a bit sad reminder that the master of the Tang family has fallen into this field.

Everyone began to think that Chuhe had dug a hole for himself. If he used it, or if he carried the magic weapon of the Chu family, he might have already taken Shenlang.

After this round of attacks, Chu River also regretted. Just the radical method, you should not use the spell, just say that it is not a treasure. It’s already late, and it’s shameful to change it.

Chu River's understanding of Shenlang is through Chuyun City, Chuyun City knows very little, so just handed over, is the real understanding. He found that Shen Lang is not only fast, but his body is very wonderful and his strength is very powerful. The most amazing thing is that the ability to adapt and the experience of combat is very rich!

This is not like a monk in a place like Pingxi. He even suspects that if you use the spell, Shen Lang will also have a powerful spell!

Although he wandered but he did not lose. Just follow this progress, he wants to win, it will pay a price to win, it will take a lot of time. Even if it wins, it loses its face, and it raises the name of Shen Lang, the nameless soldier!

He decided to use the killer!

“You are quiet in the field, because the girl...”

Suddenly I heard a faint voice ringing in my ear, and Shen Lang immediately understood that Chuhe was talking to him with “passing into the secret.” This is a small spell, the realm is enough, you can pass the sound compression to a point, will not be heard by others.

“Is it Zheng Yumeng? Do you think she is gone?”

The sentence behind the Chu River lifted the eyelids of Shen Lang and stared at him.

“She is in our hands! You are doing what I said, I can guarantee that she is fine. Otherwise, you can think about the worst!”

After the completion of the voice, Chuhe sneered out: “Shen Lang! I am not easy to read you. If I admit defeat now, I will not hurt you. Otherwise, I have to move the real thing!” ”
