

First Strong 209

Chapter 209 - Machine edge

Found that he gave up the search for the first yang ginseng, Shen Lang is not a surprise, after a speechless, he immediately frowned.

If the predecessors of Xie's family came here a few decades ago and found this millennial first ginseng, they have only come to several batches of people, and every time they come here to observe whether it is the best time to pick.

This shows that there have been many people who have been hidden caves. Isn't the gathering of the springs taken by people? Everyone who accumulates every few years will also be drunk.

Lingquan was the purpose of Shen Lang's trekking, so he ignored the first yang ginseng and flew directly to the side of Xiaochi. If there are really only a few mouthfuls of new lingering, he really wants to hate Xie.

But after that, it was to let him stop. There are still quite a few inside, almost the same as the wash basin of Lingquan!

According to one drop per day, it takes almost 30 years to accumulate a mineral water bottle. (About twenty drops, there is only one gram.) In terms of this weight, it should have been accumulated for hundreds of years.

This makes Shen Lang a bit puzzling, isn't the first Yang ginseng not the same strain? Otherwise, it is really unreasonable. The people of Xie's family will not take Lingquan, and take the risk of waiting for the maturity of the first Yangshen for decades.

He flashed and returned to the side of the first Yangshen, carefully observed.

At that time, he did not seem to see this Yangshen, which counted for hundreds of years. It was impossible to be judged as a "millennial elixir" decades ago.

But remember carefully, he is not sure. Maybe it was there at the beginning, but there is still no process of flowering results. If you don't understand it, you will ignore a plant and it is completely normal.

After careful identification, this first Yangshen, even if it is not a thousand years, is also a few hundred years, and the fruit is really mature now!

There is only one fruit, and the appearance looks like a ginseng, but it is tied to the branches.

Within the scope of these two hundred miles, it is not impossible to have just two mature first ginseng. But from the point of view of the map, the bigger possibility is the same strain!

Shen Lang returned to the edge of the pool and studied it carefully.

After a while, he probably understood the reason.

This small pool is not born, but the owner of the cave house. In addition to letting the aura condense and liquefy, it also makes a suppression, and the aura does not overflow!

Perhaps the original intention of the owner here is that the aura that does not want to gather is wasteful because of the relationship of time. But the result of this is that the Lingquan in this small pool seems to be filled with ordinary water. If you don't feel it, you don't know that this is Lingquan!

When Shen Lang came here before, he rested in this cave. At that time, he was limited to eating and drinking. So he started to drink this as water, and then discovered that it was a spiritual spring.

Xie family came in from Death Valley, I don't know which year it started. But since it is taking the initiative and leaving time, everything will be ready, and the food will be brought.

In this dead forest, in addition to a large number of heaven and earth treasures, there are also a lot of dangers, and some kind of fruit that may be accidentally eaten is highly toxic.

The same is true for water.

Now ordinary people climb mountain camping, they all know that rot can not drink, heavy metals exceed the standard, a variety of microbial parasites or something. It is the flowing living water. If it is not clean, it will be problematic if it is sensitive to the stomach.

The same is true here. The people who came here in the past discovered the first yang ginseng, and the focus was on it. It is far from the transmission line and will not be kept for a long time. The time of stay will not be too long. With food and water, you won't be able to touch the water in the corner.

It is also because it seems that it is a pool of unclean water, so that these centuries of condensed Lingquan have been preserved to the present.

In order to verify, Shen Lang first took a sip and confirmed that it was really a spiritual spring.

In the past few hundred years, there are probably more than ten kilograms of Lingquan, which should be able to greatly help him. This effect is not comparable to a medium spiritual stone.

After calculating the time, Shen Lang decided to start now, but looking at these Lingquan, I could not help but look at the first Yangshen.

He didn't want to find the elixir that Xie had guarded for decades. But now he has already encountered it, and on this point, he has been here since the last time. He didn't know where to go before the Xie family.

He even thought that this first yang ginseng was not wild, but was left by the owner of the cave.

It's just to find the chance to go to the forest of death. Isn't this Yangshen a chance?

Thinking of this, Shen Lang did not hesitate.

"Thank you for the gifts left by the predecessors! Come back again, the great fate, Shen Lang thank you!"

Although the owner of Dongfu has not been here for a long time, or has died, I don't know how many years. However, Shen Lang was once again blessed, or sincerely thanked the cave.

Then he came to the side of the first Yangshen, picked it up directly, and chewed it!

Raw food!

If this news spreads, don't say how much Xie Jia will hate him, and others will be defeated!

This is a millennium elixir, and with a little bit of addition, the effects of various medicinal herbs can be greatly improved. The greatest value of this first ginseng is to be able to train a large number of medicinal herbs and cultivate a large number of monks.

Not to mention creating a wealthy family, at least to the level of Xie's home, more brilliant for a hundred years is completely no problem. This is why they can stand it and must get it.

Now, when it is picked up by Shen Lang, it is eaten raw!

Raw food also has a huge effect, but if it has a hundred value itself, it can be used to add three hundred and five hundred values for the refining of alchemy! It is not bad to get fifty to seventy for raw food.

This is of course a savage creature, the same violent thing as the pig ginseng eating ginseng fruit...

Shen Lang does not have this idea at all. He needs to improve his strength now. Since I decided to get this opportunity then I will not wait.

And he is alone, to maximize the role through alchemy, no conditions, refining the medicinal herbs, the number of more has a limited effect on him.

So even if someone says that he is violent, he will still choose to eat raw.

After eating, Shen Lang immediately came to Lingquan, and poured a small liter of Lingquan!

Drinking such a spiritual spring as white water is also a very bad behavior...

As soon as the efficacy of the drug began to play, Shen Lang immediately began to cultivate "Yin and Yang Bozhenzhenzhen".

The retreat in the past few days has brought him to the edge of the breakthrough. What is lacking is the last chance to boost. It should be time now!

Soon, Shen Lang felt that the whole body seemed to burn!

The consequence of the first yang ginseng eating is that there is no neutrality in the tyrannical effect, and the direct overbearing effect on his body, the kind of impact is like a boiling oil pan, to swallow his whole person!
