

## First Strong 233

Chapter 233 - Black technology armor

“Teacher, you are selflessly imparting me such a profound knowledge, students do not think that ... I hope this will have a little effect on you.”

Bi Haihua gratefully stuffed these things over.

Shen Lang looked at it, there are probably more than 30 medium Lingshi, and then there is a small metal ball.

“This does have a role for me, but you have so much, should you need it?” Shen Lang looked at her.

Bihai said happily: “We mainly provide energy for the sacred armor. One can use it for a long time, and I often read it with my brother. There are few on your side, and we have a lot on it.”

Then she pointed to the metal ball: “This is the sacred armor for you. I know that with your ability, you don’t need this thing, just keep a commemoration, so you remember that there is a student like me.”

Shen Lang laughed and said: “But you can’t use this thing. It really can only... commemorate a ball!”

“It’s very simple, I teach you!” It’s probably a good thing to teach the psionic masters, and it’s exciting.

She did not care about Shen Lang’s internal organs, told him how to open the metal ball, and then controlled to wear on his body, turned into a fit tights.

Then it is how to operate specifically, this thing is black technology in terms of performance, but it is foolish in operation. Directly match the brain wave, you can operate through the mind!

Whether it is expanded into armor mode or aircraft mode, including the weapons inside, etc., all can be controlled by brainwave ideas, so before I saw the blue man often read, even Shen Lang's eyesight did not see what he pressed. organ.

After being equipped with a sacred armor and becoming a tight-fitting suit to wrap the waves, Shen Lang discovered that Bi Haihuan's eyes changed a little.

He looked at himself and covered the ragged clothes. Now, except for the messy long hair and the dirty face, the body has completely changed.

There is quite a bit of a big change in the clothes on the horse!

He smiled a little embarrassedly: "Is this your spare armor? It's black, if it's purple-like like you, I'm wearing it too... too!"

Bihai was happy, then '噗哧' laughed. "Ha ha ha ha... you actually thought... haha color is simulated, you can change the adjustment!"

Looking at Shen Lang's fortunate appearance, she smiled and swayed.

"..." Shen Lang for a while, the direct idea to try to change the color, and sure enough, can become the same purple color as her.

"Okay, thank you for your gift. I will collect it!"

Shen Lang seriously thanked that if he is already very strong, this thing is of little use. But at this stage, this is still very useful for him.

Hearing this, knowing that he is going to leave, Bi Haihuan is a bit sad.

This time it was really disappointing. Apart from getting along for a while, it was also because Shen Lang taught her exercises, which is a very rare high school.

"Teacher, you have time to go to the river basin to be a guest."

“Good.” Shen Lang smiled, that is, promised.

This river city is not another city, this is another city-state!

“There is a lot of spar on your side, it will be used. It can not only be energy power, but also absorb its own energy!” Shen Lang reminded.

Bi Haihuan was surprised and realized that this should be the secret of the spiritual master!

“Teacher, I remember, I will not tell others, you will teach me the exercises, and I will not rumor!”

“You decide it yourself.” Shen Lang did not strictly demand.

Anyway, this is another world. He may not go again in his life. Even if it is the wings of a butterfly, what effect does it have nothing to do with him.

“Are you leaving?”

Shen Lang looks at her disappointment, I don’t know if it’s a fan-girl’s attachment to an idol, or if I want to put more things on him.

But he has been around for so long, not bad for a while: “Then eat it and go!”

He took out some of the picked fruit and the roasted meat.

This is a bit of savage to make food, Bihaihuan is obviously a little unaccustomed. But now she is a teacher, and of course she is happy to try it.

“Hey! I didn’t expect it to be delicious!” A sip of fruit made her full of fragrance and her eyes changed.

Then I couldn’t wait to try the meat of the beast and I was surprised again: “Although the meat is very old, it is very chewy and the taste is very chic!”

Shen Lang couldn't help but laugh, but it's okay, but it's not so delicious. After all, Lingguo is born, not artificially grafted, and compared to the original ecology in taste.

The meat of the spirit beast contains a lot of energy, but at least it is decades. Of course, it will not be more tender, and there is no more seasoning. She looks like a rich lady, the first time to eat the big stalls barbecue like the contrast surprise.

“Sister! Come back! How can you mess around!”

When they ate almost, they often woke up and stood up directly, then jumped over and volleyed to the top of Shenlang!

This is not his personal ability, but relies on the Holy Grail.

Shen Lang casually raised his hand and flew him out of the air for a few tens of meters away!

“I'm leaving!”

He did not stop again, and he greeted the blue sea and flew away directly.

Watching him do not need the holy armor, pure flesh can quickly fly away, let Bihai sigh and sigh, and secretly vowed to learn the teachings taught by the teacher.

at last!

After so long, I finally got a medium Lingshi, and Shen Lang is also a little excited.

He has been in the forest for so long and has come a long way. To go back to the Stonehenge Temple, you have to look at the map you have drawn and slowly explore it.

After leaving them to go far, Shen Lang looked at the map and estimated the distance, decided to try the black technology armor!

He opened the metal ball let the holy arm close, and then manipulate it to open the function of the aircraft. I immediately felt the jet propulsion, so that he could fly up.

However, this thing should also be learned and adapted, in order to master the skills, Bi Haihuan thought he could not use it, just to give him a commemoration.

The first use was almost a rampage, hitting a lot of branches and falling several times.

However, with the realm and spiritual strength of Shen Lang, the response is far better than the average person, but just not used to it. After a few attempts, you can control it with ease, and you can change direction immediately before hitting something.

After being familiar with it, he maneuvers the flight of the sacred armor and flies straight to Stonehenge. They met with Bihai and let him discover that there are still many secrets in this vast forest. It is another world. It is not attached to the world of the earth. The earth can come in and other worlds can come in.

In order to avoid unnecessary trouble, he chose to fly at low altitude with a canopy. This is a real straight flight, and it can control the speed, much faster than the fly he borrowed from the canopy.

Finally, after looking for it in the air, it fell in front of Stonehenge.
