

## First Strong 226

Chapter 226 - Nedan, return

Why are so many strange people in history who will travel around the world to demons and demons?

Out of justice?

To a certain extent, it is considered a superman. If the average person does not say a lower race, at least the difference between aristocrats and civilians and slaves, how many will be just for ordinary people?

The officers and men of the court can not control them, and the secular laws can be despised!

For the heavens?

No matter which kind of martial art, no matter how the form of practice, it is the act of rebelling against the sky! Against the heavens for the heavens?

After all, the main thing is the benefit!

Of course, it does not rule out that some of the strong have great compassion and will be sheltered because of compassion for all beings. But more people are demon and demon, it is for the benefit!

There may be many forms of this interest, such as killing people on his territory, which is an offense. For example, there are monsters who make evil near Lingyin Temple. This is both a provocation against Jigong Dajiji and a direct attack on the incense and believers of Lingyin Temple.

There are still some, just to hunt for the demon!

What monsters are, often, are powerful spiritual beasts, and their inner Dan has a powerful effect. For the self-cultivator, it is a good thing to improve.

Not only can there be direct huge benefits, but also a reputation for demon and demon for the heavens, and even a large number of believers, why not?

In addition to Nei Dan, Shen Lang is still poor, can not be thrown like the Count of Dracula, he cleaned everything out. After sucking up the blood, it is convenient for him to operate.

The medullary organ can be used as a medicine. He is sold and ready to go out and sold. The fur is of course a good thing.

For the meat, the first part was grilled and eaten, and the rest was collected.

The trunk that had been inserted into the cave was still burning, took out the barbecue, and waited for the smoke inside to spread out. He lived in the cave at night.

Originally, Shen Lang was preparing to sleep on the trunk. There is a mysterious strongman nearby, and he is afraid to cultivate.

But now everyone is fighting side by side and appreciate each other. Count Dracula sucked the blood of the golden giant, and now it is in the process of cultivation and evolution.

Of course, Shen Lang did not have any scruples. It was only a daily cultivation. Now he is stunned and directly swallowed the inner giant of the golden giant, ready to refine it!

The reason why I want to pick up my heart is because he just took the thousand-year-old Yangshen last night, and he just broke through the third weight of “Yin and Yang Bo Ruozhen”. Now it is not suitable for further promotion, but needs to be consolidated. basis.

However, he came to the “opportunity”, and did not expect to have this gain, since it is obtained, it is the opportunity.

There is no cell phone signal in the death forest, so before coming in, Xie Xun is letting their mobile phone stay to reduce the load and space. They are equipped with a multi-function electronic watch, including small functions that may be used, such as compass, luminous, waterproof, alarm clock.

Shen Lang did not hand over the phone, it was received in the storage ring, but it is more convenient to watch the time and compass to confirm the orientation.

Now he deliberately set an alarm clock to avoid immersing himself in the cultivation and missing out.

The sound of the watch alarm clock is not big enough to be reminded, and it will not cause disturbing during the cultivation process.

When he began to cultivate, he immediately discovered that the meat of the golden giant python contained a strong energy, which was first absorbed.

But that Nedan, it is not so easy to refine. After all, it will be at least a hundred years to condense the inner Dan, and this golden giant does not know how long it has lived, and has always absorbed the energy of the fire spar.

However, Shen Lang is not in a hurry. If he can't fully absorb it, he will slowly come. Anyway, what he urgently needs is consolidation, not rushing.

It is really necessary to refine the entire inner Dan, too much energy, and it may not be well controlled. If there are other accidents, it will be bad.

There was no other change in the night.

After a night of cultivation, Shen Lang consolidated the third weight of "Yin and Yang Bo Ruozhen" and refining a little Nedan. The harvest is also quite large.

After the reminder of the watch alarm clock, he immediately received the work. The gods explored it and saw the Count Dracula still in the log house.

He does not bother to disturb, Dracula is blood-sucking, and may not eat meat. So after he came out, he baked some of the golden giant meat and ate it.

Look at the time, it's almost time for the return trip.

“I left first, I hope there is still a chance to see you again, Count Dracula. Remember, my name is Shen Lang!”

He bowed to the chalet and he thought Dracula should know.

Then he began to return based on the compass and memory.

The way back, you can be much faster than when you come.

You don't need to look for other things, you can try to go straight.

He went deep into the three hundred miles, that is a great range, let alone no navigation, even if there is navigation, it can not achieve absolute straight distance.

It's like going from one city to another, whether it's driving or walking, it's impossible to be completely straight, unless you fly from the air.

However, Shen Lang is not in a hurry, because after breaking through the third weight, he is using the speed of “Phantom Meteor Step” faster than before! The battle with Dracula also made him more comfortable.

The three-day calculation should have been 72 hours, which means that you should return to the transfer point tomorrow morning.

However, in this case, it is basically an extra night. There is no problem in driving the night road. However, it is very difficult to identify the direction at night when the giant trees cover the sky.

It doesn't make much sense, and there is still a little time in the morning, so the three days I said, I entered from 10:00 the day before yesterday and returned tonight at 18 o'clock.

Looking for Chu Yunfei to collect the account!

Shen Lang not only achieves the goal, but also has unexpected gains, and the mood is particularly good.

I really want to see what Chu Yunfei has to gain. When I put all his things in one pot, it is more desperate to kill him than when he comes in!

His constant acceleration along the way is also constantly correcting the direction. When he came, he also deliberately used some peaks and megaliths as marks, and it was easy to return to the front one hundred miles.

It's more relaxed after two hundred miles, because there is a map of Xie's family.

However, this is only relative. In fact, there are still too many twists and turns on the two hundred miles. The map and the compass deviate a little bit, and in the end it may be an error of dozens of miles.

All the way to accelerate, map and memory combined to distinguish, Shen Lang successfully returned to the transmission array at 5 o'clock in the afternoon.

Even if he knows that he is doing it, he can't kill Chu Yunfei in public. It is a secret.

Shen Lang is ready to lurk near the transfer point, and then use the gods to detect the surrounding. Once Chu Yunfei is found, he will rush to intercept! Just let him die near the transfer point!

The results were just close, and they found that they actually came back in advance!
