

## First Strong 2181

Chapter 2181 - Divine power

At the same time, the tail that has become bigger has already been flexibly circumvented behind the Shenlang, and it has been photographed directly on the ground. Immediately, the ground has been cracked by a crack of more than ten meters wide, and the crack instantly approaches the place where the Shenlang stands. !

The finished tail was rolled up again, blocking the full surround around the waves.

Its tail, in an instant, seems to surround a wall about ten meters around the sinking waves. This is to control the sinking waves and not to escape.

The main attack, of course, is only a large piece of water spray sprayed on it!

These mists covered a large space, and the speed was fast, like a cover, covering the top of the sinking waves.

Shen Lang was the first to shoot, but he slowly reached out, and when he finished speaking, his hand had not finished.

The Kemrisu water monster is a preemptive attack. All the attacks are completed in an instant, because it is too fast, and the average person can't distinguish it with the naked eye, as if it was done at the same time.

At this time, Shen Lang is the real shot!

He just opened his hands and faced the dark clouds. As a result, the water monster directly did not want the black cloud's disguise, and showed his huge body.

This is equal to the more obvious target for Shen Lang!

It feels the pressure of the Shenlang, so it reveals the form of the body in advance. Under such a huge state, even if it is hit by a small part, it is irrelevant, and as it is now, it can be more convenient to attack.

but.....

Shen Lang just reached out, not to give it a palm, but to direct the hands and fingers to radiate the light!

At the beginning, he had already used the sword of the king. He took a slow shot and did not hit the mouth of the monster. Now he will not continue to use the sword, but use the light.

Shenguang is essentially a belief in energy. Nowadays, the belief in the power of Shenlang must be compressed. It does not matter if it can be used.

He used to be a god, he is already experienced.

When fighting with the apostles of the Guangming gods, it is now used by the school. Even the gods are borrowing others. Now it is different. Shenlang himself has improved a lot, and he has sufficient energy reserves. Worry is not enough.

So at the moment he attacked, there were ten gods of light, and they were intertwined into a piece of light net, and they went directly to the body of the Kemrissu monster!

The use of divine light is also differentiated. For example, a light sword comes over, the power is naturally huge, and it is much smaller when it is released by the finger carrier. Even if it can penetrate everything, the scope is limited.

Shen Lang will be a ten-finger one. It is originally found in the dark clouds, very flexible, so that you can open a large network, you can be net.

As a result, the current monster's body is covered with the sun, it is a full-scale target, there is no need to aim at all, just need to gently move the finger at random.

Because Shenguang is too sharp, it can directly penetrate everything. Instead, it has limited infection around it. It does not need to slowly cut the saw, and it is directly penetrated. If the thickness of the finger is small, the hole that is pierced is slightly larger.

However, Shen Guang's divine light is not a flash of "point shot", it is a continuation of ten rays!

And now the goal is so big, directly his finger gently moving a little, through the body of the light, saw a large jump of perforation.

The grid of ten rays, plus the changes, suddenly put the body of the monster, the hole is riddled with holes!

Originally, the water monster was the first to attack, and its attack has already reached the top of the Shenlang. It is completely covered, and surrounded by the tail, it is a stable layout.

The speed of the gods is incomparable to its attack. The real thing is that the first move is first come, and it is directly on its body.

Instantly riddled with holes, it directly affected its attack.

It is true that its huge force smashed the ground, or continued to the feet of Shen Lang, and the tail struggled to shrink the circle of encirclement.

The water mist that has been sprayed has already reached the front of the waves.

It is a pity that the ground cracked more than ten meters, and it has no effect on the Shenlang. Even if it cracks a few tens of meters and a few hundred meters, he can easily move in the virtual station!

The water sprays that are sprayed are not the same as the previous rainstorms. They are strong and corrosive, just like super acid water.

Fast and awkward!

But when it comes to the swell of the waves, like those hail, it freezes directly and cannot continue.

As a result, its main attack has no effect, and the auxiliary attack has no meaning. It relies on it to adapt to the tail that has been rolled up and to the side of Shen Lang.

But still that question...

It's faster, it's faster than the speed of light!

Shen Lang only slightly adjusts the angle of the finger. When even from the ten gods, a few points are split, and the left and right shot on the big tail.

The tail and body of the monster have a thick hull like a scale. It dares to become so big, because it is strong enough and thick enough to withstand the knife and axe, it is the bullet. Wearing and bombing may not be rotten.

But the attacking light is like a piece of paper, easily breaking and tearing its hard leather shell.

With the stroke of the finger light, there are a lot of internal organs in the huge body, and a large number of blood vessels and organs are affected.

At that moment, the water monster has only one thought – this human being is very strong, not that it can be provoked!

It began to regret it...

If you know that this person is so strong, then it will not appear. Even if the temple was taken away, there was a great help for the younger brother, but at least it was alive.

There is everything in life, even if it is a little longer, there is still a expectation.

Now, I am afraid that it is already difficult to be good...

What's more, this is not like the previous storms and hail trials. Now it's really hands-on, and the shots are not merciless, the speed is fast, and a little hesitation, it will already miss the time of begging for mercy!

beg for mercy?

It is impossible to ask for mercy!

It was originally the Nile overlord who had been rampant for thousands of years, and later it was whitewashed and transformed, and wrapped itself in the image of “Kemrisu”.

Being able to pay attention to Shen Lang is already its experience and reason in the role of It is absolutely impossible to ask for mercy without dignity.

Let Shen Lang leave the temple, as things have not happened, this is the limit that it can accept.

Ownership is a matter of discretion. For the Wannian demon like it, it is just a matter of the brain, and it will not affect much.

The reality of the situation, it is also very clear, this human does not know what attack method is used, this is it can not resist.

Since you can't ask for mercy, the attack will not have any effect. The only thing that can be done is to escape!

In an instant, the water monsters that cover the sky, the body was quickly wrapped up by large clouds, and then immediately concentrated, quickly shrinking, and smashed to the original.

Chapter 2182 - Handling waters

The escape of the Kemrisu water monster is not to the far side, but to the original place.

It was in the air before, and it was concealed by the dark clouds, in order to better attack the spurs.

But now, it is to avoid the attack of Shen Lang.

Not far away, it is the speed at which it has been discovered, and it is too late to evade it.

If you leave in the distance, you will turn yourself into a target.

But to the height, it is possible to complete the dodge of the gods by moving quickly to the left and right.

In fact, in essence, it is the same. Whether it is far away or the height of the original place, it will not increase the difficulty of chasing the Shenguang, just adjust the angle of the finger.

Of course, in actual operation, the Kemrisu monster is not only flying high, but the body is shrinking smaller than the black clouds.

The advantage of this is to turn the dark cloud into a target, and it can be more concealed. Even if it is attacked by a black cloud, it can be evaded in the dark clouds.

It is a pity that this little cleverness has no effect on Shen Lang. Let alone hide in the dark clouds, even if you hide behind the rocks, you can strike it with precision.

Shen Lang did not kill it in time, I want to see what other tricks this guy can play!

Obviously, it hides in the heights, instead of escaping to the distance, it has not given up attacking him!

Shen Lang is now a bit of interest. I want to see what it gives to her courage and let it have a little fantasies.

Therefore, when Shenguang was attacking the above, he deliberately counted it, as if he had not directly hit his body because of factors such as looking up and dark clouds.

The Kemrisu water monster is exactly what it is. It flies high and shrinks its body in the dark clouds, just to get a little time.

At this moment, the Shenlang has not hit its body in a row, so that it got a little chance to ease, and immediately started the next attack!

Just the ground on which the tail has been opened, the split has already surpassed the place where the Shenlang is standing. The Shenlang has not moved, and the people are standing still.

Now, under the control of the Kemrisu water monster, the cracked ground is more open to the left and right. The original range is more than ten meters, and this time it continues to crack to tens of meters!

Not only is the left and right split, but the depth below is much larger than the previous crack.

And in the next moment, from below the crack, below the sinking waves, a groundwater column broke out accurately!

Before the Shenlang went down to the depth of the temple, there was no groundwater. Now it is up, that is, above the temple. So the groundwater below the crack is certainly not natural.

This is the Kemlisou monster that controls the groundwater, concentrated in the position of the sinking waves, tearing the hills, but for the sake of convenience and speed.

Of course, at first, I wanted to let Shen Lang fall into the crack. Even if I didn't get hurt, it would be a little convenient.

Natural groundwater, even if it has been dug up, can rise a few meters, it is already very urgent, and then it will continue to smash the surrounding silt, it is impossible to spray into the sky.

Now this water column is sprayed directly from the underground to the sinking waves. Not to mention the open water pipes, it is the high-altitude fountain of the artificial landscape.

But Shen Lang is a bit puzzled.

This Kermuri water monster, has been manipulating the water, has attacked him several times, basically has no effect, how can it not die?

Because it used to be the water that it condenses, is it really ample groundwater, can it be filled with infinite bullets?

But this has no meaning at all!

Shen Lang proved that the other party's attack was meaningless. He also wanted to see what other backhands it had. Shen Lang ignored the straight water column under his body, but floated directly to the front for a hundred meters.

The water column is controlled by the angle, and it is attacked directly under the sinking waves, and the speed is very fast.

But the more concentrated, the more easily it is easy to dodge. When the waves are hundreds of meters away, the water column is still high-spray, and there is no flexible turn to follow.

The water column continues to spray high, and after reaching the limit, if it can't bear it, it will scatter around.

At this time, the dark clouds in the air moved!

The water that has been sprayed into the air is no longer receiving gravity, but is scattered in the air, and the dark clouds are falling into the water.

Because the water column is continuously high-speed spray, in a short time, a large drop of water is scattered in the air.

Shen Lang suddenly understood it!

The Kemrisu water monster, just controlling the water column to attack him, is the first intention. Like the ground cracking, it works best, can't work, and it won't waste.

The second meaning is also the real intention, which is to trigger a lot of groundwater into the air!

It is creating a water in the air!

It is already a water monster that has been practiced for thousands of years. Just like the giant python that was encountered before Shen Lang, even if you leave the water, you can survive normally and exert its power.

But after all, it is a water-based creature. In the water, with the help of water, it is possible to give them the best strength and even get a big bonus!

Just a few quick fights with Shen Lang have made it clear that Shen Lang is above it.

But it is not reconciled, there will be an illusion: if it is in the water, with the water flow of the Nile, it can still be turned over!

However, even if it runs away, Shen Lang can directly pursue the past with the light, and may not follow it, and may not be able to lead people to the Nile.

And such a strong person has a trick, the outcome is often in an instant, it can not delay the battle for a long time, it is equal to giving more opportunities to kill it.

It is also impossible to pull the Nile River here, and if it can carry a lot of water resources, it will be as good as it is.

This is the groundwater!

These high-sprayed water columns, even if they can't directly hit the Shenlang can be controlled by it in the air.

What it just needs is the opportunity to "hand carry" the water into the air and the ground.

At this moment, every second, a lot of water is sprayed into the air, and the air above the hills is quickly felt by the rain, and then becomes rain and fog.

Such changes are only a few seconds before and after.

This process of carrying can be completed, of course, because Shen Lang wants to see what it is doing, or else just press all the water column directly, it can be done.

Now Shen Lang can see the true intentions of the Kemrisu water monster. The water monster also grasps the opportunity, the large amount of water in the air, and the continuous groundwater, which gives it ample energy source and self-confidence!

Chapter 2183 - Water call block

“Death!”

Originally, this was the home game. At this moment, there were countless water resources supplements, which made the Kemrissu water monsters self-confidence.

The Shenlang is only a hundred meters away, and it is still on the hill.

As the water sprays more and more, the scope of the Kmurisu water monsters is getting bigger and bigger. It is still hiding in the dark clouds in the mist.

With the double cover of water mist and dark clouds, it feels that it will not be so easily hit by the waves.

I just hit it with a riddled hole, but the taste is very uncomfortable. Now, it feels it is time for it to fight back!

When it roared out, countless drops of water in the air, like a million bullets, burst into the waves!

The scale of this time is actually far less than the time when it caused a torrential rain around the hills.

But the power is not the same, just that is just to show strength, or belong to the category of performance show, and now, on each of the water drops, there is a real attack of power!

This is the same as it is sprayed out of the water, but the scale is much larger than the water spray itself.

It already knows that it won't hit the body of Shenlang, it will be blocked directly in front, so this time not only the numerous drops of water in the air have exploded, the water column continues to spray, and continues to be a large number of drops of water. , continue to provide ammunition!

This kind of thinking is not wrong at all. Even if it is bullet-proof glass, it can't be broken with one shot and two shots. Ten shots and twenty shots, one hundred shots and two hundred shots... The

continuous impact can make up for the lack of strength. If there are enough bullets, don't say bulletproof glass, the walls can be crushed and knocked down.

Now it is the same reason for this attack. Shen Lang can stop the attack of solidifying 100,000 water drops. It will continue to strike hundreds of thousands and millions of drops of water, and eventually it will make the waves unable to stand up.

This is also the reason why it needs to carry groundwater. If it is a condensation of water, it takes into account the amount of water – such as the previous heavy rain and hail, and it does not take into account the power.

Now that the groundwater has been introduced, it is necessary to have a better control at the beginning of the operation. It is only necessary to maintain it in the back, and it does not require much thought.

After understanding all its intents, Shen Lang did not continue to play with it so much, and directly jumped up and greeted the “million bullets”!

The scene of the surprise of the Kemrisu water monster appeared. All the water drops around the deep waves, naturally slipped to the side, and did not attack him!

Originally, the theory of this attack was based on fixed targets. A piece of bulletproof glass and a wall are fixed in place, so they can be crushed by continuous blows.

But if you encounter high-speed moving targets, such as speed and speed, and can be very high and far, the millions of bullets do not make much sense.

When Shen Lang just leapt up, it discovered this and immediately realized that the time given to it was shorter. The result was that the numerous water droplets of the large-scale attack were concentrated in a small area to attack the waves.

However, Shen Lang did not evade the past, but the water drops that came to the side, all slipped to the side.

Shen Lang can have an invisible hood to block the water drops. It is known and acceptable, but the reason is the same. The super multi-number is just to click through his protective cover.

But just obviously, the water drops are directly sliding, not the ones that are blocked!

Shen Lang can do this, of course, because the giant scorpion had no water to protect it.

It is in the Tongliu River, a river that is ten miles wide and several hundred meters deep. He can be as relaxed as a watery beast, and will not be contaminated with water. What is the current amount of water? It's just drizzling!

Even though these water drops contain powerful power, when they reach the surrounding waves, they are like oil, and the natural repelling slides open, so there is no such thing as the number of shattering shields.

Once Shen Lang is true, the speed is not as slow as before!

At the moment of the surprise of the Kemrisu water monster, Shen Lang has been like a residual image, passing through the rain and fog, directly before the dark clouds.

The Kemrisu water monster was still the cover of the second layer, and its entity shrinks into the dark clouds, which is not so easy to be directly locked.

But at this moment, Shen Lang directly controlled all the scope of the black cloud!

He now controls the field according to the way of the dragon gods, and with the effect of its own suppression, immediately let the Kemrisu monster feel deeply trapped in the quagmire.

However, this is the game of the Kemrisu Water Monster initiative. Even if the self-confidence is overwhelming, there are still moves.

In the dark clouds, it is also full of water vapor, and it has fallen down, that is, the highest point of the water column with high spray. In other words, the highest point of the water column is also within the scope of the dark clouds.

So now it is found that Shen Lang has locked the scope of the dark clouds and made it difficult to move, and immediately realized the danger.

Suddenly, the Kemrisu monster immediately made another decision to escape!

It escaped very simply this time, and did not struggle with the control of Shenlang, but played the advantage of water control, directly using water as a medium.

In an instant, it reached the water column, which is controlled by the spout from the groundwater. Now it is flying quickly along the water column to the crack, then into the underground, and directly hiding into the groundwater!

Within the control of the realm of God, Shen Lang had absolute control over it and prevented it from moving, but he did not expect it to borrow water, and did not block the entire water column.

However, the ability of Shen Lang's resilience will be lost to the water monster?

When the monsters went down to the ground, they continued to control the water column as a cover for more than a fraction of a second.

And Shen Lang is at the water column continue to chase the underground cracks, lightning directly along the water column!

The Kremsi water monster escaped fast, and the lightning speed was faster, the whole water flow became a conductor, and it was the advantage of it by water, but now it is the trace of electric shock tracking it!

If it is directly immersed in the soil, the smashing of the thunder and lightning attacks will attack the ground. Even if it can spread to a little, it will not have much effect.

But now it is different. This is along the water, and it is directly led to it, and it is shivering!

At this moment, the Kemrisu water monster just followed the gushing water column and just hid in the groundwater. He thought about giving up the attack and fleeing in the distance, but did not expect a continuous electric shock.

Which kind of taste makes it impossible to control its own strength, it is completely a conductor in the water, there is no place to hide, and its instinctive madness bursts directly to the entire hill!

Chapter 2184 - Underground chase

The Kemrisu water monster is not aware of the lightning strikes that have just occurred, but the attack is coming along the water. As a monster with a good understanding of the water, it is still very clear.

So it immediately interrupted the control of the water column, and there was no cover value, but it helped the enemy to attack.

At the same time, it turned the blast of the electric shock to the hills, and broke out the power of the cockroaches.

This is both a kind of release of itself, but also a trouble for the above-mentioned swells!

Because the water column that has just had a huge impact has already hit a crack from the groundwater to the ground crack. Even if it does not control the water impact, Shen Lang can still follow this hole.

And in this groundwater, if you can't escape and fail to leave, the electric shock will follow.

Therefore, the entire hill is bursting, not to hurt the waves, but to wipe out the cracks of the ground, through the chaos of the whole mountain, so that Shen Lang can not find it accurately.

But how could Shen Lang make it easy to escape?

At the beginning of the electric shock through the water column, Shen Lang expected that it would interrupt the water column, so when he was in the thunderstorm attack, people also descended down the water column.

When the water column is disconnected, the Shenlang has passed through the cracked ground and passed through the hole below to the groundwater.

Therefore, the entire hill collapsed, which is equal to the situation that occurred above the Shenlang, and did not affect him. He himself is also in the groundwater, continue to lock the water monster lightning attack!

However, the industry has a specialization, even if the water can avoid water, the study of water is not as good as the Kemrisu. Just like he can fire, but it is not as good as fire.

At the moment, under the ground, in the underground river, his speed can not be played out, compared to the big discount.

The Kemrisu monster is just the opposite, it can be greatly increased.

Distance, impurities in the water, silt stones, etc., will affect the power of the current, the farther and weaker.

Shen Lang just went down the water column and was able to tremble with the water. The reason was that his power was strong enough, but it was also discounted because of the distance of transmission and impurities in the water.

At this moment, in the undercurrent of groundwater, the effect will be even worse. A large amount of sediment will be filled, and there will be seven turns and eight bends, many of which will be blocked by mud stones.

In short, his attack with lightning in the water will be even worse, and the farther the opponent opens the gap, the worse the effect will be. The worse the effect, the faster the opponent will escape!

So at such a moment, Shen Lang must change the way.

Under the water, Shen Lang took out the small shovel!

The small shovel magic weapon is to excavate and cooperate with the bandits. Now the Kemrisu water monster is at the level of groundwater, which has a little impact on the small shovel bandits.

However, Shen Lang is not afraid of trouble, just shovel the shovel quickly underneath!

With the power of a small shovel, you can dig a few tens of meters of pits, but now it is under the ground, the size of the excavation is so large, and there is no place to pile up the soil.

However, since there is a mud layer in the groundwater, there is still a lot of space. In the natural state, it is washed out by the groundwater, and there is only one law that tends to flow. The specificity is still curved, slow and urgent, and there are not many congestions.

Now that the Shenlang is under the ground, it is impossible to throw the soil on the ground and explode the ground directly. Of course, he can do it, but he does not waste it.

Therefore, the excavation of this road, the soil is also powerfully plugged to both sides, all the underground rivers that are complicated in the situation, all cleaned up the obstacles, showing a straight passage.

Shen Lang is below, there is no speed to play. The other party is in a state of water and water.

But nowadays, the excavation of the small shovel is to open up the intricate underground rivers, all of which are directly opened. The Shenlang does not need to be blocked before, and it is all the way to catch up.

If you encounter a big turning point and are blocked by a large area of rocky soil, it is even more of a small shovel.

In this way, the speed of becoming a deep wave has increased greatly!

Shen Lang is also digging more and more, waving faster and faster, and digging more and more.

One borrowed from the water, one excavated the soil and cut the road... Soon, the distance that was originally opened was pulled back by Shen Lang, and it was gradually getting closer!

Kemrisu water monster, this time is desperate to escape, simply can not observe the specific situation, but the back is very large, and the more chasing closer, but it is clearly able to feel.

The more you can feel the vibration, the more you feel flustered.

It has to escape, naturally it is going to the Nile River, to the big river, whether it is hiding or fighting, it will have more advantages.

But it is going along the groundwater, so there is no clear and direct river on the surface. Moreover, in the case of being chased, it has no time to identify the direction. Under the ground, there is no other direction other than the direction of groundwater flow.

In this way, it can only be chased out with water, and it is impossible to confirm that it is going to the Nile.

But this is the northeastern Africa. It is not the “earth of the earth” in the Amazon basin. The river on the surface cannot guarantee how long it will extend. It may be dry for a while.

The condition of groundwater is much better than the surface, but the situation is more complicated and there is no law to follow. If there is no problem, there will be no water in front!

The Kremsius monster, the most fearful of this situation, in that case, its speed is reduced, it is blocked under the ground.

Behind the sinking wave, after gradually getting closer, he has already mastered the initiative. Under the controllable distance, he does not have to worry about the monsters losing and enjoying the process of catching mice.

In order to create greater psychological pressure on the water monster, Shen Lang waves the small shovel faster, making the movement more loud!

But this has a result that he himself has neglected...

As he gets more and more playful, the tunnels that are excavated are getting bigger and bigger!

All the soil was not pulled out of the ground, was forced to squeeze on both sides and behind by huge forces. At the beginning, the scope was small, and there was nothing like it, just like digging a sewer.

But the movements are getting bigger and bigger, turning into tens of meters of vibration, and gradually getting bigger, the impact is different.

Human construction is a process of monitoring and calculation. After excavating the soil, it will be transported away and will be reinforced in various ways. And the progress is slow, even if there is a danger of collapse when blasting.

The movement of Shen Lang is getting bigger and bigger, just like running along the groundwater, a series of continuous blasting!

And all the way to catch up, the thickness of the ground will not be the same. After all, the place where they first started was on a hill. In the face of a thinner thickness, the top is exactly the riverbed, so a series of “blasting” in the past, it began to trigger the ground crack!

Chapter 2185 - Seeking for the price

The result is that Shen Lang is tracking the Kemlisu monster in the underground, and when it continues to increase pressure on it, the ground begins to crack down!

This is also a linkage reaction. When there is a ground crack, it will cause a new shock, and the ground that can be supported by the side will also collapse.

In the end, there was a long dragon on the ground, chasing the waves at the pace below. Except for some mountains, many of the thin terrain have collapsed.

In this regard, Shen Lang is ignorant!

Because they are catching up very fast, he has already left a long distance when there is a crack in the back. Plus, he didn't even think that it would affect the ground. The attention was on the front of the monster, and he couldn't let it run.

After so many hundred miles, the things that the Kemrisu Water Monster worried about happened!

There is no groundwater in front!

Of course, this will not suddenly disappear, but the previous paragraph will become smaller and smaller. It's just a small stream of water, it can be taken away by the momentum, but now, there is no way.

No water, it is a convenience for Shen Lang, he does not need to dig, can go through faster.

At this time, the Kemrisu water monster has no way to find a new source of water, but it can't stop. The pause will only be caught immediately.

So it immediately broke the power of the cockroach, tearing the ground and jumping out.

The previous fight has made it clear that on the ground and in the air, the speed of the waves may be faster than it is, and the ability to control the surrounding environment is stronger than it.

But now there is no way, there is no way to go below, there is no water, it has to be drilled in the soil, the speed will be greatly reduced, and it can play a little in the air.

Kemrisu is a monster who has lived for thousands of years. His wisdom and adaptability are very good. The imprisonment and thunder of lightning in the field of God have left it with a lingering fear.

It will also consume power when it tears the ground, and it will take a little delay. In order not to be chased by the sinking waves, it will wait for it to vacate, and the tail will quickly smash out and hit the surrounding ground!

This will not only affect the speed at which it is vacated, but also increase the speed of the overshoot by the force of rebound.

More importantly, a large amount of mud rock is opened and then falls down under the body, so that the sinking waves that follow will encounter a large number of mudslides.

Although it is clear that this does not stop the wave of time, it is even less likely to be injured, but as long as it can delay a little more time, it will have more hope of escape.

fast! Just a little faster!

The Kemrisu monster will not fly to the heights. It only needs to be as high as one or two hundred meters, and then flies away.

The sinking waves are still underground, and they have to follow the tearing ground. Then it starts again, and there is no point in the front, back, left and right. It doesn't have to go forward and back now, and you have to fly back in the direction of the Nile!

With its eternal years here, coupled with sensitivity to water sources, naturally no maps are needed, and there is no need to refer to them. There is no way to find them in the ground. After coming out, they can immediately recognize the direction.

Then, at the fastest speed, hide it in the Nile!

This human being can't afford it!

Now that I can't take care of the temple, it is very good to be able to escape.

At this time, the Kemrisu monster feels that he has reached the limit and has reached the fastest speed. Today's level of tension is only the danger of being chased when it is not strong enough thousands of years ago.

This is a very magical experience, and the high tension also gives it a kind of tightrope.

but.....

Whether it's encouraging yourself or being nervous, it's just a matter of moments. Because the next moment, it feels that it has been tied by a net, and Shen Lang has appeared in the air in front of it!

How can it be?

It is noticed that the body is moving, and those fallen muds have not yet fallen. Shen Lang has not yet come up from the cracks of the ground, how can he wait in advance in the air?

But even if it is incredible, it is the first to escape!

I have already eaten the loss of getting bigger body. Now that Shen Lang has reached the front, it will not become bigger and bigger. Instead, it will continue to shrink the body and prepare to fly away from the grid.

It turned out that the net seemed to have been stained on its own body. It became smaller and smaller, and it still tightened its body, making it almost breathless.

Of course, this is not the real breath, but the tightness of the body that is difficult to change the body.

“Are you running?”

Shen Langyi waved, the water monster that was caught in the net, directly to him.

He didn't rush out from the tears of the water monster, because he was still a little away from the water monster. When he sensed that the monster was on the ground, he would not go forward. The small shovel took him straight out. .

The small shovel can shuttle the bandits directly in the soil. There is no need to tear the ground. It is the first step to come to the air, and then the sky net is ready.

Therefore, the water monster has just used the tail to split the ground, which is simply useless.

It's fast, it's too late to tell, and it just crashed into the sky and the net!

Shen Lang can accurately calculate the direction, also because it is supposed to go to the Nile.

He is not familiar with this continent, nor does he feel anything about water, but he has a map! The holy gala possesses the map information of the earth, and directly knows the location of the current position according to the satellite positioning. The direction of the Nile River is also coming out.

Water monsters can only know a general direction, approximate distance, and the power of technology, but it can accurately locate ten meters or even meters.

So there is no accident, and when the water monster accelerates to escape, it is directly caught.

This is the magic weapon on the mainland of Nakajima. It can be tied to the ancestors of the realm of the gods. Of course, this year's monsters cannot break free.

Shen Lang is not worried about whether this magic weapon will be used on the earth to trigger a catastrophe like because it is not an offensive weapon, it is the sword of the king, under his control, There is no problem.

“Rain!”

After discovering that he could not break free and could not narrow the escape from the grid, the Kemrisu water monster immediately became desperate. It understood that there is only one way to beg for mercy.

If you ask for mercy, you must pay the price. No matter whether it is human beings or itself, there is not enough interest, how can we spare the enemy?

Therefore, after asking for mercy, not waiting for Shenlang to reject, it has begun to promise benefits.

“Do you want to know the secrets of the pyramid? Do you want to know the treasures of the pharaohs of all ages? As long as you spare me, I will make you a richer person than all the kings now!”

Chapter 2186 - It is better to offer Nedan

As a eternal water monster, Kermsu has contacted and experienced human beings of different eras, and greed for wealth is almost an unchanging heart.

In different eras, human beings have different concepts about wealth. The earliest use of some meat foods can be bought and attracted to humans. The most common thing behind is gold.

Now it is different. Human beings have developed into modern civilization. Although gold is still a precious metal, its value is limited. To reach the price of abundance, a lot of gold must be done.

For a strong person like Shen Lang, a few jins or a few hundred pounds of gold may not be able to make him tempted. It is impossible to have a Jinshan.

Therefore, it directly took out the most attractive wealth of this land – Pharaoh’s treasure!

And it uses the treasures of the “Pharaohs of the Ages.”

Pharaohs from different periods will have different treasures. Some have been hollowed out by Western aggressors, while others have lost clues and have not been able to find them.

But for the Kemlisou monster that came all the way, there are many things that people have lost in this land, and they still know it.

Just like that temple, it is intentionally hidden, and there are other temples. And some pyramids, pharaoh treasures and the like, it was also taken away.

It does not need gold treasures, but it is very useful for humans, so it also has a lot of hoarding.

Now that I have said this, I really want to contribute all the treasures, and I can really reach the level of rich countries!

This human power will not care about millions to tens of millions, or even hundreds of millions, but if it is worth hundreds of billions, hundreds of billions of wealth?

According to the experience of the Kemrisu water monster, human beings can buy it. There is only one reason why it can't be bought – the price is not enough!

Although it was seeking for mercy, when it was said that it was conditional, it was still experienced and toned, with strong temptation.

Do you want to know the secrets of the pyramid?

Do you want to know the treasures of the pharaohs of all ages?

I will make you a richer person than all the kings now!

Using the “king” to refer to the richest group of people is still its old concept, not that it does not know that there are many richer than the king. But these few sentences have already strongly expressed the purchase price it can give.

“do not wanna know.”

After it was tempted, it waited for Shen Lang to respond. I didn't expect Shen Lang to directly say that I didn't want to know!

“You, you...this...”

The Kemrisu Water Monster is ready to respond. According to the usual practice, Shen Lang should doubt whether it is true or not, and will ask it to show its sincerity.

I did not expect to reject it directly!

“I am telling the truth! I know the secret of the pyramid!”

“Now the pyramids are empty, but there are treasures in them. I know where I am hiding. I can give them all to you!”

“It's all! I know more than everyone else, all for you!”

In order to win the letter, it began to rush.

“Do you think people like me need the wealth of ordinary people? Or, on the other hand, do you think that all the pharaoh treasures are worth the value of you?”

Shen Lang looked at it like a smile, watching it so anxious, could not help but ridicule.

Although he is very clear about the film law of “the villain died in words”, here he is completely confident that he can control the whole situation, not to mention the monsters and ghosts here, that is, the forces on the whole earth, he is fearless!

After he said this, the face of the Kemrisu monster became awkward.

It immediately understood everything!

Although the hearts of the people are greedy, they will not change because of the times.

But the times are different, and the definition of wealth is different. Different people, the definition of wealth will be different!

The ancient high priests will be bought by it, because in such an era, wealth can help the priests to do a lot of things, whether it is the buying and selling of nobles, or the influence on civilians and slaves, can be transformed into power, influence, and the power of faith.

But now the Shen Lang in front of it, has no interest in the wealth of the world, and the strength is so superb, the general things can not enter his eyes, can touch him, only powerful energy resources!

Why did he accept the temple?

Isn't this obvious?

Now that this subtext has been said, even if there is a Jinshan, he will not be in the eye, because the value it represents is more useful to him!

It is the "great god" of Kemrisu, which has been cultivated for thousands of years. In addition to its own cultivation and evolution, it also absorbs the energy of the temple. If humans eat it directly, it will certainly be able to make great progress!

Look at it and say nothing, Shen Lang continues to laugh.

"Not as good as this, you give me your inner Dan, I can spare you a life. There is hope in life, isn't it?"

The face of the Kemrisu monster is even more ugly.

If it dedicates Nei Dan to Shen Lang, it means that it has been repaired for seven or eighty-eight. What is the use of the rest?

Is it really time to come back again?

Even if it can suppress all the anger and unwillingness, and can calm down the mind and recultivate, there will be no more time.

Living for a thousand years, it is old enough to maintain its peak, because its strong repair is supportive. Once the inner Dan is pumped, it will quickly age.

The same is true for human beings, like the Pope. If one is trained to be drained, it will soon become an old clock.

Besides, even if its vitality is strong enough, even if it does not have Nedan, it can live for hundreds of years, and it can extend Shouyuan with cultivation. Will other people give it this time?

There was no human comprehension who had hunted it before. It was not that the land had no comprehension, but they often had two results. One could not find it at all. The other one was to find traces of its traces. Its food tonic!

Once it has disappeared from Nei Dan, it will become a long time for the old dragon to linger, and it will not be possible to return to it for hundreds of years. It has not been able to hide, and will soon be discovered by human comprehensions and will not resist them.

Even if there is no endo, its other value will quickly shrink sharply, but for human monks, after all, it is a tonic. Even it is worthless Killing such monsters and beasts will also gain fame and support from believers.

I have seen so many milestones of historical changes, can you not know this ending?

“If you want to take my inner dan, please kill me first! I am alive and meaningless.”

The Kremsi water monster sighed, and his mind was desperately thinking about the situation and seeing if there was anything that could buy life.

Shen Lang shrugged: “This is your request. I don’t mind meeting your wishes. Just be helpful and enjoy the day.”

“...”

The Kemrisu water monster secretly vomits blood, this is not to kill it, you must first mad at it!

Suddenly, the brain flashed in his head and hurriedly shouted: “Wait a minute!”

Chapter 2187 - Pharaoh's Secret

Tutankhamun! Tutankhamun! ”

What the hell?

Listening to a word from the Kemrisu water monster, Shen Lang is a bit inexplicable, is it a spell?

However, he immediately checked it with the sacred search and understood what it was.

Tutankhamun is a famous pharaoh king of this ancient civilization. Strictly speaking, he is not too famous, because he died at the age of 19.

The world is famous because of his tomb!

Because he died early, the pyramid has not yet been built, so another small tomb was buried, plus more concealed. Therefore, in the long history behind, the pharaoh's tombs of the major pyramids have been stolen, and only he has not been stolen.

As a result, many precious cultural relics have been unearthed. During the excavation process, there are also many rumors of mysterious and spiritual events. The so-called “Pharaoh's curse” is derived from its tomb.

Every generation of Pharaohs has a lot of precious funerary objects, but they have all been dug up by the tomb thieves. After a few thousand years of history, they have not been able to find them, and there are no records. Most of the valuable ones have also been destroyed. Various extinctions.

Therefore, the tomb of Tutankhamun is very famous, and there is a complete set of funerary objects.

Such as the very famous gold plaque, gold mask, gold dagger, gold chariot and so on.

Yes, many of them are gold. Like China and many places, gold is a rare and noble metal in a long history. It can only be owned and used by the royal family and the king.

“What do you want to say?” Shen Lang gave it a chance to express it.

Can the Kemrisu water monster steal these golden funerary objects in the museum?

What does that mean?

Of course, these can no longer be based on the value theory of gold. From the perspective of historical relics, it is already a national treasure level and cannot be measured by price.

But the question is, what is Shen Lang going to do?

He has no good collection of antiques, and he has no interest in plundering other civilized and antique artifacts. If you say value, even if it can be worth billions, you have to sell it. Who can easily pick up this level of cultural relics?

If it is openly circulated, it will be condemned by the whole world!

Because now is not the age of war, there are countless wars in history, it is already the past tense, and now the earth is the earth of civilization.

Shen Lang can ignore all the public opinion, there will be no pressure, but that will make his support plummet. Compared with the power of faith, the value of money attached to this cultural relic is not worth mentioning.

Seeing the opportunity for Shen Lang to speak to it, the Kemrisu water monster sighed with relief, and at least the gimmick thrown out had already attracted the other side.

“Listen to me! I just thought of it. What gold mask and gold 图 of Tutankhamun Pharaoh is actually not made of gold!”

Shen Lang frowned. “Speak the key.”

What information is this?

What kind of metal does not naturally grow a large piece, which is extracted from the ore. Gold mines were scarce, and gold refining technology was not developed enough three thousand years ago, with limited purity and quantity.

Light is a golden mask, which is the weight of more than 20 kilograms. Not to mention the golden dragonfly and the gold chariot.

The actual ingredients, naturally there are many other metals added, and gold is only a part. And like the gold dagger, it really needs to be made of all gold, and it can't be hard and sharp.

The Kemrisu water monster hurriedly continued to explain.

“A lot of funerary objects in Tutankhamun are not materials on the earth, they are from the meteorites!”

There was no accident in Shen Lang. When I searched for Tutankhamun, the information listed also included the introduction of these famous cultural relics, and it was also said that it was a meteorite.

The scientific community is inconclusive, but the alloy composition is similar to the meteorites. At that time, there was no technology that could smelt meteorite forged weapons and jewelry, but...

Shen Lang slightly hesitated.

The information found is nothing more than two kinds. One is to write the literary self-media number. It is generally in the direction of mystery and spirituality to attract attention. Historically, there have been more words, leaving a lot of imprints, forming some common sense.

The other is the study of the scientific community, which is purely scientifically arguable. Analyze, detect components, and break historical information. If the argument is not available, then maintain the “hypothesis.”

For example, in the era, the former two thousand years, three thousand years, can also be blown into five thousand years, six thousand years, even if the difference is huge, anyway, are “thousands of years?” The latter will detect the era of precision as much as possible through the “carbon 14” and other methods.

If you can't quickly search for scientific evidence that is truly authoritative, it is often difficult to distinguish between those that are true scientific circles, and those that are ridiculous.

But the problem now is that no matter which one, it is written by ordinary people!

This is not taking into account factors other than the scientific system such as comprehension.

It is extremely difficult for ordinary people three thousand years ago to smelt the meteorites of the heavens, but for the magic forge masters who have supernatural powers, they may not be able to do so.

With such a thought, it will be relieved. There are some products of “aliens” that are considered to be “traversing”, perhaps by the self-cultivators of the priests and wizards.

Shen Lang did not interrupt, but the Kemrisu water monster still saw his hesitation, and quickly explained it.

“All the funerary objects of Tutankhamun actually have two sets of authenticity. Now what humans have dug up to see is fake. It is the set used to cover. The real set is taken away by me. It!”

“Authentic? Have you taken it?” Shen Lang looked at it a little unbelievable.

The Kemrisu water monster smiled bitterly.

“I didn't lie because many of the funerary objects of the Pharaoh's Pyramid were taken away by me.”

“Is you in the pyramid?”

Shen Lang still does not believe that the existing pyramid of development will leave a residual body, but when it was originally built, it is closed, and there must be seals such as spell enchantments. Human power may enter. For the demon ghosts definitely a stronger limit.

“Not necessarily I personally go in I have controlled a lot of people. I get these things, but they are only useful, and most of them are used to buy humans.”

Kemrisu Water Monster is afraid of Shen Lang’s doubts and quickly explained.

This can be said to be true. It has been alive for a long time. The pyramids that have been built for decades are a lifetime for human beings, and it is nothing more than a watch.

Coupled with its strength, it is not too difficult to know more information. It is also possible that you do not personally take risks and let the human tomb thief pay for the cost of life by means of coercion and temptation.

“Too much, plus a lot of value, Tutankhamun is also 3,000 years ago, so I did not think about it for a while. I am willing to give this set of authenticity to you! This is not the same, it may be for you. It also has a big effect!”

Chapter 2188 - Offer the soul

Before the Kmlu Su water monster, he only thought of the wealth of Pharaoh, because even in the past years, it used a lot of places to buy humans, and certainly there are still many wealth collections.

But since Shen Lang does not care about wealth like gold, but named its inner Dan, it is related to those wealth.

Now I want to dedicate it to Shen Lang, I hope that this will be able to move the waves.

Shen Lang looked at the Kemrissu water monster, and the water monsters imprisoned by the sky and the net, there is no room for struggle. If he needs it, then he can plunder its memory like a temple, and naturally know the land of treasure!

He didn’t have a look, and he was shocked by the Kremsou.

Although it does not understand the specific ideas of Shen Lang, it basically guesses a rough idea.

Now it is offered on its own initiative, just to offer one. If you have all the memories, then everyone else can have it!

“Respected human beings, please forgive me before my rudeness. I apologize to you for your arrogance and rudeness. I hope that you will not be able to practice my life for a long time. I am willing to offer my soul. Willing to be your slave in the future!”

The original water monster is to put the last hope on the valuable items. Now it is found that Shen Lang may directly put it all over, and there is no value.

Therefore, it decisively lowered the posture again. This time, it is to offer your own soul and treat yourself as a slave. As a thug, this is the value of its own.

Shen Lang is hesitating at this moment.

When I heard this, I couldn't help but secretly open my eyes. What did I do early?

He said before, it is not easy to practice in it for thousands of years, you can put it a horse, the result is to fight him to the end, and even threaten to kill him.

No coffin, no tears!

Originally he was hesitant to kill this monster, anyway, all its memories can be taken over, even if there is really a pharaoh treasure, it will not miss the mistake.

But now the water monster is taking the initiative to say that he wants to offer his soul, and let him think about it.

Compared to direct destruction, controlling the life of its soul is equivalent to adding a super beater. Anyway, wanting its treasure, can be directly requested.

The verbal enthusiasm is of course unreliable. But being willing to offer a soul is true sincerity, and it is only when there is no way.

That is truly reliable, because he can destroy the soul of the other person with a little thought, this is the real master.

The other party will make such a choice, that is, willing to sacrifice freedom for life.

The reason is simple, as long as you live there is hope.

Although the Kemrisu monster has lived for a thousand years, as long as the realm is maintained, the Shouyuan is still very long. As long as you wait until the natural death of Shen Lang, it will be freed.

According to the longevity of human beings, it will last for hundreds of years. As long as you are a slave, the most difficult thing is to let go of your self-esteem. Nothing else is going to work, it will not be difficult for it.

It has just begun to ask for mercy, and when it comes to the soul, it is the hardest thing to do. Naturally, it also maintains the sincerity of body and mind.

“Okay, then I will leave you! If you have a disagreement, you know what the consequences will be.”

Like the prisoners waiting for the verdict, Shen Lang hesitated for a second, making it feel very long.

At this moment, I heard that Shen Lang had already answered, and I couldn't help but be overjoyed. I promised again and again: “Don't dare to have any disagreement! You must be faithful to your master!”

When he spoke, his body trembled and he felt that his soul was marked with a mark.

It is very clear about what kind of form it is and what it is asking for. The way of sinking waves is different from the one here, but the result is the same.

Since it has already got its soul, Shen Lang has also received the net.

Now, no matter where he flies, he can control it and even kill it!

And if the water monster is killing him and wants to kill him, then he doesn't need him to think about it. Naturally, it will be finished. This is a ban on preventing it from attacking.

Under such circumstances, Shen Lang wants to read the memory of the Kemsu Monster, and it does not dare to contradict it.

So wait for Shen Lang to ask questions, regain the free Kemrissu water monster, and quickly offer your sincerity, lest this unreliable contract, resulting in the loss of restricted freedom.

“Master, please come with me. I will take you to find the treasure of the Pharaoh!”

“it is good.”

Shen Lang did not have any kind of politeness, and he agreed directly.

He has no interest in the general pharaoh's treasure. This is the water monster. Since the “golden suit” in the tomb of Tutankhamun is a fake for theft, the real thing is collected by it, and it is made by the meteorite. I want to see what happens.

The Kemrisu monster immediately took the posture of the servant, and paid respectfully to the shiver in the air, and then made the invitation etiquette, which led the way.

Shen Lang did not read its memory, but according to normal analysis, he thought that it should go to the Nile River, but the result was not the case.

When flying in the air, the Shenlang gods expanded as much as possible, and the overall situation was understood. As a result, it was found that the effect of waving a small shovel under the ground had caused the ground to collapse and collapse!

In fact, the environment here is a lot of deserts and semi-deserts. Many of them are quicksand. It is not surprising that they are sunken.

In such arid and deserted environment, it is not easy to find a lot of groundwater networks.

Think again, it is no wonder that it will show strength by condensing rainstorms, because in the desert and semi-desert environment, it is very challenging to try to condense the rainstorm.

Now he is too lazy to pay attention to it, just in the night, flying with the Kemrissu monster.

Positioned about the approximate environment, this is the depths of the desert in the west, whether it is the map positioning or the intuitive feeling above, this is the no-man's land that came to the depths of the desert.

The Kemrisu water monster first landed on the ground, respectfully waiting for the waves, and then began to read the words of the spell.

After a while, in the deserted no-man's land, there was a tornado out of thin air.

“Master please rest assured This will not hurt you, please go in with me!”

The Kemrisu water monster first made a guarantee with Shen Lang, and then he himself committed himself to the tornado. The whole speed was not fast. This is to prepare for the failure of the wave, and it can follow it.

Shen Lang is indeed awkward because he has a little familiarity!

When I was in the Jinji Valley forbidden land, I encountered a similar situation of a desert tornado, and when I joined it, I reached the meditation area.

Later, in the Yungong Holy Land, there was also a tornado-like environment, which was the way to send away.

Is this a desert tornado that rolls a lot of yellow sand, and is it a cover for the array?

Chapter 2189 - Treasure cave

Of course, Shen Lang will not be afraid, even the vigilance is not needed, just a little like this way, I do not know if this is a coincidence, or has some continuity.

At the moment when the Kermsu water monster entered the tornado, Shen Lang also followed.

For this “tornado”, Shen Lang has several judgments quickly.

First of all, it may be a magical array, just like the Tianshan Jianzong and other sects, which can block the interruption of ordinary people and ordinary comprehensions. For high-level monks, it does not work much.

If it is a magical array, the place to go should be under this desert.

Second, it is a transmission matrix that takes people to another place.

But there are many possibilities for the transmission array. For example, the kind that is encountered in the Yungong Holy Land is in the same space. This area to that area may also be below the desert.

There is also a world like the transfer from Tiandu City to the other side of Zhoushan.

And if the Golden Mile is forbidden to pass to the meditation domain, it is transmitted to another space. Including the small world, or another world.

These thoughts are natural for Shen Lang, but he did not think deeply, because the answer came out immediately.

After entering the tornado filled with the yellow sand, he and the Kemrisu water monster immediately felt the fluctuation of the space, and then went to another space.

In the moment, Shen Lang learned all the information around him.

The appearance here seems to be that in a cave in the underground, the holy armor does not detect satellite signals or the like. But it is not because of this, it is determined that it is a small world, another world and the like.

Because this is in the middle of the desert, the lack of base stations nearby, the original signal is weak, deep underground, and all signals are blocked by the earth.

“please follow me.”

Kemrisu water monster, do a good attitude of a slave, in addition to Christine, and immediately explained the source.

“This is a treasure house of the human priests. Later it was abandoned. I took it. Now no one knows that my things are here, and sometimes I will stay here.”

The Kemrisu monster is a dragon snake shape, probably also a creature of this kind, so it is far more comfortable than this desert.

Shen Lang probably understands that it is such a source, and there is no question.

Is it robbed, except for the treasure, it can not be used here, these are irrelevant.

This suspected underground cave, there are also some blue and shimmering stones on the wall, so that there is more light in it.

The Kremisi water monster swiftly moved forward as if it were swimming in the water so naturally.

Its body has not changed its appearance, but in the face of Shen Lang, it has been presented several times in different sizes.

It just appeared hidden in the dark clouds, and it became huge covering the entire hill, narrowed down into the dark clouds, and finally, in order to escape, it shrank smaller and walked along the groundwater source.

When the ground is torn out, it knocks down more ground for the tail to obstruct the sinking waves and make the body bigger.

After being wrapped up in the sky, I quickly rolled out and wanted to escape from the grid.

So now, in front of Shen Lang, it is a big python looking like a monster.

Such a shape makes it different in space requirements, just like when the drowning water left, as long as there is a little water, it can be dexterously turned.

This also proves that it is not the cave that it opened, or else it should be adapted to its shape. Now, Shen Lang is walking straight forward and has no influence.

When the cave went forward, it didn't take long to get to the end. It was actually a drop-shaped shape. The place where they just appeared was at the cutting edge, but now it is coming in.

The space inside is obviously much larger, and it is comparable to the treasure house space of the City of Light.

Shen Lang's knowledge slipped a circle. This is obviously a place that has been excavated. There is a special layer of material around it, which is probably an isolated function.

Isolation of groundwater infiltration, but also isolation of external exploration and the like.

There are also a few stones that emit a faint blue light, so that the space inside is much brighter than the place that has just entered.

However, on the whole, it is still a darker cool style. Of course, this is no problem for Shenlang. You can see everything clearly.

Everything is well organized in the treasure house of the City of Light.

It's not the same here, anything is thrown on the ground.

Although Shen Lang does not understand what is specific, from the perspective of external shape, many of them are cultural relics of ancient civilization.

As it said before, these should have been collected from various places, including the funerary of the pharaohs of the pyramids, and possibly the tombs of nobles, as well as priests, temples and the like.

But it is just a monster. It does not respect these things like the humans of modern civilization. It is the artistry of not enjoying human artifacts, because it is much older, and it cannot be called antiques in front of it. And artifacts.

So these things are thrown on the ground casually, and some are stacked on top of each other.

If there are historians and antiques lovers here, it will definitely hurt you!

Because these ancient artifacts are very precious and highly artistic, they are piled up together, damaged, or just smashed some traces, which are regrettable losses.

Now they are two, but they are very calm.

It doesn't need to be said that the Kremisu water monster is originally collected. It is collected from time to time. When there is a need, it is necessary to take a little out of the transaction. The more modern and modern, it may not be useful.

Shen Lang is not a cold for their civilization. Historical, artistic and what does not care. Aside from the historical relics of ancient civilizations, the material value of gold and jewellery is nothing.

The only thing he is interested in right now is the authentic version of Tutankhamun's "Golden Set" by Kemlisu to see what is special.

After the Kemrisu water monster arrived here, it was also aware of the reaction of Shen Lang.

With its experience of thousands of years and human confession, no matter what position, when you see the treasure, it will shine.

The treasures of this large cave filled with mountains, the Pharaoh king will also be greatly attracted.

However, after Shen Lang came in, everything was as usual, just looking around and not staring at the treasure.

This makes it sigh!

Although it has already offered a soul contract, it does not expect to be free immediately, but if the treasure here can make the owner smile and be very satisfied, then its days will definitely be better, even if it is happy, let it go.

Now it seems that what I said before is not installed, it really does not care.

Chapter 2190 - Pharaoh's Gold Set

“Don’t try to figure me out.”

A faint sentence from Shen Lang, I was shocked by the Kemrisu Water Monster.

“You have lived for a long time. I have seen the change of the dynasty here. I have witnessed the changes that have been conquered by other civilizations again and again, and I have collected many treasures from different periods.”

“But the scope of your activities is too small. It is also this land. You don’t even know how big the world is. You don’t even know what other worlds look like!”

This is not a smashing force, but to be honest, the water monster has the depth of time, but there is no breadth of space, which is incomparable to his knowledge.

It thinks that it has collected the great treasures since ancient times, but in the eyes of Shen Lang, it is not the case, and there is not much difference with a pile of scrap iron metal.

When the Kemrisu monster heard the first sentence of Shen Lang, he was still shocked, worried that he would be angry with it to try to figure out his mind.

When I heard the words behind, I couldn’t help but be silent.

It may have been tens of thousands of years of living, experienced so many times, and seen more changes, there is no feeling for any.

For example, who is Pharaoh here, it does not care, it is invaded by other civilizations, it will not care. I don’t think this is its home, it has to be guarded.

Because the aborigines here may be later than it.

But in the long years, it is also advancing with the times. It will not be active every moment, but every big time will not be missed.

Just as the temple was destroyed by the invasion, it would not just rush, but at some point later, it just came out, found it, and passed.

From now on to modern times, this is also the law. It is the same reason that Xu Yuyue lived in the dead forest, but it was not completely out of touch.

Modern human science and technology civilization, it is not very proficient, but it also has a certain understanding, even with the same level of an old farmer, but also know how big the world, know that human beings can fly to the sea.

But it really didn't get involved in other corners of the world, it was for security reasons. In this familiar land, it can have a real sense of security.

If you are in the dark, let it be silent and fascinating!

Listening to this, the owner has not only been to the rest of the world, but also to other worlds?

What kind of world is the other world?

Looking at the rise and fall of civilization for thousands of years, there is nothing that can stimulate it. But now, other worlds are a big attraction.

“Work!”

Shen Lang made a snap.

He used to use a similar method to attract (fudge) the dog \*\*\*\* to follow him to other worlds. Since it was saved at the time, he even pulled a big backing that could be a fox and a tiger. Later, everyone became a fellow student. Dead friend.

But nowadays, in the past, the current Shen Lang can easily suppress this Kemli Suwei monster, there is no need to flick it, and there is no need to give it any sweetness.

It's just a casual feeling, and now it's the purpose of reminding it to come here.

The Kemrisu monster rushed quickly and quickly.

This is the legacy of ancient civilizations. Not to mention that modernity is very precious. It was also cherished by other civilizations in ancient times. For example, the big heads such as the obelisk are well preserved.

But here, it is just a mess, and there is no such thing as a good one.

And the time span of thousands of years, just thrown in, it is a mess.

Now I need to look for it. When it is drilled, it will make a lot of collisions and falls.

Shen Lang casually found a place to sit down and waited for its "dedication."

In fact, if he does it himself, even if there are a lot of treasures, it should be able to search faster. After all, there is a clear difference between the magic weapon and the ordinary cultural relics.

But do you have to do it yourself if you do it yourself?

Although this is something thousands of years ago, the memory of the Kemrisu monster is also blurred, but even if it is piled up in a hill, the number is actually limited.

With the realm strength of the Kemrisu water monster, it still took a lot of effort, and sent the "golden suit" it said to the front of Shen Lang.

Then introduced one by one, the first and easiest to find out, is the big two, one is a gold coffin, one is a gold chariot.

They are piled underneath, pressed by a lot of things, and two more, golden masks and gold daggers.

“This is the golden scarab... It is said to be able to summon the scarab.”

The gold coffin, in the “cultural relics version”, should be the coffin of the Tutankhamun mummies, but in the authentic version of Kemrisu, it is a death sacred device that can summon the devil, or exile people to Devil’s domain.

The gold chariot is the same as the open version. It is a chariot that can travel at high speed in the desert. Historians have recovered the chariot according to the description. It is said that it can reach 50 kilometers per hour in the desert, which is really very good.

Now this version of the gold chariot is a flying magic weapon that can control it to fly. It is much stronger than the high speed driving in the desert.

Needless to say, the golden dagger is sharp, regardless of the legend or the unearthed object. Although it is not as good as cutting iron, it is extremely sharp with the crafts of that era.

But in fact, for the king’s level, that is, an ornament, as a funerary, also represents the pharaoh’s majestic force.

Now this gold dagger is a magic weapon!

The gold scarab is made into ornaments, and according to the statement, it can summon the scarab. Shen Lang remembered the movie that I watched as a child, and a lot of bugs can instantly eat people’s pictures...

The most mysterious one is the golden mask.

The golden mask is very well known and has many mysterious legends. Now the golden mask of the Kemrisu water monster is that it does not know the specific effect.

But it is sure that this is definitely not just a decorative mask, but with another golden mask, there is definitely a huge difference.

In the face of Shen Lang, it is now without any lies It can be seen that it is because there is no interest in human objects, just collected as treasures, so that it is useful.

It was also because it collected enough, so it was used a lot later, and it did not use this “golden suit.”

But as a million-year-old demon, it now has the strength of the beast \*\*\*\*\* level, and it should have the level of the king’s beasts three thousand years ago, or it can distinguish the particularity.

It’s just a long time in the past, and it hasn’t studied it anymore. Today, if you want to redeem your life, search for memories madly, you won’t think about them, and you will continue to stay here.

Now that I have found it, I will directly dedicate it to Shen Lang, and I will not need it to study anything.
