

First Strong 194

Chapter 194 - Tasks and rewards

On the morning of the next day, Xie You rushed to the hotel, first picking up the waves to go to lunch, and then went to meet with Xie Xun.

However, it is not a thank-you to go, but in an office, it seems that it is very good soundproofing, and it is also preventive for eavesdropping.

Inside is Xie Xun, and I have not seen Xie Tongwen and Xie Yunlin again.

After entering with the sinking waves, Xie You quit, leaving Shen Lang and Xie Xun two people.

“Small Shen brother, here today, I want to tell you about the situation of the dead forest alone. I believe that Xie You also told you that it is a big secret. If it is not our family this time, there will be no shortage of staff. Please ask for foreign aid.”

“Do not worry! I still know the secret.” Shen Lang directly agreed.

“It’s so good, everyone is not an ordinary person, so you don’t need any confidentiality contracts, trust each other.”

Xie Xun nodded with satisfaction. For the monk, the confidential contract that is bound by law is really meaningless. But mutual trust, in fact, that is to say, it really depends on strength and mutual restraint!

Xie’s family is strong enough. If Shen Lang does not abide by the agreed leaks, it will be chased by them. Now explain it in advance, just let him have this meaning. Before the cooperation, it is to talk about trust instead of warning.

“This is our more detailed information about the forest of death. You can look at it first and have a general understanding. But the place is very unusual. The time for each entry is limited, the number of people is not much, so a lot of information is If you accumulate it again and again, you can’t guarantee that the reality is exactly the same. If you go inside, you still have to rely on yourself.”

Xie Xun solemnly handed over a few A4 printing papers, which had the information just printed. Look at this, and let Shen Lang see the scene and the shredder was broken.

Shen Lang took over and immediately browsed.

Death Valley is a very mysterious place, not found on the map. But it does not exist, but the outside world does not know the existence of this place.

The comparison of Shenlang is probably like the palace of the cemetery of the King of the Kings hiding in the Phoenix Valley. Even if ordinary people enter the Phoenix Valley, they will not see the Palace of the Tomb of the King.

The dead forest is only accessible through Death Valley. Death Valley also consumes a lot of spiritual stones to open for a limited period of time.

According to the above, there is a wealth of treasures in the dead forest. There is a lot of aura inside, and almost no one develops, so both animals and plants are kept very good, and there are many years and months.

Animals are now a general saying. In fact, what the practitioners can pay attention to is the various beasts!

There are two types of spirits, one is a natural race, such as the blood of the descendants of the ancient Yaozu, this kind of potential is huge, as long as they give them enough space and time to cultivate, can be cultivated into a monster.

Another is the day after tomorrow, in a special environment, such as some caves, the environment is full of aura, and there is no malicious killing, so that they can live a long, long-lasting absorption of accumulated aura, can also be reborn .

The latter kind can also be artificially cultivated. For example, there are some big sects. By feeding the elixir, the spirit and the like, you can cultivate and raise your own beast.

The plants they value, of course, are not ordinary flowers and trees, but some high-grade spirits.

Although the aura is still full, even more than the era of the pre-Shen Lang, but because of the big explosion of the population, the places that can be developed are almost developed, and there is not enough room for the drug to grow.

Just like the last time he purchased at Qiongzhitang, he saw the ginseng with a very low quality. The price that has been sold is not low, and there are not many goods, and there is no higher quality.

There are two types of death forests, which are the targets for them to take risks. If you can find some elixir for hundreds of years, you can refine some high-quality medicinal herbs to contribute to the prosperity of the family.

If you can get the spirit beast, let alone its role. If it is aggressive, once it is domesticated, it is a patron! With the life of the beast, it is possible to guard the family for generations or even centuries.

Other attributes, or not domesticated, can be used more. Kill it, Nedan is very precious, the essence of bone blood is a good thing with no price. But that is the last practice. The more common method is to ban, regularly bleed, to take medicine, or to take it directly.

If you are lucky, you will encounter mineral deposits in the dead forest. For example, if you discover a Lingshi mineral deposit, you will take it exclusively, keep it secret, and the descendants of the family from generation to generation can dig.

After Shen Lang finished reading, he returned the paper to Xie Xun.

Xie Xun immediately broke it, and then seriously said: "This trip to the dead forest, our family in addition to the same text, Yun Lin two, is Xiao Shen brother you. You should also see it, they two Strength is not as good as you. So..."

He paused and made the tone more solemn.

"We thank the family for your request, only one – to protect the safety of both of them! Make sure they come back safely."

Shen Lang was a little surprised. Originally, he thought that it was the last time he went to the Xie family. He had already found any elixir or spirit beast, but there was no way to get it. This time he wanted to use him to capture. After all, he is an outsider. It is dangerous to have death or injury.

“People, is the most important thing! Other things have the best harvest, no gain, they will get some experience, for the future growth, there is great benefit. But if they have an accident, we are two The excellent seedlings are broken, and this is something that no other harvest can make up for!”

Xie Xun’s people-oriented attitude makes Shen Lang feel a little more good to him.

“Good I can’t guarantee anything, but I will try my best.” Shen Lang said faintly, since it is his promise, even if he does not say death, he will certainly do a good job.

Xie Xun nodded with satisfaction: “Now say your reward, I don’t know how Xie You told you, but I must emphasize that it is not expensive to open the death forest this time. And the number of places is three. In other words, the tickets that can go in are very expensive... Do you understand what I mean?”

“That is to say, the quota is the reward that Xiejia gave me, I accept.” Shen Lang nodded.

With his current personal resources, there is no way to reach the Death Valley, and certainly can’t get the need to open a spiritual stone, so you can follow it and look for opportunities, which is not a measure of reward.

Xie Xun smiled and said: “Haha, I am not afraid to tell you the truth. If we give you a huge return, but you are required to thank the family in the harvest, are you willing? Even if you promise, you will leave yourself. Part of it? So we don’t pay any more, you get it, we don’t ask for it. Is it fair?”

“It’s good.” Fair and unfair, it doesn’t matter, he accepts this.
