

## First Strong 222

Chapter 222 - The secret of the golden giant

Don't wait for the sinking waves to evade, there is already a trunk squatting next to it!

The mysterious powerhouse, inspired by the Shenlang, also picked up a trunk and hit a dog stick. This squat came over and threw the golden giant python that flew two meters above the sinking wave.

“Hey-!”

The golden giant screamed again, and it was thick and thick, which was not enough to make it seriously injured, but it made it violent.

Although it is dominated by instinct, it is a wise beast. When one is alone, it dares to anger in the end, and now another one, the strength is also strong, but let it retreat.

After the barking, they found that both of them were grabbing the trunk and chasing them. They immediately sprayed several fireballs on them, then turned and flew away into the forest.

“chase!”

This time, the mysterious strongman called out directly, and the trunk in his hand was smashed behind the golden giant, and then chased out at a faster speed. Among them, the trunk was not stepped on, and the speed was chased again. !

In an instant, he has turned into a shadow, directly chasing the top of the golden giant.

Shen Lang can see that this person has brought the speed to the extreme, and it is also a must for this golden giant.

But he did not immediately go out, but sighed, the trunk in his hand, slammed directly into the hole, and then stuffed it into the cave.

He didn't know what was in this cave, but it seems that this mysterious strongman has been kept for a long time, indicating that the golden giant is either sleeping in it or guarding something!

Or maybe there is a possibility to use something to strengthen!

If the mysterious strongman does not have a strong attack, he can rule out dormancy and healing, and maybe even something in the cave that makes him jealous!

Shen Lang just had a big drink, and it was the first to smash the cave, in order to attract the attention of the golden giant who escaped.

The trunk was hit by its fireball, and the front end was still burning, stuffed into the cave, like a large torch. But you must also go in immediately, or you will be covered with smoke in a while.

Shen Lang is still a kind of speculation, but it is not certain that it will be accurate. It may also be a habitat for it. It is empty.

So he didn't go in immediately, but looked at it and looked at the reaction of the golden giant.

At this time, the mysterious strongman has already caught up with the golden giant. He has not tied his hands, but flickers around it at a very fast speed. Every time he approaches, it is a slap in the face, as if He also has claws.

The gold giant 癸 obviously heard the movement behind it. After turning around and looking around, it was still running fast, but the direction was no longer straight ahead, but it was around and back again!

Seeing it coming back, Shen Lang understood that the guess was right, and he immediately jumped into the cave.

After entering, Shen Lang found that something was wrong, and there was a blaze that forced it over!

This is not the flame on the trunk, but something else.

He also immediately saw it. The trunk was stuffed with a straight hole, but the inside was completely in, and the feeling of blazing came from there.

Listening to the sound, you can know that the golden giant is going to return to the hole. Now, going out will only be right with it.

So Shen Lang quickly rushed in front, and after a few turns, he went to the depths of the cave.

He immediately understood what caused the heat.

Inside the cave is a circular space with a stone shining with flames on the central ground. The blazing heat came from it, but it was very convergent and did not spill out into the cave.

Otherwise, according to the strength of this energy, he should feel it when he first came over.

“Roar!”

The mouth of the gold came the roar of the golden giant, and it seemed that he was flying out by the mysterious powerhouse.

Shen Lang did not have time to use the knowledge of God to investigate the situation outside, he must maintain the state of fighting at any time.

The sword is also in the hand. If the golden giant rushes in, the space here is narrow, and the “Phantom Meteor Step” body method has no use, it can only be a life-and-death fight!

However, he is basically certain now, precisely because of this flame-like stone on the ground, the gold giant has been hiding here, and it is also reluctant to leave, to chase into the hole.

But the mysterious powerhouse, who did not want the gold giant to come in, was fighting at the door.

Shen Lang didn't have more time to think about it. When people reached the center of the cave, they reached out and lifted the flame stone.

The compelling blazing energy, after contact, gives his palm a tingling burning sensation.

“It turned out to be a sparkling stone!”

When I found out, I already guessed it. Now it is really confirmed.

Pyrite is a spiritual stone containing pure elemental energy. The general Lingshi is available to all comprehensions, but the spar of pure elemental energy is different.

Fire spar will be of great help to the cultivation of pure Yang Gong. For example, this golden giant can fire a fireball, which has a direct relationship with the energy of this pyrite.

This also confirms the speculation of Shen Lang, the golden giant is here to absorb energy evolution! Similar to human cultivation.

But the mysterious powerhouse is not attacking in the process of its cultivation. Instead, it is a little weird when it has evolved and attacked.

“Roar!”

Every second is a fight every second, but with a roar, the golden giant is still coming in.

Shen Lang can feel that the mysterious strong man hesitated at the hole and did not come in.

He thinks that it is one of the reasons, directly infusing that piece of pyroblast into the space of the ring, and the sword is swiftly waving in his hand!

A spur of the sword spurt out, and the rock of the cave fell a lot, but this did not have much effect on the blockage of the golden giant python.

It found that the spar disappeared. The yellow eyes almost fired, and the mouth of the fireball was sprayed directly, and the body followed it!

Shen Lang could not help but frown.

He just had a sword, not expecting the fallen stone to kill it, but hope to open the cave a little bigger. But the time is too short, now the gold giant is attacked by a fireball, and the entire space has been fully covered!

He helped the mysterious strongman to attract the golden giant, but the man himself did not know, although it was a bit of a golden giant, but when it entered the cave, the man did not even have it!

At this time, Shen Lang can only rely on himself!

With his current strength, these flames are not enough to burn him. But the flame is only the first wave. The claws of the golden giant python are sharp weapons. It is really close to me, and his flesh and blood body is at risk of being torn!

This is not even protected by the “King Kong is not bad spirit” because its claws are sharp and sharp.

Just like a lot of martial arts, you can use a fist and a palm to break a brick, but it will be stabbed by a needle.
