Chapter 152: Advancement to Fourth-Layer Qi Cultivation_2

Taking this elixir can weaken the bottleneck therein.

Even with thin spiritual power inside the body, one can instantly break through and advance to the Fourth-Layer Qi Cultivation.

However, cultivators with extremely high spiritual root talent don't need to do this at all.

Even relying on arduous cultivation, highly talented cultivators can still absorb large amounts of Heaven and Earth Spiritual Qi, thereby nurturing enormous spiritual power. Even without the aid of elixirs, they can instantly break through bottlenecks.

Jiang Fan is precisely such a highly talented cultivator.

"Come on."

Jiang Fan didn't hesitate at all and activated the Mixed Element Talisman Scripture.

The primordial spiritual power within his body surged into three meridians, mighty and vast, resembling three rivers.

Dong!

In an instant, the enormous primordial spiritual power effortlessly penetrated the three meridians, causing the three rivers to converge and form a perfect circulation.

One circulation, two circulations, three circulations...

A full nine circulations were completed.

As the primordial spiritual power flowing through the three meridians grew increasingly large, it almost reached the limit of Third-Layer Qi Cultivation.

At this moment, Jiang Fan urged the spiritual power within him to impact the bottleneck of the fourth meridian.

Boom~

It was like sweeping away deadwood; the bottleneck at Fourth-Layer Qi Cultivation couldn't possibly stop him.

The vast primordial spiritual power penetrated the fourth meridian and began to flow through it.

Fourth-Layer Qi Cultivation!

Undoubtedly, Jiang Fan's cultivation had now ascended to the realm of Fourth-Layer Qi Cultivation.

"Finally broke through."

Jiang Fan couldn't help but show a hint of joy on his face.

After advancing to Fourth-Layer Qi Cultivation, he sensed that the primordial spiritual power inside him had doubled.

Simultaneously, the primordial talisman deep in the Elixir Field and Sea of Qi also expanded considerably.

With this, he could also inscribe the fourth Life Talisman.

It's known that the gap between Fourth-Layer Qi Cultivation and Third-Layer Qi Cultivation is significant.

One belongs to mid-stage Qi cultivation, the other is an early stage.

This is the difference between a veteran and a newbie.

True masters within the slums are generally mid-stage Qi cultivators.

Only by becoming a mid-stage Qi cultivator can one barely have a foothold in the cultivation realm.

If one can become a late-stage Qi cultivator, that would be the elite among loose cultivators.

Such individuals are incredibly rare.

As for becoming a Foundation Establishment cultivator, that can no longer be considered a loose cultivator.

Such strength can become elders in Golden Core Sects like the Great Sun Sword Sect.

No matter the talent, even with low-grade spiritual root talent, the sects would still value them.

If one doesn't want to join a sect, they can also establish a Foundation Establishment family, thus leaving a legacy.

This is a realm millions of loose cultivators dream of.

Unfortunately, very few loose cultivators actually achieve Foundation Establishment.

"Next is inscribing the fourth Life Talisman."

Jiang Fan clenched his fist; he had already decided about his fourth Life Talisman, which is the Protective Talisman.

To be honest, he isn't lacking attack methods right now, only lacking defenses.

The power of the Light Body Talisman certainly isn't bad.

But it can't guarantee he's able to dodge all harm one hundred percent.

Thus, the power of the Protective Talisman is necessary.

And the power of the Protective Talisman is actually quite simple: it can activate a spiritual energy shield to envelop the entire body.

In this way, when enemies attack the spiritual energy shield, it will be blocked, essentially a full-body defense.

Many mid-stage Qi cultivators will buy Protective Talismans to safeguard their safety.

From a certain perspective, this is a critical reason why mid-stage Qi cultivators can overpower early-stage Qi cultivators. Once protected by a Protective Talisman, an early-stage Qi cultivator's attack can never break through its defense.

"Inscribing the Protective Talisman consumes a thousand Luck Points?!"

Jiang Fan soon discovered he needed to expend a large amount of Luck Points to successfully inscribe the Protective Talisman.

Though it requires consuming Luck Points, it is well worth it.

This shows the inestimable complexity and power of the Protective Talisman.

Boom~~

Thinking of this, Jiang Fan didn't hesitate at all and immediately spent a thousand Luck Points.

A mysterious energy instantly enveloped his soul, causing him to enter the realm of Unity of Heaven and Man.

At this moment, the primordial talisman deep in the Elixir Field and Sea of Qi kept spinning.

Strands of primordial spiritual power engraved the pattern of the Protective Talisman on this sphere.

Who knows how much time has passed; when the final line was inscribed, it promptly burst with golden light, finally forming the fourth talisman—the Protective Talisman.

"It's done."

Jiang Fan immediately felt a thrill; he sensed that he had mastered the power of the Protective Talisman.

At a thought, countless spiritual powers between Heaven and Earth gathered, unexpectedly forming a primordial shield in front of him to fend off enemy attacks.

It must be known that different cultivators have different powers in their Protective Talismans.

Cultivators practicing Fire Element Techniques, their Protective Talismans' power would be Flame Spiritual Power, which is a spiritual shield formed from flame spiritual power.

Sect members with Water Element Cultivations can form water-based spiritual energy shields.

As for Jiang Fan, naturally, he conjures the Primordial Qi Shield.

Such a Primordial Qi Shield is naturally stronger compared to other Protective Talismans, encompassing all, containing everything.

Various magic powers attacking the Primordial Qi Shield would be quickly dissolved and effortlessly blocked.

"Since it's only at entry level, can it now only form a primordial shield?"

Jiang Fan stroked his chin.

He realized that his talisman was just at entry level, so it couldn't perfectly exert the power of the Protective Talisman.

At most, it can only condense a spiritual shield.

However, if he can raise it to the proficient level, he can expand the spiritual shield's area to cover more parts.

In other words, the power of this talisman needs more usage to enhance its potency and increase skill level.

Boom~~

Thinking of this, Jiang Fan's heart moved, and he immediately opened his virtual panel.

[Name: Jiang Fan]

[Realm: Fourth-Layer Qi Cultivation (1%)]

[Profession: Low Grade Talisman Master (99%)]

"Not bad."

Jiang Fan felt quite satisfied.

Seeing he's still got fifteen hundred and sixty Luck Points.

After all, he had just collected twelve hundred Luck Points before, but due to inscribing the fourth Life Talisman, he spent a full thousand Luck Points, leaving just this much.

Indeed, regardless of the amount of Luck Points on him, it seems insufficient to expend.

"Next is advancing to Middle Grade Talisman Master, right?"

"To become a Middle Grade Talisman Master is actually simple."

"As long as one can draw a middle-grade talisman, they can naturally become a Middle Grade Talisman Master."

"However, regarding which middle-grade talisman to master, this requires careful deliberation."

Jiang Fan stroked his chin.

For him, middle-grade talismans are the genuine moneymakers.

Lower-grade talismans face fierce competition with extremely low prices, utterly unprofitable.

Only middle-grade or higher talismans have any profit.

Therefore, he hadn't planned to advance to Middle Grade Talisman Master, not just wanting to further solidify his Low Grade Talisman Master's cultivation but also considering which middle-grade talisman to master.

After all, this is crucial to his future.

This will become his signature product.

Once mastering a middle-grade talisman, it's like possessing a cash machine dispensing money endlessly.

"As a Talisman Master, not all middle-grade talismans can be mastered."

"What's essential is not what one can do, but the customers' demands."

"What talisman customers need, the Talisman Master refines; only thus can one make money."

"Otherwise, even if drawing a talisman, there might be no buyers."

In his previous life, Jiang Fan lived in a commercial society, so he profoundly understands the nature of commerce.

Customer demand is paramount.

Sometimes excellent products do not sell because nobody needs them.
