

## Fortune 122

### Chapter 122: Nurturing Primordial Spiritual Power, Peerless Genius\_2

"I hope you maintain your composure in the future and keep pushing forward."

The Primordial Talisman Pen coughed, and after pondering, felt it should not let this young man become too arrogant.

Throughout history, there have been numerous geniuses destroyed by arrogance.

"Only the top hundred?"

"Among the geniuses in the world, they are like fish crossing a river."

Upon hearing these words, Jiang Fan remarked with feeling.

Originally, he thought his progress was quite good, but didn't expect there to be those faster than him in the world.

However, he didn't doubt it.

After all, the Cultivation Realm is vast, full of geniuses.

And compared to the geniuses of every era.

Being able to enter the top hundred is already quite good enough, sufficient to be remembered in history.

"This."

The Primordial Talisman Pen coughed, feeling guilty.

But it couldn't speak further; saying too much might reveal the secret.

"Elder Fu, why does it seem like the spiritual energy in the cave abode is constantly decreasing?"

Jiang Fan's mind stirred, noticing the spiritual energy in this cave abode had reduced considerably compared to the beginning; if it continued, it would be like the outside.

"It's the fault of you two as a married couple."

"Both of you are beginners and have devoured a large amount of the cave's spiritual energy."

"Originally, the spiritual energy in the cave came from spirit stones."

"Now that you've devoured most of it, naturally, the spiritual energy is thinning out."

"So if you want to advance further, heading to the Cultivation Realm is the only choice."

The Primordial Talisman Pen said irritably.

"Has Weiwei also succeeded in beginning cultivation?"

Upon hearing this, Jiang Fan was immediately pleased.

Su Weiwei had struggled to begin cultivation, but unexpectedly after coming to this Immortal Cave Mansion for a short time, she succeeded.

It seems finding the right cultivation technique was the correct decision.

Otherwise, it would be uncertain when she could become a cultivator.

"Of course she has begun."

"This woman's physique is naturally suited for such a technique."

"With just a little cultivation, she can start."

"Now she is a First-Layer Qi Cultivation cultivator."

"Next, she needs to find a suitable spirit beast for a contract."

The Primordial Talisman Pen said contentedly.

This time it truly hit the jackpot, finding two geniuses at once, and they are husband and wife.

This way, their relationship becomes more solid.

They will certainly be able to carry forward the legacy of Primordial Talisman Sect in the future.

"Husband, I succeeded."

At this moment, Su Weiwei charmingly walked out of a room nearby.

In fact, yesterday when Jiang Fan was cultivating the Mixed Element Talisman Scripture, she went into another room to cultivate, to avoid disturbing him.

She joyfully approached Jiang Fan.

Her aura now is completely different from before.

It seemed her allure was fully developed.

Her skin became smoother and more delicate, and the high towers were more majestic.

Every movement exuded endless charm, making people's faces blush and ears heat.

Clearly, her Taiyin Virgin Body is indeed extraordinary.

"Fantastic."

"I knew you could do it."

Jiang Fan immediately embraced Su Weiwei, feeling her fiery figure.

"Ahem, you two stop being affectionate here."

"Hurry and get ready."

"Soon we will take the teleportation array to leave here."

The Primordial Talisman Pen, unable to bear it, spoke.

"Why so soon?"

Jiang Fan felt puzzled, not knowing why Elder Fu Line wanted them to leave so quickly.

"It's simple, because I am soon to fall into slumber."

"I didn't tell you before, although I am a top-grade spiritual treasure, I suffered severe injuries."

"To recover from my injuries on the body, I need to sleep for a while."

"Otherwise, I may sleep forever."

"If I don't quickly activate the teleportation array to send you to the Cultivation Realm, you won't be able to activate it, requiring you to go to the Cultivation Realm by yourselves, which would take an unknown amount of time."

The Primordial Talisman Pen explained.

The reason the Immortal Cave Mansion opens every fifty years is that it cannot last long.

Often awakening for a period then requiring fifty years of sleep.

It doesn't even know how long its next sleep will be, possibly even longer.

"Is there really such a thing?"

Jiang Fan was surprised, thinking the Primordial Talisman Pen was intact, but now it seemed deeply injured inside.

Su Weiwei also looked worriedly at the Primordial Talisman Pen.

"But you don't need to worry."

"Before I sleep, I will impart to you a large amount of knowledge about cultivation."

"At least it will be enough for you to cultivate to the Foundation Establishment Realm."

"So the cultivation ahead will rely on you."

The Primordial Talisman Pen spoke solemnly.

"Isn't there any other treasure here?"

Jiang Fan asked curiously; he hoped to find some spirit stone elixirs or something.

"No, there's no treasure in the entire cave abode."

"Spirit stones were used to build the array."

"As for elixirs, due to time, their medicinal power has long been exhausted."

"When the master fled here, all treasures on him disappeared completely."

"Basically a pauper."

"The greatest treasure of the cave is me and the knowledge I possess."

"Once you reach the Cultivation Realm, you'll know knowledge is the most important."

"With knowledge, any cultivation resources are achievable."

The Primordial Talisman Pen explained.

"Mm."

Jiang Fan nodded.

Before long, under the guidance of the Primordial Talisman Pen, Su Weiwei and Jiang Fan arrived at the deepest part of the cave abode, where a temporary teleportation array was built, only usable once.

The two walked onto the teleportation array.

They curiously observed their surroundings, wanting to study the mysteries of the teleportation array.

Bang!

Instantly, the Primordial Talisman Pen touched lightly, causing the whole array to start shaking, radiating endless golden light.

An invisible void power instantly enveloped Su Weiwei, Jiang Fan, and the Primordial Talisman Pen.

In the next second, their figures vanished in the teleportation array, transported to another location.

As for Chen Yaochuan and others who came to the Immortal Cave Mansion originally, due to failing the test, they were expelled instantly.

The Yunmeng Lake, previously shrouded in white mist, rapidly returned to its original state, as if nothing had happened.

.....

Instantly, Jiang Fan sensed that he seemed to have arrived at another location.

Appearing in a strange cave.

However, he sensed the spiritual energy around was incredibly rich.

At least compared to the Mortal World, the spiritual energy here was ten, even twenty times thicker.

Perhaps due to the Mortal World's spiritual energy being too thin.

Like multiplying 0.1 by ten times, it's still just one.

But undoubtedly, this place is quite suitable for cultivators to live.

Boom~~

At this moment, a message came from the depths of his consciousness: "You rode the teleportation array, leaving the perilous Wei Kingdom, avoiding a life-threatening crisis, and gained a thousand luck points."

What?!

Jiang Fan blinked, slightly shocked inside, merely leaving Wei Kingdom yet it's considered avoiding a deadly threat?

Could there be unknown dangers lurking in Wei Kingdom?

If he stayed in Wei Kingdom, might he face mortal danger?!

Who in Wei Kingdom could kill him?

"It seems Wei Kingdom isn't as simple as imagined."

"The uprising army, the Red Eyebrow Army, may not succeed in overthrowing Wei Kingdom."

Jiang Fan took a deep breath.

In fact, from the beginning he considered this possibility, Wei Kingdom standing for a thousand years must have faced numerous crises, yet no one could topple the Great Wei Royal Family.

There must be a reason, he absolutely believes.

If this were a mortal-controlled world, perhaps he would join the uprising army to overturn the corrupt dynasty.

But this world is dominated by cultivators.

Even if you overthrow a dynasty, establish a new one, the rulers are still cultivators.

Any cultivator in the Mortal World can stir up chaos.

Even cause dynastic upheaval.

Thus, anything he does bears little significance.

Power births authority.

If he truly wishes to change this decaying world, he shouldn't waste time in the Mortal World.

But enter the Cultivation Realm to gain mighty power.

Then, if he becomes the strongest, the world will turn according to his will.

However, until then, he must act cautiously.
