

Fortune 1031

Chapter 1031: Crossing the Tribulation with Ease, Gaining a First-Grade Opportunity (Part 2)

It's a pity that Jiang Fan wouldn't let this Ancient Demon leave so easily.

If a demon skilled in assassination were to leave and hide in the shadows, who knows how much of a threat that would pose.

Even if the opponent couldn't kill him, they could kill the people around him.

Such a troublesome demon absolutely cannot leave this place alive.

"Die."

Jiang Fan's eyes revealed a cold glint, and he immediately activated another Sub-Immortal Artifact on him—the Immortal Slaying Flying Saber.

This is an extremely powerful killing Magical Treasure.

Once it locks onto the enemy's aura and cause and effect, it will always hit its target.

If other Magical Treasures were used, they might not have much effect on the Shadow Fish Demon, which is extremely fast.

Because at the opponent's speed, it could instantly escape the attack range.

But the Immortal Slaying Flying Saber is different.

Its attack speed is even faster than the Shadow Fish Demon.

Boom~~

In an instant, Jiang Fan's vast Primordial Magical Power poured into the Immortal Slaying Flying Saber, and the power of this saber was immediately activated.

At this moment, it seemed to transform into a white energy entity, surrounded by a terrifying killing intent and cold light.

It seemed to transform into the most terrifying killing weapon in the world.

Whoosh!

The next second, the Immortal Slaying Flying Saber locked onto the aura of the Shadow Fish Demon, and like a tracking missile, it arrived in an instant.

In almost the blink of an eye, it appeared before this Ancient Demon.

The saber radiance it emitted contained the power to tear apart the void.

The surrounding void appeared with countless cracks, like a spider's web.

"How is this possible? How many Magical Treasures does this guy have?"

Seeing this scene, the Shadow Fish Demon's eyes were wide open, hardly able to believe what it was witnessing.

Having just the Human Emperor Sword, an Immortal Artifact, is already quite incredible, an unbelievable opportunity.

But besides this Immortal Artifact, there was actually a second Immortal Artifact, which was simply unimaginable.

It didn't know how this hateful human cultivator managed to obtain it.

But now wasn't the time to consider these things.

"It's over."

Before the Shadow Fish Demon could think of a way to respond, the saber was already in front of it, piercing through its body in the blink of an eye.

In terms of defense, it naturally couldn't compare to a demon like the Blood-eating Fish Demon.

So, facing the power of the Immortal Slaying Flying Saber, its defense was simply vulnerable.

Its body was as fragile as tofu.

What frightened it even more was the power of the Destruction Law erupting from the saber.

It emitted waves of destructive force.

This power could destroy everything, including its soul.

At this moment, it was so remorseful it could have cried.

It recalled the Blood-eating Fish Demon's suggestion earlier; if it had chosen to attack at that time and join forces against this human cultivator, perhaps they could have beaten him to death.

But because it was too cautious, the Blood-eating Fish Demon was quickly killed by this human cultivator.

It could be said that its excessive caution led to being defeated one by one.

But unfortunately, it's too late to say anything now.

After all, there's no medicine for regret in this world.

Boom~~

In an instant, the Shadow Fish Demon's soul was destroyed, and its massive demon body fell into the sea.

At the moment of its death, the curse within its body naturally exploded, attempting to corrode Jiang Fan.

But it was easily purified by the Human Emperor Sword, and no curse could get close to him.

It can be said that the two Ancient Demons, having just escaped their seal, were slain by him without a chance of survival.

Boom~~

At this moment, a message instantly entered the depths of Jiang Fan's consciousness sea: "By acting promptly and using all your strength to finally slay two Ancient Demons, you successfully helped all beings pass through a life-and-death calamity. You gained one billion Luck Points and a First-Grade Opportunity."

Sensing this message, Jiang Fan immediately sighed in relief.

He was worried that he hadn't really killed these two Ancient Demons earlier.

After all, Ancient Demons are full of tricks and have countless means; no one knows how many hidden moves they have.

It's possible they had some means to escape and survive.

But since destiny prompted the message, it indicated that these two Ancient Demons truly died and could never come back to life.

It can be said that he helped the Black Dragon Sea Region through a great catastrophe.

Otherwise, if these two Ancient Demons were still alive, who knows how many lives they would slaughter.

"I actually got one billion Luck Points; such a reward is akin to destroying a demon cave."

Jiang Fan himself was slightly surprised, not expecting to get so many Luck Points.

Initially, he thought that getting tens of millions of Luck Points would be good, but getting a whole billion was a bit exaggerated.

However, thinking about it carefully, this is quite normal.

Because the threat of these two Ancient Demons was too great, no less than a demon cave.

For instance, the Blood-eating Fish Demon, if he hadn't happened to have the means to deal with this demon, with its life-preserving capabilities, even Integration and Mahayana cultivators here might not have been able to kill this Blood-eating Fish Demon.

The Shadow Fish Demon was the same, with too powerful concealment methods, able to merge into shadows and void.

If it weren't for the power of destiny constantly monitoring this demon, it would be hard for Jiang Fan to detect its whereabouts.

As for other cultivators, there was no need to mention them.

Moreover, having just escaped, the demons were at their weakest. If given some time to quickly recover their cultivation, perhaps the entire Void Realm would be unchecked, and all beings may be slaughtered by them.

So earning one billion Luck Points isn't too much, rather it's well-deserved.

"And there's a First-Grade Opportunity? I wonder what kind of treasure it is."

Jiang Fan was very curious about this First-Grade Opportunity, the most top-tier opportunity in the Void Realm.

Such opportunities are undoubtedly rare.

The appearance of just one could allow a cultivator to defy fate and become a Child of Fortune.

So naturally, he was very curious about this First-Grade Opportunity.

"Is the specific location of this First-Grade Opportunity inside the Demon Cave?"

"Although the two Ancient Demons escaped from it, there are still some opportunities left inside."

Jiang Fan checked the information about this opportunity and immediately discovered that it was located in the Demon Cave.

Perhaps it was left by a Great Power from the Ancient Era.

Whoosh!

Thinking of this, he hesitated no further, his figure flashed, and he immediately flew toward the location of the Demon Cave.

And the Demon Cave was located thirty thousand meters below the Black Dragon Sea Region, which was originally the territory of the Five Poison Flood Dragon.

The Flood Dragon clan had guarded this place for a long time.

All along, there hadn't been any major problems.

However, due to the Spiritual Energy Revival and the great changes in the heavens and earth, the seal of the Demon Cave encountered problems.

So those two Ancient Demons escaped from within.

For ordinary humans, delving thirty thousand meters underwater is almost impossible.

But for Jiang Fan, a Tier Six Cultivator, that's child's play.

The surrounding seawater was kept at bay by his Mana Shield.

It was as if he had activated a water-repellent pearl.

No seawater could approach his body.

It wasn't long before Jiang Fan finally arrived at the infamous Demon Cave.

What appeared before him was a gigantic seabed volcano, continuously spewing terrifying magma and black smoke.

The surrounding temperature was extremely high.

Coming here felt like arriving in Hell.

Inside this seabed volcano lurked a massive cave, bottomless, with no sunlight at all.

Deep at the seabed, the mountain's surface was covered with dense Array inscriptions.

Every stone here was indestructible.

It was constructed from special materials.

Obviously, an Ancient Era Array had once been set here.

But over the years, this Ancient Array was completely destroyed, with pits and holes all around.

It's estimated that the two Ancient Demons wreaked havoc before escaping.

Otherwise, it wouldn't be damaged so thoroughly.

Meanwhile, the depths of the cave were filled with dense demonic aura, accumulated over billions of years.

Whoosh!

Jiang Fan hesitated no further, his figure flashed, and he promptly entered the Demon Cave.

Chapter 1032: Obtaining the Immortal Artifact Qiantian Ice Soul Pearl and Ancient Cultivators

"Is it here?"

After entering the Demon Cave, Jiang Fan followed the information provided by his destiny hints and reached the deepest part of the cave.

Moreover, obtaining this opportunity wasn't going to be that simple.

It was concealed deep within the dimensional space.

So even the Blood-eating Fish Demon and the Shadow Fish Demon hadn't detected it.

Only those destined could arrive here to obtain the opportunity hidden in this place.

This might be a treasure left here by a great power from the Ancient Era.

Boom~~

In an instant, Jiang Fan activated the power of divine sense in his body, permeating every corner of the void here.

Soon, he sensed that a treasure was concealed within one of the spatial nodes.

Thud!

He grasped at the void, and immediately drew out the treasure hidden in the depths of the dimension.

It was a white bead, the size of a fist, with the surface of the bead covered in intricate mysterious runes, emanating a terrifying chill that pierced to the bone.

Holding it in hand, ordinary cultivators would be completely frostbitten by this chill.

However, for Jiang Fan, who possessed a True Spirit physique, this cold was nothing at all.

Buzzing~~

Without hesitation, Jiang Fan immediately consumed a large amount of his Luck Points.

A mysterious energy instantly fused into the white bead.

In just a moment, he completely refined this treasure, making it his lifebound magical treasure.

Qiantian Ice Soul Pearl!

That's the name of this magical treasure, a damaged immortal artifact.

Capable of releasing profound ice qi, it freezes everything, being an extreme cold weapon.

Once activated, it can freeze everything and solidify an entire area.

There is no doubt this damaged immortal artifact possesses powerful capabilities and combat strength.

"What happened?"

"Who are you? Why did I suddenly awaken?"

"Wait, how did you refine me? What on earth happened?"

"Cursed human cultivator, what did you do to me?"

At this moment, the artifact spirit of the Qiantian Ice Soul Pearl awoke.

It looked around dizzily, unable to comprehend what had happened.

But it quickly realized that it had been completely refined by this unfamiliar human cultivator before it.

The issue is that it is an immortal artifact; even damaged, how could this human cultivator refine it completely without its consent? It defies logic.

Instantly, it became somewhat frantic, floating mid-air, glaring angrily at Jiang Fan.

Hearing these words, nearby magical treasures like the Ten Thousand Transformations Immortal Cauldron, Demon-Vibrating Bell, Exquisite Tower, and others found amusement in its misfortune. They too were silently refined in such a manner.

It seems that this fellow has followed in their footsteps.

But this is their master's ability.

No matter how rebellious a magical treasure may be, it cannot resist their master's mysterious methods.

"First, answer my question. Why are you in the Demon Cave?"

Jiang Fan asked.

The Qiantian Ice Soul Pearl didn't want to answer any questions from this accursed human cultivator, but for some reason, the mysterious power within this human's words compelled it to respond.

It began to speak, "My previous master was Daoist Xue Xue. She, along with many great powers, used their means to seal two terrifying demons here to spare the world from immense disaster.

However, to prevent these two demons from escaping in the future and causing another catastrophe, I was left here to watch over them day and night.

For many years, my task was completed perfectly, without any mistakes. Wait, how did you enter the Demon Cave? Where are the Blood-eating Fish Demon and the Shadow Fish Demon? Where did they go to?"

At this moment, it was a bit panicked, having not detected the two demons it had sealed.

The entire Demon Cave was empty.

More alarming was the fact that the sealing array here had been completely destroyed.

Undoubtedly, those two terrifying demons must have escaped while it was asleep.

Now it was extremely anxious.

No one knew better than it how terrible those two demons were.

Even during the Ancient Era, it took many great powers working together to seal them.

And in this era now, with spiritual qi thin and cultivators' cultivation low.

If these two demons escaped, it wouldn't be long before they'd massacre all beings in the Void Realm, leaving none alive.

"Oh, they've already escaped from here."

"But you needn't worry, I've personally slain them."

"Those two menaces have completely disappeared from this world."

Jiang Fan said nonchalantly.

"Huh?!"

Hearing this, the Qiantian Ice Soul Pearl was dumbfounded.

Although it understood every word this guy said, it couldn't comprehend what he meant.

Who did this young human cultivator think he was?

His cultivation was indeed at the Tier Six Early Stage.

In this era, he might be considered a top-notch powerhouse.

But for those two terrifying demons, what did this level of cultivation amount to?

Yet here he was, brazenly claiming he had slain two Ancient Demons.

It was like lying without hesitation, as if he thought the Qiantian Ice Soul Pearl were a fool.

"Hmm, these are their remains."

Jiang Fan didn't waste any words.

He had already acquired the remains of the two Ancient Demons and stored them inside the internal world of the Exquisite Tower, allowing the Exquisite Tower to rapidly refine these demon remains.

Chapter 1033: Obtaining the Immortal Artifact Qiantian Ice Soul Pearl, Ancient Cultivator_2

After all, if these demon corpses are left outside, they will surely pollute a vast sea area.

They might even give rise to numerous demons and demon cultivators.

So for ordinary cultivators, dealing with demon corpses is a huge problem.

But for Jiang Fan, it's not that troublesome; he can turn waste into treasure and refine demon corpses.

"How is this possible?"

"If you killed them, how are you still alive?"

"Their bodies contain a terrible curse."

"Even great powers cannot resist it."

Seeing the demon corpses Jiang Fan took out, within the Qiantian Ice Soul Pearl, waves of astonishment rose in its heart, filled with mixed emotions.

After spending countless eons of its life, these utterly terrifying demons were actually killed by this guy?!

Moreover, they are indeed dead beyond a doubt.

This was something that even numerous great powers joining forces in the past couldn't achieve.

After all, they too feared the curse within the demons.

If they perished together with these demons, then no one would be left to guard the Void Realm.

So sealing these demons was actually the best option.

"I happen to have mastered some methods that can counteract the curse."

"So the curse within the demons cannot affect me."

Jiang Fan said calmly.

"This."

"No wonder you can easily refine me."

"If it's you, indeed you are qualified to be my master."

The Qianti Ice Soul Pearl took a deep breath.

It immediately realized how extraordinary this human cultivator in front of it truly was.

Possibly the Child of Destiny born in this era of the Void Realm.

Following such a significant figure wouldn't disgrace its identity.

"The ancient cultivator Daoist Xue Xue left you here, perhaps because of your ability."

Jiang Fan asked.

"That's right, I have the ability to freeze everything."

"The demons are incredibly terrifying, each nearly impossible to kill, and they possess an undying body."

"And even if you can kill them, the curse within them isn't something ordinary cultivators can withstand."

"The ancient era's cultivators put in a lot of effort to deal with these demons."

"However, since they couldn't be killed, they could only choose to seal them up."

"Perhaps they could rely on the power of time to exhaust them to death."

"And I, the Qianti Ice Soul Pearl, happen to have the ability to seal demons."

"That's why Daoist Xue Xue left me here."

"That way, even if these two demons break free from the seal in the future,"

"if future cultivators can use my power, they can freeze them again."

"But I didn't expect you to kill them, even without my intervention."

The Qianti Ice Soul Pearl said with great emotion.

It felt that this future cultivator was overly powerful.

Without even using its power, he killed these two terrifying demons.

This isn't something ordinary cultivators can achieve.

And it didn't know what means and abilities this human cultivator had used.

Moreover, it could see that this human cultivator had only reached the Tier Six Early Stage in physique.

His Qi Cultivation was actually still at the level of Divinity Transformation Perfection.

To kill two great demons with such a realm is truly inconceivable.

Even in the ancient times, this would have been considered a miraculous event.

"I see."

Jiang Fan nodded.

It must be said, this incomplete Immortal Artifact, the Qianti Ice Soul Pearl, is indeed a supreme weapon against demons.

Once activated, it can freeze one demon after another.

Even if these demons have an undying body, it would be to no avail.

As long as they are frozen, they pose no threat to the Void Realm.

Furthermore, it doesn't matter if they are cursed because they aren't actually dead.

And the life force of the demons is limited as well.

As time passes, these demons will have their life force worn away by the years.

In fact, most of the sealed demons have already perished.

However, ancient demons like the blood-eating fish demon and the shadowy fish demon have life forces that are too tenacious, so they still survive until now, although their cultivation has declined significantly and needs time to recover.

From another perspective, any ancient demon that could withstand the passage of time and still be alive now is extremely powerful, with the potential to destroy worlds.

"By the way, Daoist Xue Xue also left some treasures."

"Unfortunately, the years have been too long."

"Many spiritual objects have been destroyed by the power of time."

"So now there are only two thousand pieces of Immortal Stone left."

"Therefore, I hope you won't be too disdainful."

At this moment, the Qiankun Ice Soul Pearl said apologetically.

It took out a full two thousand Immortal Stones from itself, placing them in front of Jiang Fan.

Immediately, as the two thousand Immortal Stones piled together, they began to exude a rich Immortal Qi.

Thus, the entire Demon Cave became enveloped by Immortal Qi, forming a Grotto Heaven Blessed Land.

"Two thousand Immortal Stones?!"

"Not disdainful, definitely not disdainful."

Upon hearing this, Jiang Fan was dumbfounded, utterly unable to believe his own eyes.

In the Spirit Ruins Realm, he had encountered so many opportunities, yet he had only obtained eight hundred Immortal Stones.

But here the Qiankun Ice Soul Pearl just took out two thousand Immortal Stones at once, which was exceedingly wealthy.

Without a doubt, at its peak, the Void Realm was many times wealthier than the Spirit Ruins Realm.

Even though the Void Realm has fallen, a broken ship still has three pounds of nails.

With the aid of these two thousand Immortal Stones, he would be able to advance his cultivation to Divinity Transformation Perfection faster.

At that time, he would quickly ascend to Refining Void.

After this battle, he realized it was only the beginning.

No one knew just how many Ancient Demons were sealed within the Void Realm.

He was just one person.

If he didn't quickly enhance his cultivation, and if all those Ancient Demons broke free, who knows what horrifying catastrophe the Void Realm might face.

Deep within his heart, he was filled with urgency.

Whoosh!

Thinking of this, Jiang Fan did not hesitate, immediately returning to the Ten Thousand Beasts Secret Realm through the Gate of the Void.

He also began his seclusion cultivation, intending not to pay any attention to external affairs.

Nothing was more important than his own cultivation.

.....

At this time, on Primordial Peak.

Su Weiwei and Lu Youyou naturally learned of Jiang Fan's return.

Simultaneously, they also discovered that their husband personally took action to resolve two Ancient Demons.

"Impossible, he actually killed the Blood-eating Fish Demon and the Shadow Fish Demon?"

"How on earth did he manage this?"

"During the Ancient Era, these two demons were notorious, slaughtering countless cultivators."

"Even in the Ancient Era, many Great Powers paid a tremendous price."

"Only then were they ultimately sealed away."

"Yet a mere human cultivator actually slew them?"

Upon hearing this news, the Taiyin Jade Rabbit, Yueque, was stupefied.

It originally thought that even if that human cultivator intervened personally, sealing the demons would have been the best outcome; as for intending to kill them, it was almost an impossibility.

Yet this impossible feat indeed occurred.

This was truly beyond its expectations, and it was completely baffled by how such an event came to be.

"It truly is unbelievable."

"But indeed, the husband achieved it."

"And even brought their corpses back."

"It wasn't just one demon that broke free this time, but two Ancient Demons."

"Fortunately, the husband addressed them in time, otherwise countless lives would have perilously met their demise."

Su Weiwei exclaimed with emotional conviction.

She couldn't believe that two Ancient Demons surfaced at once.

If it were any other cultivator, they surely wouldn't have suspected this.

However, as the husband personally intervened, even hidden demons were discovered.

Moreover, he slew them together, such a method was truly astonishing.

Yet, for the husband, perhaps it was merely an ordinary occurrence.

"Undoubtedly."

"If you knew the methods of the Blood-eating Fish Demon and the Shadow Fish Demon, you'd truly understand how unbelievable this is."

"They are reputed as immortal demons."

"If there were even a slight negligence, killing them would be impossible."

"I underestimated this human cultivator."

"Even in the Ancient Era, this human surely was a Great Power, not lesser than a True Spirit."

Now, the Taiyin Jade Rabbit, Yueque had come to wholeheartedly accept the situation.

Though most humans are weak, occasionally a rare anomaly emerges.

These anomalies possess talents and combat capabilities that are in no way inferior to True Spirits.

Even stronger than the True Spirits themselves.

Like the founder of the Taixu Sect was precisely such an individual.

"The husband is currently in seclusion cultivation."

"Once the seclusion ends, he should truly ascend to Refining Void."

Su Weiwei anticipated eagerly.

Chapter 1034: Soul Merges with the Void, Power Merges with the Void, Heavenly Phenomena

Half a year later.

Void Realm, Ten Thousand Beasts Secret Realm, Primordial Peak.

A Quiet Chamber.

The entire chamber was covered in a large number of Immortal Stones.

Although due to the Spiritual Energy Revival, the Spirit Vein of the Ten Thousand Beasts Secret Realm had elevated to Tier Six level.

However, the Spiritual Qi contained within a Tier Six Spirit Vein still couldn't compare to the Immortal Qi brought by Immortal Stones.

After all, to some extent, Immortal Qi is a higher-level energy.

It provides enormous benefits to cultivators and can help them break through bottlenecks.

One might say it's infinitely mystical.

At this moment, Jiang Fan sat cross-legged on the ground, operating the Mixed Element Talisman Scripture.

The enormous Spiritual Qi around him poured into his body, merged deeply within him, and then transformed into Primordial Magical Power.

Divinity Transformation Perfection!

After spending half a year, Jiang Fan's cultivation finally elevated to the stage of Divinity Transformation Perfection.

This was naturally attributed to the two thousand Immortal Stones he had obtained earlier.

The massive energy of precisely two thousand eight hundred Immortal Stones piled together was almost like Grotto Heaven Blessed Land.

Almost exceeding the needs of Divinity Transformation cultivators.

Even for a cultivator with a strong foundation like Jiang Fan.

It was because of this that in just half a year, his cultivation was advanced to Divinity Transformation Perfection.

Merely one step away from ascending to the Void Refinement Realm.

"The time has come."

Without any hesitation, Jiang Fan began to attempt the advancement to Void Refinement.

For ordinary Divinity Transformation cultivators, the first step in advancing to Void Refinement is to consume Void Refining Spirit Medicine to make their Divine Sense break through to the Void Refinement Realm.

But he was different; his Divine Sense had already reached the Ninth-Layer Void Refining Realm.

Comparable to Void Refining Perfection cultivators.

So this step for Jiang Fan was futile.

Boom~~

A terrifying force of Divine Sense erupted from within him, enveloping a million kilometers.

Yet the cultivators in this region could hardly detect anything.

Because the Divine Sense of Void Refining cultivators has entered a higher dimension.

That is the void.

If a cultivator cannot perceive the void, they cannot sense the Divine Sense of Void Refining cultivators.

This is a higher-dimensional Power of Divine Sense.

For ordinary cultivators, it's simply a dimensional strike.

"My Divine Sense transformation actually completed long ago."

"Next, I need to complete the transformation of my Magical Power."

"This requires leveraging strands of Void Power to merge into my Magical Power."

"Thus making the Magical Power undergo transformation and ascend to become Void Refining Power."

Jiang Fan carefully recalled the details described by the Primordial Talisman Pen about advancing to Void Refinement.

After all, the Primordial Talisman Pen is the heritage artifact of the Primordial Talisman Sect, well-versed in cultivation techniques of various realms.

Receiving its guidance was like receiving guidance from a Mahayana cultivator.

Thus, he had no doubts about how to advance to Void Refinement.

Boom~

In an instant, his vast Divine Sense infiltrated the void.

Strands of spiritual tendrils fused into the void.

Like a huge net, it covered a hundred meters of the void.

This was using the power of the mind to interfere with reality, leveraging Void Power.

For ordinary cultivators at the level of Divinity Transformation Perfection, achieving this is incredibly difficult.

Because Void Energy is exceedingly heavy.

Like a rock with extremely high density.

The Divine Sense of ordinary Divinity Transformation Perfection cultivators is very weak, barely able to push the rock.

So they need to take medicine to surge their Divine Sense power dramatically.

This allows them to leverage Void Power.

However, Jiang Fan doesn't need to do so since his Divine Sense power is already strong enough.

Like a natural divine strength.

Other cultivators find it hard to leverage Void Power, but for him, it's as simple as eating and drinking.

Buzz buzz~~

Immediately, the spiritual tendrils on Jiang Fan's body began cutting the void.

Like sharp blades, continuously cutting the energy of the void.

The previously overwhelmingly heavy void became featherlike under his Divine Sense power.

Unable to burden his mind in the least.

Boom~~

The next second, a strand of Void Energy, under Jiang Fan's Divine Sense manipulation, instantly entered the depths of his Elixir Field and Sea of Qi, merging with the Primordial Magical Power within him.

The instant Void Energy entered the Elixir Field and Sea of Qi, it rapidly merged with the Primordial Magical Power.

This caused the Primordial Magical Power to undergo an astonishing transformation.

Even allowing his Magical Power to merge with strands of Void Power.

At this moment, it seemed as if his body's Magical Power resonated with the void.

Merging him with the surrounding void.

"So this is soul fusion with the void."

"Not only does the soul merge with the void, but the Magical Power does as well."

"Thus, Void Refining cultivators can easily refine Void Power."

"This is a distinct characteristic of Void Refining cultivators, vastly surpassing Divinity Transformation cultivators."

"If Divinity Transformation cultivators are merely earthly gods, they are merely Land Gods."

"Only Void Refining cultivators have transcended the domain of Land Gods, ascending to a higher level of divine status."

"Of course, to merge Magical Power with Void Power, the Magical Power must be extremely pure."

"If there are any impurities, it cannot merge, leading to failure in advancing to Void Refinement."

"Hence, those chaotic cultivation techniques from the Ancient Era are too simplistic and rushed."

"This leads to their Magical Power being mixed and unrefined even after advancing to Divinity Transformation."

"Losing nearly all potential for further advancement."

"Though there is faint hope in this world, with certain Treasures of Heaven and Earth, to cleanse the impurities in Magical Power."

Chapter 1035: Soul Fused with the Void, Dharma Fused with the Void, Heavenly Phenomena

"But these Treasures of Heaven and Earth are exceedingly precious, not something those irregular cultivators can obtain."

"This also leads to their inability to further advance."

Jiang Fan's eyes revealed a glimmer of brilliance.

Undoubtedly, on his journey, his foundation was immensely solid, never impatient for success.

He always advanced steadily and surely.

It was because of this that his cultivation had been quite smooth, without encountering any bottleneck.

Even the bottleneck of breaking through to Refining Void couldn't stop him.

And this is also why the true disciples of the Renowned and Righteous Sects from the Ancient Era almost all had the potential to become immortal.

"However, the Primordial Magical Power within me is too vast."

"A mere strand of Void Power is far from enough."

"I need more Void Power."

"Only by doing so can all the Primordial Magical Power within me undergo metamorphosis."

"Thus advancing to Void Refining Power."

Jiang Fan sat cross-legged on the ground.

He activated the Power of Divine Sense within him, starting to continuously devour the power in the void.

Strands of Void Power were captured by his divine sense and integrated into the Elixir Field and Sea of Qi.

If it were an ordinary Divinity Transformation Cultivator, they would need to exert much effort, cautiously pushing the fusion of magical power and void power, but he was different. The moment Void Power entered the Elixir Field and Sea of Qi, it fused with his Primordial Magical Power.

This also greatly reduced the burden on him.

As long as he continuously devoured Void Power, he could naturally induce the metamorphosis of Primordial Magical Power within.

Boom~~

It was at this moment that Jiang Fan operated the Mixed Element Talisman Scripture, triggering heaven and earth phenomena across a million kilometers.

It was as if resonating with the laws of this realm.

Centered around Primordial Peak, within a million kilometers, the spiritual qi seemed to receive the most devout summons, breaking free from mountains, lakes, ancient trees, deep ravines, clouds, and mists, transforming into rainbow-colored torrents visible to the naked eye. They roared, crossed plains

and canyons, tearing through the air with sharp cries, converging towards the center. The air echoed with the rumble of spiritual qi surging like a million galloping horses, or a reversed river.

In the sky above, the wind and clouds changed color, the originally clear sky shrouded in endless glow and darkness intertwined.

Then, immensely huge Divine Beast apparitions appeared within the clouds: the Cyan Dragon coiled and soared, dragon scales shining with the brilliance of billions of stars, sweeping its tail, turning clouds to dust;

The White Tiger roared with its head held high, its pure white fur showing mystical patterns, a tiger rumble shaking the cosmos, causing ripples in the void;

The Vermilion Bird spread its wings as if to fly, surrounded by flames that could burn the sky and boil the sea, each opened wing covering half the sky, with flames falling as nurturing rain;

The Black Tortoise crouched deep within the clouds, its turtle shell carrying the trajectory of sun, moon, and stars, its snake tail coiling as if locking time's flow... Not only the four spirits, but also the Qilin walking on clouds, the Kunpeng spreading wings, the Bifang bearing fire, countless legendary Divine Beast phenomena appearing in the high skies, some static, some moving, their gaze all fixated on the center where the spiritual qi converged, as if worshipping, yet also guarding.

And in that even more distant void, beyond the limits of clouds and stars, originally an emptiness, was now covered by myriads of intricate, multi-layered mysterious runes.

These runes were neither gold nor stone, neither light nor shadow, akin to tadpole movements, star constellations, or ancient tree roots, exuding a vast, ancient, supreme Dao charm.

They interwove, collided, merged, at times bursting forth with endless streamers, at times sinking into absolute darkness, every flicker inciting the tide of Heaven and Earth Spiritual Qi, like cosmic law imprints that existed since the universe began, now thoroughly activated.

As the spiritual qi became increasingly magnificent, the movement of void runes grew ever more rapid, forming a terrifying "Spiritual Qi Tsunami" in an instant. It was no longer streams or rivers, but an

endless ocean of spiritual qi, carrying sky-crashing and earth-quaking might, sweeping from a million kilometers beyond the boundary towards the center. Towering waves reached thousands of feet, tens of thousands of feet, causing mountains to slightly tremble under the impact of spiritual qi, and the earth showed spiderweb-like spirit patterns, with the Divine Beast apparitions and void runes casting the sprawling spiritual qi tsunami as if divine retribution descended.

"What's going on? What exactly happened?"

"Primordial Peak, the source of the heaven and earth phenomena is at Primordial Peak."

"That's where Lord Sect Master undergoes seclusion cultivation, could such a stunning phenomenon mean a breakthrough in cultivation?"

"But didn't Lord Sect Master just have a breakthrough not long ago? Now it's happening again?"

"This is the power of a Refining Void Cultivator, even the Refining Void Cultivators of the Ancient Era were top powerhouses, let alone in this era now."

"But with such concentrated spiritual qi converging, it seems it greatly benefits our cultivation too."

"Indeed it does, I feel my own bottleneck somewhat loosening."

"This is the ultimate opportunity, everyone must not miss it."

The numerous cultivators of Primordial Talisman Sect discussed fervently.

They were astounded by such vast heaven and earth phenomena.

Unable to imagine that such phenomena would appear one after another, truly unbelievable.

But they quickly realized these heaven and earth phenomena greatly benefited them as well.

As if the Qi of Creation permeated the heavens and earth.

As long as there was a chance to devour a strand of it, it would provide cleansing of body and bones, overcoming bottlenecks. If this wasn't opportunity, then what was indeed opportunity?

Chapter 1036: Soul Merges with the Void, Law Merges with the Void, Heavenly Phenomena

Without further ado, many cultivators began practicing in this area.

Of course, Su Weiwei and Lu Youyou also witnessed this scene.

They were curious watching such a scene.

After all, for them, a Divinity Transformation Cultivator breaking through to Refining Void was unprecedented.

If they could carefully observe this once, they could surely gain great benefits.

"I didn't expect that my husband breaking through to Refining Void would cause such a huge phenomenon, it's truly exaggerated."

Lu Youyou exclaimed in amazement.

She had already learned some information about Divinity Transformation advancing to Refining Void from her master.

But such an astonishing phenomenon was unheard of.

This also meant that her husband's foundation was incredibly solid, beyond imagination.

"It's indeed exaggerated."

"But such an astonishing phenomenon also indicates a great tribulation."

"Even after advancing to Refining Void, one must go through Thunder Tribulation and Heart Demon Tribulation."

"The deeper the foundation, the more terrifying the tribulation."

"In the Ancient Era, some peerless geniuses died under the Thunder Tribulation."

Su Weiwei was worried about her husband's upcoming tribulation.

Sometimes, excessive phenomena might not be a good thing.

If he couldn't withstand the Thunder Tribulation, he would perish and his Dao would vanish.

In the Ancient Era, such things were not uncommon.

"Sister Weiwei, there's no need to worry."

"Given my husband's abilities, how could such tribulations possibly trouble him?"

"We just need to observe quietly."

Lu Youyou comforted.

"Mm."

Hearing this, Su Weiwei also calmed down.

Her husband was indeed not one to fight battles without assurance.

Since he made this decision, he probably anticipated this situation long ago.

...

Another three days passed.

Undoubtedly, the transformation speed of Jiang Fan's magical power was rapid.

In just three days, his magical power completely transformed into Void Refining Power.

Strands of special energy containing Void Power roamed inside his body.

Like a great river, it flowed through his meridians everywhere.

At this moment, it seemed as if his meridians had turned into the patterns of an Array Map, merging with the surrounding void. This power engraved the void and resonated with it.

This was the merging of power with the heavens and earth.

"Void Refining Power is truly incomparable to Divinity Transformation Magical Power."

"Not to mention the quality or quantity."

"Just the Void Power it carries is something an ordinary cultivator's physique cannot withstand."

"If a Divinity Transformation Cultivator with a weak physique tries to condense Void Refining Power, they would be crushed instantly."

"Which would result in their physique being shattered, turning into a mess of flesh."

Jiang Fan clenched his fist, starting to feel the benefits of a strong physique.

If a cultivator before Nascent Soul didn't practice a Body Tempering Technique, it was indeed the correct choice.

Because the lifespan was too short.

How could an ordinary cultivator train in two paths simultaneously?

The resources required cannot be afforded by Low-Tier Cultivators.

However, after advancing to Divinity Transformation, it was completely different.

At this time, a Divinity Transformation Cultivator has a lifespan of three thousand years, no longer as short-lived as before.

In this case, it becomes possible to cultivate in both paths.

Not just possible, but necessary to take both paths.

Otherwise, you would never advance to Refining Void.

Without a strong physique, one cannot even withstand a Void Refining Cultivator's power.

Fortunately, Jiang Fan had no such worries at all.

He cultivated the True Spirit Technique, possessing the physique and lifespan of a True Spirit.

Naturally, he could easily bear the Void Refining Power.

Chapter 1037: Primordial Domain, Heart Demon Tribulation

"Now, I can be considered to have truly stepped into the First-Layer Void Refining."

At this moment, Jiang Fan sensed the primordial magical power deep within his body, along with the immense power of divine sense, which compared to before had undergone a tremendous transformation, more than tenfold increase.

More importantly, magical power and the power of divine sense had fused into one.

With a single thought, a domain covering thousands of miles spread out, encompassing the Nine Heavens and Ten Lands.

Primordial Domain!

This domain contained various forces, gold, wood, water, fire, earth, and so on. Essentially, the power of his Life Talisman was all integrated into the domain, it was simply all-encompassing.

Once this primordial domain is unfolded, various powers can be exerted.

It can be said that whatever Life Talisman he possesses, he can wield that kind of power.

It feels as if he can blend into the countless forces of heaven and earth.

The stronger the fused power, the more formidable the primordial domain becomes.

He felt that under the coverage of his primordial domain, everything within it was under his control.

He felt like a creator, almost omnipotent.

With a thought, he could crush any living being within the domain, extremely domineering.

"But next, there are still the Heart Demon Tribulation and Thunder Tribulation."

"Only by overcoming these two tribulations can I be truly promoted to Refining Void."

"If I die under the tribulation, it would truly be the end."

Jiang Fan's expression was very serious.

Because he sensed the Heart Demon Tribulation arriving at that very moment.

Crack~~

A shattering sound reminiscent of primordial times echoed in the void, the sound was deep and heavy, like countless mountains collapsing simultaneously.

Jiang Fan suddenly looked up, only to see that the sky above had, at some unknown time, split open with a sinister crack. The crack was like a demon's eye, with thick, ink-like black mist flowing from its edges, in which countless warped runes flickered, emitting a chillingly evil aura.

Soon after, the crack began expanding rapidly at a speed visible to the naked eye, the initially fine fissure quickly transformed into a massive rift stretching across the horizon. From the depths of the rift came bursts of eerie howls, unlike anything of this world, filled with greed, savagery, and destructive desire.

The next moment, numerous dark shadows surged from the rift, like a flood breaking its banks, engulfing the whole world. These shadows were of various forms, some with three heads and six arms, each hand holding a different deadly weapon, gleaming coldly;

Others were like writhing masses of flesh, covered with countless eyes, staring fixedly at the cultivators below; Still others took human form, but with pale faces, hollow eye sockets, drooling mouths, exuding a strong aura of death. These were celestial demons descending from the outer realm, evil beings composed of all negative emotions in the world, feeding on the souls of living beings.

"Why are there so many Outer Celestial Demons appearing?"

"Isn't this the Heart Demon Tribulation?"

Jiang Fan frowned.

It was different from what the Primordial Talisman Pen had described, the Heart Demon Tribulation was much stronger compared to the Ancient Era.

This was no longer a Heart Demon Tribulation, but a Celestial Demon Tribulation.

Frankly speaking, these outer celestial demons were much stronger than the heart demons within.

Not only could they trap a cultivator in endless illusions.

They could also devour the cultivator's soul while the cultivator was trapped in the illusion.

In some sense, they were a type of demon.

Undoubtedly, due to his breakthrough to the Void Refinement Realm, these celestial demons, which had always been in the outer realms, were now immensely excited. They flew in through the rift in the void, locking onto Jiang Fan's energy.

To them, Jiang Fan was the most delicious food in the world.

"A human cultivator has ascended to Refining Void."

"Heh heh, how many years has it been, how many years, finally a cultivator has ascended to Refining Void."

"If it weren't for this human cultivator, we would never have been able to open the barrier of this world and enter here."

"Devour him, we must devour him, this human cultivator's soul smells incredibly fragrant."

"This human is no ordinary Void Refining cultivator, such a powerful soul aura is truly unheard of."

"If we could devour this human cultivator's soul, maybe we could all become Demon Kings."

The celestial demons from the outer realm discussed this chaotically, already driven to a state of complete madness.

In an instant, as soon as these celestial demons appeared, they started dancing wildly in the void, enacting a nauseating dance of chaos.

They tore and devoured each other, emitting sharp, ear-piercing laughter, laughter filled with bizarre magic, as if it could directly penetrate one's mind.

Some celestial demons unfolded their massive wings, weaving through the clouds, leaving trails of black; others rolled and jumped on the ground, withered grass and crumbled rocks in their wake;

Still others formed a circle, starting an ancient and evil dance, chanting as if conducting some terrible sacrifice.

"This."

Jiang Fan's eyes revealed a glint of cold light.

He felt the scene before him starting to distort and blur, the howls and laughter in his ears gradually drifting away, replaced by some familiar sounds.

He seemed to see himself back in Osmanthus Village, unable to protect Su Weiwei, ultimately leading to her being killed by the Dragon King Gang people. She transformed into a vengeful ghost, glaring at him with a face full of resentment;

It felt as if he returned to previous times, with enemies he once killed reaching out with withered hands, trying to drag him into the endless abyss.

Chapter 1038: Primordial Domain, Heart Demon Tribulation (Part 2)

The wailing ghosts cried out, asking why he had to kill them, saying they only wanted to survive. They wanted to drag Jiang Fan into the endless Hell.

"Is this the illusion technique of a Refining Void-level Celestial Demon?"

Jiang Fan's face was grim; he wanted to resist, but found his body incredibly heavy, as if his limbs were filled with lead, making it difficult to move.

The boundless Primordial Magical Power stagnated within his body, and his sea of consciousness was flooded with countless negative emotions—fear, regret, despair—drowning him like a tidal wave.

The terrifying illusion realm from the Celestial Demon was like a giant net, firmly trapping Jiang Fan.

Jiang Fan saw what he desired most right in front of him, just within reach, yet at the moment of grasping, it turned into an illusion;

He felt the most piercing betrayal as those he once trusted most were stabbing at his heart with knives;

He experienced the most painful failures, his lifetime's cultivation destroyed in an instant, reduced to a despised wastrel.

These illusions were so real, each detail exquisitely clear.

"Indeed, the Heart Demon Tribulation upon ascending to Refining Void is not so simple."

"But unfortunately, if you want to kill me, you're still far off."

At this moment, a mysterious energy instantly penetrated the depths of Jiang Fan's sea of consciousness, keeping his soul in a state of clarity, unaffected by any tribulation.

No matter how terrible these Celestial Demon illusions were, they couldn't affect him.

Scene after scene presented before him, and he merely regarded them as watching a movie.

Inside, he remained exceedingly calm.

In the next second, under Jiang Fan's urging, the Demon-Vibrating Bell flew out immediately.

After all, this magical treasure was particularly effective against demons and Celestial Demons.

Using it to deal with this group of Celestial Demons was simply ideal.

Whoosh!

The ancient huge bell immediately flew into mid-air, its body a deep golden color, covered in dense patterns that at first glance seemed like ordinary carvings. Yet as the bell's toll sounded, the patterns actually began to flow as if alive.

The first to light up was the "鎮" rune on the bell's shoulder, from which ink-colored stroke splashed with pale golden radiance, as if an invisible ancient sage were inscribing on the bell, the brushstrokes exuding a mighty force to suppress all evils.

Then, the runes "蕩," "灭," "淨" on the bell's belly lit up in succession, countless small Sanskrit scripts overflowed from the main runes like golden fireflies swirling and dancing around the bell body, forming a dense magical net isolating the Demonic Qi outside.

Buzzing~~~

The first toll sounded, and the bell body trembled fiercely. Those swirling runes instantly merged into the bell body, causing the deep golden bell body to emit a layer of brilliant glow.

A visible sound wave expanded outward from the bell body, where it passed, the void rippled like a calm lake disturbed by a giant stone.

The ripples appeared pale gold, their edges flashing with the afterimage of runes, seemingly gentle yet containing an indestructible power.

The sound wave first struck the nearest Celestial Demons. Those winged Celestial Demons had no time to react as their bodies turned into specks of black ash within the ripples, unable even to utter a scream.

Celestial Demons a bit farther away tried to escape but were caught by the pursuing sound wave. The wave was like countless sharp little knives, instantly shredding their bodies into fragments. The black blood splattered in the air but was purified the moment it touched the golden ripples, leaving no trace.

"Damn it, what is going on here?"

"This sound contains Demon-Vanquishing Power, especially restraining us."

"Damn human, damn magical treasure, don't underestimate us."

"Everyone, charge together, we are many in number, let's see if he can kill us all."

The Outer Celestial Demons were instantly enraged.

Not only were they not afraid, they were utterly enraged by Jiang Fan's actions.

How could a mere human cultivator possibly deal with such grand Celestial Demons?

Usually, some simple means would definitely lead to this human being killed by them.

Now was just some minor obstruction, nothing significant.

Besides, the feast was right in front of them, letting them escape now was simply impossible.

This human could not frighten them.

However, the sound waves of the Demon-Vibrating Bell did not cease; instead, they grew stronger. As the second toll rang out, the entire world seemed to resonate, with layers upon layers of golden ripples surging toward the rift in the void.

The Celestial Demons emerging from the rift were shattered at the border by the sound waves, the black fog dissipating swiftly in the ripples, exposing the void chaos behind the rift.

The runes on the bell became increasingly bright, as if to melt the entire bell. Countless ancient syllables spread with the sound waves, purification words existing since the opening of heaven and earth, each like a key unlocking the mighty righteousness hidden within living beings.

At this moment, Jiang Fan felt the sharp pain in his sea of consciousness instantly vanish, those negative emotions melting like snow under the sun. The previously chaotic spiritual power flowed smoothly again, and his Dao Heart grew more stable under the nourishment of the sound waves.

Numerous Outer Celestial Demons were exterminated under such an attack.

They were like moths to a flame, perishing as many as they came, utterly useless.

Undoubtedly, the power of the Demon-Vibrating Bell could not only deal with Celestial and ordinary demons but also had a great effect on cultivators themselves, possessing the ability to cleanse the mind with infinite mysteries.

As Jiang Fan's cultivation progressed, the power of the Demon-Vibrating Bell began to be gradually unleashed.

As a former Ancient Treasure, its power was much more than this.

"What a tremendous soul energy."

"Killing these Celestial Demons yields significant benefits too."

"The soul energy from these Celestial Demons can promote the growth of the soul."

"Obviously, this is not just a tribulation but also an opportunity."

Jiang Fan's Soul Devourer Divine Power was immediately unleashed.

A Soul Devourer Domain silently encompassed all directions.

After the death of those Outer Celestial Demons, a large amount of soul energy was left behind.

This soul energy was immediately devoured and absorbed by him.

He felt the soul energy within him growing at an astonishing speed.

If this growth continued, his soul power could break through, ascending to the First-Layer Integration Realm.

This was a qualitative transformation.

Without such an opportunity, he wouldn't even know how long it would take to break through.

Thinking of this, his gaze heatedly fell upon these Outer Celestial Demons.

For him now, these Outer Celestial Demons were already like spirit medicine.

He absolutely would not allow them to escape from here.

"Oh no, the power of this magical treasure is too formidable. We can't fight it."

"Shameless and despicable human, merely relying on the power of the magical treasure, if you dare, don't use it."

"Quick, let's run, this human is no longer someone we can handle, he has definitely formed a strong presence."

At this time, the chaotic scene of dancing demons paused abruptly, those previously frenzied Celestial Demons showing fear in their eyes, beginning to flee in all directions.

Initially, they were confident, convinced they could capture this human cultivator.

But the power of the Demon-Vibrating Bell was too terrifying, beyond their capability range.

If they continued like this, they would surely be wiped out.

Though they were indeed brave, they were not recklessly fearless.

If the situation was untenable, they would never linger; they would run as far as possible.

Clang~~Clang~~Clang~~

At this point, the power of the Demon-Vibrating Bell was fully unleashed, covering an area within millions of kilometers.

It essentially enveloped this entire region of Celestial Demons, leaving none behind.

Undoubtedly, these Celestial Demons were no match for the Demon-Vibrating Bell.

Now, the Demon-Vibrating Bell hung in the sky, its tolls, and golden ripples continuously spreading, purifying each remaining Celestial Demon, eradicating them all.

Under the impact of the sound waves, the void rift began to shrink slowly, the black mist at its edges growing fainter, finally closing completely with a bell tolling that echoed into the clouds. The world was restored to clarity, leaving only the lingering, melodious toll of the Demon-Vibrating Bell in the air.

Evidently, the Heart Demon Tribulation was thus easily overcome.

And Jiang Fan seized the opportunity to devour a massive amount of soul energy, significantly enhancing his soul power.

"Hmm? The Void Refining Thunder Tribulation? Has it arrived so soon?"

At this moment, Jiang Fan's expression changed as he sensed the sudden appearance of thick dark clouds overhead.

Purple tribulation lightning flashed within the depths of the clouds.

A destructive aura brewed, locking onto Jiang Fan's presence.
