Chapter 170: Sixth-Grade Opportunity, Acquiring Cyan Lotus Earth Fire_2

Once a great battle breaks out, its reasons naturally become exposed.

The wars between Cultivation Sects are mostly over grudges or the struggle for benefits.

A Crimson Flame Iron Ore Vein coupled with a Spirit Stone Ore Vein is indeed enough to incite a major conflict among Golden Core Sects.

If any Golden Core Sect were to acquire these two ore veins, they wouldn't have to worry about financial income for centuries.

So no cultivator would be willing to give them up.

"If that's the case, what will happen to Cyan Forest Market?"

Fan Wei asked worriedly.

After all, a Cultivation Market is extremely important for Loose Cultivators.

Even if residing in the market's shantytown meant being exploited by the Great Sun Sword Sect.

The problem is, without the market, they wouldn't be able to purchase Spirit Rice, Elixir, Talisman, Magical Artifacts, and other cultivation resources, which is a major blow to them.

Moreover, with the market's protection, many Loose Cultivators could gather together to jointly fend off demons at night.

If the market is gone, numerous Loose Cultivators may face the danger of demons.

They may not survive in the Ten Thousand Beasts Mountain Range.

"Not sure, but anyhow, after Cyan Forest Market was breached, people from the Five Elements Pill Sect ran off long ago."

"Cyan Forest Market has already turned into ruins."

"It's said that the Great Sun Sword Sect still wants to rebuild Cyan Forest Market."

"But at least they'd have to wait until the war between the Great Sun Sword Sect and the Five Elements Pill Sect ends."

"Who knows when the war between the two Golden Core Sects will end."

Many Loose Cultivators said helplessly.

Their home, gone just like that, leaving them powerless.

As Loose Cultivators, facing the war of Golden Core Sects, they are too powerless.

"Cyan Forest Market just disappeared like that?"

Listening to this, Jiang Fan felt heavy-hearted.

After losing Cyan Forest Market, he lost a channel through which he could acquire cultivation resources.

Without the help of Elixirs, Spirit Medicines, and other resources, it's difficult to quickly improve cultivation.

He can only rely on daily arduous training.

This will greatly reduce cultivation efficiency.

But there's no other way, since the Great Sun Sword Sect and the Five Elements Pill Sect have fought over cultivation resources.

These weak Loose Cultivators can only drift along with the tide.

"What do you plan to do next?"

Fan Wei couldn't help asking.

"Originally, we thought about going to live in another market."

"After all, given the vastness of the Ten Thousand Beasts Mountain Range, Cyan Forest Market isn't the only one."

"Through years of development, there are at least a hundred Cultivation Markets in the Ten Thousand Beasts Mountain Range."

"The problem is, the nearest market to us is at least several thousand kilometers away."

"Such a distance is really too long."

"And it's within the Ten Thousand Beasts Mountain Range where demon beasts and demons run rampant."

"With our strength, we simply cannot traverse thousands of kilometers across the Ten Thousand Beasts Mountain Range."

"Because of this, we still plan to stay and build a temporary settlement."

"We just hope the war between the two Golden Core Sects ends soon, so Cyan Forest Market can be rebuilt."

Many Loose Cultivators discussed.

They naturally want to live in other Cultivation Markets.

But the distance is too far.

The journey is fraught with dangers.

Based on Qi Cultivation Stage, it's really impossible to handle the numerous dangers en route.

Perhaps halfway through, they'll face total annihilation.

So instead of risking dying halfway, it's better to stay here and continue living.

At least they're quite familiar with the surrounding environment.

They know where is dangerous and where is safe.

If the war between the two Golden Core Sects ends, Cyan Forest Market can be rebuilt.

"So, where are you planning to live?"

Jiang Fan asked.

"We feel the valley where the two of you live is suitable."

"The spot is secluded and has a water source."

"Therefore, we're also planning to build wooden houses nearby as a temporary settlement."

"Moreover, if many Loose Cultivators gather, they can jointly fend off dangers."

"Hopefully, Fellow Daoists won't mind."

This group of Loose Cultivators has already decided to build wooden houses in this valley.

After all, such settlements are quite rare.

"Of course we won't mind."

"Fellow Daoists willing to reside here is beneficial for us too."

"After all, everyone can support each other and jointly fend off demons and demon beasts."

Fan Wei said generously.

Although Loose Cultivators are mixed, unclear how they behave, given the current situation, gathering Loose Cultivators together is the most appropriate choice.

Gathering a large number of Loose Cultivators at least can counter the ubiquitous demons and demon beasts in the Ten Thousand Beasts Mountain Range.

If encountering dangers, they wouldn't have to face them alone.

More importantly, he can't refuse the requests of these Loose Cultivators.

So he could only agree reluctantly.

"Thank you, Fellow Daoist Fan."

"We're probably going to reside here for some time."

Many Loose Cultivators smiled slightly.

...

In the dead of night.

Jiang Fan silently left the valley.

Following the direction indicated by the Sixth-Grade Opportunity, it wasn't long before he unleashed the power of the Light Body Talisman and quickly arrived at an unnamed mountain and entered a cave inside.

After entering the cave, he proceeded forward and finally reached its deepest part.

Boom~~

At this moment, at the cave's depths, a cluster of blue flames was fiercely burning.

Its appearance was like a cyan lotus.

It emanated a faint cyan light.

Under the cover of the cyan flame, one's heart demons seemed to vanish, achieving mental clarity and peacefulness.

As if all worries were eliminated entirely.

"Wait, is this the Cyan Lotus Earth Fire?"

Seeing this cluster of cyan flames, Jiang Fan's pupils contracted.

Although he knew that a Sixth-Grade Opportunity was certainly extraordinary, he never imagined he would encounter the Cyan Lotus Earth Fire in this cave.

It's important to know, Cyan Lotus Earth Fire is one of many Anomalous Fires in the Cultivation Realm.

This fire's power is unfathomable, with immense destructive capabilities.

Once it erupts, it's akin to an earthquake, akin to a volcanic eruption.

Not only that, it is also an Anomalous Fire that assists in cultivation.

If one can fully control and subdue it, they can use the Cyan Lotus Earth Fire to clear their heart demons, enhancing their comprehension, which is incredibly profound.

This is absolutely one of the Anomalous Fires that many Alchemists desire most.

Countless Alchemists want to find an Anomalous Fire but are helpless.

But unexpectedly, he found it.

Even if not used, just preserving this Anomalous Fire and selling it would fetch an unimaginable price.

"Normally, for a Talisman Master, Anomalous Fires aren't very useful."

"But this excludes Talisman Masters of the Primordial Talisman Sect."

"Especially for Talisman Cultivators who cultivate the Mixed Element Talisman Scripture, Anomalous Fires are Heaven and Earth's Wondrous Treasures."

"If this cluster of Cyan Lotus Earth Fire can be integrated into the Fireball Talisman, its power will enhance tenfold, even several dozen times."

Jiang Fan clenched his fists, feeling exceedingly excited.

To him, this is absolutely an unimaginable opportunity.

The fire power contained in the previous Fireball Talisman was merely ordinary Flame Spiritual Power.

Although quite powerful, facing stronger foes, that would not suffice.

But if integrated with Cyan Lotus Earth Fire, it would be completely different.

The Fireball Talisman's power would see a huge increase.

At that time, unleashing the Fireball Talisman's power would be unleashing the Cyan Lotus Earth Fire's might.

This would enhance the Fireball Talisman's power tenfold at least.

Simultaneously, it could lead to the Fireball Talisman's evolution.

"Enhancing the Life Talisman's power involves improving cultivation, increasing skill level."

"There is also a third way; that is, by integrating various wondrous things from Heaven and Earth."

"If the Fireball Talisman integrates Cyan Lotus Earth Fire, it will no longer be a Lower-grade Talisman."

"It might even evolve into a Tier Two Talisman or Tier Three Talisman."

"Its power can amplify endlessly."

Jiang Fan's eyes glowed with excitement.

Thinking of this, he stepped forward without hesitation and activated the power of Mixed Element Talisman Scripture.

Instantly, the Primordial Talisman within his Elixir Field and Sea of Qi emerged.

This was a spherical talisman, rotating like a planet.

In the next moment, it generated immense attraction, akin to a black hole.

Boom~~

In an instant, this thread of Cyan Lotus Earth Fire was devoured by the Primordial Talisman, becoming part of it.

At this moment, the Fireball Talisman's power saw a remarkable increase.

The symbol patterns of the once simple Fireball Talisman now displayed numerous cyan talisman symbols.

Thus made the Fireball Talisman far more complex.

Perhaps this was no longer a Fireball Talisman, but a Cyan Lotus Earth Fire Talisman.
