Chapter 153: Obtaining the Ancient Strange Insect—Six-winged Poison Bee

Another seven days passed.

During these seven days, Jiang Fan stayed at home cultivating, familiarizing himself with the power of the Fourth-Layer Qi Cultivation, consolidating his cultivation, and also getting acquainted with the power of his fourth Life Talisman.

After three days of arduous cultivation, he finally completely mastered the surging power and could freely control the spiritual power within his body.

Moreover, ever since he killed Yu Minghui and others, he had gained a bit of fame in the shantytown area.

At the very least, the loose cultivators in the shantytown no longer viewed Jiang Fan as an easy target.

The peering eyes at night also reduced significantly.

This is the harsh reality of the Cultivation Realm.

Only the strong can secure safety.

The weak ones are easy targets, vulnerable to being preyed upon at any moment.

Sometimes appropriately showcasing one's strength is also a way to protect oneself.

At noon.

Jiang Fan left his home, flying towards the location of the Seventh-Grade Opportunity.

The Skilled level of the Light Body Talisman made him extremely fast, reaching the level of Stepping on Snow Without Leaving a Trace.

In no time, he arrived at his destination.

"Hmm? Is it a cave?"

Jiang Fan discovered that the location of the Seventh-Grade Opportunity was a hidden cave, which originally had an array covering it, concealing the surroundings, but over time and due to an earthquake,

the entire array collapsed, fully revealing the cave, thus exposing this Seventh-Grade Opportunity.

Thinking of this, he didn't hesitate and immediately entered the cave.

Inside the cave, he saw a skeleton, white bones covered in dust, apparently the owner of the cave had been dead for a very long time.

"There's a Storage Bag Ring, is this the Seventh-Grade Opportunity?"

Jiang Fan saw that on the skeleton was a Space Ring, and without hesitation, he took it off.

He looked around but found no more treasures.

Presumably, all the treasures are within this Space Ring.

Bang~~

Thinking of this, he used the Fireball Technique, instantly collapsing the entire cave, burying the place in rocks.

In this way, no one else would discover this place.

Whoosh!

After doing all this, Jiang Fan quickly returned to his home in the shantytown.

Then he opened the ancient-looking Space Ring, eager to see what was inside.

"This cultivator seems to be a Beast Cultivator."

Jiang Fan's eyes gleamed with a hint of excitement.

Because he found several secret manuals about Beast Taming within the Space Ring.

However, such secret manuals naturally cannot compare to those of the Primordial Talisman Sect.

They can only be considered rather ordinary Beast Taming Techniques.

But what really excited him was that there was a jade box inside, sealing an insect egg.

This was the greatest gain that this nameless Beast Cultivator obtained from a mysterious cave dwelling.

Unfortunately, after obtaining this opportunity, he was ambushed by enemies, suffered severe injuries, and died.

"This is the Ancient Strange Insect—Six-winged Poison Bee."

Jiang Fan clenched his fist.

He immediately realized why this nameless Beast Cultivator was so excited, feeling that he had obtained a heaven-sent opportunity.

For a Beast Cultivator, the greatest opportunity is none other than contracting a top Spirit Beast.

The problem is, top Spirit Beasts are not easily obtainable.

They are mainly monopolized by ancient sects; otherwise, they would have vanished long ago.

For an ordinary loose cultivator, obtaining a top Spirit Beast is almost impossible.

So after acquiring the egg of the Ancient Strange Insect—the Six-winged Poison Bee, the Beast Cultivator was ecstatic.

Unfortunately, it was not meant to be for him.

Even before he could contract this Ancient Strange Insect, he met an untimely death.

"The Six-winged Poison Bee is one of the top ten ancient strange insects in the Cultivation Realm."

"It possesses six pairs of wings, allowing it to fly incredibly fast, even traversing space in a blink of an eye."

"It also develops poison needles capable of penetrating various Body Protection Techniques and Protective Treasures, with potent toxins."

"Once struck, the poison invades the body, and remedies are almost useless."

"Moreover, it is a Queen Bee, capable of nurturing a massive hive."

"If a hive forms, it can produce thousands of poison bees, akin to a natural disaster."

"In ancient times, the Six-winged Poison Bee once wreaked havoc, overpowering many forces."

"Sadly, due to an unknown disaster, the Six-winged Poison Bees eventually disappeared from the Cultivation Realm entirely."

Jiang Fan quickly found records regarding the Six-winged Poison Bee.

His heart filled with uncontrollable joy.

He had been pondering how to find a suitable contract Spirit Beast for Su Weiwei.

Unexpectedly, luck was on his side, leading him to the Ancient Strange Insect—the Six-winged Poison Bee.

Without a doubt, once this Ancient Strange Insect is nurtured, Su Weiwei's strength would be unimaginable.

Even relying solely on the power of the Six-winged Poison Bee, she could sweep the world.

More importantly, the hive formed by the Six-winged Poison Bee could yield mysterious honey.

This mysterious honey has various special effects.

Not only can it assist cultivators in advancing their cultivation, but it also helps in breaking through bottlenecks and refining the physique.

It's truly full of endless wonders.

In other words, mastering this Six-winged Poison Bee would also open up a financial avenue.

Thinking of this, Jiang Fan didn't hesitate to inform Su Weiwei about it.

"Husband, you actually found the Ancient Strange Insect—the Six-winged Poison Bee?"

Hearing this, Su Weiwei widened her beautiful eyes, filled with delight.

After all, as a Beast Cultivator, she knows that a top Spirit Beast almost determines the future of a Beast Cultivator.
