

First Strong 228

Chapter 228 - Poor

Although it came in on the same day, the whole process is very fast, and it is estimated that it will last for a few minutes.

Just Chu Yunfei's plan is to take away the Shenlang. If you really leave for dozens of miles, you will definitely not be able to come back in a few minutes. It's so troublesome!

This is open outside, and they don't have a fixed time, from five or six years to more than ten years!

To survive here for so long, Shen Lang is confident, just like Count Dracula.

However, it is only a few minutes to get in and out. If you want to stay in the house, you can only live around this transfer point! That would be more troublesome. Or you can go to other places to try your luck, it has no purpose.

So at this moment, he must arrive!

For Chu Yunfei, he is also very annoyed. If you go out, even if they are still guarded by their elders, they must be killed!

When it was said that it was too late, it was actually a gap of one second and two seconds. The whirlwind was very fast. After they disappeared, they immediately came to the top of the transmission array with Shen Lang.

Sinking and screaming, use the vitality to let your body sink like a mountain.

This whirlwind is not a real magic weapon. It is only the one-time items created by the super strong, which has been weakened after he has changed the channel.

At this moment, under his full strength, he was still an iron anchor in the big waves. Although he still rushed for a while, his feet finally stood firm.

Relying on the “foot brakes” of the feet, the body is set, but it is beyond the scope of the transmission array.

The whirlwind has passed by and gradually faded away. Shen Lang is quickly rushing to the center of the transmission array!

At this moment, he is also ready for the battle!

Chu Yunfei, they have already gone out first. With the insidiousness of this kid, the death of everyone in Xie, Chu, and Haitian will be counted on his head – that is also true.

At that time, it's not just Xie Xun, but at least three masters like Xie Xun, who will wait for him to besiege!

Several other sects are not considered to be in the same breath, but after they open their mouths, they will certainly not maintain a young man who has never had any intersection.

That counts, there may be up to seven masters waiting to attack him! Even if the Tianshan Ice Palace can be avoided because of the relationship between the rain and the rain, it can only be done.

In other words, Chu Yunfei just had the first hand, after the move is set!

If he can't get back from it, stay in this dead forest.

Even if he rushes back in time, he will be attacked by their elders as soon as he sends out the transmission array!

but!

Shen Lang is not a vegetarian!

They may attack him, and he can do it directly as soon as it appears!

It will be faster than time!

His original speed has surpassed that of others, and he has been practicing with the vampire Count Dracula for a long time, and has reached a new realm.

After he was ready to go out, he killed Chu Yun and then left directly outside Death Valley!

Wait.....

Thinking about how to attack and leave the waves, I found something wrong.

I just slipped past the middle of the transmission array. It can be said that the whirlwind was too fast, but now I have re-established in this center. Why hasn't it reacted?

Shen Lang first put aside other thoughts and carefully sensed this transmission array.

Soon, he discovered a tragic reality – the transmission array has stopped!

When I came, there was still a little time to come in in batches, and when I went out, I just sent everyone out.

Now, the transmission array is closed!

Shen Lang could not help but scream, almost want to ruin this transmission array!

Just a little bit worse! The gap of one second and two seconds!

Just because that Chu Yunfei!

Shen Lang's teeth bite and squeak, regret not killing Chu Yunfei on the first day!

Then he crushed the watch directly!

In addition to time, it is estimated that the compass is also a hand, let him spend more time in the direction.

Although it is so violent, Shen Lang is not only a young and young teenager, but also a memory of past lives. This made him suppress his anger and calm himself down.

Since the facts are already the case, it is useless to anger and regret anything. It is better to spend time on more constructive aspects.

He sat down in the middle of the transmission array and tried to calm himself down. He also waited and saw if it would open. Although this possibility is very embarrassing...

After waiting for about half an hour, Shen Lang will definitely not open again.

His mood was completely calmed down, and the hatred of Chu Yunfei was buried deep in his heart.

Isn't it a dead forest!

Not a small world!

Can this trap him?

His fighting spirit has already spurred up, and then immediately began to inspect the transmission array.

All along, they have been able to wait passively. Both in and out must be handed over to the people in Death Valley to operate, and over time they become a matter of course.

But who knows if it is the rule of the people in Death Valley?

From the past to the later, Shen Lang was also very researching about the formation. It is a relatively large project to build a transmission array, but it is much simpler to start.

He began to search, as long as he could find a place to place the stone in it, there may be a way to open the transmission array from here.

If you can really send it out yourself, you can kill them by surprise!

After a careful search, I found that there was no way to open the transmission array, and there was no place to place the Lingshi. This is a passive one-way transmission array!

Even so, Shen Lang is not discouraged.

That temple – Stonehenge.

That place is what he used to go out and can be sure that it can be opened from the inside.

It's just that the temple is almost two hundred miles away Even if he flies at a speed of thirty or forty miles per hour, it will take several hours to arrive.

And now the real time is almost seven o'clock, it is already dark. In this dead forest, unless you have to force it, or try not to go dark.

Because it may be walking on the road, walking for one night, it may be straight out of ten or twenty miles. There may also be various accidents, including encountering beasts.

endure!

Forbearance!

Shen Lang held back the hatred of Chu Yunfei. Since he can't catch up now, let him live a few more days. Just go out, the first one will kill him first!

He took out the golden giant meat and continued to eat it. These meats are also great, and they are very helpful for cultivation. I looked at some of the lesser-eras that were taken in the past, and I chose to eat them directly, and I also swallowed them.

After eating this, his body began to respond, and had to leave aside distractions and refine.
