

## First Strong 43

### Chapter 43 - First refining

Qiongzhitang has its own warehouse, and there are also trucks for delivery. After confirming the delivery address, they immediately went straight to the county town of C, and did not let Shen Langjiu wait.

After receiving the goods, Shen Lang was only a rough point, and immediately transferred the remaining 30,000 yuan to the manager of Han, which made Han manager happy.

Less than a full day before and after, a 500,000 transaction was completed, and all the money was received directly, which is almost a good thing that has never been done before. Generally, it is a good customer to be able to settle the payment in three to six months.

In addition to thanking Shen Lang, he also said that there is a need in the future, he will open it at any time, he will be ready and delivered in the shortest time.

At the end, it is said that in the goods, there is a small package box alone, which is a little personal meaning of his personal delivery.

Shen Lang does not care about his gift. This is nothing more than selling him a good one. He hopes that he will not default on the payment and hopes to continue trading next time.

The delivery staff is putting all the herbs in the yard, and now they need to settle down.

Nobody's help is not a problem. He just smashed it in one hand and there was enough space in the house.

The utensils have been prepared in the front. Now heat the boiled water, then start to pick out the herbs, clean them, and open them according to the different cooking time.

Finally, a plurality of pots are started at the same time, which requires high-temperature fire, and is placed in a pressure cooker. If the fire is slow, it is placed in a casserole and an induction cooker.

For the first time, using such modern equipment to refine the medicine, the effect is not clear, so the waves are not sure, so I have learned a few more hands.

One hour later, the medicinal herbs of different pots were combined and cooked together to re-integrate the thirty-three herbs that have been re-formed.

Two hours later, the first pot of treasure is still out of the soup!

Following the memory of past lives, Shen Lang examined and tasted it. There was no failure, but it was not successful. With these colored medicines, if the thirty-three flavor refining treasures can reach a very high level, this can only be regarded as a five-point level.

This is actually a big soup for the average person, but it does not meet the requirements of Shen Lang.

He analyzed all the processes, made adjustments, and started the second pot of smelting...

The second pot reached a level of seven points!

The third pot reached a level of nine points!

In fact, the full score of Baibao Rehmandour Soup should be a hundred percent...but the level of these herbs is determined to be at most to a certain extent, so the Shenlang has not been entangled, and the fourth pot begins to increase the weight of the medicine.

The fourth pot has been brewed for a little longer, because the weight is much larger, he can't take it all, and refining it to a more concentrated level.

This is so, it is also the amount of three or four pounds!

The medicinal soup that comes out of so many herbs is naturally not so good. It is a scent of self-deception to say that there is something fragrant and fragrant.

Just like the herbal tea in the south, it is basically very bitter. The herbal tea drink will be delicious. In fact, it is a lot of sugary drinks, just a little bit of diluted herbal tea. So one can be a medicine, one is just a drink.

The mixture of these thirty-three flavors is not only a bitter but an indescribable taste. The average person can't swallow it and even vomit. The ancestors in order to improve the level of alchemy, in addition to better results, but also to facilitate a swallow!

Shen Lang drank the first bite, and the feeling brought by the taste buds also made him frown. However, he has the strength of the previous world, and now that he has reached a certain level, he can still hold back this difficult drink.

Difficult to drink can only speed up, fill the mouth with a big mouth, and finish all the drinks as soon as possible.

After drinking all, I'm drinking enough, or because I haven't eaten anything in one day...

The three pots that were previously smelted were not discarded, and the medicinal materials after the \*\*\*\* were all contained. Now all the baths in the master bedroom are filled and diluted with hot water to make a medicated bath.

Lying in the bathtub and being bathed in a hot medicated bath, Shen Lang realized the heat from the inside out and from the outside to the inside!

The sweat is rolling, and the body is very uncomfortable, but he does not get up, and immediately begins to cultivate, and runs the "yin and yang wave if true", absorbs the energy contained in all the medicines inside and outside, refining and transforming into its own vitality...

After a period of cultivation, especially after the refining of the jade aura, the body of Shenlang has reached a certain intensity. The energy contained in this medicine is still far less than the aura obtained from the incense burner yesterday. Difficult, not as hard as before.

The main time today is still used in refining.

Waiting for the medicated bath, after the shower, the time is up in the middle of the night.

Shen Lang counted a bit, 500,000 said a lot, but in addition to some common, many herbs are not cheap. Three hands training, in addition to a larger dose, but also refining, probably about five copies.

With his current cultivation speed, it will be less than a week.

One hundred thousand a day... This consumption makes Shen Lang secretly smile, it seems that now it is necessary to prop up a comprehension, the cost is not small!

He still has more than one million. If he continues to buy medicine, he can change it for more than a dozen. Bai Shenghua's five million, if you want to come, you should not deny it. If you change it into medicine, you can support it for more than two months.

A rough estimate, with the current foundation, plus seven million medicinal materials refining, should be able to make "Yin Yang Bo Ruozhen" break through to the second!

I still don't know the level of strength in the contemporary comprehension community. Combined with the descriptions of Yue Zhennan and Bai Shenghua, he speculates that the super-martial warriors of the seven to nine paragraphs should be regarded as the level of cultivation in the realm of practicing Qi, and they should be respected as comprehensions. The level of the base.

When he set up Dacheng's "Yin Yang Bo Ruozhen 诀 has already become a self-contained system, if it is analogous, the first weight is comparable to the practice of building a foundation.

And he can reach the realm of the present, of course, also benefited from the aura that had been absorbed by the jade for hundreds of years, and after the complete absorption of refining, it was directly stabilized.

Now encountering the nine-segment of the extraordinary warrior, and even the comprehension, Shen Lang is also confident, but can break through to the second, of course, more secure.

Although I haven't touched it yet, Ye Fan's master is a self-cultivator, and maybe he will meet soon!

This crisis awareness made Shen Lang not sleep, continued to stay up late to start refining, and refining the remaining five herbs.

In order to finish the refining in one night, he turned the shaft. After the pot of the first part of the medicine was vacated, he took the second part. After the first refining, there was a semi-finished product and then refined.

The refined condensed treasures are also simmered in the soup, which is cooled and finally placed in the refrigerator. You don't need to cook every day, drink slowly as a drink!

As the drug gradually became smaller, he also saw the small box sent by Han Manager. After opening it, he could not help but be surprised.
