Chapter 177: The War is Over, Rebuilding Cyan Forest Market

Two months later.

As the war between the Great Sun Sword Sect and the Five Elements Pill Sect intensified, the Nameless Valley, on the other hand, gathered more and more loose cultivators, with numbers exceeding a thousand people.

After all, every other place was engulfed in war.

A slight lack of caution could lead one into the war between the two Golden Core Sects, thereby leading to untimely death.

On the contrary, by hiding here, one could avoid the aftermath of the war.

As a result, the Nameless Valley became more lively.

It was just like a former slum area.

It even spontaneously formed a marketplace for the loose cultivators.

Some people sold spirit rice, others sold talismans, elixirs, magical artifacts, and so on.

In short, the Nameless Valley became increasingly bustling.

Although occasionally conflicts would arise between loose cultivators, leading to robberies and murders,

But overall, it was not a major issue.

It was also considered a paradise for loose cultivators, free from the exploitation of the Golden Core Sects.

At this moment, in a secret cave somewhere.

This was also the place where Jiang Fan usually practiced his Life Talisman.

As far as the Ten Thousand Beasts Mountain Range was concerned, similar caves were countless and not particularly difficult to find.

"Finally, I've raised the skill level of the Light Body Talisman to the Great Success Realm."

Jiang Fan smiled slightly.

With a thought, he activated the power of the Light Body Talisman, and his entire body seemed to be enveloped in an air current.

At this moment, his body slowly rose into midair.

Undoubtedly, this was the symbol of the Great Success Realm of the Light Body Talisman—facing the wind.

You must know, ordinary cultivators can only fly after advancing to become Foundation Establishment cultivators.

Soaring above the sky.

This is the symbol of a Foundation Establishment cultivator.

But now, the Great Success Realm of the Light Body Talisman could achieve an effect similar to that of a Foundation Establishment cultivator.

Of course, it naturally couldn't match the ease and freedom of a Foundation Establishment cultivator.

It merely allowed Jiang Fan's body to float in midair.

Nevertheless, this was already quite remarkable.

Especially with the help of the air currents, his speed had significantly improved compared to before.

Obviously, the Great Success Realm of the Light Body Talisman provided substantial assistance to him.

If it could be enhanced to the Perfection Level, then the power of the Light Body Talisman could allow him to travel with the wind.

At that time, even a Foundation Establishment cultivator would only achieve the same.

"But it's not just the Light Body Talisman that has been elevated to the Great Success Realm."

"The Conceal Breath Talisman, Golden Light Talisman, Body-Stabilizing Talisman, and Protective Talisman have all reached the Great Success Realm."

Jiang Fan narrowed his eyes.

The reason for the rapid advancement of his Life Talisman's skill level was undoubtedly due to the consumption of Luck Points.

He spent a total of three thousand Luck Points.

Only then could his Life Talisman rapidly improve.

Otherwise, it was uncertain how long it would take for him to increase his Life Talisman's skill level.

But regardless, it was all worth it.

"The abilities of the Great Success Realm Conceal Breath Talisman are even more amazing."

"If the Mastery Level Conceal Breath Talisman could achieve seamless integration, leaving no trace,"

"Then the Great Success Realm Conceal Breath Talisman could reduce one's sense of presence."

"In other words, even if standing in front of others, they wouldn't notice your existence."

"They might even naturally ignore you."

Jiang Fan had experimented with the Great Success Realm Conceal Breath Talisman before, walking through the marketplace of loose cultivators, yet not a single one noticed his presence, as if he were invisible.

Even if others used their spiritual sense to probe, they would naturally overlook his existence.

As if he were a part of nature.

Undoubtedly, such an ability was exceptionally powerful and useful.

Especially in the wild, when encountering demon beasts and demons, if the power of the Conceal Breath Talisman was used, enemies would ignore him and pass by, thereby avoiding danger.

If it could advance to the Perfection Level, the ability would be even more terrifying.

By then, it could merge with nature.

Even existences more powerful than himself would find it difficult to detect his tracks.

"However, the Great Success Level Protective Talisman isn't simple either."

"If the Mastery Level Protective Talisman could form a spiritual energy shield covering the whole body,"

"Then the Great Success Level Protective Talisman could form a triple-layer spiritual energy shield."

"In this way, defense is increased many times over."

"Even if an enemy could break through one layer of the spiritual energy shield, breaking two or three layers wouldn't be so simple."

With a thought, Jiang Fan activated the power of the Protective Talisman on himself.

Immediately, three layers of primordial spiritual energy shields appeared around his body.

His whole body was enveloped in spiritual energy shields.

Tightly sealed, without any vulnerabilities.

He felt that even a deadly blow from a late-stage Qi Cultivation cultivator couldn't break through his triple-layer spiritual energy shield.

Undoubtedly, if it were cultivated to the Perfection Level, it could then form a nine-layer spiritual energy shield.

By that time, it would be an invincible defense during the Qi Cultivation Stage.

Even an early-stage Foundation Establishment cultivator would likely need to expend considerable effort to breach a nine-layer spiritual energy shield.

Now he felt like he was carrying a turtle shell.

His sense of security enhanced greatly.

Moreover, the power of the Great Success Realm Golden Light Talisman is also quite terrifying.

The destructive power and attack strength need not be mentioned, akin to the Sword Qi on a sword cultivator.

More importantly, this talisman could simultaneously unleash nine rays of golden light.

Previously, the Mastery Level Golden Light Talisman could only unleash a single golden light at once.

Now, being able to unleash nine rays of golden light at once allows him to fight many foes at the same time.
