

## First Strong 96

### Chapter 96 - Lurking Phoenix Valley

Shen Lang hit a car and arrived at the foot of the mountain before the evening. The driver is not clear about the remaining mountain roads. He got off the bus, according to the direction of the phone, and then went over the mountains.

After breaking through the second weight, the use of the “Phantom Meteor Step” is even more powerful. I have been in school, and I don’t have much practice opportunities. Now I’m going through the mountains and mountains, and Shen Lang is also used as an exercise. I have got more practical exercises in the various applications of this method.

The Phoenix Valley is said to be seen from the sky, named after a winged phoenix.

However, there are satellite pictures, aerial photographs of planes and drones, which have long proved that it is just a wonderful attachment to the ancients. In fact, looking down from the sky, it is similar to other kinds of valleys. It is not like a phoenix with wings.

In fact, standing in the highest mountain, you can also see the general image of the valley, not to attach to the image of the wings of the Phoenix, perhaps the worship of the Phoenix Totem.

But in fact, this Phoenix Valley is an ordinary valley. There is no special place, traffic is not convenient, and of course it has not been developed into a tourist attraction.

The tomb of the king of the dark, according to the information of the Yue family, is located here. And when it is tonight, it will open an hour.

The burial of the tomb of the King of the King is a person named Zheng Man. Of course he is not a prince. Just a few hundred years ago, a big man in Pingxi County, said to be a fairy-like figure, left a lot of folklore, and was called a king.

The specific life and death of the King of the King is not good. Now the tomb of the King of the Kings in Pingxi City is also the time of the former dynasty. It is said that it was renovated by his descendants.

Because of the legendary characters, and there is no big popularity, no scholars have explored the information of archaeology. It is in Pingxi, that is, in order to build tourism, when historical celebrities dig out and package, the impact is not great.

But for the comprehension family in the area of Pingxi, I know that this is not a legendary fairy, but a powerful comprehension of the year! Those legends may also be exaggerated.

In particular, they jointly guard the secrets passed down by a ancestor. The real king's tomb is in the Phoenix Valley, which is opened every sixty years. There are a lot of treasures left by the predecessors of the king!

The ancient Pingxi County is also a remote place, and there is nothing to cultivate. The local sects are not so strong, they are unable to expand and rob resources. Therefore, the tomb of the King of the King is important for them.

All the factions have always kept secrets. If anyone leaks out, they will be jointly pursued by other sects.

Of course, the times are different now. After the fall of the previous generation family, the Yue family has been chased in disguise, and the transformation has barely protected itself. Let them all have a trace of resentment, and then someone sold the information to Yuan Cheng, including Yue Gang told Shen Lang.

Shen Lang has refining eight Lingshi, and there is no Lingshi on hand. It is impossible to ask the rain to come back. That one has little effect on him now.

From the second to the third, it is naturally more difficult. Without more resources, it takes a lot of time to rely solely on the cultivation of the penance.

So tonight, he is also bound to win!

When I arrived near the Phoenix Valley, Shen Lang hesitated. The best place, of course, is the highest mountain next to it, so that you can take a bird's-eye view of the entire valley. Once the tomb of the King of the King is opened, it will take a while to complete it in two hours.

But there is no doubt that this best position, certainly someone is guarding. Including the entrance to the valley, and certainly someone is guarding.

Thanks to the lush spring and summer branches, he has not been discovered all the way. Now, the sky is still not completely dark, and a cliff is found.

Such a road section, there should be no one to guard, it is convenient for him to hide in the past.

Although Shen Lang is very confident, it is a top priority for many sects in the past 60 years. It is bound to be a master. He now has a limited understanding of the realm of cultivation, and he dare not underestimate the world.

Under the cliff, Shen Lang quickly rose up and used the “Phantom Meteor Step” to fly up. After stepping on the stone wall several times, he reached the ridge.

After the sinking of the waves, immediately sway down, quietly on the edge of the ridge, let yourself hide in the crack between a stone and a tree, to ensure that it will not be seen below and the mountains.

Then I quickly looked at the general situation of the Phoenix Valley.

Similar to what he saw on his satellite map, there is only a clearer look. But the sky is almost dark, there is a glimmer of light on it, and the valley is darker.

These days, Shen Lang is also training the gods. From a radius of 50 meters, it can spread to a larger distance. If the concentration is in one direction, it can be further. The valley is not too far and too far, so his knowledge extends and it can be clearly sensed.

Soon he had a general understanding, and there are already many people in the valley!

I just couldn't see it, except for the relationship between light and distance, and because they were hidden. Or under the stone, or on the tree, or from the grass.

At eleven o'clock, there are more than four hours.

Shen Lang is not in a hurry. On the way, he has already eaten something and can wait patiently.

Then I used the gods to sense the mountain. As he guessed, there are many people who are watching. These people are observing the distance and seeing if anyone is coming.

Time passed by, and by 8 o'clock in the evening, a group of people appeared in Taniguchi.

Many people who had been lurking in the bottom of the valley came out. Just leaving people to watch, after waiting for the people in Taniguchi to meet, Shen Lang found that they brought a lot of tools.

Some of them include people relying on large charging lights. Although they can't illuminate the entire valley, there is still a large piece of light near the lights. He can see a rough eye on the ridge.

The Shenlang gods sensed the number of silences and found that it did not include the foothills of the mountains. Just entering the valley, there are as many as forty-five!

A tomb in a certain district, certainly not so many people can go in together. The different sects with so many people coming over should be interactive prevention and self-protection. As for how many people go in and who goes in, they should have an agreement with each other.

Maybe every time before opening, each sect will gather together to discuss a feasible plan. Restrict each other and strive for a fairness as much as possible, or there may be alliances in private.

For these routines, Shen Lang is too familiar. Even if they look like a sigh of relief now, everyone is excited and polite, and once there is a good thing, it is possible to turn a big face and shoot. And if it is in the tomb of the King of the King, it is even more likely to use all kinds of mean means. Anyway, if you kill it, you can push it out.
