Chapter 119: Peerless Cultivation Technique - Mixed Element Talisman Scripture, One Talisman Carrying Ten Thousand Talismans

"What is a Talisman Cultivator?"

Su Weiwei asked curiously.

She was becoming more and more curious about the cultivation realm.

Although she had previously gained some knowledge about the cultivation realm from her husband, she still didn't fully understand what so-called cultivators were, nor the kind of power they possessed.

"In the cultivation world, there are various professions."

"Among them, alchemy, artifact creation, talisman manipulation, and array formation are the four basic professions."

"Based on these professions are the Pill Cultivator, Artifact Cultivator, Talisman Cultivator, and Array Cultivator."

"A Pill Cultivator focuses on elixirs, refining numerous elixirs, and can even use elixirs as weapons in battle. Each Alchemist is a prominent figure in the cultivation realm."

"Artifact Cultivators are actually one of the mainstream professions in the cultivation realm. They focus on various magical artifacts, achieving Unity of Man and Artifact, and unlock mysterious powers, such as Sword Cultivators, Spear Cultivators, and Sword Cultivators, all of whom see various magical artifacts as their weapons."

"Array Cultivators are cultivators who take arrays as their foundation, contemplate array formation, understand the principles of heaven and earth, and refine array plates. When they act, they can deploy grand arrays, manipulating the power of nature, with boundless might.

However, comprehending array formation is extremely difficult. Only those with extraordinary insight can master it. Therefore, Array Cultivators are rare, but upon encountering one, one must exercise extreme caution."

"As for us, Talisman Cultivators are even simpler, focusing on talismans, refining the Life Talisman, and using talisman power to drive the forces of heaven and earth. At advanced levels, they can move mountains and overturn seas, and even pluck stars with one hand.

Of course, Talisman Cultivation is easy to learn but difficult to master; achieving the highest level is exceedingly challenging, requiring exceptional aptitude and insight."

"Additionally, there are other types of cultivators, such as Gu Cultivators, Poison Cultivators, Beast Cultivators, Plant Cultivators, Technique Cultivators, Earth Cultivators, etc."

"In summary, the cultivation realm has countless paths."

The Primordial Talisman Pen explained.

"I see."

Jiang Fan and Su Weiwei nodded, somewhat understanding.

However, it's clear from this that the cultivation realm is vast, far beyond what the mortal world can compare.

"Our Primordial Talisman Sect is also a leader in Talisman Cultivation."

"The reason we can command respect is because of the Mixed Element Talisman Scripture."

"This cultivation technique lays the foundation of the Primordial Talisman Sect."

"The reason this technique is so powerful is that it requires refining the Primordial Talisman as one's Life Talisman. This talisman's power can encompass all talismans in the world."

"With one talisman controlling the power of myriad talismans, this is how our Primordial Talisman Sect dominates the world."

"However, entering this cultivation technique is not easy."

The Primordial Talisman Pen said proudly.

It stated that there are other Talisman Sects in the cultivation realm.

But those sects only excel in one specific path.

Such as Fire Talisman, Thunder Talisman, Water Talisman, etc. Only the Primordial Talisman Sect can encompass myriad powers in one talisman, which is the supreme inheritance countless cultivators desire.

Upon hearing this, Jiang Fan was overjoyed. Is this the Fifth-Grade Opportunity?

It was indeed wise to wait several days.

Cyan Wood Formula is far too ordinary compared to the Mixed Element Talisman Scripture.

Only top cultivation techniques can establish a supreme cultivation foundation.

If the foundation is wrong, it will be incredibly difficult to change it later.

The cost is unbearable.

"By the way, this is your Dao Companion, right."

"She not only possesses a High-grade Spirit Root but also a special Spirit Body—Taiyin Virgin Body."

"This constitution is a prime tripod furnace."

"If discovered by a Demon Cultivator, they would definitely try to snatch her."

"After all, dual cultivation with such a woman can continuously gain Taiyin Qi from her."

"Not only can it wash marrow and cut meridians, but it can also accelerate one's cultivation speed, at least doubling it."

"However, if a man's Yang Qi is insufficient, she will eventually devour him completely, leading to the dispersal of his soul."

"You're lucky, having cultivated the Soaring Snake Technique, enhancing your Yang Qi greatly."

"If you were an ordinary person and dared to share a room with her, you would surely die young."

The Primordial Talisman Pen smiled, looking at Jiang Fan.

What?!

Upon hearing this, although Jiang Fan had anticipated Su Weiwei's constitution, he hadn't realized it was so terrifying. No wonder even as an Innate Martial Artist, she could handle it.

Furthermore, she seemed to be getting stronger.

Su Weiwei naturally is a seductive woman.

Ordinary men couldn't handle her.

He felt his encounter with Su Weiwei was likely due to his Life Chart.

Because he possesses great destiny, Su Weiwei such a cherished woman was attracted to him.

It's like a Yin Yang Magnet, mutually attracting each other.

"Husband."

Su Weiwei blinked her beautiful eyes, looking puzzled, not quite understanding what was being said.

She considered herself an ordinary woman.

Only with high demand in certain aspects.

"If that's the case, is there a way to solve this problem?"

Jiang Fan humbly sought advice as this concerned his future happiness, leaving no room for negligence.

"Solving this issue is simple."

"That is to refine the Primordial Talisman Sect's exclusive spirit talisman—the Yin Yang Mandarin Duck Talisman."
